Prince of Wales, in England, a title given to the eldest son of the sovereign and heir apparent to the throne. The title is created in every case, and not hereditary. Edward II. was the first to hold it.—**Prince of Wales's feathers.** See *feather*.—**Prince President,** a title given to Prince Louis Napoleon while he was president of the French republic, 1848–52.—**Prince royal,** the eldest son of a king or queen; the heir apparent.—**Prince Rupert's drop.** Same as *detonating bulb* (which see, under *detonating*).—**Prince's metal,** mixture, etc. See *metal*, etc.—**The prince of darkness.** See *darkness*.—*Syn.* 1–4. *Princes, King, Sovereign, Monarch, Emperor.* *Prince* has a narrow and a broad meaning. It may indicate a son of the sovereign, or the grade of prescriptive rank next to that of the sovereign, or it may be a general word for king, etc., as often in Shakespeare. A country not large enough to be ruled by a king may be ruled by a prince, as some of the states of Germany, and Montenegro. *Sovereign* is an impressive but somewhat general term, being applicable to a king or an emperor, and expressing a high degree of power and dignity. *Monarch* expresses the fact of ruling alone, and therefore is generally, though not necessarily, applied to one ruling autocratically and with splendid state, with similar figurative use. *Emperor* is sometimes affected, as a grander word than king, and seems to express more of absolute rule, but there have been kings of all degrees of absolutism and grandeur. Historically, emperor is especially associated with military command.

prince (prin's), *v. t.*; pret. and pp. *princied*, ppr. *princing*. [*< prince, n.*] To play the prince; put on a stately arrogance: with a complementary *it*.

George Eliot, Daniel Deronda, xxxiii.

2. A governor or presiding officer; one who is chief in authority. Specifically, the head of an institution of learning: a title used (a) in colleges or universities in Scotland, Canada, and other parts of the British empire; (b) in certain colleges (Braenose, Jesus, etc.) and halls at Oxford; (c) in the public and in many private secondary schools in the United States; (d) in certain higher institutions of learning in the British empire.

3. In law: (a) A person who, being *sui juris*, and competent to do an act on his own account, employs another person to do it; the person from whom an agent's authority is derived. Compare *master*¹, 2.

The agent simply undertakes to execute a commission in the market; in that market he acts as though he were the *principal*.

Nineteenth Century, XXVI. 845.

(b) A person for whom another becomes surety; one who is liable for a debt in the first instance. (c) In testamentary and administration law, the corpus or capital of the estate, in contradistinction to the income. Thus, under a gift of the income of stock to A for life, and on A's death the stock to B, it is often a contested question whether a stock dividend, as distinguished from a money dividend, is income or *principal*. (d) In criminal law, the actor in the commission of a crime; a person concerned in the commission of a crime, whether he directly commits the act constituting the offense or instigates or aids and abets in its commission. A *principal* in the first degree is the absolute perpetrator of the act which constitutes the crime, whether he does it with his own hand or by the hand of an innocent third person, the third person being ignorant of the character of the act perpetrated. A *principal* in the second degree is a person who, without actually participating in the act itself, is present, aiding and encouraging the person who commits the act. See *accessory*.

And before the coroner of Coventry, up on the syth of the bodies, ther ben editied, as *pryncipall* for the deeth of Richard Stafford, Syr Robert Harcourt and the ij. men that ben dede.

Spenser, F. Q., V. xi. 2.

2. Cause, in the widest sense; that by which anything is in any way ultimately determined or regulated.

The Stoics could not but think that the fiery *principle* would wear out all the rest, and at last make an end of the world.

Sir T. Browne, To a Friend.

What deep joy fills the mind of the philosopher when, throughout apparently inextricable confusion, he can trace some great *Principle* that governs all events, and that they all show forth.

Channing, Perfect Life, p. 102.

Without entering on the various meanings of the term *Principle*, which Aristotle defines, in general, that from whence anything exists, is produced, or is known, it is sufficient to say that it is always used for that on which something else depends; and thus both for an original law and for an original element. In the former case it is a regulative, in the latter a constitutive, *principle*.

Sir W. Hamilton, Reid, Note A, § 5, Supplementary [Dissertations].

It is only by a very careful observation . . . that we are able from the singular and concrete operations to enunciate precisely the general law which is the expression of the regulative *principle*.

McCosh, Locke's Theory, p. 5.

3. An original faculty or endowment of the mind: as, the *principle* of observation and comparison.

Under this title are comprehended all those active *principles* whose direct and ultimate object is the communication either of enjoyment or of suffering to any of our fellow-creatures.

J. Sully, Outlines of Psychol., p. 555.

4. A truth which is evident and general; a truth comprehending many subordinate truths; a law on which others are founded, or from which others are derived: as, the *principles* of morality, of equity, of government, etc. In mathematical physics a *principle* commonly means a very widely useful theorem.

How doth Aristotle define *principles*? In this manner: *principles* be true propositions, having credit of themselves, and need no other proofs.

Brundeville, Logic (1619), vi. 18.

Doctrines . . . laid down for foundations of any science . . . [are] called *principles*.

Locke, Human Understanding, IV. xii. 1.

When a man attempts to combat the *principle* of utility, it is with reasons drawn, without his being aware of it, from that very *principle* itself.

Bentham, Introd. to Morals and Legislation, I. 13.

Many traces of this ancient theory (regarding the English common law as existing somewhere in the form of a symmetrical body of express rules, adjusted to definite *principles*) remain in the language of our judgments and forensic arguments, and among them we may perhaps

place the singular use of the word *principle* in the sense of a legal proposition elicited from the precedents by comparison and induction.

Maine, Village Communities, p. 385.

5. That which is professed or accepted as a law of action or a rule of conduct; one of the fundamental doctrines or tenets of a system: as, the *principles* of the Stoics or of the Epicureans; hence, a right rule of conduct; in general, equity; uprightness: as, a man of *principle*.

If I had a thousand sons, the first humane *principle* I would teach them should be to forswear thin potatoes.

Shak., 2 Hen. IV., iv. 8. 183.

They dissolved themselves and turned Seekers, keeping that one *principle*, That every one should have liberty to worship God according to the light of their own consciences. *N. Norton, New England's Memorial*, p. 154.

In all governments truly republican, men are nothing—*principle* is everything.

D. Webster, Speech at Salem, Mass., Aug. 7, 1834.

The party whose *principles* afforded him [James II.] no guarantee would be attached to him by interest. The party whose interests he attacked would be restrained from insurrection by *principle*. *Macaulay, Hist. Eng.*, vii.

The man of *principle*—that is, the man who, without any flourish of trumpets, titles of lordship, or train of guards, without any notice of his action abroad, expecting none, takes in solitude the right step uniformly, on his private choice, and disdaining consequences—does not yield, in my imagination, to any man.

Emerson, War.

6. In *chem.*: (a) A component part; an element: as, the constituent *principles* of bodies. (b) A substance on the presence of which certain qualities, common to a number of bodies, depend. See *proximate principles*, under *proximate*.

Confinement to a single alimentary *principle*, or to any one class of them alone, is sure to be followed by disease. *Huxley and Yemmans, Physiol.*, § 429.

7. In *patent law*, a law of nature, or a general property of matter, a rule of abstract science. *George Ticknor Curtis*. A principle is not patentable, although a process for utilizing a principle may be. Compare *process*.

It is very difficult to distinguish it [the specification of the hot-blast furnace for throwing hot air into a furnace instead of coal, thereby increasing the intensity of the heat] from the specification of a patent for a *principle*, and this at first created in the minds of the court much difficulty; but, after full consideration, we think that the plaintiff does not merely claim a *principle*, but a machine embodying a *principle*, and a very valuable one. We think the case must be considered as if, the *principle* being well known, the plaintiff had first invented a mode of applying it by a mechanical apparatus to furnaces, and his invention then consists in this—by interposing a receptacle for heated air between the blowing apparatus and the furnace. *Baron Parke, 3 Meeson & W.*, 306.

A principle of human nature, a law of action in human beings; a constitutional propensity common to the human species.—**Archimedean principle**. See *Archimedean*.—**Atter principles**, commutative principle, constitutive principles. See the adjectives.—**Carnot's principle**, a highly important principle of the theory of heat—namely, that the work done by an engine is proportional to the amount of heat used multiplied into the fall of temperature of that heat in the action of the engine. In the mechanical theory of heat, this principle is transformed into the second law of thermodynamics. It was discovered in 1824 by Sadi Carnot (1796–1832), son of the great war-minister Carnot.—**D'Alembert's principle**, an important principle of mechanics, to the effect that the forces impressed upon a mechanical system may be resolved into forces balancing one another perpendicular to the motions of the particles and of forces whose direct effects would be to make the particles move as they do move.—**Declination of principles**. See *declination*.—**Dirichlet's or Dirichletian principle**, a certain important proposition concerning the equation

$$\frac{\partial^2 P}{\partial x^2} + \frac{\partial^2 P}{\partial y^2} = 0.$$

Distributive principle. See *distributive*.—**Döppler's principle**, in *acoustics*, the phenomenon that, when a sound-body is rapidly approaching the ear, the pitch of the sound is raised, because more sound-waves reach the ear per second, and conversely if the sounding body recedes. This principle is also applied in optics, and the rapidity of relative approach or recession of the earth and some of the fixed stars has been deduced from it, by the change in the character of the light (as to wave-length), as shown by the spectroscope.—**Extractive principle**. Same as *extract*.—**First principle**, one of the most general principles, not deducible from others.—**Fruitful principle**. See *fruitful*.—**General principle**. See *general*.—**Helmholtz's principle**, the proposition (enounced by Helmholtz, a German physicist, born 1821) that if any source of light or of sound situated at any point will by the intervention of any system of reflectors or lenses produce any given intensity of illumination or of sound at any second point, then the same source being placed at the second point would produce the same intensity of radiation at the first point.—**Heterogeneous principle**, **heteronymous principles**, **immanent principle**. See the adjectives.—**Huygens's principle**, the proposition (enounced by Christian Huygens in 1678) that any disturbance due to waves in any part of a medium at any instant is that due to the superposition of all the disturbances reaching it at that instant from the neighboring parts of the medium.—**Hypostatic principle**, a chemical element.—**Material principle**. See *material*.—**Organic principles**. Same as *proximate principles* (which see, under *proximate*).—**Principle of**

areas, in *dynam.*, the proposition that, if all the external forces acting upon a moving system are directed toward an axis, the rotation-area for that axis will be described with a uniform motion.—**Principle of causality**. See *law of causation*, under *causation*.—**Principle of certainty**, of *coincidence*. See *certainty*, *coincidence*.—**Principle of conservation of number**, in *geom.*, the proposition that, if there is a finite number of figures of a given general description subject to certain conditions, then this number remains, if finite, of the same value, however the general description be specialized. For example, if we wish to know how many lines can cut four given lines, we take four special lines, say two cutting one another and two others cutting one another. Then there are evidently just two lines—namely the one through the two points of intersection and the one common to the planes of the two pairs—which cut all the four lines; and consequently the same will be true in all cases where the number remains finite.—**Principle of contradiction**. See *contradiction*.—**Principle of correspondence**, in *geom.*, the principle that, if the points on a line have an $m + n$ correspondence with one another, there are $m + n$ points which correspond to themselves. There is also an extension to the plane.—**Principle of duality**, of *homogeneity*, of *identity*. See *duality*, etc.—**Principle of least action**, of *least constraint*. See *action*, *constraint*.—**Principle of similitude**, in *dynam.*, proposition 32 of section 7 of the Second Book of Newton's "Principia," namely that, if two systems are geometrically similar, and have their corresponding masses proportional, and begin to move in the same way, in proportional times, they will continue to move in the same way, provided the forces are proportional to the masses and the linear dimensions, and are inversely as the squares of the times.—**Principle of sufficient reason**. See *reason*.—**Principle of the arithmetical mean**, the proposition that the mean of different results of direct observation of a quantity is the best way of combining them.—**Principle of the composition of rotations**. See *rotation*.—**Principle of the inclined plane**, in *mech.*, same as *principle of the parallelogram of forces* (which see, under *force*).—**Principle of the last multiplier**, a certain principle used in the solution of dynamical equations.—**Principle of the lever**, in *mech.*, same as *Archimedean principle* (a) (which see, under *Archimedean*).—**Principle of the parallelogram of forces**. See *force*.—**Principle of translation**, in *math.*, the theorem that all the invariative properties of a ternary form can be represented by the vanishing of invariants and the identical vanishing of covariants, contravariants, or mixed forms.—**Principle of virtual velocities**. See *velocity*.—**Reductive, regulative, etc., principle**. See the adjectives.—**Short-haul principle**, the principle that the charge for carrying freight should not be higher for a shorter than for a longer distance. See *long haul*, under *long*.—**The currency principle**. See *currency*.—**The principle of excluded middle or third**.—**Transcendental principle**. See *transcendental*.—**Syn. S. Principle, Rule, Precept**. "There are no two words in the English language used so confusedly one for the other as the words *rule* and *principle*. . . . You can make a *rule*; you cannot make a *principle*; you can lay down a *rule*; you cannot, properly speaking, lay down a *principle*. It is laid down for you. You can establish a *rule*; you cannot, properly speaking, establish a *principle*. You can only declare it. *Rules* are within your power, *principles* are not. Yet the mass of mankind use the words as if they had exactly similar meanings, and choose one or the other as may best suit the rhythm of the sentence." (*Helps*). A *principle* lies back of both *rules* and *precepts*; it is a general truth, needing interpretation and application to particular cases. From a *principle* we may deduce *rules* that we lay imperatively upon ourselves or upon others who are under our authority, and *precepts* that we lay upon those who look to us for instruction. It is a *principle* that "the Sabbath was made for man"; details as to the observance of the Sabbath would be not *principles*, but *rules*, *maxims*, or *precepts*. See *apophism*.

Christianity is a spirit, not a law; it is a set of *principles*, not a set of *rules*. . . . Christianity consists of *principles*, but the application of those *principles* is left to every man's individual conscience.

F. W. Robertson, Sermons, Marriage and Celibacy.

Nations pay little regard to *rules* and *maxims* calculated in their very nature to run counter to the necessities of society. *A. Hamilton, The Federalist*, No. 25.

Teachers best

Of moral prudence, with delight received

In brief sentences *precepts*, while they treat

Of fate, and chance, and change in human life.

Milton, P. R., iv. 264.

principle (prin'si-pl), *v. t.*; pret. and pp. *principled*, ppr. *principling*. [*principle*, *n.*] To establish or fix in certain principles; impress with any tenet or belief, whether good or ill: used chiefly in the past participle.

Well did thir Disciples manifest themselves to bee no better *principled* than thir Teachers. *Milton, Hist. Eng.*, iii.

All parliament so *principled* will sink

All ancient schools of empire in disgrace.

Young, On Public Affairs.

We replied, we hoped he would distinguish and make a difference between the guilty and the innocent, and between those who were *principled* for fighting and those who were *principled* against it, which we were, and had been always known to be so.

T. Eliwood, Life (ed. Howells), p. 263.

princecock (pring'kok), *n.* [Also *princecock*, *primecock*, etc.; < *prim*, *prime*, + *cock*.] A coxcomb; a conceited person.

Your proud university *princecock* thinks he is a man of such merit the world cannot sufficiently endow him with preferment.

Returne from Parnassus, iii. 2.

A cavalier of the first feather, a *princecock*, . . . all to be frenchified in his souldier's sute.

Nashe, Pierce Penilesse, p. 52.

And thou, yong *Princecock*, Puppet as thou art, Shalt play no longer thy proud Kingling's Part Vpon so rich a stage.

Syluester, tr. of Du Bartas's Weeks, ii., The Decay.

princeod (prin'kod), *n.* [*princ* + *cod*.] A pincushion; figuratively, a short thick-set woman. *Halliwel*. [Prov. Eng.]

princum (pring'kum), *n.* [An arbitrary var. of *prink*, simulating a L. form. Cf. *prinkum-prankum*.] A scruple; a nice or affected notion.

My behaviour may not yoke

With the nice *princums* of that folk.

D'Urfey, Colin's Walk, i. (Davies.)

prine (prin), *n.* [Cf. *prin*.] Same as *pick*, 5. **pringle** (pring'gl), *n.* A small silver coin, of about the value of a penny, formerly current in Scotland and in the northern parts of England. *Halliwel*.

Pringlea (pring'glé-á), *n.* [NL. (J. D. Hooker, 1847), named after Sir John Pringle (1707–82), a British physician and natural philosopher.] A genus of plants of the order *Cruciferae* and tribe *Alyssineae*, characterized by its fruit, an oblong one-celled silicle, containing very many cordate seeds with their outer coat prolonged into a short beak, and by its growth from a thick rootstock with ample and compactly imbricated leaves. The only species, *P. antiscorbutica*, is a cabbage-like plant of Kerguelen Land, valuable as a preventive of scurvy. The thick round rootstock lies on the ground for 3 or 4 feet, and bears a single large ball of leaves which are loose and green outside, and form a dense white mass within. The flower-stalk grows out from below the head of leaves, and reaches 2 or 3 feet in height. An essential oil pervading the plant gives it a taste resembling a combination of mustard and cress.

Prinia (prin'i-á), *n.* [NL. (Horsfield, 1820), < Javanese *prinya*, a native name.] A genus of grass-warblers or *Cisticolæ*, having a graduated tail of only ten rectrices and a long stout bill. The numerous species range through the Ethiopian and Indian regions. *P. familiaris* of Java and Sumatra is the type. Also called *Daeocharis* and *Drymopsis*.

prink¹ (pringk), *v. i.* [*ME*. "prinken, preynken; origin obscure.] To look; gaze. [Prov. Eng.]

Thanne Conscience curtelliche a contenance he made, And preyns vpon Pacience to prele me to be stille.

Piers Plowman (B), xiii. 112.

prink² (pringk), *v.* [A weaker form of *prank*, to which it is related as *clink* to *clank*, etc.: see *prank*. Cf. *prick*, *v.*, in like sense.] I. *intrans.* 1. To prank; dress for show; adorn one's self.

Or womans will (perhappes)
Enflame hir haughtie harte
To get more grace by crummes of cost,
And *prink* it out hir parte.

Gascogne, Philomene (ed. Arber), p. 98.

They who *prink*, and pamper the Body, and neglect the Soul are like one who, having a Nightingale in his House, is more fond of the Wicker Cage than of the Bird.

Howell, Letters, iv. 21.

Hold a good wager she was every day longer *prinking* in the glass than you was.

Jane Collier.

2. To strut; put on pompous airs; be pretentious or forward. [Prov. Eng.]

II. *trans.* To deck; adorn; dress ostentatiously or fantastically.

She *prink'd* herself and prinn'd herself,
By the as light of the moon.

The Young Tamlane (Child's Ballads, I. 118).

To gather kingcups in the yellow mead,
And *prink* their hair with daisies.

Cowper, Task, vi. 303.

Ay, prune thy feathers, and *prink* thyself gay.

Scott, Monastery, xiv.

It is . . . a most perilous seduction for a popular poet like Burns to *prink* the unadorned simplicity of his ploughman's Muse with the glittering spangles and curious lace-work of a highly polished literary style.

Prof. Blackie, Lang, and *Lit. of Scottish Highlands*, iii.

prinker (pring'ker), *n.* One who prinks; one who dresses with much care.

prinkle (pring'kl), *v. i.*; pret. and pp. *prinkled*, ppr. *prinkling*. [Appar. a nasalized form of *prickle*.] To tingle or prickle. [Scotch.]

My blude ran *prinklin'* through my veins, . . .

As I beheld my dear, O.

Hogg, Mountain Bard, p. 200. (*Jamieson*.)

prinkle (pring'kl), *n.* The coalfish. [Local, Eng.]

prinkum-prankum (pring'kum-prang'kum), *n.* [A redupl. of *prink*² or *prank*, simulating a L. form. Cf. *princum*.] A kind of dance.

What dance?

No wanton jig, I hope; no dance is lawful

But *Prinkum-Prankum*!

Randolph, Muses Looking-glass, v. 1. (Davies.)

prinpriddle (prin'prid'1), *n.* The long-tailed titmouse, *Acredula rosea*. [Cornwall, Eng.]

print (print), *v.* [*ME*. "printen, prenten, preenten, print (= D. *prenten*, imprint, = MLG. *pre-*

In that Roche is *printed* the forme of his Body.

Manderly, Travels, p. 62.

Think, when we talk of horses, that you see them
Printing their proud hoofs 't the receiving earth.

Shak., *Hen. V.*, I, Prol., l. 27.

The muredred face lies *printed* in the mud.

Sylvestor, tr. of Du Bartas's Weeks, II, The Handy-Crafts.

And *print* on thy soft cheek a parent's kiss.

Byron, *Child Harold*, III, 116.

And hill and wood and field did *print*
The same sweet forms in either mind.

Tennyson, *In Memoriam*, lxxxix.

2. To mark by pressing something upon; leave an imprint upon; as, to *print* butter.

On his fiery steed betimes he rode,
That scarcely *prints* the turf on which he trod.

Dryden, *Fal. and Arc.*, II, 46.

And little footsteps lightly *print* the ground.

Gray, *Elegy* (omitted stanza).

Where olives overhead

Print the blue sky with twig and leaf.

Browning, *Old Pictures in Florence*.

3. To make or form by pressure or impression of any kind; fashion or shape out by stamping, indentation, or delineation in general. [Obsolete or archaic in many applications.]

That god couseth nat the coynge that Crist hym-self
prints.

Piers Plowman (C), xvii, 80.

Ye shall not make any cuttings in your flesh, . . . nor
print any marks upon you.

Lev. xix, 28.

Heaven guide thy pen to *print* thy sorrows plain.

Shak., *Tit. And.*, IV, l. 75.

Do not study

To *print* more wounds (for that were tyranny)

Upon a heart that is pierc'd through already.

Beau. and Fl., *Knight of Malta*, III, 2.

Specifically—4. To stamp by direct pressure, as from the face of types, plates, or blocks covered with ink or pigments; impress with transferred characters or delineations by the exertion of force, as with a press or some other mechanical agency; as, to *print* a ream of paper; to *print* calico; to *print* pottery.

"Ye-ye-yes," sobbed the little boy, rubbing his face very hard with the Beggar's Petition in *printed* calico (a figured cotton handkerchief).

Dickens, *Nicholas Nickleby*, IV.

But as for the cook, and as for that clever and willing lass, Maggie—well, I've bought each o' them a *printed* cotton gown.

W. Black, *In Far Lochaber*, VIII.

5. To copy by pressure; take an impression or impressions from or of. as, to *print* a form of type; to *print* an engraved plate or block; to *print* a pattern on paper, or on calico or some other fabric.—6. To make a copy or copies of by impression; produce by or issue from the press; put into print, as for publication: as, to *print* a book or a newspaper, an essay or a sermon; to *print* a picture.

In books, not authors, curious is my Lord; . . .

These Aldus *printed*, those Du Suel have bound.

Pope, *Moral Essays*, IV, 136.

I . . . sought a Poet, roosted near the skies, . . .

Said nothing like his works was ever *printed*.

Burns, Address spoken by Miss Fontenelle on her Benefit

[Night].

7. To cause to be printed; obtain the printing or publication of; publish.

Some said, "John, *print* it," others said, "Not so."

Some said, "It might do good," others said, "No."

Bunyan, *Pilgrim's Progress*, Apology.

A chiel's amang ye takin' notes,

An' faith, he'll *print* it.

Burns, *Captain Grose's Peregrinations*.

8. To form letters; write.

The highest lesson that man may lere . . .

Is playnly *printed* in Poullis bookes.

Hymns to Virgin (1430) (E. E. T. S.), p. 114.

Loo! sir, this is a perliurys

To *prente* vndir penne. *York Plays*, p. 222.

9. To form by imitation of printed characters; write in the style of print: as, the child has learned to *print* the letters of the alphabet.—10. To record, describe, or characterize in print as.

My safest way were to *print* myself a coward, with a discovery how I came by my credit, and clasp it upon every post.

Beau. and Fl., *King and No King*, III, 2.

Men . . .

Must now be named and *printed* Heretics.

Milton, *Forcers of Conscience*.

11. In *photog.*: (a) To make a positive picture from (a negative) by contact. (b) To produce, as a positive from a negative, by transmitted light, as by the agency of a lens in an enlarging-camera.—*Printed carpet*. See *carpet*.—*Printed china*, *printed crockery*, porcelain or glazed pottery

decorated with transfer-printing.—*Printed goods*, call-coses figured by printing from blocks or rollers.—*Printed ware*, a term applied to porcelain, queen's-ware, etc., decorated with printed designs.

II. *intrans.* 1. To use or practise the art of taking impressions in a press.—2. To produce books or any form of printed work by means of a press; specifically, to publish books or writings.

Like Lee or Budgell, I will rhyme and *print*.

Pope, *Imit. of Horace*, II, l. 100.

3. To form imitations of printed characters; write in the style of print: as, the child can *print*, but has not learned to write yet.

print (print), n. [*<* ME. **print*, *prynt*, *printe*, *prente*, *preynte* (= MD. *print*, D. *prent*, *print* = MLG. *prente* = Dan. *prent*), *<* OF. *preinte*, *prainte*, impression, print, by aphesis from *empreinte*, impression, print: see *imprint*, n. Cf. *print*, v.] 1. A mark made by impression; any line, character, figure, or indentation made by the pressure of one body or thing on another; hence, figuratively, a mark, vestige, or impression of any kind; a stamp.

Your yeen hathe sette the *prynt* which that I feelee

Withynne myne herte.

Political Poems, etc. (ed. Furnivall), p. 69.

Except I shall . . . put my finger into the *print* of the

As when a seal in wax impression makes,

The *print* therein, but not itself, it leaves.

Sir J. Davies, *Immortal. of Soul*, xiii.

Sooner or later I too may passively take the *print*

Of the golden age. *Tennyson*, *Maud*, I.

2. Printed matter for reading; the state of being printed; character or style of printing, or size of the printed letters: as, to put a work into *print*; clear or blurred *print*.

Item, a Boke in *prente* off the Pleye off the [Chess].

Paston Letters, III, 300.

The small Geneva *print* referred to, we apprehend, was the type used in the common copies of the Geneva translation of the Bible.

Cruik.

A literary man—with a wooden leg—and all *print* is

open to him. *Dickens*, *Our Mutual Friend*, I, v.

There has been established such an intimate association between truth and *print* upon paper that much of the reverence given to the one gathers round the other.

H. Spencer, *Prin. of Psychol.*, § 339.

3. An imprint; an edition.

When these two *prints* (there were of them bothe aboute v. thousand bokis *printed*) were al soule more then a twelue moneth agoe (i. e., before February, 1584) Tindale was pricked forth to take the testament in hande to *print* it and correcte it.

George Joy, *Apology to Tyndale* (1535). (*Arber.*)

4. A printed publication, more especially a newspaper or other periodical.

What I have known

Shall be as public as a *print*.

Beau. and Fl., *Philaster*, II, 4.

The *prints*, about three days after, were filled with the same terms.

Addison.

5. A printed picture or design; an impression from engraved wood or metal taken in ink or other colored medium upon paper or any other suitable material.

That Bible, bought by sixpence weekly saved,

Has choicest *prints* by famous hands engraved.

Crabbe, *Works*, I, 33.

Conrad ab Uffenbach, a learned German, recreated his mind, after severe studies, with a collection of *prints* of eminent persons, methodically arranged.

I. D'Israeli, *Curios. of Lit.*, I, 91.

6. Printed calico; a piece or length of cotton cloth stamped with designs: as, striped, black, colored, or figured *prints*.—7. (a) An impression of something having comparatively slight relief, such as to reproduce in reverse all the parts of the original. Hence, by extension—

(b) A cast or impression from such a first impression, which reproduces exactly the original.

—8. A pattern or device produced by stamping, as upon the surface of a piece of plate; hence, apparently by extension, the boss at the bottom of mazers and other vessels of the middle ages or later times, upon which are engraved or otherwise represented the arms of the owner or donor, or some other device.—9. Something bearing a figure or design to be impressed by stamping; a figured stamp: as, a butter-*print*. Specifically—(a) A mold for coin. *Hallivell*. (b) In *iron-working*, a swage; a mold sunk in metal from which an impression is taken.

10. In *photog.*, a positive picture made from a negative.—*Cotton prints*. See *cotton*.—*In print*. (a) In a printed form; issued from the press; published; also, in a printed and published work.

I love a ballad in *print* o' life, for then we are sure they are true.

Shak., *W. T.*, IV, 4, 284.

Margaret Fuller, less attractive in *print* than in conversation, did her part as a contributor as well as editor.

O. W. Holmes, *Emerson*, v.

(b) In stock: said of a book of which copies can be had of the publisher. Compare *out of print*. (c) In a formal method; with exactness; in a precise and perfect manner; to perfection.

P. Jun. Fits my ruff well?

Lin. In print.

B. Jonson, *Staple of News*, I, 1.

He must speak in *print*, walk in *print*, eat and drink in *print*.

Burton, *Anat. of Mel.*, p. 539. (*Latham.*)

Jeypore print, a square of cotton cloth printed with an elaborate design in colors from small separate blocks. These squares are used as hangings and also for garments; they are of different sizes, sometimes as much as 8 or 9 feet square.—*Mezzotint print*, in *photog.* See *mezzotint*.—*Out of print*, no longer in stock: said of a book of which copies can no longer be supplied by its publisher.—*Solar print*. See *solar*.

print (print), a. [*<* *print*, n.] Clear and bright. *Hallivell*. [*Prov. Eng.*]

print-broker (print'brō'kēr), n. A broker in printed goods or figured calico. [*Local, Eng.*]

These are the *print-brokers*, who sell "gown-pieces" to the hawkers or street-traders.

Mayhew, *London Labour and London Poor*, I, 414.

print-cloth (print'klōth), n. Cotton cloth woven and finished suitably for printing.

Cloth of the kind called *print-cloth*, . . . which when printed becomes calico. *Pop. Sci. Mo.*, XXVIII, 480.

print-cutter (print'kut'ēr), n. A plain or a mechanical knife, such as a small knife-edged wheel mounted in a handle, for cutting photographic prints to shape and size. The prints are usually cut on a piece of glass, by means of a rule or a caliber of glass of the required size.

printer (prin'tēr), n. 1. One who prints, impresses, or stamps by impression; a person whose business it is to produce copies or superficial transfers of anything by pressure, as in a press or the like, or by the agency of light on a sensitized surface, as in photography: usually distinguished, when not specific (def. 2), by an adjunct: as, a lithographic *printer*; a plate-*printer*; a calico-*printer*.—2. A person who practises or carries on the business of typographical printing; one who understands the mechanical process of producing printed matter for reading; specifically, as used of workmen, a compositor, or one who manipulates the types.—3. One who sells what he prints or procures the printing of; hence, a publisher of books or of a periodical. The early printers were generally also publishers, producing works on their own account; and the word *printer* long retained this extended meaning. Thus, most of the letters of Junius were addressed "To the *Printer* of the Public Advertiser"—the printer, Woodfall, being its proprietor, editor, and publisher. [Now nearly obsolete.]

Learning hath gained most by those books by which the *printers* have lost. *Fuller*, *Books*.

4. A telegraphic instrument which makes records in printed characters; a telegraphic printing instrument.

Edison's various devices in his old stock *printer* have formed the basis of all later variations on that sort of instrument.

Harper's Mag., LXXX, 452.

Mechanical printer, a type-writer.—*Motor printer*. See *motor*.—*Printers' Bible* a Bible printed prior to 1702, mentioned by Cotton Mather as containing the word *printers* in place of *princes* in Ps. cxix, 161: "Printers have persecuted me without a cause."—*Printer's devil*. See *devil*.—*Printer's flower*, an ornamental design at the end of a printed book; a tail-piece.—*Printer's imprint*. See *imprint*.—2.—*Printers' ink*. See *printing-ink*.—*Printer's mark*, an engraved device, sometimes a monogram or a rebus, used by printers as a trade-mark.—*Printers' ream*, or *printing ream*, the ordinary ream of 480 sheets, to which 1½ quires are added as an allowance for waste in printing, making 516 sheets: sometimes, but improperly, called a *perfect ream*. [*Eng.*]—*Printers' roller*. See *inking-roller*.—*Printers' varnish*, a varnish made of nut- or linseed-oil, black resin, and dry brown soap.—*Public printer*, an official of the United States government who has charge of the government printing-office at Washington. = *Syn. Compositor, Printer*. Before the introduction of power-presses both pressmen and compositors were called *printers*; but these classes are now nearly always distinct, and the term *printer* more especially, but less appropriately, designates the latter.

printery (prin'tēr-ī), n.; pl. *printeries* (-iz). [*<* *print* + *-ery*.] 1. An establishment for the printing of calico or the like.—2. A printing-office. [*Rare.*]

print-field (print'fēld), n. A print-works; an establishment for printing and bleaching calicoes.

print-holder (print'hōl'dēr), n. 1. A small frame, standing like an easel by means of a support at the back, used to hold a photograph or an engraving.—2. In *photog.*, any device for holding a print flat, or in a desired position.

printing (prin'ting), n. [*Verbal n. of print*, v.] 1. In general, the art or process of making copies or superficial transfers by impression; the reproduction of designs, characters, etc., on an impressible surface by means of an ink or a pig-

ment (generally oily) applied to the solid surface on which they are engraved or otherwise formed. This sense is used specifically in typography of the actual taking of impressions by the operation of a press; in other uses, it is generally accompanied by some descriptive term; and in typography itself different methods are discriminated, as type, letterpress, or stereotype printing, color-printing, etc. Type or stereotype printing is done from a surface in high relief; lithographic printing, from the surface of a flat stone; copper-plate printing, from inked lines engraved below the surface of a flat plate of copper or steel. The art of printing with ink from blocks of wood was practised in China at an early undetermined date. Silk and linen fabrics were printed from engraved hand-stamps in Europe in the twelfth century; playing-cards and prints of images were impressed on paper in the beginning of the fourteenth century. Calico-printing, oilcloth-printing, and carpet-printing are also distinct arts, each requiring specially made inks and machinery. Printing for the blind, in letters embossed in relief, is the only form of printing done without ink.

2. The art or process of producing printed matter for reading (including illustrations, etc.) by composition and imposition of types, and their subjection when inked to pressure upon paper in a printing-press; the typographic art; typography in the fullest sense. Although documents of a much earlier date exist, which show strong evidence of having been printed in some manner analogous to the modern practice, the history of printing properly begins with the first use of movable molded types, and is accredited to Gutenberg, with the aid of Schoeffer and Faust, of Mainz in Germany, in which city appeared the first book with an authenticated (written) date, 1456. Gutenberg's invention, however, is disputed in favor of his contemporary Coster, of Haarlem in Holland, from whom the former is said to have derived the process. Improvements have since been made in the speed of type-making and in the methods of type-setting, but there has been no radical change in their theory or process. The simple screw hand-press first used for printing from types received no considerable improvement before 1800. Since that date many inventions have been made in printing-machinery, and the collateral arts of stereotyping and electrotyping have been developed. Machines that print from 5,000 to 50,000 copies an hour are to be found in many large cities. The earliest Italian copperplate-print is by Maso Finiguerra, a goldsmith of Florence (1452). Lithography was invented by Alois Senefelder, of Munich, about 1796; he made prints in 1798, and received a patent in 1800. Typography, also known as letterpress printing, obtains its greatest advantage from the mobility of its types of metal, which can be repeatedly used in endless combinations. Type-printing machinery permits the use, along with types, of engravings on wood, or of stereotype or electrotype plates. In all other kinds of printing, the use of an engraved design in a new combination is not practicable; it can be used only in its first state. Printing comprises two distinct trades—composition, or the art of arranging types, and presswork, or the art of getting impressions from composed types. See *compositor*, *pressman*, and *printer*, 2.

3. In *photog.*, the act or art of obtaining a positive photographic picture from a negative, or a picture in which the lights and shades are true to nature from one in which they are reversed. When based upon the properties of a salt of silver, such printing is called *silver-printing*, and similarly with other salts.—4. In *ceram.*, the art of decorating pottery by means of transfers, either by paper printed with mineral colors or by sheets of gelatin printed in oil. By the first plan, the paper is pressed, printed side down, on the ware to make the transfer, and afterward removed by softening in water. By the other plan, the gelatin film or bat simply transfers the oil to the ware, when it can be removed and used again, the oil-print being then dusted with mineral colors.

5. Advertising-bills, posters, dodgers, window-bills, and the like. [Theat. slang.]—Anastatic printing. See *anastatic*.—Artificial or artistic printing. See *artificial*.—Bureau of Engraving and Printing. See *bureau*.—Chromatic printing. See *chromatic*.—Lithographic printing. See *lithography*.—Logographic printing, printing with types bearing whole words or syllables. See *logography*.—Natural printing, the taking of an impression from an etched plate as it comes from the bath, for the purpose of showing its exact state. See also *nature-printing*.—Polychrome printing. See *polychrome*.—Solar printing, in *photog.*, the process or operation of printing or enlarging from a negative by the use of the solar camera. See *copying camera*, under *camera*.

printing-body (prin'ting-bod'i), *n.* A piece of ceramic ware ready for printing.

printing-frame (prin'ting-frām), *n.* In *photog.*, a quadrangular frame in which sensitized paper is placed beneath a negative held firmly in position and exposed to the direct rays of light. Also called *pressure-frame* and *press*.

printing-house (prin'ting-hous), *n.* A house or office where letterpress printing is done.

printing-ink (prin'ting-ingk), *n.* Ink used in typographical printing. Its composition, generally speaking, is linseed-oil boiled to a varnish, with coloring matter added to it.

printing-machine (prin'ting-mā-shēn'), *n.* An apparatus for printing with types or typographic forms, more elaborate than a hand-press; a printing-press adapted for operation at greater speed, and commonly with larger areas of type,

than a hand-press; a power-press (properly so called, although with some of the smaller forms manual power may be used). See *printing-press*. Many such machines have been invented. Platen-machines are provided with flat beds for the types, which are impressed by flat platens. Favorite styles of platen-machines for book-work are the Adams press of America and the Napier press of England; for job-work, the Gordon press of America and the Cropper press of England. Cylinder-machines are provided with flat sliding bed-plates for the type-forms, which at intervals are impressed by a rotating cylinder. (See *cylinder-press*.) Rotary machines are provided with cylinders on the curved surface of which the types or plates are fixed, and which are impressed by another rotating cylinder. In some styles of rotary press the central cylinder containing the type is impressed by two or more impression-cylinders, which make a corresponding number of impressions at every rotation. All forms of platen- and cylinder-machines receive, by hand-feeding, cut sheets of paper which are delivered printed usually on one side only, and not folded. Some forms of cylinder-machines are provided with two cylinders for printing a sheet on both sides, or in two colors. Web-machines (so called because they use paper in a web-roll, which may be two or more miles long) are provided with cylinders on the curved surface of which the plates are fastened, and which are impressed by other cylinders on both sides. All of these machines are complex, and have an apparatus for cutting and folding sheets and pasting in supplementary single or double

leaves, and are largely used for printing daily newspapers. Their performance varies, according to the size of the sheet and other conditions, from 5,000 to 70,000 copies an hour. Nicholson of England received a patent for a cylinder printing-machine in 1790, but his invention was never perfected.

Koenig and Bauer in 1811 did the first practical work on their machine, which in 1814 was used to print the "London Times." Early forms of cylinder-machines have been largely improved by Napier of London and Hoe of New York. The web-machine was introduced in 1853, and has received many improvements from Applegath of London, Marinoni of Paris, Hoe of New York, and others. —Cradle printing-machine. See *cradle*.

printing-office (prin'ting-of'is), *n.* An office where typographic printing is done.

printing-paper (prin'ting-pā'pēr), *n.* See *paper*.

printing-press (prin'ting-pres), *n.* A machine for taking impressions from an inked surface upon paper. A press that prints from stone is always specified as a lithographic press; a press that prints from etched or engraved copperplates, as a copperplate-press. Presses for typographic printing are broadly divided into three classes—hand-presses, job-presses, and power-presses. Those of the last class are treated under *printing-machines*. The early hand-press was largely of wood. A stone was provided as a bed for the form of types, and iron for minor pieces only. Impression was made by the direct action of a screw on the platen or pressing surface, which covered only one half of the bed-plate of stone. The first notable improvement was that of Stanhope of England, who in 1798 made a hand-press entirely of iron, with a platen that fully covered the bed-plate. Many improvements have followed. The hand-presses now preferred

of various forms have been devised for special kinds of printing, as in different colors at the same time. The prevalent style of job-presses, for the printing of cards and small sheets, has the type secured to a bed-plate which stands vertically, and the platen swings to and from it on a rocking shaft, or is brought to it by means of a side-lever. They are often worked by a treadle, and hence are also called *treadle-presses*. Their prototype is the Gordon press, invented by George P. Gordon in 1850.—Chromatic printing-press. See *chromatic*.—Copperplate printing-press, a roller-press used in printing from plates engraved or etched in sunken lines. The original form, still in use, was invented in 1545. It consists of a bed moving on rollers and supporting the plate which is to be printed from. The requisite pressure is obtained by means of a roller above the

bed, having a vertical adjustment by means of screws attached to its journal-boxes. The bed is rolled forward to bring the plate and the sheet upon which the drawing is to be transferred beneath the pressing-roll. The pressure is adjusted by means of the screws, and the roll turned by a lever-arm attached to its axis, causing the plate and its bed to roll forward beneath it, so as to subject the whole surface of the plate and the sheet which covers it to its action.—Multicolor printing-press, a chromatic printing-press for printing simultaneously in bands or stripes of different colors; distinguished from a *chromolithographic press*, which prints in overlaid colors by successive operations.

printing-telegraph (prin'ting-tel'ē-grāf), *n.* Any form of automatic self-recording telegraph, as the "ticker" of a stock-reporting telegraph. See *telegraph*.

printing-type (prin'ting-tip), *n.* Letterpress-type. See *type*.

printing-wheel (prin'ting-hwél), *n.* A wheel having letters or figures on its periphery, used in paging- or numbering-machines, or in ticket-printing machines.

printless (print'les), *a.* [*< print + -less.*] Without a print. (a) Receiving or bearing no print or impression.

Lighting on the *printless* verdure.

Keats, Lamia, l.

Lovell, Bon Voyage!

print-room (print'róm), *n.* An apartment containing a collection of prints or engravings.

print-seller (print'sel'éer), *n.* One who sells prints or engravings.

Any *print-sellers* who have folios of old drawings or facsimiles of them. *Ruskin, Elem. of Drawing, II.*

print-shop (print'shop), *n.* A shop where prints or engravings are sold.

I picked up in a *print-shop* the other day some superb views of the suburbs of Chowringhee.

Macaulay, in Trevelyan, I. 309.

print-works (print'wérks), *n. sing. and pl.* An establishment where machine- or block-printing is carried on; a place for printing calicoes or paper-hangings.

There were for many years extensive calico *print-works* at Primrose, but these are now converted into paper-mills.

Baines, Hist. Lancashire, II. 21.

Prionodon (pri-ô-don), *n.* [NL.] Same as *Prionodon*.

Prionodontes (pri-ô-don'téz), *n.* [NL.] Same as *Prionodon*.

Prion (pri'on), *n.* [NL. (Lacépède, 1800-1), *< Gr. πριον, a saw, < πριεν, saw.*] A genus of *Procellariidæ*, having the bill expanded and strongly beset along the cutting edges with lamellæ like the teeth of a saw; the saw-billed petrels. *P. vittata* is a blue-and-white petrel inhabiting southern seas. Also *Pachyptila*.

Prionæ (pri-ô-nê-ê), *n. pl.* [NL., *< Prion + -æ.*] A section of *Procellariinæ* established by Coes in 1866, having the bill lamellate, and containing the genera *Prion*, *Pseudoprion*, and *Hulobæna*; the saw-billed petrels.

Prionidæ (pri-on'i-dê), *n. pl.* [NL. (Leach, 1819), *< NL. Prion + -idæ.*] A family of longicorn beetles, typified by the genus *Prionus*, related to the *Cerambycidæ*, having the sides of the prothorax sharply delineated and often serrate or spinous.

Prionidus (pri-ô-ni'dus), *n.* [NL. (Uhler, 1886), *< Gr. πριον, a saw, + ειδος, form.*] A genus of reduvioid bugs, replacing *Prionotus* of Laporte, 1833, which is preoccupied in ichthyology. It includes many strange tropical and semi-tropical forms, as *P. cristatus*, the wheel-bug, useful in destroying willow-slugs and many other noxious insects.

Prioninæ (pri-ô-ni'-nê), *n. pl.* [NL., *< Prion + -inæ.*] The *Prionidæ* as a subfamily of *Cerambycidæ*, distinguished by the margined prothorax and the connate labrum. The species are of large size and of brown or black color, and some of them are the longest beetles known. They stridulate by rubbing the hind femora against the edge of the elytra. *Prionus imbricornis* is a common North American species. *Orthosoma cylindricum* is also a striking example of this group. It is found in the West Indies and all through North America, feeding in the larva state in decaying stumps of oak, walnut, pine, and hemlock.

Prionites (pri-ô-ni'téz), *n.* [*< NL., < Gr. πριον, a saw: see Prion.*] In *ornith.*, a genus of motmots: same as *Momotus*. *Illiger, 1811.*

Prionitidæ (pri-ô-ni'ti-dê), *n. pl.* [NL., *< Prionites + -idæ.*] Same as *Momotidæ*. *Bonaparte, 1849.*

Prionitinae (pri-ô-ni-ti'nê), *n. pl.* [NL., *< Prionites + -inæ.*] Same as *Momotinæ*, 1. *Cabanis, 1847.*

Prioniturus (pri-ô-ni-tû'rus), *n.* [NL. (Wagler, 1830), *< Prionites + Gr. οὐρά, tail.*] A genus of *Psittucidæ*, having the central rectrices

spatulate, as in the motmots of the genus *Prionites* (or *Momotus*), whence the name; the racket-tailed parakeets. Several species in-

Racket-tailed Parakeet (*Prioniturus discurus*).

habit Celebes and the Philippines, as *P. platurus*, *P. discurus*, and *P. spatuliger*.

Prionium (pri-ô-ni-um), *n.* [NL. (E. Meyer, 1832), so called in allusion to the sharply saw-toothed leaves; *< Gr. πριον, a saw.*] A genus of monocotyledonous plants of the order *Juncaceæ* and tribe *Eujuncæ*. It is distinguished from *Juncus*, the rushes, which it closely resembles in structure, by the three-celled ovary with a few seeds in the lower half of each cell, the large club-shaped embryo, and the three separate styles. The only species, *P. Palmila*, is a native of South Africa, known as *palmiet* or *palmiet*, and *palmite*. See *palmite*.

Prionodesmaceæ (pri-ô-nô-des-mâ-sê-ê), *n. pl.* [NL., *< Gr. πριον, a saw, + δέσμη, band, ligature.*] An order or group of bivalve shells with the hinge primitively transversely plicated or prionodont. It includes the *Nuculaceæ*, *Arceæ*, *Trigoniaceæ*, *Naiadaceæ*, and *Monomyaria*.

Prionodon (pri-on'ô-don), *n.* [NL., *< Gr. πριον, a saw, + δοντις (δοντ-) = E. tooth.*] In *zool.*, a generic name variously used. (a) In *mammal.*: (1) The emended form of *Prionon* or *Prionodontes*, a genus of giant armadillos of South America, the only species of which is the kabalassou, *P. gigas*. (2) A genus of Malayan viverrine quadrupeds of the subfamily *Prionodontinæ*, containing such as *P. gracilis*, which is white with broad black crossbands; the linsangs. This genus was founded by Horsfield in 1823. See cut under *delung*. (b) In *ichth.*, a genus of sharks or subgenus of *Carcharias* or *Carcharinus*. *Müller and Henle, 1841.*

prionodont (pri-on'ô-dont), *a. and n.* [*< Gr. πριον, a saw, + δοντις (δοντ-) = E. tooth.*] 1. *a.* Having teeth set like a saw; having serrated teeth. Specifically—(a) Having very numerous teeth, 20 or 25 above and below on each side, as an armadillo of the genus *Prionodon*. (b) Having the tubercular molars reduced to one on each side above and below, as a civet-cat of the genus *Prionodon*. (c) In *conch.*, transversely plicated, as the hinge of the *Prionodesmaceæ*.

2. An armadillo of the subfamily *Prionodontinæ*.—2. A linsang of the subfamily *Prionodontinæ*.

Prionodontinæ (pri-on'ô-don-ti'nê), *n. pl.* [NL., *< Prionodon (-odont-) + -inæ.*] 1. A subfamily of *Viverridæ*, named from the genus *Prionodon* of Horsfield, having the body slender and elongate, and the tubercular molars reduced to one above and below on each side; the linsangs. —2. A South American subfamily of *Dasypodidæ*, having from 20 to 25 teeth above and below on each side, a greater number than in any other land-animal; the kabalassous, grand tatous, or giant armadillos. It is named from the genus *Prionodon* (emended from *Prionon* or *Prionodontes* of F. Cuvier).

prionodontine (pri-on-ô-don'tin), *a. and n.* [*< prionodont + -ine.*] Same as *prionodont*.

Prionurus (pri-ô-nû'rus), *n.* [NL. (Ehrenberg, 1829), *< Gr. πριον, a saw, + οὐρά, tail.*] 1. A genus of scorpions: same as *Androctonus* of the same author and date.—2. In *ichth.*, a genus of *Teuthididæ*.

Prionus (pri-ô-nus), *n.* [NL. (Geoffroy, 1762), *< Gr. πριον, a saw.*] A genus of large longicorn beetles, of the broad-bodied series of *Cerambycidæ*, typical of the family *Prionidæ*, having the antennæ imbricated or pectinated in the male. It is wide-spread and has about 30 species, of which 9 in-

habit North America. *P. latidorsis* and *P. imbricornis* being among the commonest of the latter. The larvae of both of these feed upon the roots of the grape. *P. coriarius* is European. *P. brevicornis* is destructive to orchard and

other trees in North America. *P. cervicornis* is a South American staghorn beetle, whose larvae are eaten by the natives. See also cut under *Phytophaga*.

prior (pri'or), *a.* [*< L. prior* (neut. *prius*), former, earlier, previous (pl. *priores*, forefathers, ancestors, the ancients), superior, better, used as the comparative of *primus*, first: see *prime*, and cf. *pristine*.] 1. Preceding, as in the order of time, of thought, of origin, of dignity, or of importance; in *law*, senior in point of time: as, a *prior* and a junior incumbence.

Sche seyde thou semyste a man of honour,
And therefore thou schalt be *priour*.

MS. Cantab. Fl. II. 38, f. 110. (Halliwell.)

The thought is always *prior* to the fact; all the facts of history preexist in the mind as laws. *Emerson, History.*

2. Previous: used adverbially, followed by *in*, like *previous*. See *previous*, *a.*

At the close of the Republican era, and *prior* to the reconstruction of society under the Emperors, skepticism had widely spread.

G. P. Fisher, Begin. of Christianity, p. 133.

prior (pri'or), *n.* [*< ME. priour, preour = D. prioor = MLG. prior, prior = MHG. prior, G. prior = Sw. Dan. prior, < OF. priour, prieur, F. prieur = Sp. Pg. prior = It. priore, < ML. prior, a prior, lit. superior, < L. prior, former, superior: see prior, a.*] A superior officer; a superior. Specifically—(a) *Eccles.*, an official in the monastic orders next in dignity and rank to an abbot. Before the thirteenth century he seems to have been called *procurator* (prepositus) or *prælat* (prælat), and *prior* seems to have meant any superior or senior. If in an abbey, and an assistant of the abbot, he is called a *claustral prior*; if the superior of a priory—that is, of a monastery of lower than abbatial rank—he is called a *conventual* or *conventual prior*. The superiors of the houses of regular canons were always called *priors*, and the commandants of the priories of the military orders of St. John of Jerusalem, of Malta, and of the Templars were called *grand priors*. See *hegumen*.

The *prior* of Durham, modest as the name might sound, was a greater personage than most abbots.

priority (pri-ō-r'i-ti), *n.* [*< F. priorité = Sp. prioridad = Pg. prioridade = It. priorità, < ML. priorita(-t)s, < L. prior, former: see prior, a.*] 1. The state of being prior or antecedent, or of preceding something else: as, *priority of birth*: opposed to *posteriority*.

As there is order and *priority* in matter, so is there in time. Bacon, *Advancement of Learning*, ll. 845.

2. Precedence in place or rank; the having of certain rights before another.

3. In *law*, a precedence or preference, as when one debt is paid in *priority* to others, or when an execution is said to lose its *priority* by the neglect of the party to enforce it.—4. *Apriority*. = *Syn. Priority, Antecedence, Precedence, Preeminence, Predominance, Preference, Superiority, Supremacy.* *Priority* is the state or fact of coming first in order of time; what little use it has beyond this meaning is only a figurative extension. *Antecedence* is strictly *priority*, without any proper figurative use. *Precedence* may mean *priority*, but generally means the right to go or come first, the privilege of going before another: as, the question of *precedence* among sovereigns or ambassadors makes great trouble, because the dignity of the nations represented is supposed to be at stake. *Preeminence* is, figuratively, height by nature above all others, generally in some one respect: as, the *preeminence* of Shakspere as a dramatist. *Predominance* is superior and dominating power or influence: as, the *predominance* of a certain faction; figuratively, the *predominance* of light or shade or a particular color in a certain picture. *Preference* is the putting forward of a person or thing by choice, on the ground of worthiness, or on account of the taste, fancy, or arbitrary will of the one preferring: as, to give the *preference* to Milton over Dante. *Superiority* may refer to nature or to given or achieved position over others; it differs from *supremacy* as the comparative differs from the superlative degree: as, the *superiority* of the appearance of certain troops; the *superiority* of the dairy-products of a certain region; *superiority* to one's circumstances; *supremacy* on the land and *supremacy* on the sea do not always go together. See *previous*.

Whether *priority* to that sea it had ever been inhabited, or lain till then in its chaotic state, is a question which it would be rash to decide. Geddes, *tr. of Bible*, l. Pref.

prioryship (pri-ōr-ship), *n.* [*< prior, n., + -ship.*] The office of prior; a priory.

The archbishop, provoked the more by that, deposed him from the *prioryship*. Foss, *Martyrs*, p. 214, an. 1190.

priory (pri-ōr-i), *n.*; pl. *priories* (-iz). [*< ME. priorie, < OF. priorie, priorie, prioree (= It. prioria), l., a priory (cf. ML. prioria, the office of a prior, a priory), a later form for OF. priore, priore, < ML. prioratus, the office of a prior, < prior, a prior: see prior, n., and cf. priorate.*] A religious house next in dignity below an abbey, and often, but not necessarily, dependent upon an abbey. Its superior is called a *prior* or *priores*.

Our abbey and our *priories* shall pay
This expedition's charge. Shak., *K. John*, l. 1. 48.

Alien priory, a cell or small religious house dependent upon a large monastery in another country.

And [the parliament] showed no reluctance to confiscate the property of the *alien priories* which Henry had restored in the previous year. Stubbs, *Const. Hist. of Eng.*, § 306.

pripri (prē-prē), *n.* [*S. Amer.*] In French Guiana, a marshy belt occurring immediately behind the mangrove or submerged belt of the coast. It can easily be drained and made into good meadow-land.

prist, *n.* A Middle English form of *price*. Chaucer.

prisa (pri-zā), *n.* [*< OF. prisage, prizing, rating, valuing, < priser, estimate; in def. 2, rather < OF. prise, a taking: see prize.*] 1. A prizing; rating; valuing. Cotgrave.—2. In *early Eng. and French law*, a seizure or asserted right of seizure by way of exaction or requisition for the use of the crown. More specifically—(e) A right which once belonged to the English crown, of taking two tuns of wine from every ship importing twenty tuns or more. This by charter of Edward I. was commuted into a duty of two shillings for every tun imported by merchant strangers, and called *butlerage*, because paid to

the king's butler. (b) The share of merchandise taken as lawful prize at sea which belongs to the crown—usually one tenth.

prizal (pri-zal), *n.* [*Also prizall; by abbr. from reprisal.*] A taking; a capture.

They complain of two ships taken on the coast of Portugal. . . . They of Zealand did send unto Holl^d to let them know of these *prizals*. Sir P. Sidney, quoted in Motley's *Hist. Netherlands*, [III. 174, note.

priscan (pris'kan), *a.* [*< L. priscus, primitive, + -an.*] Primitive. [Rare.]

We seem to hear in the songs and dances of the savage Indians the echoes of our own *priscan* history. Smithsonian Report, 1881, p. 506.

Priscian (prish'ian), *n.* [*So called from Priscian (LL. Priscianus), a Latin grammarian (about A. D. 500).*] A grammarian. Compare the phrase to *break Priscian's head*, under *break*.

But thus it is when petty *Priscians*
Will needs step up to be censorians. Marston, *Satires*, iv. 104.

Priscillianism (pri-sil'yan-izm), *n.* [*< Priscillian-ist + -ism.*] The doctrines of the Priscillianists.

Priscillianist (pri-sil'yan-ist), *n.* [*< Priscillian or Priscilla (see defs.) + -ist.*] 1. One of a sect, followers of Priscillian, a Spanish heretic of the fourth century. The sect, which originated in Spain, held various Gnostic and Manichean doctrines. The Priscillianists considered it allowable to conceal their tenets by dissimulation; they were accused of gross immorality, and were severely persecuted by the emperor Maximus.

2. A name given to the Montanists (see *Montanist*), from their alleged prophetess Priscilla.

prise, *n.* and *v.* An obsolete form of *prize*.

prise, *a.* [*ME., also pryse, pris, < OF. pris, taken, received, accepted, etc. (used in various adj. senses), pp. of prendre, take, receive, accept: see prize, n. and v.*] Choice; excellent; noble.

I bid that ye buske, and no bode make;
Pas into Payone there *prise* knights dwellis,
Doughty of dede, derfe men in Armys.
Destruction of Troy (E. E. T. S.), l. 2568.

So didde wele thoo *prise* knyghtes in her compaigny,
also the knyghtes of the rounde table, that ne ought not
to be for-yeten. Merlin (E. E. T. S.), ll. 220.

I have a *pris* present, to please with thil herl.
William of Palerne (E. E. T. S.), l. 411.

prise, *v.* and *n.* A variant of *prize*.

prise, *n.* and *v.* See *prize*.

prishede, *n.* [*ME. prishede; < prise, a., + -head.*] Excellence; worthiness.

The *prishede* of Farys was praisit so mekyll,
With ferly of his falmea, & his fe buernes.
Destruction of Troy (E. E. T. S.), l. 2907.

prisert, *n.* An obsolete form of *prizer*.

prism (prizm), *n.* [= *F. prisme = Sp. Pg. It. prisma = D. G. Sw. Dan. prisma, < LL. prisma, a prism (in geom.), < Gr. πρίσμα, a prism (in geom.), lit. something sawed (as a block of wood), also sawdust, < πρίν, πρίν, saw.*] 1. In *geom.*, a solid whose bases or ends are any similar, equal, and parallel plane polygons, and whose sides are parallelograms. Prisms are triangular, square, pentagonal, etc., according as the figures of their ends are triangles, squares, pentagons, etc.

When the mirror is entirely inlaid with large pieces of Marble, some of which are found to rise above the others, or to be detached from them, they are forced down again with a quadrangular wooden *prism*. Marble-Worker, § 152.

Specifically—2. An optical instrument consisting of a transparent medium so arranged that the surfaces which receive and transmit light form an angle with each other: usually of a triangular form with well-polished sides, which meet in three parallel lines, and made of glass, rock-salt, or quartz, or a liquid, as carbon disulphide, contained in a prismatic receptacle formed of plates of glass. A ray of light falling upon one of the sides of a prism is refracted (see *refraction*) or bent from its original direction at an angle depending upon its own wave-length, the angle of incidence, the angle of the prism, and the material of which the prism is made. This angle of deviation, as it is called, has a definite minimum (minimum deviation) value when the angle of incidence is equal to the angle of emergence.

Our abbeys and our *priories* shall pay
This expedition's charge. Shak., *K. John*, l. 1. 48.

Alien priory, a cell or small religious house dependent upon a large monastery in another country.

And [the parliament] showed no reluctance to confiscate the property of the *alien priories* which Henry had restored in the previous year. Stubbs, *Const. Hist. of Eng.*, § 306.

pripri (prē-prē), *n.* [*S. Amer.*] In French Guiana, a marshy belt occurring immediately behind the mangrove or submerged belt of the coast. It can easily be drained and made into good meadow-land.

prist, *n.* A Middle English form of *price*. Chaucer.

prisa (pri-zā), *n.* [*< OF. prisage, prizing, rating, valuing, < priser, estimate; in def. 2, rather < OF. prise, a taking: see prize.*] 1. A prizing; rating; valuing. Cotgrave.—2. In *early Eng. and French law*, a seizure or asserted right of seizure by way of exaction or requisition for the use of the crown. More specifically—(e) A right which once belonged to the English crown, of taking two tuns of wine from every ship importing twenty tuns or more. the king's butler. (b) The share of merchandise taken as lawful prize at sea which belongs to the crown—usually one tenth.

prizal (pri-zal), *n.* [*Also prizall; by abbr. from reprisal.*] A taking; a capture.

They complain of two ships taken on the coast of Portugal. . . . They of Zealand did send unto Holl^d to let them know of these *prizals*. Sir P. Sidney, quoted in Motley's *Hist. Netherlands*, [III. 174, note.

priscan (pris'kan), *a.* [*< L. priscus, primitive, + -an.*] Primitive. [Rare.]

We seem to hear in the songs and dances of the savage Indians the echoes of our own *priscan* history. Smithsonian Report, 1881, p. 506.

Priscian (prish'ian), *n.* [*So called from Priscian (LL. Priscianus), a Latin grammarian (about A. D. 500).*] A grammarian. Compare the phrase to *break Priscian's head*, under *break*.

The angle of deviation increases as the wave-length of the light-ray diminishes; consequently, if a pencil of white light falls upon the prism, the different rays are separated or dispersed, and a spectrum is the result. (See *spectrum*.) Prisms are hence used in spectrum analysis to decompose light, so that the rays of which it is made up may be examined.

The beams that thro' the Oriel shine

Make *prisms* in every carven glass.
Tennyson, *Day-Dream*, The Sleeping Palace.

3. In *crystal*, a form consisting of planes, usually four, six, eight, or twelve, which are parallel to the vertical axis. If the planes intersect the lateral axes at the assumed unit distances for the given species, it is called a *unit prism*; otherwise it may be described, according to the position of the planes, as a *macroprism*, *brachyprism*, *orthoprism*, or *dinoprism*. In the triclinic system the form includes two planes only, and it is hence called a *hemiprism*. In the tetragonal system the unit prism is sometimes called a *protoprism*, or prism of the first order, and the diametral prism, whose planes are parallel to a lateral axis, a *deutoprisim*, or prism of the second order; these names are also used in an analogous manner in the hexagonal system.

4. In canals, a part of the water-space in a straight section of a canal, considered as a parallelepiped.—5. In *weaving*, same as *pattern-box* (b).—Achromatic prism, a prism through which an incident beam of light is refracted into a new direction without color. It consists of a combination of two prisms, made of two different transparent substances of unequal dispersive powers, as flint-glass and crown-glass.—Amici's prism, in *microscopy*, a form of illuminator consisting of a prism having one plane and two lenticular surfaces, so that it serves at once to concentrate the rays and to reflect them obliquely upon the object. It is supported upon an adjustable stand.—Bisulphid prism. See *bisulphid*.—Diametral prism. See *diametral planes*, under *diametral*.—Diatom prism, a prism used as an attachment to a microscope to give the oblique illumination favorable for observing very fine lines or markings, as those on the shells of diatoms.—Double-image prism, in *optics*, a prism of Iceland spar which yields two images of like intensity, but polarized in planes at right angles to each other.—Equilateral prism, a prism having equal sides, used as an attachment to a microscope to illuminate the object. It acts on the principle of total reflection.—Erecting prism, a prism placed between the two lenses of the eyepiece, and serving to erect the inverted image of a compound microscope.—Natchez's prism. (a)

In *microscopy*, an erecting prism.
(b) A form of illuminator consisting of a prism with two convex surfaces, by which the light is brought to a focus upon the object.—Nicol prism, or *nicol*, a prism of Iceland spar (calcite), used when polarized light is required: named from its inventor, William Nicol, of Edinburgh, who first described it in 1828. The common form is constructed from an oblong cleavage piece, first by grinding two new faces at the ends (as *pp'*) inclined about 68° to the vertical edges, and then cementing the halves together by Canada balsam in the line *AB*. The ordinary ray now suffers total reflection at *c*, and is absorbed by the blackened sides at *g*, while the extraordinary ray, polarized with vibrations parallel to the shorter diagonal of the cross-section, emerges at *e*. Modified forms of the prism, accomplishing the same end, have been devised in recent years (often called *nicol*s also), which are much shorter, and hence have the advantages of giving a larger field in the microscope and less loss of light by absorption, together with an important saving of the material: one of these is the Ramsdenvsky prism.—Prism battery, a Leclanché battery in which a pair of compressed prisms, containing all the materials commonly used in the porous cup, is employed in place of the latter.—Reversing prism, a small obtuse-angled isosceles prism (*p* in the cut) of flint-glass, placed between the eye-lens of a positive eyepiece *e* and the eye, with its longest side parallel to the optical axis of the eyepiece. It inverts the image viewed through the eyepiece, and when it is made to rotate around the optical axis the image also appears to turn, so that any line in it can be made vertical or horizontal at pleasure. This enables the observer to avoid, or to eliminate, certain errors of measurement which depend upon the apparent position of the object.—Right-angle prism, a prism attached to a microscope-stand to throw light upon an object. It is so made that it can rotate on a horizontal or vertical axis, so as to throw light as required.—Wenham prism, in a binocular microscope, a quadrilateral prism used to refract part of the light-rays from the object up the second tube to its eyepiece.

prismatic (priz-mat'ik), *a.* [= *F. prismatique = Sp. prismático = Pg. It. prismatico, < Gr. πρίσμα, a prism: see prism.*] 1. Of or pertaining to a prism; having the form of a prism.

False eloquence, like the *prismatic* glass,
Its gaudy colours spreads on every place. Pope, *Essay on Criticism*, l. 811.

2. Separated or distributed by, or as if by, a transparent prism; formed by a prism; varied

Vertical and Transverse Sections of a Nicol Prism.

pp', direction of terminal face of prism;
AB, direction of surface by which the parts are cemented together;
degr, path of ordinary ray;
degr', path of extraordinary ray;
evs', direction of vibration plane in shorter diagonal of transverse section (*pp'* being longer diagonal, cf. above).

Reversing Prism. The prism can be rotated on the optical axis *uv*.

measurement which depend upon the apparent position of the object.—Right-angle prism, a prism attached to a microscope-stand to throw light upon an object. It is so made that it can rotate on a horizontal or vertical axis, so as to throw light as required.—Wenham prism, in a binocular microscope, a quadrilateral prism used to refract part of the light-rays from the object up the second tube to its eyepiece.

prismatic (priz-mat'ik), *a.* [= *F. prismatique = Sp. prismático = Pg. It. prismatico, < Gr. πρίσμα, a prism: see prism.*] 1. Of or pertaining to a prism; having the form of a prism.

False eloquence, like the *prismatic* glass,
Its gaudy colours spreads on every place. Pope, *Essay on Criticism*, l. 811.

2. Separated or distributed by, or as if by, a transparent prism; formed by a prism; varied

in color: as, a *prismatic* spectrum; *prismatic* colors.

He talks of light and the *prismatic* hues.

Couper, Charity, l. 391.

Prismatic cleavage, cleavage parallel to the planes of a prism.—**Prismatic colors**, the colors into which ordinary

white light is decomposed by a prism, from the red to the violet. See *color* and *spectrum*.—**Prismatic compass**, a compass held in the hand when used, and so arranged that by means of a prism the graduations can be read off at the same time that the object sighted is seen through the sight-vane. It is used for taking bearings in sketching ground for military purposes, and for filling in the interior details of rough surveys.—**Prismatic crystal**, a crystal having a prismatic form.—**Prismatic planes**, in *crystal*, planes parallel to the vertical axis of the crystal.—**Prismatic powder**. See *powder*.

prismatical (priz-mat'i-ka), *a.* [*< prismatic + -al.*] Same as *prismatic*.
prismatically (priz-mat'i-ka-li), *adv.* In the form or manner of a prism; by means of a prism.

What addition or decrement . . . befalls the body of the glass by being *prismatically* figured?

Boyle, Works, l. 556.

prismatoid (priz'ma-toid), *n.* [*< Gr. πρισμα, a prism, + εἶδος, form.*] A solid having two parallel polygonal bases connected by triangular faces. If A and C are the areas of the bases of a prismatoid, and B that of the section halfway between them, then *h* being the altitude, Augustus's formula for the solid contents is $\frac{1}{6}h(A + 4B + C)$.

prismatoidal (priz-ma-toi'dal), *a.* In the form of or connected with a prismatoid.

prismenchyma (priz-meng'ki-mä), *n.* [*< Gr. πρισμα, a prism, + NL. (par)enchyma.*] In *bot.*, cellular tissue in which the cells are of a prismatic form.

prismoid (priz'moid), *n.* [*< Gr. πρισμα, prism, + εἶδος, form.*] A body that approaches to the form of a prism; a prismatoid.

prismoidal (priz-moi'dal), *a.* [*< prismoid + -al.*] 1. Having or relating to the form of a prismoid.—2. In *entom.*, noting long bodies when they have more than four faces: as, *prismoidal* joints of the antennæ. *Kirby*.—**Prismoidal formula**, a formula based on the consideration of a solid as composed of prismoids.

prism-train (prizm'trân), *n.* A series of prisms used with the spectroscope to give increased dispersion. See *spectroscope*.

Instruments (spectroscopes) in which the *prism-train* is replaced by a diffraction-grating are still more powerful. *C. A. Young*, The Sun, p. 191.

prismy (priz'mi), *a.* [*< prism + -y.*] Pertaining to or like a prism; prismatic in color.

The mighty ministers
Unfurled their *prismy* wings.

Shelley, Demon of the World.

The *prismy* hues in thin spray showers.

Whitlir, Tent on the Beach.

prison (priz'n), *n.* [*< ME. prison, prisoun, prisun, prysoun, prysoun, preson, late AS. prisun, < OF. prison, prisoun, prisun, a prison, a prisoner, F. prison, a prison, imprisonment, = Pr. preiso = Sp. prison = Pg. prisão = It. prigione, a prison (ML. reflex prisio(n)-, captivity, prison), < L. prensio(n)-, a taking, seizing, arresting, contr. of prehensio(n)- (found only in the sense of a machine for raising or screwing up anything, a jackscrew), < prehendere, prendre, take, seize: see *prehend*, and cf. *prehension* (a doublet of *prison*) and *prize*, etc.] 1. A place of confinement or involuntary restraint; especially, a public building for the confinement or safe custody of criminals and others committed by process of law; a jail. The jailor . . . thrust them into the inner *prison*, and made their feet fast in the stocks. Acts xvi. 24. Each heart would quit its *prison* in the breast, And flow in free communion with the rest. Couper, Charity, l. 610.*

2†. A prisoner. Mi lord the king was ther caught in kene stoure, & goure sone also, and are *prisons* bothe. William of Palerne (E. E. T. S.), l. 4215.

"Consummatum est," quod Cryst, and comsed forto sowwe Pitoualliche and pale as a *prison* that deyeth. Piers Plowman (B), xviii. 59.

Fleet Prison. See *fleet*.—**Keeper of the Queen's prison**. See *marshal of the King's Bench*, under *marshal*.

Limits of a prison, prison bounds, jail liberties (which see, under *jail*).—**Prison-breaking or -breaking**, in law, a breaking and going out of prison by one lawfully confined therein. (*Bishop*.) Breaking into a prison to set a prisoner at large is commonly called *rescue*.—**Prison rustic ashler**. See *ashler*, 3.—**Rules of a prison**. See *rule*.—**State prison**. (a) A jail for political offenders only. (b) A public prison or penitentiary. (U. S.)—**To break prison**. See *break jail*, under *break*.—**To go out of prison by baston**. See *baston*, 3.

prison (priz'n), *v. t.* [*< ME. prisonen; < prison, n.*] To shut up in a prison; restrain from liberty; imprison, literally or figuratively.

Sir William Crispyn with the duke was led,
Togidder *prisoned*. Rob. of Brunne, p. 101.

Her tears began to turn their tide,
Being *prison'd* in her eye like pearls in glass. Shak., Venus and Adonis, l. 980.

He groped; I arrested his wandering hand, and *prisoned* it in both mine. Charlotte Brontë, Jane Eyre, xxxvii.

prison-bars (priz'n-bärz), *n. pl.* 1. The bars or grates of a prison; hence, whatever confines or restrains.

Even through the body's *prison-bars*,
His soul possessed the sun and stars. D. G. Rossetti, Dante at Verona.

2. Same as *prisoners' base* (which see, under *prisoner*).

prison-base (priz'n-bäs), *n.* Same as *prisoners' base* (which see, under *prisoner*).

prisoner (priz'nër), *n.* [*< ME. prisoner, prisouner, prysouner, < AF. prisonier, OF. prisonier, F. prisonnier (= Sp. prisionero = Pg. prisioneiro), a prisoner, < prison, prison: see prison.*] 1†. One who keeps a prison; a jailer.

He had (Joseph) ben sperd fast dun,
And holden herde in prison.
An litel stand, quhille he was ther,
So gau him luene the *prisoner*.
Genesis and Exodus (E. E. T. S.), l. 2042.

2. One who is confined in a prison by legal arrest or warrant.

She leteth passe *prisoneres* and payeth for hem ofte,
And gyueth the gallers gold. Piers Plowman (B), iii. 136.

The High Priest and the Elders with their eloquent Tertullus were forced to return as they came, and leave St. Paul under the name of a *Prisoner*, but enjoying the conveniences of liberty. Stillingsfleet, Sermons, II. l.

3. A person under arrest or in custody of the law, whether in prison or not: as, a *prisoner* at the bar of a court.

The jury, passing on the *prisoner's* life.
Shak., M. for M., II. 1. 19.

4. A captive; one taken by an enemy in war.

He yielded on my word;
And, as my *prisoner*, I restore his sword. Dryden, Indian Emperor, III. 4.

5. One who or that which is deprived of liberty or kept in restraint.

Most souls, 'tis true, but peep out once an age,
Dull, sullen *prisoners* in the body's cage.
Pope, To the Memory of an Unfortunate Lady.

If the person sent to relieve his confederate (in *prisoners' base*) be touched by an antagonist before he reaches him, he also becomes a *prisoner*, and stands in equal need of deliverance. Strutt, Sports and Pastimes, p. 145.

Prisoners' base. Same as *prisoners' base*.—**Prisoners' base**, a children's game in which one player strives to touch the others as they run from one goal or base to another: when one player is thus touched, he too stands between the bases and tries to touch the rest, and so on till all are caught. There are many other ways of playing the game. Also called *prisoners' base*, *prison-base*, and *prison-bars*.—**Prisoners' bolt**, in *her.*, same as *shackle-bolt*.—**State prisoner**, one confined for a political offense.—**Syn. Prisoner, Captive**. See *captive*.

prison-fever (priz'n-fë'vër), *n.* Typhus fever (which see, under *fever*). Also called *jail-fever*.

prison-house (priz'n-hous), *n.* A house in which prisoners are kept; a jail; a place of confinement.

I am forbid
To tell the secrets of my *prison-house*.
Shak., Hamlet, I. 5. 14.

That I may fetch thee
From forth this loathsome *prison-house*. Milton, S. A., l. 922.

prisonment (priz'n-ment), *n.* [*< prison + -ment.*] Confinement in a prison; imprisonment.

Item, the *prisonment* of John Porter of Blykelyng. Paston Letters, l. 189.

'Tis *prisonment* enough to be a maid;
But to be new'd up too, that case is hard. Middleton, More Dissemblers besides Women, II. 8.

prison-ship (priz'n-ship), *n.* A ship fitted up for receiving and detaining prisoners.

They saw themselves melting away like slaves in a *prison-ship*. Prescott, Ferd. and Isa., II. 14.

prison-van (priz'n-van), *n.* A close carriage for conveying prisoners.

pristav (pris'tav), *n.* [*< Russ. pristavû.*] In Russia, an overseer, police official, commissioner, commissary, or inspector.

He was styled the grand *pristav*, or great commissioner, and was universally known amongst the Tartar tribes by this title. De Quincey, Flight of a Tartar Tribe.

I have in my possession the original report of a Russian police *pristav*, written upon a printed form. George Kennan, The Century, XXXVII. 893.

Pristidæ (pris'ti-dë), *n. pl.* [NL., *< Pristis + -idæ.*] A family of selachians or plagiostomous fishes, typified by the genus *Pristis*, having the snout enormously prolonged into a flattened beak, armed with a row of saw-like teeth on each side; the saw-fishes. (a) In Gray's system the *Pristidæ* included the *Pristiophoridae*. (b) In Günther's system, a family of *Batoidei*, including only the saw-fishes proper. They chiefly inhabit tropical seas. See cuts under *Pristis* and *saw-fish*.

pristine (pris'ti-nät), *a.* [*< pristine + -ate.*] Original; pristine.

But as it [health] hath recovered the *pristine* strength, which thing only in all the fight it coveted, shall it incontinent be astonished? Sir T. More, Utopia (trans.), II. 7.

I thynke, yea and doubt not, but your yll shalbe again restored to the *pristine* estate and degree. Hall, Rich. III., l. 13. (Halliwell.)

Beside the only name of Christ, and external contempt of their *pristine* idolatry, he taught them nothing at all. Holinshed, Chron., I. B. 3, col. 2, b. (Nares.)

pristine (pris'tin), *a.* [Formerly *pristin*; *< OF. pristin = Sp. pristino = Pg. It. pristino, < L. pristinus*, early, original, primitive, also just past (of yesterday); akin to *priscus*, former, ancient, antique, and to *prior*, former: see *prior*, *prime*.] Of or belonging to a primitive or early state or period; original; primitive: as, *pristine* innocence; the *pristine* manners of a people.

Find her disease,
And purge it to a sound and *pristine* health. Shak., Macbeth, v. 3. 52.

Adam's self, if now he liv'd anew,
Could scant vnwinde the knotty snarled clew
Of double doubts and questions intricate
That Schools dispute about this *pristine* state. Sylvester, tr. of Du Bartas's Weeks, II., Eden.

After all their labour, [they] at last return to their *pristine* ignorance. Goldsmith, Citizen of the World, xxxvii. = *Syn. Primitive*, etc. See *primary*.

Pristiophoridae (pris'ti-ô-for'i-dë), *n. pl.* [NL., *< Pristiophorus + -idæ.*] A family of plagiostomous fishes, typified by the genus *Pristiophorus*. They are anarthrous sharks, having the snout much produced and armed with lateral saw-like teeth. They thus resemble the true saw-fishes, but have lateral branchial apertures like other sharks, and do not attain such size. The species are confined to tropical Pacific waters.

Pristiophorus (pris-ti-ôf'ô-rus), *n.* [NL., *< Gr. πριστης, a saw, + φέρειν = E. bear.*] The typical

Pristiophorus cirratus.

genus of *Pristiophoridae*, including such forms as *P. cirratus*. Müller and Henle, 1837.

Pristis (pris'tis), *n.* [NL., *< Gr. πριστης, a large fish of the whale kind, formerly supposed to be a saw-fish, < πριστης, saw.*] The only genus of *Pristidæ*, having the form elongate, with the

Sword of *Pristis pectinatus*.

snout prolonged into a toothed sword. The European saw-fish is known as *P. antiquorum*. The common American species is *P. pectinatus*, whose weapon (figured above) is about three feet long. See also cut under *saw-fish*.

pritch (prich), *n.* [An assimilated form of *prick*, *n.*] 1. Any sharp-pointed instrument. Halliwell.—2†. Pique; offense taken.

The least word uttered awry, the least conceit taken, or *pritch*. . . is enough to make suits, and they will be revenged. D. Rogers, Naaman the Syrian, p. 270.

pritch (prich), *v. t.* [An assimilated form of *prick*, *v.*] To pierce or make holes in. Halliwell. [Prov. Eng.]

Pritchardia (pri-chär'di-ä), *n.* [NL. (Seeman and Wendland, 1862), named after W. T. Pritchard, British consul in Fiji.] A genus of palms of the tribe *Corypheæ*, remarkable among palms for its persistent corolla-tube, from which the lobes fall away. It is characterized by the valvate

corolla-lobes and three-angled or three-lobed ovary, attenuated into a robust style. There are 3 or 4 species, natives of the Friendly and the Hawaiian Islands. They are moderate-sized or low palms, the trunk clad above with the sheathing bases of the leaves, and ringed below with their annular scars. They bear large terminal rounded or fan-shaped leaves, often whitened below with a mealy dust, cut into shallow and slender two-lobed segments, bearing projecting fibers on their margins. Their flowers are rather large, with a bell-shaped three-toothed calyx, and a tubular corolla bearing three thick, rigid, ovate lobes. The flowers are scattered on the stiff ascending branchlets of a long-stalked spadix, inclosed in a large, thick, and coriaceous spathe, which is tubular below and dusted over with silvery particles. In the Hawaiian Islands the leaves of *P. Gaudichaudii* afford fans and hats, and its fruit-kernels, called *hawaia*, are eaten unripe. The leaves of *P. Pacifica* in the Fijis are four feet long by three wide, and make fans and umbrellas, their use being confined to the chiefs. Some authors have proposed to unite with this genus the American palm *Washingtonia*.

pritchel (prich'el), *n.* [An assimilated form of *prickle*. Cf. *pritch*.] 1. In *farricry*, a punch employed for making or enlarging the nail-holes in a horseshoe, or for temporary insertion into a nail-hole to form a means of handling the shoe. *E. H. Knight*.—2. An iron share fixed to a thick staff, used for making holes in the ground. *Hallivell*. [Prov. Eng.]

prithce (prieth'ē), *n.* [Formerly also *prythee*, *pree-thee*; a weakened form of (*I*) *pray thee*.] A corruption of *pray thee*; I pray thee.

My soules deer Soule, take in good part (*I pree-thee*)
This pretty Present that I gladly give thee.
Sylvester, tr. of Du Bartas's Weeks, II. The Handy-Crafts.

I prithce let me go;
I shall do best without thee; I am well.
Beau. and Fl., Philaster, iv. 3.
Prithce, be forgiven, and I *prithce* forgive me too.
Fletcher, Pilgrim, v. 6.

My Love, my Life, said I, explain
This Change of Humour; *prythee* tell;
That falling Tear—what does it mean?
Prior, The Garland, st. 6.

prittlet (prit'l), *v. t.* [A weakened form of *prattle*, as in *prittle-prattle*.] To chatter.

Awe man, you *prittle* and *prattle* nothing but leasings
and untruths.
Haywood, Royal King (Works, ed. Pearson, 1874, VI. 9).

prittle-prattle (prit'l-prat'l), *n.* [A varied reduplication of *prattle*.] Empty or idle talk; trifling loquacity. [Colloq.]

Cianrogna [It.], glibish, pedlars french, rogish language, fustian toong, *prittle prattle*.
Florio.
It is plain *prittle-prattle*, and ought to be valued no more than the shadow of an ass.

Abp. Bramhall, Church of Eng. Defended (1659), p. 46.
[*Latham*.]

prius (pri'us), *n.* [Cf. *L. prius*, neut. of *prior*, being before, prior: see *prior*.] That which necessarily goes before; a precondition.

priv. An abbreviation of *privative*.

Priva (pri'vā), *n.* [NL. (Adanson, 1763); origin unknown.] A genus of erect herbs of the order *Verbenaceæ* and tribe *Verbeneæ*. It is characterized by a fruit of two nutlets, each two-celled and two-seeded, a long spike with small bracts and interrupted at the base, and an enlarged fruiting-calyx tightly including the fruit within its closed apex. The 9 species are natives of warm regions of both hemispheres. They bear opposite toothed leaves, slender spikes terminal or long-stalked in the axils, and small and somewhat two-lipped flowers which have five lobes and four short didynamous stamens. *P. echinata* of Brazil, the West Indies, southern Florida, etc., is called *stypic* or *velvet-bur*, its fruiting-calyx being bristly with small hooked hairs. *P. Lewis* of Chili and the Argentine Republic yields small edible tubers.

privacy (pri'vā-si or pri'vā-si), *n.*; pl. *privacies* (-siz). [Cf. *priva*(te) + *-cy*.] 1. A state of being private, or in retirement from the company or from the knowledge or observation of others; seclusion.

In the closet, where *privacy* and silence befriend our inquiries.
Bp. Atterbury, Sermons, I. x.

In a tumultuous *privacy* of storm.
Emerson, The Snow-Storm.

2. A place of seclusion from company or observation; retreat; solitude; retirement.

Her sacred *privacies* all open lie. *Rouse*.

3. Joint knowledge; privity. See *privity*.

You see Frog is religiously true to his bargain, scorns to hearken to any composition without your *privacy*.
Arbutnot, Hist. John Bull.

4. Taciturnity. *Ainsworth*.—5. Secrecy; concealment of what is said or done.

Of this my *privacy*
I have strong reasons.
Shak., T. and C., III. 3. 190.

There was no affectation of *privacy* in what they (Christ and his apostles) said or did; their doctrines were preached, and their miracles wrought, in broad day-light, and in the face of the world!
Bp. Atterbury, Sermons, II. 1.

6. A private or personal matter, circumstance, or relation.

What concerns it us to hear a Husband divulge his Household *privacies*, extolling to others the virtues of his Wife?
Milton, Elkonoklastes, vii.

In all my Acquaintance and utmost *Privacies* with her.
Steele, Conscious Lovers, I. 2.

privado (pri-vā'dō), *n.* [Sp., = *E. private*: see *private*.] 1. A private or intimate friend; a court favorite.

The modern languages give unto such persons the name of favourites, or *privadoes*. *Bacon*, Friendship (ed. 1887).

The Duke of Lerma was the greatest *Privado*, the greatest Favourite, that ever was in Spain since Don Alvaro de Luna.
Howell, Letters, I. iii. 11.

Lat. May I desire one favour?
F. Book. What can I deny thee, my *privado*?
Steele, Lying Lover, II. 1.

2. A private soldier or inferior (non-commissioned) officer.

Lants *privadoes*, who are Corporals' Lieutenants.
Ranks in British Army (Arber's Eng. Garner, I. 463).

privant (pri'vant), *a.* [Cf. *L. privan*(t)-s, ppr. of *privare*, deprive: see *privare*.] Noting privative opposites. See *privative*.

privat-docent (prē-vāt' dō-tsent'), *n.* [G., < *L. privatus*, private, + *docent*(t)-s, ppr. of *docere*, teach: see *private* and *docent*.] In the universities of Germany and some other countries of Europe, a teacher of the third rank: unlike professors, he has no part in the government of the university, and receives no compensation from the university, but is remunerated by fees.

private (pri'vāt), *a.* and *n.* [= *F. privé* = Sp. *privado* = It. *privato* = D. *privaat* = G. *Sw. Dan. privat*, private, < *L. privatus*, apart from what is public, pertaining to an individual, private, ppr. of *privare*, separate, deprive, release, < *privus*, single, every, one's own, private, prob. for orig. **praius*, < *prai*, older form of *pri*, before: see *pre*-. Cf. *privy*. Hence also ult. *deprive*.] 1. *a.* 1. Peculiar to, belonging to, or concerning an individual only; respecting particular individuals; personal.

Why should the *private* pleasure of some one
Become the public plague of many more?
Shak., Lucrece, I. 1478.

When was public virtue to be found,
Where *private* was not? *Cowper*, Task, v. 508.

That he (Buckingham) should think more about those
who were bound to him by *private* ties than about the
public interest . . . was perfectly natural.

Macaulay, Lord Bacon.
This (the peace policy) is not to be carried by public opinion, but by *private* opinion, by *private* conviction, by *private*, dear, and earnest love. *Emerson*, War.

The expression . . . sounded more harshly as pronounced in a public lecture than as read in a *private* letter.
O. W. Holmes, Emerson, v.

2. Kept or removed from public view; not known; not open; not accessible to people in general; secret.

O unfelt sore! crest-wounding, *private* scar!
Shak., Lucrece, I. 828.

The poor slave that lies *private* has his liberty
As amply as his master in that tomb.
Fletcher, Wife for a Month, II. 2.

Reason . . . then retires
Into her *private* cell, when nature rests.
Milton, P. L., v. 109.

The Rais gave the captain of the port a *private* hint to take care what they did, for they might lose their lives.
Bruce, Source of the Nile, I. 249.

3. Not holding public office or employment; not having a public or official character: as, a *private* citizen; *private* life; *private* schools.

Christ and his Apostles, being to civil affairs but *privat* men, contended not with Magistrates.
Milton, Elkonoklastes, xiii.

Any *private* person . . . that is present when a felony is committed is bound by the law to arrest the felon.
Blackstone, Com., IV. xxi.

4. Noting a common soldier, or one of the ordinary rank and file.

I cannot put him to a *private* soldier that is the leader of so many thousands. *Shak.*, 2 Hen. IV., III. 2. 177.

5. Being in privacy; retired from company; secluded.

Away from light steals home my heavy son,
And *private* in his chamber pines himself.
Shak., R. and J., I. 1. 144.

Cæsar is *private* now; you may not enter.
B. Jonson, Poetaster, v. 1.

I came home to be *private* a little, not at all affecting the life and hurry of Court. *Evelyn*, Diary, Jan. 18, 1662.

Sir, we are *private* with our women here.
Tennyson, Queen Mary, v. 6.

6. Privy; informed of what is not generally known.

She knew them [her sister's council of state] adverse to her religion . . . and *private* to her troubles and imprisonment.
Sir R. Naunton, Fragments Regalia.

7. Keeping privacy or confidence; secretive; reticent.

You know I am *private* as your secret wishes,
Ready to fling my soul upon your service.
Fletcher, Wife for a Month, I. 1.

Wintthrop, Hist. New England, II. 470.

8. Intimate; confidential.

If David, being a king, a Prophet, a Saint, and with God so *private*, understood not what to present unto God, . . . what shall we do?
Gusmano, Letters (tr. by Hellowes, 1677), p. 2.

What makes the Jew and Lodowick so *private*?
Marlowe, Jew of Malta, II. 2.

9. Particular; individual; special: opposed to *general*.

No prophecy of the scripture is of any *private* interpretation.
2 Pet. I. 20.

Who cries out on pride,
That can therein tax any *private* party? . . .
Who can come in and say that I mean her,
When such a one as she such is her neighbour?
Shak., As you Like it, II. 7. 71.

Private acts, bills, or statutes, those acts, etc., which concern private interests—that is, the interests of particular persons—as distinguished from measures of public policy in which the community is interested. See *bills*.—**Private attorney**. See *attorney*, 2.—**Private bank**. See *bank*, 4.—**Private baptism**. See *baptism*.—**Private carrier**. See *carrier*, 2.—**Private chapel**, a chapel attached to a private residence.—**Private corporations**, corporations created for private as distinguished from purely public purposes. Such corporations are not, in contemplation of law, public merely because it may have been supposed by the legislature that their establishment would promote, either directly or consequentially, the public interest. (*Dillon*.) Thus, a railroad company is a *private corporation*, although it takes property for public use. See *corporation*.—**Private detective**. See *detective*.—**Private international law**. See *international*.—**Private judgment**, in *theol.*, the judgment of an individual as to doctrine or interpretation of Scripture, in contradistinction to the judgment of the church.—**Private law**, that branch of the law which deals with the rights and duties of persons considered in their private or individual capacity, as distinguished from the rights and duties which are possessed by and incumbent on persons or bodies of persons considered as filling public positions or offices, or which have relation to the whole political community, or to its magistrates and officers. *Kenelm Edward Digby*, Hist. of Law of Real Prop., p. 255.—**Private legislation**, legislation affecting the interests of particular persons, as distinguished from measures of public policy in which the community is interested.—**Private mass**. See *mass*.—**Private nuisance**. See *nuisance*, 5.—**Private parts**, the organs of sex.—**Private person**, one not having or not for the time being acting in a public official capacity.—**Private property**, *private rights*, the property and rights of persons, natural or artificial, in their individual, personal, or private capacity, as distinguished from the rights of the state or public vested in a body politic or a public officer or board as such and for public use. Thus, if a city owns a building which it leases for obtaining a revenue, the property and its rights in respect thereto are deemed the *private property* of the city, as distinguished from parks, etc., and buildings in municipal use.—**Private rights of way, or private ways**, rights which belong to a particular individual only, or to a body of individuals exclusively, either for the purpose of passing generally or for the purpose of passing from a particular tenement of which they are possessed. *Goddard*.—**Private trusts**, those trusts in the maintenance of which the public have no interest.

Private Trusts are those wherein the beneficial interest is vested absolutely in one or more individuals, who are, or within a certain time may be, definitely ascertained, and to whom, therefore, collectively, unless under some legal disability, it is competent to control, modify, or determine the trust. *Bispham*, Principles of Equity, § 58.

Private war, a war carried on by individuals, without the authority or sanction of the state of which they are subjects. *Halleck*.—**Private wrong**, a civil injury; an infringement or privation of some civil right which belongs to a person considered in his private capacity. = *Syn.* 2. *Latent*, *Covert*, etc. (see *secret*), retired, secluded, isolated, sequestered.

II. *n.* 1. A person not in public life or office.

And what have kings that *privates* have not too,
Save ceremony?
Shak., Hen. V., IV. 1. 255.

2. A common soldier; one of the rank and file of an army.—3. A secret message; private information.

Pem. Who brought that letter from the cardinal?
Sal. The Count Melun, a noble lord of France;
Whose *private* with me of the Dauphin's love
Is much more general than these lines import.
Shak., K. John, IV. 3. 16.

4. Personal interest or use; particular business.

My lords, this strikes at every Roman's *private*.
B. Jonson, Sejanus, III. 1.

Our President . . . ingrossing to his *private* Omeale, Sacke, Oyle, Aquavite, Beeffe, Egges, or what not.
Quoted in *Capt. John Smith's Works*, I. 154.

5. Privacy; retirement.

Go off! . . . let me enjoy my *private*.
Shak., T. N., III. 4. 100.

In our *private* towards God being as holy and devout as if we prayed in public.

Jer. Taylor, Works (ed. 1835), I. 888.

6. *pl.* The private parts of the body.—7. In some colleges, a private admonition.—In *private*, privately; in secret; not publicly.

They do desire some speech with you *in private*.

B. Jonson, Catiline, iv. 3.

The *private*, private life of individuals, or what relates to private life: opposed to and suggested by the phrase *the public*. [Rare.]

I long to see you a history painter. You have already done enough for *the private*; do something for the public.

Pope, To Jervas, Nov. 29, 1716.

privatē (pri-vāt), *v. t.* [*L. privatus*, pp. of *privare*, strip, deprive: see *private*, *a.* Cf. *prive*.] To deprive.

They would not onely lose their worldly substance, but also be *privated* of their lives and worldly felicity, rather then to suffer Kyng Rycharde, that tyrant, leuger to rule and reygne over them.

Hall, Rich. III., f. 17. (*Halliwel*.)

privateer (pri-vā-tēr'), *n.* [*L. privatus* + *-eer*.] 1. An armed vessel owned and officered by private persons, but acting under a commission from the state usually called letters of marque. It answers to a company on land raised and commanded by private persons, but acting under regulations emanating from the supreme authority, rather than to one raised and acting without license, which would resemble a privateer without commission. (*Woolsey*, *Introductio* to *Inter. Law*, § 121.)

He is at no charge for a fleet farther than providing *privateers*, wherewith his subjects carry on a piratical war at their own expense.

Swift, Conduct of the Allies.

2. The commander of, or a man serving on board of, a privateer.

Meeting with divers Disappointments, and being out of hopes to obtain a Trade in these Seas, his Men forced him to entertain a Company of *Privateers* which he met with near Nicoya.

Dampier, Voyages, I. 187.

privateer (pri-vā-tēr'), *v. i.* [*L. privateer*, *n.*] To cruise in a privateer for the purpose of seizing an enemy's ships or annoying his commerce. Privateering was abolished by the treaty of Paris of 1856, and this article has been assented to by nearly all civilized nations; the most prominent exception is the United States.

In 1797 the United States passed a law to prevent citizens of the United States from *privateering* against nations in amity with or against citizens of the United States.

Schuyler, Amer. Diplomacy, p. 383.

privateering (pri-vā-tēr'ing), *n.* [Verbal *n.* of *privateer*, *v.*] The act or practice of cruising in a privateer for hostile purposes.

Many have felt it to be desirable that *privateering* should be placed under the ban of international law, and the feeling is on the increase, in our age of humanity, that the system ought to come to an end.

Woolsey, *Introductio* to *Inter. Law*, § 122.

privateerism (pri-vā-tēr'izm), *n.* [*L. privateer* + *-ism*.] *Naut.*, disorderly conduct, or anything out of man-of-war rules. Also called *privateer practice*. *Admiral Smyth*. [Rare.]

privateersman (pri-vā-tēr'zman), *n.*; *pl.* *privateersmen* (-men). [*L. privateer's*, poss. of *privateer*, + *man*.] An officer or seaman of a privateer.

Marquis Santa Cruz, lord high admiral of Spain, . . . looked on, mortified and amazed, but offering no combat, while the Plymouth *privateersman* [Drake] swept the harbour of the great monarch of the world.

Moley, Hist. Netherlands, II. 283.

privately (pri-vāt-li), *adv.* 1. In a private or secret manner; not openly or publicly.

And as he sat upon the mount of Olives the disciples came unto him *privately*.

Mat. xxiv. 3.

2. In a manner affecting an individual; personally: as, he is not *privately* benefited.

privateness (pri-vāt-nes), *n.* 1. Secrecy; privacy.

Knew theye how guiltless and how free I were from prying into *privateness*.

Marston, *End of Scourge of Villanie*, To him that hath (perused me).

2. Retirement; seclusion from company or society.

A man's nature is best perceived in *privateness*, for there is no affectation.

Bacon, Nature in Men (ed. 1887).

3. The state of an individual in the rank of a common citizen, or not invested with office.

Men cannot retire when they would, neither will they when it were reason, but are impatient of *privateness*, even in age and sickness, which require the shadow.

Bacon, Great Place (ed. 1887).

privation (pri-vā'shon), *n.* [*ME. privacion*, *OF. (and F.) privation* = *Sp. privacion* = *Pg. privação* = *It. privazione*, *L. privatio* (-n-), a taking away, *L. privare*, pp. *privatus*, deprive: see *private*.] 1. The state of being deprived; particularly, deprivation or absence of what is necessary for comfort; destitution; want.

Pains of *privation* are the pains that may result from the thought of not possessing in the time present any of the several kinds of pleasures.

Bentham, *Introductio* to *Morals and Legislation*, v. 17.

Maggie's sense of loneliness and utter *privation* of joy had deepened with the brightness of advancing spring.

George Eliot, Mill on the Floss, iv. 3.

2. The act of removing something possessed; the removal or destruction of any thing or any property; deprivation.

Kyng Richard had bene in greates leoparde either of *privation* of his realme, or losse of his life, or both.

Hall, Rich. III., an. 3.

3. In *logic*, a particular kind of negation consisting in the absence from a subject of a habit which ought to be, might be, or generally is in that subject or others like it.

Privation sometimes signifies the absence of the form which may be introduced upon the subject: so the *privation* of the soul may be said to be in the seed, of heat in cold water; sometimes the absence of the form which ought to be in the subject. That is a physical privation, and is numbered among the principles of generation; this is a logical. *Burgardicus*, tr. by a Gentleman, i. 22.

Whether this comparative specifying foundation be a *privation* or a mode is a philosophical controversy.

Baizer, Divine Life, i. 10.

4. The act of degrading from rank or office.

If part of the people or estate be somewhat in the election, you cannot make them nulls or cyphers in the *privation* or translation.

Bacon.

5. Technically, in the *Rom. Cath. Ch.*, the suspension of an ecclesiastic from his office, stipend, ecclesiastical functions, or jurisdiction.—*Logical privation*. See *logical*.—*Syn.* 1. Need, penury, poverty, necessity, distress.

privative (priv'a-tiv), *a.* and *n.* [= *F. privatif* = *Sp. Pg. It. privativo*, *L. L. privativus*, denoting privation, negative, *L. L. privare*, pp. *privatus*, deprive: see *private*, *v.*] 1. *a.* 1. Causing privation or destitution.

We may add that negative or *privative* will, also, whereby he withholdeth his graces from some.

Hooker, Eccles. Polity, v., App. 1.

2. Depending on or consisting in privation in the logical sense.

The very *privative* blessings, the blessings of immunity, safeguard, liberty, and integrity, which we all enjoy, deserve the thanksgiving of a whole life.

Jer. Taylor, Holy Living, II. 6.

Descartes is driven by the necessary logic of his thought to conceive all limits and differences as purely *privative*—*i. e.* as mere absence or defect of existence.

E. Caird, Philos. of Kant, p. 42.

3. In *gram.*: (a) Changing the sense of a word from positive to negative: as, a *privative* prefix; *a-* or *an-* *privative*. (b) Predicating negation: as, a *privative* word.—*Privative* connotative term, an adjective noting some privation, as "blind."—*Privative* jurisdiction. In *Socls. law*, a court is said to have *privative* jurisdiction in a particular class of causes when it is the only court entitled to adjudicate in such causes. *Imp. Dic.*—*Privative* nothing. See *nothing*.—*Privative* opposites, a habit and its privation.—*Privative* proposition, a proposition declaring a privation.

II. *n.* 1. That which depends on, or of which the essence is, the absence of something else, as silence, which exists by the absence of sound.

Blackness and darkness are indeed but *privatives*, and therefore have little or no activity.

Bacon, Nat. Hist., § 873.

2. In *gram.*: (a) A prefix to a word which changes its signification and gives it a contrary sense, as *un-* in *unwise*, *in-* in *inhuman*, *an-* in *anarchy*, *a-* in *achromatic*. (b) A word which not only predicates negation of a quality in an object, but also involves the notion that the absent quality is naturally inherent in it, and is absent through loss or some other privative cause.

privatively (priv'a-tiv-li), *adv.* 1. In a privative manner; in the manner or with the force of a privative.—2. By the absence of something; negatively. [Rare.]

The duty of the new covenant is set down first *privatively*.

Hammond.

privativeness (priv'a-tiv-nes), *n.* The condition of being privative. [Rare.]

privet, *v. t.* [*ME. priven*, *OF. privier* = *Sp. Pg. privar* = *It. privare*, *L. L. privare*, separate, deprive: see *private*, *v.* Cf. *deprive*.] To deprive.

Bretton, Daffodils and Primroses, p. 3. (*Davies*.)

privilege (priv'i-lej), *n.* [Formerly also *privilege*; *ME. privilege*, *prevetlache*, *OF. privilege*, *F. privilège* = *Sp. Pg. It. privilegio*, *L. privilegium*, an ordinance in favor of an individual, prerogative, *L. privus*, one's own, private, peculiar, + *lex*, law: see *private* and *legal*.] 1. An ordinance in favor of an individual.

Be ye our help and our protection,

Syn for meryt of your virginitee

The *privilege* of his deedecloun

In yow confirmed God upon a tree

Hanging. *Chaucer, Mother of God*, l. 122.

Privilege, in Roman jurisprudence, means the exemption of one individual from the operation of a law.

Mackintosh, Study of the Law of Nature, p. 50, note.

2. A right, immunity, benefit, or advantage enjoyed by a person or body of persons beyond the common advantages of other individuals; the enjoyment of some desirable right, or an exemption from some evil or burden; a private or personal favor enjoyed; a peculiar advantage.

As under *privilege* of age to brag
What I have done being young.

Shak., Much Ado, v. 1. 60.

It hath been an accustom'd liberty
To spend this day in mirth, and they will choose
Rather their Soules then *privileges* loose.

Times Whistle (E. E. T. S.), p. 20.

Pastures, wood-lots, mill-sites, with the *privileges*, Rights, and appurtenances which make up A Yankee Paradise.

Whittier, Bridal of Pennacook.

Specifically—(a) In the *Rom. Cath. Ch.*, an exemption or license granted by the Pope. It differs from a *dispensation* and from a *grace* in that it never refers to a single act, but presupposes and legalizes many acts done in pursuance of it, and confers on its possessor immunity in regard to every act so privileged. (b) Special immunity or advantage granted to persons in authority or in office, as the freedom of speech, freedom from arrest, etc., enjoyed by members of Parliament or of Congress. Compare *breach of privilege*, below.

The Parliament-men are as great Princes as any in the World, when whatsoever they please is *Privilege* of Parliament.

Selden, Table-Talk, p. 81.

3. An advantage yielded; superiority.

Compassion of the king commands me stoop,
Or I would see his heart out, ere the priest
Should ever get that *privilege* of me.

Shak., 1 Hen. VI., III. 1. 121.

4. In *law*: (a) A special and exclusive right conferred by law on particular persons or classes of persons, and ordinarily in derogation of the common right. Such grants were often sought to be justified on grounds of public utility, but were, to a greater or less extent, really intended to benefit the privileged person or persons.

If the printer have any great dealings with thee, he were best get a *privilege* betimes, ad imprimendum solum, forbidding all other to sell waste paper but himself.

Nashe, Pierce Penlesse, p. 46.

Our King, in lieu of Money, among other Acts of Grace, gave them a *Privilege* to pay but 1 per Cent.

Howell, Letters, I. vi. 3.

(b) The law, rule, or grant conferring such a right. (c) In the civil law, a lien or priority of right of payment, such as the artisans' privilege, corresponding to the common-law lien of a bailee or the lien under mechanics' lien-laws, carriers' privilege, inn-keepers' privilege, etc. In this sense the word is more appropriately applicable to a preference secured by law, and not to one granted by special agreement. (d) In some of the United States, the right of a licensee in a vocation which is forbidden except to licensees. (e) In modern times (since all have become generally equal before the law), one of the more sacred and vital rights common to all citizens: as, the *privilege* of the writ of habeas corpus; the *privileges* of a citizen of the United States.—5. A speculative contract covering a "put" or a "call," or both a put and a call (that is, a "straddle"). See *call*, *n.*, 15, *put*, *n.*, 6, and *straddle*, *n.*—*Breach of privilege*, violation of the

privileges specially possessed by members of legislative bodies. See the quotation.

Breach of privilege may be summarized as disobedience to any orders or rules of the House, indignities offered to its character or proceedings, assaults, insults, or libels upon members, or interference with officers of the House in discharge of their duty, or tampering with witnesses.

Sir T. Erskine May, *Encyc. Brit.*, XVIII. 311.

Conservator of the apostolic privileges. See *conservator*.—**Exclusive privilege.** See *exclusive*.—**Mixed privilege,** a privilege granted to classes of persons.—**Personal privilege,** a privilege primarily and directly granted to some person, regarded as an individual.—**Question of privilege,** in *parliamentary law*, a question arising upon the privileges or rights of an assembly or of a member of an assembly. It takes precedence of all questions except a motion to adjourn.—**Real privilege,** a privilege granted to some thing (building, place, or benefice), although indirectly extended to the persons by whom the thing is owned or enjoyed.—**Writ of privilege,** a writ to deliver a privileged person from custody when arrested in a civil suit.—**Syn. 2. Privilege, Prerogative, Exemption, Immunity, Franchise.** *Privilege* is a right to do or a right to be excused or spared from doing or bearing, this right being possessed by one or more, but not by all. *Privilege* is also more loosely used for any special advantage: as, the *privilege of intimacy* with people of noble character. *Prerogative* is a right of precedence, an exclusive privilege, an official right, a right indefeasible on account of one's character or position: as, the Stuart kings were continually asserting the royal *prerogative*, but Parliament resisted any infringement upon its *privileges*. (See definition of *prerogative*.) An *exemption* is an exception or excuse from what would otherwise be required: as, *exemption* from military service, or from submitting to examination; figuratively, *exemption* from care, from disease. *Immunity* is the same as *exemption*, except that *exemption* more often expresses the act of authority, and *immunity* expresses more of the idea of safety: as, *immunity* from harm. A *franchise* is a sort of freedom; the word has very exact senses, covering certain *privileges, exemptions, or immunities*.

privilege (priv'i-lej), *v. t.*; pret. and pp. *privileged*, pp. *privileging*. [Formerly also *privileged*; < OF. *privelegir*, F. *privilégier* = Sp. Sir, a kynge ought not to go so *prevely*, but to haue his mayne a-boute hym. *Martin* (E. E. T. S.), I. 51.

There shall be false teachers among you, who *privily* shall bring in damnable heresies. 2 Pet. II. 1.

privacy (priv'i-ti), *n.*; pl. *privacies* (-tiz). [*ME. privitee, privete, private, pryvete*, etc., < OF. *privete*, < ML. *privata* (-t), *privacy*, < L. *privus*, one's own, *private*: see *private*.] 1. Privacy; secrecy; confidence.

Ther shalowe fynde
A thyng that I have hyd in *privitee*.
Chaucer, *Summoner's Tale*, I. 443.

I will to you, in *privitee*, discover the drift of my purpose. *Spenser*, *State of Ireland*.

2. Private life; privacy; seclusion.

Then Pirrus with pyne put hym to serche
Of Polixena the pert, in *privete* holdyn,
That was cause of the cumberance of his kynd fadur.
Destruction of Troy (E. E. T. S.), I. 12078.

For all his dayes he drownes in *privitee*.
Yet has full large to live and spend at libertie.
Spenser, F. Q., III. ix. 3.

3. Intimate relation; intimacy.

With the praise of armes and chevalrie
The price of beaute still hath joynd beame;
And that for reasons specciall *privitee*,
For ether doth on other much relie.
Spenser, F. Q., IV. v. 1.

4. That which is to be kept *privy* or *private*; a secret; a private matter.

Blamed hymself for he
Hadde told to me so greet a *privitee*.
Chaucer, *Prolog* to *Wife of Bath's Tale*, I. 542.

To signify unto your grace, besides our common letters, also with these my private letters the *privities* of my heart and conscience in that matter.

Bp. Ridley, in *Bradford's Works* (Parker Soc., 1853), II. 370.

5. Private knowledge; joint knowledge with another of a private concern, which is often supposed to imply consent or concurrence.

I had heard of his intending to steal a marriage without the *privitee* of us his intimate friends and acquaintance. *Steele*, *Spectator*, No. 153.

This marriage . . . brought upon Garcilasso, in consequence of his *privitee*, the displeasure of the Emperor. *Tucknor*, *Span. Lit.*, I. 448.

6. *pl.* The private parts. *Abb. Abbot*.—7. *In law*: (a) That relation between different interests of several persons in the same lands which arises under feudal tenures. All the various estates, less than a fee simple absolute, were regarded as so many parts of entire title, and the persons among whom such partial interests were distributed were said to stand in *privitee* or in *privitee* of estate to each other. If the interests belonging to one of such persons devolved either by act of law, as in the case of his death intestate, or by act of the parties, as in the case of a conveyance, upon a third person, that person was thereby brought into *privitee* with him and the others. In the former case he was said to be *privy in law*, in the latter case *privy in deed*, each of these being only species of *privitee* in estate. Upon the same principle, whenever several lesser estates were carved out of a larger, as by grant of a qualified interest or life estate leaving a remainder or reversion in the grantor, the parties were termed *privies*. (b) More loosely, since the abrogation of tenure, any joint, separate, or successive interest affecting the same realty is deemed to constitute a *privitee* between the parties in interest. Thus, if B inherits land from A, there is *privitee* of estate between them, and if C inherits the same land from B, the *privitee* extends to him, so that B and C may be both bound in respect to the land by whatever bound A. (c) In the law of obligations, the mutual relationships between contractor and contractee, and either of them and a third person claiming under the contract, which result from the existence of the contract. Thus, if A gives his note to B, and B separately gives his note to C, there is *privitee* of contract between A and B, and also between B and C, but none between A and C. But if A gives his note to B, and B indorses it over to C, there is *privitee* of contract among all. (d) In the law of contracts and torts, the legal relation consequent on joint or common knowledge and concurrence, particularly in respect to a breach of contract, a tort, or a wrong.—*Privitee of tenure*, the relation subsisting between a lord and his immediate tenant.

privy (priv'i), *a.* and *n.* [*ME. privy, privee, prive, privet, pryve, pryve, preve, OF. prive, F. privé* = Sp. Pg. It. *privado*, private, < L. *privatus*, apart from the public, private; see *private*, *a.*, of which *privy* is a doublet.] 1. *a.* 1. II. *n.*; pl. *privies* (-iz). 1. In *law*, one standing in a relation of *privitee* to another. See *privitee*, 7. (a) A partaker; a person having a joint or common knowledge, right, or responsibility. More specifically—(b) One bound by an obligation irrespective of his being a party to it; one bound or entitled in respect to an estate irrespective of his having been a party to the transaction by which it was created. The term *privy* is properly used in distinction from *party*; but *privies to a contract* is used to mean the parties themselves. *Stimson*.

2. A secret friend.—3. A necessary.

privy-fly (priv'i-flī), *n.* A fly of the family *Anthomyiæ*, *Homalomyia scalaris*, whose larva is usually found in human excrement. It is probably indigenous in Europe, though also found in North America. See cut under *Homalomyia*.

prix (prē), *n.* [F.: see *price*.] A premium; a prize; specifically, the stakes or cup in a French horse-race or other sporting event: used by English writers in such phrases as *grand prix* and *prix de Rome* (in French national competitions in the fine arts).

prizable (pri'zə-bl), *a.* [*prizee* + *-able*.] Valuable; worthy of being prized. Also spelled *prizeable*.

The courage of the tongue

Discreetly used, a *prizable* possession.
Sir H. Taylor, *St. Clement's Eve*, I. 1.

prizaget, *n.* See *prisage*.

prizallt, *n.* See *prisal*.

prize (priz), *n.* and *a.* [Formerly also *prise*; < *ME. prise*, < OF. *prise*, a taking, capture, a seizure, a thing seized, a prize, booty, also hold, purchase (= It. *presa*), < F. *prise*, < *pris*, pp. of *prendre*, take, capture, < L. *prehendere*, *prehendere*, take, seize: see *prehend*. Cf. *prizee*, *prison*, etc., *apprize*, *comprise*, *enterprise*, *purprise*, *reprisal*, *surprise*, etc. *Prizee* and *prizee* have been in some senses more or less confused.] 1. *n.* 1. A taking or capture, as of the property of an enemy in war.

His leg, through his late luckelesse *prise*,
Was crackt in twaine. *Spenser*, F. Q., VI. viii. 25.

2. In *hunting*, the note of the horn blown at the capture or death of the game.

Syr Eglamour hase done to dede
A grete herte, and tane the hede;
The *pryse* he blew full schillie.
MS. Lincoln A. 17, f. 140. (*Halliwel*.)

Aim'd well, the Chieftain's lance has flown;
Struggling in blood the savage lies;
His roar is sunk in hollow groan—
Sound, merry huntman! I sound the *pryse*!
Scott, *Cadyow Castle*.

3. That which is taken from an enemy in war; any species of goods or property seized by force as spoil or plunder; that which is taken in combat, particularly a ship with the property taken in it. The law as to prizes is regulated by the general law of nations. Prizes taken in war are condemned (that is, sentence is passed that the thing captured is lawful prize) by the proper judicature in the courts of the captors, called *prize-courts*.

And when the saunes were thus disconfit and fledde,
the kynge Vrien and his peple gedereyd vp that was lefte therof . . . grete richesse, . . . the richest *prize* that euer was seyn. *Martin* (E. E. T. S.), II. 240.

I have made, mother,
A fortunate voyage, and brought home rich *prize*
In a few hours. *Fletcher*, *Spanish Curate*, I. 2.

The distinction between a *prize* and booty consists in this, that the former is taken at sea and the latter on land. *Bouvier*.

4. In *early Eng. law*, a seizure or the asserted right of seizure of money or chattels by way of exaction or requisition for the use of the crown; more specifically, a toll of that nature exacted on merchandise in a commercial town.—5. That which is obtained or offered as the re

ward of exertion or contest: as, a *prize* for Latin verses.

I'll never wrestle for the *prize* more.

Shak., As you Like it, I. 1. 168.

At every shot the *prize* he got,

For he was both sure and dead.

Robin Hood and the Golden Arrow (Child's Ballads, V. 386).

You love

The metaphysics! read and earn our *prize*,

A golden brooch.

Tennyson, Princess, III.

6. That which is won in a lottery, or in any similar way.

The word lottery . . . may be applied to any process of determining *prizes* by lot.

Encyc. Brit., XV. 11.

7. A possession or acquisition which is prized; any gain or advantage; privilege.

It is war's *prize* to take all vantages.

Shak., 3 Hen. VI., I. 4. 59.

The lock, obtain'd with guilt, and kept with pain,

In every place is sought, but sought in vain;

With such a *prize* no mortal must be blest.

Pope, R. of the L., v. 111.

8†. A contest for a reward; a competition.

Like one of two contending in a *prize*.

Shak., M. of V., III. 2. 142.

And now, as it were, a *Prize* began to be played between the two Swords, the Spiritual and the Temporal.

Baker, Chronicles, p. 73.

Maritime prize, a prize taken by capture on the high seas.—To play *prizes*, to fight publicly for a prize; hence, figuratively, to contend only for show.

He is my brother that plays the *prizes*.

B. Jonson, Cynthia's Revels, v. 2.

By their endless disputes and wranglings about words and terms of art, they [the philosophers] made the people suspect they did but play *prizes* before them.

Stillingfleet, Sermons, II. III.

II. a. 1. Worthy of a prize; that has gained a prize.

A lord of fat *prize* oxen and of sheep.

Tennyson, Princess, Conclusion.

2. Given or awarded as a prize: as, a *prize* cup.

prize¹ (priz), *v. t.*; pret. and pp. *prized*, ppr. *prizing*. [*prize¹*, *n.*] 1†. To risk or venture. *Davies*.

Thou'rt worthy of the title of a squire,

That durst, for proof of thy affection,

And for thy mistress' favour, *prize* thy blood.

Greene, Friar Bacon, p. 175.

2. To make a prize of; capture; seize.

In the British House of Commons it was explained that the David J. Adams was *prized* for concealing her name and her sailing-port.

The American, XII. 67.

prize² (priz), *v. t.*; pret. and pp. *prized*, ppr. *prizing*. [*ME. prysen*, <OF. (and F.) *priser*, set a price or value on, esteem, value, < *pris*, price, < L. *pretium*, price, value: see *price*. Cf. *praise*, *appraise*, *apprize*.] 1. To set or estimate the value of; rate.

Having so swift and excellent a wit

As she is *prized* to have.

Shak., Much Ado, III. 1. 90.

2. To value highly; regard as of great worth; esteem.

Whoe'er excels in what we *prize*

Appears a hero in our eyes.

Swift, Cadogan and Vanessa, I. 733.

Gold is called gold, and dross called dross, I' the Book; Gold you let lie, and dross pick up and *prize*!

Browning, Ring and Book, II. 254.

3. To favor or ease (an affected limb), as a horse. *Halliwel*. [Prov. Eng.]—*Syn.* 1. To appraise.—2. Value, Esteem, etc. See *appraise*.

prize^{2†} (priz), *n.* [*prize²*, *v.* Cf. *price*, *n.*] Estimation; valuation; appraisement.

Cæsar's no merchant, to make *prize* with you

Of things that merchants sold.

Shak., A. and C., v. 2. 183.

prize³ (priz), *v. t.*; pret. and pp. *prized*, ppr. *prizing*. [Also *prise*; < *prize³*, *n.* Hence, by confusion, *pry²*.] To force or press, especially force open by means of a lever, as a door, etc.

Taking a marling-spike hitch over a marling-spike, and with the point *prizing* it against the rope until the service is taut.

Lucie, Seamanship, p. 48.

When I gently *prized* up the anther-case at its base or on one side, the pollenium was ejected.

Darwin, Fertile of Orchids by Insects, p. 216.

prizeable, *a.* See *prizable*.

prize-bolt (priz'bôlt), *n.* A projection on a gun-carriage for a handspike to hold by in raising the breech. [Eng.]

prize-court (priz'kôrt), *n.* A court whose function it is to adjudicate on captures made at sea.

prize-fight (priz'fit), *n.* A pugilistic encounter or boxing-match for a prize or wager.

prize-fighter (priz'fî'tèr), *n.* One who fights another with his fists for a wager or reward; a professional pugilist or boxer.

prize-fighting (priz'fî'ting), *n.* Fighting, especially boxing, in public for a reward or stake. It prevails in Great Britain, the United States, and in the British possessions; in most of its forms and in most localities it is illegal. Prize-fighting is conducted generally under one of two codes of rules—the London prize-ring rules and the Marquis of Queensberry rules. The fighting is either with bare knuckles or with light gloves.

prizeless† (priz'les), *a.* [*prize²* + *-less*. Cf. *priceless*.] Inestimable; priceless.

Oh, mediocrity,

Thou *prizeless* jewel only mean men have,

But cannot value.

Fletcher (and another), Queen of Corinth, III. 1.

prize-list (priz'list), *n.* 1. A detailed list of the winners in any competition for prizes, as a school examination or a flower-show.—2. *Naut.*, a return of all the persons on board entitled to receive prize-money at the time a capture is made.

prizeman (priz'man), *n.*; pl. *prizemen* (-men). [*prize¹* + *man*.] The winner of a prize.

prize-master (priz'mas'tèr), *n.* A person put in command of a ship that has been made a prize.

prize-money (priz'mun'î), *n.* Money paid to the captors of a ship or place where booty has been obtained, in certain proportions according to rank, the money divided being realized from the sale of the prize or booty.

prizer (priz'èr), *n.* [Formerly also *priser*; < *prize²*, *v.*, + *-er*.] 1. One who estimates or determines the value of a thing; an appraiser.

But value dwells not in particular will;

It holds his estimate and dignity

As well wherein 'tis precious of itself

As in the *prizer*. *Shak.*, T. and C., II. 2. 56.

2. One who competes for a prize, as a prize-fighter, a wrestler, etc.

Why would you be so fond to overcome

The bonny *prizer* of the humorous duke?

Shak., As you Like it, II. 3. 8.

Appareath no man yet to answer the *prizer*!

B. Jonson, Cynthia's Revels, v. 2.

As if a cloud enveloped him while fought

Under its shade grim *prizers*, thought with thought

At dead-lock. *Browning*, Sordello.

prize-ring (priz'ring), *n.* A ring or inclosed place for prize-fighting; also, sometimes, the practice itself. The ring has now become an area eight yards square, inclosed by poles and ropes. It probably derived its name from the fact that the combatants originally fought in a ring formed by the onlookers.

It was lately remarked . . . that we take our point of honour from the *prize-ring*; but we do worse—we take our point of honour from beasts.

H. Spencer, Study of Sociol., p. 183.

p. r. n. An abbreviation of the Latin phrase *pro re nata*, as occasion may require.

pro (prô). [*L. pro*, before, in front of, for, etc.: see *pro-*.] A Latin preposition occurring in several phrases used in English.—**Pro and con**, for Latin (New Latin) *pro et con*, abbreviation of *pro et contra*, for and against; hence, as a quasi-noun, in plural *pros and cons*, the arguments or reasons for and against a proposition or opinion; and (rarely) as a verb, to weigh or consider impartially.

Grand and famous scholars often

Have argu'd *pro and con*, and left it doubtful.

Ford, Fancies, III. 3.

A man in soliloquy reasons with himself, and *pro's and con's*, and weighs all his designs.

Congreve, Double Dealer, Ep. Ded.

My father's resolution of putting me into breeches . . . had . . . been *pro'd and con'd*, and judicially talked over betwixt him and my mother, about a month before.

Sterne, Tristram Shandy, VI. 16.

They do not decide large questions by casting up two columns of *pros and cons*, and striking a balance.

pro-. [*I. F. Sp. Pg. It. pro-*, < *L. pro-* (*prô-* or *prô-*), prefix, *prô*, adv. and prep., before, in front of, in favor of, for the benefit of, in place of, for, in proportion, in conformity with, etc., = *Gr. pró*, before, for, etc., *pro-* prefix, = *Skt. pra*, before; cf. *L. por-*, *po-*, collateral forms; *Gr. próg*, before, forth, from, etc. (see *pros-*); akin to *E. for-*, *fore-*, *q. v.* 2. *F.*, etc., *pro-*, < *L. pro-*, < *Gr. pro-* prefix, before, etc., like the cognate *L. pro-*: see above.] A prefix of Latin or Greek origin, meaning 'before,' 'in front,' 'fore,' 'forth,' 'forward.' In some words, as *procon-*, *proprætor*, *pronoun*, etc., it is properly the preposition (*L. pro*, for, instead of).

proa (prô'ä), *n.* [Also *prau*, *prahu*, and formerly *proe*, *pron*, also *prau* (as Malay); < Malay *präu*, a proa (a general term for all vessels between a canoe and a square-rigged vessel).] A kind of Malay vessel remarkable for swiftness, former-

ly much used by pirates in the Eastern Archipelago. Proas are found chiefly within the region of the trade-winds, to which by their construction they are peculiarly adapted; for, being formed with stem and stern equally sharp, they never require to be turned round in order to change their course, but sail equally well in either

direction. The lee side is flat and in a straight line from stem to stern, and acts as a lee-board or center-board; but the weather side is rounded as in other vessels. This shape, with their small breadth, would render them very liable to heel over, were it not for the outrigger, which is used on either side or on both. The proa is fastened together with coir yarns, is extremely light, and carries an enormous triangular sail. Also called *flying proa*.

They [the Dutch] have *Proes* of a particular neatness and curiosity. We call them Half-moon *Proes*, for they turn up so much at each end from the water that they much resemble a Half-moon with the Horns upwards.

Dampier, Voyages, II. I. 5.

I spied, where she pointed, the reedy booms and buoyant outriggers of freebooting *proas* lurking in cunning coves.

J. W. Palmer, Up and Down the Irrawaddi, p. 29.

proacht (prôch), *v. i.* [Early mod. E. *proch*; < OF. *prochier*, come near: see *approach*.] To approach.

Friday, the v Day of februaril, *proched* nye the Cyte of Corfew.

Torkington, Diarie of Eng. Travell, p. 61.

proal (prô'al), *a.* [*Gr. pró*, before, + *-al*.] Directed or moved forward, as the lower jaw in the act of chewing: as, the *proal* mode of mastication, in which the food is acted on as the lower jaw pushes forward: opposed to *palinal*. See *propalinal*. *E. D. Cope*.

pro-amnion (prô-am'ni-on), *n.* [*Gr. pró*, before, + *E. amnion*.] The primitive amnion of some animals, succeeded by the definitive amnion in a later stage of the embryo.

pro-amniotic (prô-am-ni-ot'ik), *a.* Of or pertaining to the pro-amnion; characterized by or provided with a pro-amnion.

Long after the true amnion has been quite completed the head gradually emerges from this *pro-amniotic* pit.

proanaphoral (prô-an-af'ô-ral), *a.* [*Gr. pró*, before, + *anáphorá*, anaphora: see *anaphora*, 3.] *Eccles.*, in liturgies, preceding the anaphora (which see): applied to so much of the eucharistic office as precedes the Sursum Corda.

In every Liturgical family there is one *Liturgy* (or at most two) which supplies the former or *proanaphoral* portion to all the others.

J. M. Neale, Eastern Church, I. 319.

pro and con. See *pro*.

proangiosperm (prô-an'ji-ô-spér'm), *n.* [*Gr. pró*, before, + *E. angiosperm*.] An archaic or ancestral angiosperm; the ancestral form or forms from which the modern angiosperms are supposed to have been developed. They may be known only in the fossil state, or may be manifested by rudiments of once functional organs or parts in living angiosperms.

The ancestral *pro-angiosperms* are supposed to have borne leaves such as are found diminished or marked in so many of their existing descendants.

Nature, XXXIII. 389.

proangiospermic (prô-an'ji-ô-spér'mik), *a.* [*Gr. proangiosperm* + *-ic*.] In bot., pertaining to or resembling a proangiosperm.

Plants in their *pro-angiospermic* stage.

Nature, XXXIII. 389.

Proarthri (prô-är'thri), *n. pl.* [*NL.*, < *Gr. pró*, before, + *arthron*, joint.] One of four suborders of existing *Squali*, or sharks, represented only by the *Heterodontidae*, having the palatoquadrate apparatus articulated by an extensive surface with the preorbital region of the skull: correlated with *Opistharthri*, *Anarthri*, and *Rhinæ*. *T. Gill*.

proarthrous (prô-är'thrus), *a.* In *ichth.*, pertaining to the *Proarthri*, or having their characters.

proatlas (prō-at'las), *n.* [NL., < L. *pro*, before, + NL. *atlas*: see *atlas*, 3.] A rudimentary vertebrate which in some animals precedes the atlas proper. *Encyc. Brit.*, XX. 447. [Rare.]

proaulion (prō-ā'li-on), *n.* [Gr. *προαύλιον*, a court, a vestibule, < *προ*, before, + *αὐλή*, a court, a hall, a chamber: see *aula*.] In the early church and in the Greek Church, the porch of a church. In Greek churches the proaulion is a porch at the west end of a church, open on three sides and of the same width as the narthex, into which it opens.

The *Proaulion*, or porch, is . . . sometimes a lean-to against the west end of the narthex, but oftener it forms with the narthex one lean-to against the west end of the nave. *J. M. Neale*, *Eastern Church*, I. 215.

probabiliorism (prob-a-bil'i-or-izm), *n.* [NL. **probabiliorismus*, < L. *probabilior*, compar. of *probabilis*, probable: see *probable*.] In *Rom. Cath. theol.*, the doctrine that it is lawful to act in a certain manner only when there is a more probable opinion in favor of such action than against it, so that when there are two equally probable opinions, one for and the other against liberty of action, it is not lawful to accept the former opinion and follow one's inclinations. See *probabilism*, *probabilist*.

probabiliorist (prob-a-bil'i-or-ist), *n.* [NL. **probabiliorista*, < L. *probabilior*, compar. of *probabilis*, probable: see *probable*.] One who holds to the doctrine of probabiliorism.

Probabiliorists, who hold that the law is always to be obeyed unless an opinion clearly very probable (*probabilior*) is opposed to it. *Encyc. Brit.*, XIV. 632.

probabilis causa (prō-bab'i-lis kâ'zâ), [L.: see *probable* and *cause*.] A probable cause.—*Probabilis causa litigandi*, in *Scots law*, plausible ground of action or defense.

probabiliam (prob'a-bil-izm), *n.* [= F. *probabilisme* = Sp. Pg. It. *probabilismo* = G. *probabilismus*, < NL. *probabilismus*, < L. *probabilis*, probable: see *probable*.] In *Rom. Cath. theol.*, the doctrine that when there are two probable opinions, each resting on apparent reason, one in favor of and the other opposed to one's inclinations, it is lawful to follow the probable opinion which favors one's inclination. See *probabiliorism*, *probabilist*.

The working of the principle known as *Probabiliam*. The meaning of this principle . . . is simply this: when a doubt arises as to the binding force of some divine or human precept in any given case, it is permissible to abandon the opinion in favour of obedience to the law—technically known as "safe" (*tuta*) opinion—for that which favours non-compliance, provided this laxer opinion be "probable." And by "probable" is meant any judgment or opinion based on some reasonable grounds, though with some doubt that the opposite view is perhaps the true one (Gury, *Theol. Mor.*, L. n. 51).

Encyc. Brit., XIV. 632.

probabilist (prob'a-bil-ist), *n.* [= F. *probabiliste* = Sp. Pg. It. *probabilista* = G. *probabilist*, < NL. *probabilista*, < L. *probabilis*, probable: see *probable*.] 1. One who holds the doctrine of probabilism.—2. One who maintains that certainty is impossible, and that probability alone is to govern faith and practice.

probability (prob-a-bil'i-ti), *n.*; pl. *probabilities* (-tiz). [= F. *probabilité* = Sp. *probabilidad* = Pg. *probabilidade* = It. *probabilità*, < L. *probabilis* (-tis), probability, credibility, < *probabilis*, probable, credible: see *probable*.] 1. The state or character of being probable; likelihood; appearance of truth; that state of a case or question of fact which results from superior evidence or preponderation of argument on one side, inclining the mind to receive that as the truth, but leaving some room for doubt.

Thus, first traditions were a proof alone,
Could we be certain such they were, so known;
But, since some flaws in long descent may be,
They make not truth, but probability.

Dryden, *Religio Laici*, I. 345.

Probability is nothing but the appearance of such an agreement or disagreement, by the intervention of proofs whose connection is not constant, . . . but is or appears for the most part to be so. . . . In which case the foundation of his assent is the probability of the thing, the proof being such as for the most part carries truth with it. . . . so that that which causes his assent to this proposition is the wonted veracity of the speaker in other cases.

Locke, *Human Understanding*, IV. xv. § 1.

2. Quantitatively, that character of an argument or proposition of doubtful truth which consists in the frequency with which like propositions or arguments are found true in the course of experience. Thus, if a die be thrown, the probability that it will turn up ace is the frequency with which an ace would be turned up in an indefinitely long succession of throws. It is conceivable that there should be no definite probability: thus, the proportion of aces might so fluctuate that their frequency in the long run would be represented by a diverging series. Yet even so, there would be approximate probability for short periods of time.

All the essential features of probability are exhibited in the case of putting into a bag some black beans and some white ones, then shaking them well, and finally drawing out one or several at random. The beans must first be shaken up, so as to assimilate or generalize the contents of the bag; and a similar result must be attained in any case in which probability is to have any real significance. Next, a sample of the beans must be drawn out at random—that is, so as not to be voluntarily subjected to any general conditions additional to those of the course of experience of which they form a part. Thus, out-of-the-way ones or uppermost ones must not be particularly chosen. This random choice may be effected by machinery, if desired. If, now, a great number of single beans are so taken out and replaced successively, the following phenomenon will be found approximately true, or, if not, a prolongation of the series of drawings will render it so: namely, that if the whole series be separated into parts of two fixed numbers of drawings, say into series of 100 and of 10,000 alternately, then the average proportion of white beans among the sets of 100 will be nearly the same as the average proportion among the sets of 10,000. This is the fundamental proposition of the theory of probabilities—we might say of logic—since the security of all real inference rests upon it. The greater the frequency with which a specific event occurs in the long run, the stronger is the expectation that it will occur in a particular case. Hence, probability has been defined as the degree of belief which ought to be accorded to a problematical judgment; but this *conceptualistic probability*, as it is termed, is strictly not probability, but a sense of probability. Probability may be measured in different ways. The conceptualistic measure is the degree of confidence to which a reason is entitled; it is used in the mental process of balancing reasons pro and con. The conceptualistic measure is the logarithm of another measure called the *odds*—that is, the ratio of the number of favorable to the number of unfavorable cases. But the measure which is most easily guarded against the fallacies which beset the calculation of probabilities is the ratio of the number of favorable cases to the whole number of equally possible cases, or the ratio of the number of occurrences of the event to the total number of occasions in the course of experience. This ratio is called the *probability* or *chance* of the event. Thus, the probability that a die will turn up ace is $\frac{1}{6}$. Probability *zero* represents impossibility; probability *unity*, certainty. The fundamental rules for the calculation of probabilities are two, as follows: *Rule I.* The probability that one or the other of two mutually exclusive propositions is true is the sum of the probabilities that one and the other are true. Thus, if $\frac{1}{2}$ is the probability that a die will turn up ace, and $\frac{1}{2}$ is the probability that it will turn up an even number, then, since it cannot turn up at once an ace and an even number, the probability that one or other will be turned up is $\frac{1}{2} + \frac{1}{2} = 1$. It follows that if $\frac{1}{2}$ is the probability that any event will happen, $1 - \frac{1}{2}$ is the probability that it will not happen. *Rule II.* The probability of an event multiplied by the probability, if that event happens, that another will happen, gives as product the probability that both will happen. Thus, if a die is so thrown that the probability of its not being found is $\frac{1}{2}$, then the probability of its being found ace up is $\frac{1}{2} \times \frac{1}{6} = \frac{1}{12}$. If the probability that a certain man will reach the age of forty is $\frac{1}{2}$, and the probability, when he is forty, that he will then reach sixty is $\frac{1}{2}$, then the probability now that he will reach sixty is $\frac{1}{4}$. If two events A and B are such that the probability of A is the same whether B does or does not happen, then, also, the probability of B is the same whether A does or does not happen, and the events are said to be *independent*. The probability of the concurrence of two independent events is the product of their separate probabilities. The probability that a general event, whose probability on each one of n occasions is $\frac{1}{2}$, should occur just k times among these n occasions, is equal to the term containing p^k in the development of $(p + q)^n$, where $q = 1 - p$. Thus, suppose the event is the appearance of head when a coin is tossed up, so that $p = q = \frac{1}{2}$, and the coin be tossed up six times. Then the probabilities of 0, 1, 2, 3, 4, 5, 6 heads respectively are $\frac{1}{64}, \frac{6}{64}, \frac{15}{64}, \frac{20}{64}, \frac{15}{64}, \frac{6}{64}, \frac{1}{64}$. The most probable value of k is that whole number next less than $(n + 1)p$, unless this be itself a whole number, when it is equally probable. When the number of trials is large, the probabilities of the different numbers of occurrences of the given event are proportional to areas included between the so-called probability curve, its asymptote, and ordinates at successive distances equal to $1/\sqrt{2npq}$. This probability curve, whose equation is $y = \frac{1}{\sigma\sqrt{2\pi}} e^{-\frac{1}{2}\sigma^2 x^2}$ (where σ is the circumference for unit diameter, and σ is the Napierian base), is represented in the figure, where the approximate straightness

of the slope will be remarked. If it is desired to ascertain the probability of the occurrence from k_1 to k_2 times inclusive in n trials of an event whose probable occurrence at each trial is $\frac{1}{2}$, the approximate value is the area included between the probability curve, the asymptote, and the two ordinates, for which

$$x = \frac{k_1 - (n + 1)p}{\sqrt{2npq}} \text{ and } x = \frac{k_2 + 1 - (n + 1)p}{\sqrt{2npq}}$$

Twice the quadratures of the areas are given in treatises on probabilities as tables of the theta function of probabilities. The chief practical application of probability is to insurance; and its only significance lies in an assurance as to the average result in the long run. The theory of probability is to be regarded as the logic of the physical sciences.

3. Anything that has the appearance of reality or truth.

Both the rocks and the earth are so splendid to behold that better judgements than ours might have been persuaded they contained more than probabilities.

Quoted in *Capt. John Smith's Works*, I. 115.

4. A statement of what is likely to happen; a forecast: applied in the plural by Cleveland Abbe to his daily weather-predictions in Cincinnati in 1869, and subsequently adopted by General Myer to designate the official weather-forecasts of the United States Signal Service. The same term had been similarly used by Leverrier in Paris since 1859.

The whole system [of meteorological predictions] is excellently organized and very extensive; the official publications embrace the probabilities and the so-called weather-maps. *Pop. Sci. Mo.*, XXIX. 546.

Antecedent probability. See *antecedent*.—**Balance of probabilities.** See *balance*.—**Calculus of probability.** A branch of mathematics teaching how to calculate probabilities by general methods.—**Curve of probability.** See above.—**Inverse probability.** The probability of a hypothesis as deduced from the comparison of its consequences with observation. Thus, the following is a familiar problem of inverse probability: Suppose a bag contains a series of tickets numbered consecutively from 1 up. Suppose a ticket is drawn at random, and its number is 13, what is the most probable number of tickets in the bag? The best opinion concerning inverse probability seems to be that it is altogether fallacious, unless the antecedent probability of the hypothesis is known. Some writers hold that the probability of a proposition about which we are completely ignorant is $\frac{1}{2}$; others hold that it is indeterminate.—**Local probability.** See *local*.—**Old Probabilities.** See *old*.

probable (prob'a-bl), *a.* and *n.* [F. *probable* = Sp. *probable* = Pg. *provavel* = It. *probabile*, < L. *probabilis*, that may be proved, credible, < *probare*, test, examine: see *probe*, *proce*.] 1. *a.* 1. Capable of being proved; provable.

It is doubtlessly probable that women are nature's pride, virtue's ornaments. *Ford*, *Honour Triumphant*.

It ought to be a total fast from all things during the solemnity, unless a *probable* necessity intervene.

Jer. Taylor, *Holy Living*, iv. 5.

No man . . . is properly a heretic . . . but he who maintains traditions or opinions not *probable* by scripture. *Milton*, *Civil Power*.

2. Having more evidence for than against, or evidence which inclines the mind to belief, but leaves some room for doubt; likely.

I do not say that the principles of religion are merely *probable*, I have before asserted them to be morally certain. *Bp. Watkins*.

That is accounted *probable* which has better arguments producible for it than can be brought against it. *South*.

I made up a story as short and *probable* as I could, but concealed the greatest part.

Swift, *Gulliver's Travels*, III. 11.

Chaucer . . . makes it possible, and even *probable*, that his motley characters should meet on a common footing.

Lowell, *Study Windows*, p. 284.

3. Rendering something likely, or showing it to be likely: as, *probable* evidence; a *probable* presumption. *Blackstone*.—4. Plausible; specious; colorable.

Make this haste as your own good proceeding,
Strengthen'd with what apology you think
May make it *probable* need.

Shak., *All's Well*, II. 4. 52.

Probable cause. See *cause*.—**Probable error**, in *astron.* and *physics*. When the value of any quantity or element has been determined by means of a number of independent observations every one liable to a small amount of accidental error, the determination will also be liable to some uncertainty, and the *probable error* is the quantity which is such that there is the same probability of the difference between the determination and the true absolute value of the thing to be determined exceeding or falling short of it. But it is to be remarked that, as so defined, the constant error belonging to all observations of the given series is not included in the probable error.—**Probable evidence**, evidence distinguished from demonstrative evidence in that it admits of degrees, and of all variety of them, from the highest moral certainty to the very lowest presumption.—**Probable inference.** See *inference*.—**Probable proposition.** See *proposition*.—**Syn. 2.** Presumable, credible, reasonable.

II. *n.* A probable opinion; an opinion resting upon good but not sufficient grounds.

The casuists' doctrine of *probables*, in virtue of which a man may be probabiliter obligatus and probabiliter deobligatus at the same time.

Lowell, *Among my Books*, 2d ser., p. 264.

probably (prob'a-bli), *adv.* 1. With probability; in a probable manner; in all likelihood; with the appearance of truth or reality; likely: as, the story is *probably* true; the account is *probably* correct.

Distinguish betwixt what may possibly and what will *probably* be done. *Sir R. L. Estrange*.

2†. Plausibly; with verisimilitude.

Those that held religion was the difference of man from beasts have spoken *probably*.

Sir T. Browne, Religio Medici, l. 20.

Call this a Mede, and that a Parthian youth;

Talk *probably*; no matter for the truth.

Dryden, tr. of Ovid's *Art of Love*, l. 260.

probab† (prō'bāl), *a.* [*L. proba*, *prob*, + *-al*.] Probable.

This advice is free I give, and honest,
Probal to thinking, and indeed the course
To win the Moor again. *Shak.*, *Othello*, II. 3. 344.

probability† (prō-bal'i-ti), *n.* [*Appar. < probal + -ity*; but *prob.* an error for *probability*.] Probability.

[After describing a far-fetched derivation for the name *Brigantes*.] But if such a conjecture may take place, others might with as great *probability* derive them from the Brigantes of Britaine.

Holland, tr. of Camden, II. 84. (*Davies*.)

probang (prō'bang), *n.* In *surg.*, a long and slender elastic rod of whalebone, with a piece of sponge attached to one end, or other similar instrument, for introduction into the esophagus or larynx, as for the application of remedies or the removal of foreign bodies.

probate (prō'bāt), *a.* and *n.* [*L. probatus*, pp. of *probare*, test, examine, judge of: see *probe*, *prove*.] 1. *a.* 1†. Proved; approved.

The very true & *probate* assercyons of hystoryal men touchyng and concernyngs thantyquytes of thounourable monastery of oure lady in Glastenbury.

Joseph of Arimathe (E. E. T. S.), p. 27.

2. Relating to the proof or establishment of wills and testaments: as, *probate* duties.—**Probate Act**, an English statute, also called the *Court of Probate Act*, 1857 (20 and 21 Vict., c. 77), abolishing the jurisdiction of ecclesiastical and other courts in matters of probate of wills and administration, and vesting it in a new Court of Probate, whose authority was increased by the Confirmation and Probate Act, 1858 (21 and 22 Vict., c. 56), and the Court of Probate Act, 1858 (id., c. 96).—**Probate courts**, the general name given in American law to courts having jurisdiction of probate and administration. Often more specifically called *orphans' courts*, *surrogate courts*, etc.—**Probate judge**. See *Judge*.

II. *n.* 1†. Proof.

Macrobius, that did treat
Of Scipion's dreame what was the treu *probate*.

Skelton, Garland of Laurel, l. 368.

2. In law, official proof of a will. (*a.*) The determination of the court before which a will is propounded that the paper is the last will and testament of the deceased, and its admission thereupon to record as such. It determines or implies that the instrument is genuine, and regular in form and execution, and that the testator was competent to make a will, but not usually that the provisions of the will are valid. (*b.*) A copy of the will so proved, authenticated by the court, usually under its seal, and with a certificate that it has been proved, etc.—**Probate in common form**, a summary probate granted in some jurisdictions on production of the will with an affidavit, when there is no contest: as distinguished from *probate in solemn form*, or by litigation on issues or opportunity for contest.

probate-duty (prō'bāt-dū'ti), *n.* A tax on property passing by will.

probation (prō-bā'shon), *n.* [*F. probation* = *Pr. proazo*, *probatio* = *Sp. probacion* = *Pg. pro-vação* = *It. probazione*, < *L. probatio* (*n.*), a trying, inspection, examination, < *probare*, pp. *probatus*, test, examine: see *probe*, *prove*.] 1. The act of proving; proof.

And what he with his oath
And all *probation* will make up full clear.
Shak., *M. for M.*, v. 1. 157.

He that must eat an hour before his time gives *probation* of his intemperance or his weakness.

Jer. Taylor, Works (ed. 1885), I. 35.

2. Any proceeding designed to ascertain truth, character, qualifications, or the like; trial; examination.

Let us buy our entrance to this guild [friendship] by a long *probation*.

Life is *probation*, and this earth no goal,
But starting-point of man.

Browning, Ring and Book, II. 211.

Specifically—(*a.*) *Eccles.*, the trial of a candidate for church membership, holy orders, or other ecclesiastical position and functions, preparatory to his final admission thereto. (*b.*) In *theol.*, moral trial; a state of life affording an opportunity to test moral character.

3. Any period of trial. Specifically—(*a.*) In religious houses, the period for the trial of a novice before he or she takes the vows of the monastic order.

I, in *probation* of a sisterhood,
Was sent to by my brother.

Shak., *M. for M.*, v. 1. 72.

She . . . may be a nun without *probation*.

Beau. and *Fr.*, *Philaster*, II. 20.

(*b.*) In the *Meth. Epis. Ch.*, a period, usually six months, at the end of which a candidate for admission to the church determines whether he will unite with the church, and the church decides whether he should be admitted to membership.—The doctrine of *future probation*, the doctrine that the gospel will be preached in another life, either (*a.*) to all who die unregenerate, or (*b.*)

to those to whom it was never preached, or who never apprehended it, in this life, particularly to the heathen and to those dying in infancy. In this latter and more common form it is entertained by members of various Protestant denominations. This doctrine is distinguishable from the doctrine of purgatory, or future disciplinary sufferings for the faithful, supposed to be necessary for their purification, and from the various forms of universalism, which holds that in a future probation all men will sooner or later accept the gospel.

probational (prō-bā'shon-al), *a.* [*< probation + -al*.] Serving for trial or probation.

Their afflictions are not penal, but medicinal, or *probational*. *Ep. Richardson*, Oba. on the Old Testament, p. 278.

probationary (prō-bā'shon-ā-ri), *a.* [*< probation + -ary*.] Pertaining to probation; embracing or serving for trial or probation.

Like Eden's dread *probationary* tree,
Knowledge of good and evil is from Thee.

Cowper, Progress of Error, l. 468.

That the present life is a sufficient period of *probationary* existence to the Righteous will be readily acknowledged by all men.

Timothy Dwight, Sermons, cixiii.

probationer (prō-bā'shon-ēr), *n.* [*< probation + -er*.] One who is on probation or trial; one who is placed so that he may give proof of certain qualifications for a place or state.

Every day gain to their college some new *probationer*.
B. Jonson, Episcene, l. 1.

While yet a young *probationer*
And candidate for heaven.

Dryden, To the Memory of Mrs. Anne Killigrew, l. 21.

Specifically—(*a.*) A novice.
A stripling divine or two of those newly-fledged *probationers* that usually come scouting from the university, and lie here no lame legers to pop into the Bethesda of some knight's chaplainship.

Milton, Colasterion.

Green *probationers* in mischief. *Lamb*, Old Actors.

(*b.*) In the Presbyterian churches in Scotland, one who has been licensed to preach, but who has not been ordained or does not hold a pastoral charge.

How do they expect a *probationer* to become a capable teacher if they never give him the chance of a pulpit?

W. Black, In Far Lochaber, viii.

(*c.*) In the *Meth. Epis. Ch.*, a candidate for membership received for a specified period on trial before final admission.

probationership (prō-bā'shon-ēr-ship), *n.* [*< probationer + -ship*.] The condition or state of being a probationer.

He has afforded us the twilight of probability, suitable to that state of mediocrity and *probationership*.

Locke.

probationism (prō-bā'shon-izm), *n.* [*< probation + -ism*.] Views or beliefs as to human probation in relation to the future state. *Religious Herald*, July 15, 1886.

probationist (prō-bā'shon-ist), *n.* [*< probation + -ist*.] A probationer.

What portion of the *probationists* uniting with the M. E. church become full members?

The Congregationalist, May 14, 1885.

probationship (prō-bā'shon-ship), *n.* [*< probation + -ship*.] A state of probation; novitiate; probation. [Rare.]

Before the end of these ladies' *probationship* and matriculation, his majesty charged the cathedral doctors to dismiss them out of the university.

Translation of Boccacini (1628), p. 202. (*Latham*.)

probative (prō-bā-tiv), *a.* [*< probate + -ive*.] 1. Serving to test or prove.

Some are only *probative*, and designed to try and stir up those virtues which before lay dormant in the soul.

South, Sermons, IV. ix.

2. Pertaining to proof or demonstration: as, the *probative* force of evidence.

probator (prō-bā'tor), *n.* [*< L. probator*, examiner, approver, < *probare*, test, examine, prove: see *probate*, *prove*.] 1. An examiner.—2†. In law, one who turns king's (queen's) evidence; an approver.

probatory (prō-bā'tō-ri), *a.* and *n.* [*< ML. *probatorius*, adj. (neut. *probatorium*, a house for novices), < *L. probare*, pp. *probatus*, test, examine, prove: see *probate*.] 1. *a.* 1. Serving for trial; being a proof or test.

Job's afflictions were no vindictory punishments, but *probatory* chastisements to make trial of his graces.

Abp. Bramhall.

2. Pertaining to or serving for proof.

His other heap of arguments are assertory, not *probatory*.
Jer. Taylor (?), *Artif. Handsomeness*, p. 126.

II. *n.*; pl. *probatories* (-riz). A house for novices.

In the same years Christian, Bishop of Lismore, . . . and Pope Eugenius, a venerable man, with whom he was in the *Probatorie* at Clarevall, who also ordained him to be the Legate in Ireland, . . . departed to Christ.

Holland, tr. of Camden, II. 151. (*Davies*.)

probatum est (prō-bā'tum est). [*L. probatum*, neut. of *probatus*, pp. of *probare*, test, examine; *est*, 3d pers. sing. pres. ind. of *esse*, be.] It has been tried or proved: often appended to recipes or prescriptions.

Take, . . . If your point be rest,
Lettuce and cowslip wine; *Probatum est*.

Pope, Imit. of Horace, II. l. 18.

probe (prōb), *v. t.*; pret. and pp. *probed*, pp. *probing*. [*< L. probare*, test, examine, prove, < *probus*, good: see *prove*, an older form from the same *L.* verb. The verb *probe* is partly from the noun.] 1. To examine with or as with a probe; explore, as a wound or other cavity, especially of the body: often used of searching for some extraneous object in a part or organ by means of an instrument thrust into it.

Yet durst she not too deeply *probe* the wound.
Dryden, *Hind and Panther*, III.

Thither too the woodcock led her brood, to *probe* the mud for worms.

Thoreau, *Walden*, p. 245.

2. Figuratively, to search to the bottom; scrutinize; examine thoroughly into.

The late discussions in parliament, and the growing disposition to *probe* the legality of all acts of the crown, rendered the merchants more discontented than ever.

Hallam.

Why do I seek to *probe* my fellow's sin?

William Morris, *Earthly Paradise*, II. 170.

3. To prick, as a sealed can, so as to allow the compressed air or gas within to escape.

probe (prōb), *n.* [*< L. proba*, a proof, < *probare*, test, examine, prove: see *probe*, *v.*, and *proof*, *n.* Cf. *Sp. tiento*, a surgeon's probe, < *tentar*, try, test: see *tempt*.] 1. A proof; a trial; a test.

We who believe life's bases rest
Beyond the probe of chemic test.

Lowell.

2†. A printer's proof.

The thanksgiving for the queen's majesty's preservation I have inserted into the collect, which was after place in my opinion than in the psalm; ye shall see in the *probe* of the print, and after judge.

Abp. Grindal, Remains, p. 268. (*Davies*.)

3. In *surg.*, a slender flexible rod of silver or other substance for examining the conditions of a wound or other cavity, or the direction of a sinus.—*Nélaton's probe*, a probe tipped with unglazed porcelain, used in feeling for bullets. The lead, if touched, leaves a mark upon the porcelain.

probe-pointed (prōb'poin'ted), *a.* Having a blunt end, like that of a probe; not sharp-pointed: as, *probe-pointed* scissors; a *probe-pointed* bistoury.

probe-scissors (prōb'siz'orz), *n. pl.* Scissors used to open wounds, the blade of which, to admit of being thrust into the orifice, has a button at the end.

probing-awl (prō'bing-āl), *n.* A steel prod or awl, used to pierce the brain in killing fish for the table.

probity (prōb'i-ti), *n.* [*< F. probité* = *Sp. probidad* = *Pg. probidade* = *It. probità*, < *L. probita* (*t-s*), uprightness, honesty, < *probus*, good, excellent, honest: see *probe*, *prove*.] Tried virtue or integrity; strict honesty; virtue; sincerity; high principle.

So near approach we their celestial kind
By justice, truth, and *probity* of mind.

Pope.

A minister [Walpole] . . . who had seen so much perfidy and meanness that he had become sceptical as to the existence of *probity*.

Macaulay, Lord Holland.

Let the reign of the good Stuyvesant show . . . how frankness, *probity*, and high-souled courage will command respect, and secure honor, even where success is unattainable.

Iraing, Knickerbocker, p. 469.

—*Syn.* Integrity, Uprightness, etc. (see *honesty*), worth, trustworthiness, trustiness, incorruptibility.

problem (prō'b-lēm), *n.* [*< ME. probleme*, < *OF. probleme*, *F. problème* = *Sp. Pg. It. problema* = *D. probleem*, *problema* = *G. Sw. Dan. problem*. < *L. problema*, < *Gr. πρόβλημα*, a question proposed for solution, < *πρόβαλλειν*, throw or lay before, < *πρό*, before, + *βάλλειν*, throw, put: see *ball*², *ballista*, etc., and cf. *emblem*.] 1. A question proposed for decision or discussion; a matter for examination; any question involving doubt, uncertainty, or difficulty; also, a question with a discussion of it.

Although in general one understood colours, yet were it not an easy *problem* to resolve why grass is green.

Sir T. Browne.

The Conclusion is the *Problem* (problema), question (questio, quaestio), which was originally asked, stated now as a decision. The *Problem* is usually omitted in the expression of a syllogism, but is one of its essential parts.

Sir W. Hamilton, *Logic*, xv.

Few researches can be conducted in any one line of inquiry without sooner or later abutting on some metaphysical *problem*, were it only that of Force, Matter, or Cause.

G. H. Leves, *Proba. of Life and Mind*, I. l. § 8.

Specifically—2. In *geom.*, a proposition requiring some operation to be performed or construction to be executed, as to bisect a line, and the like. It differs from a *theorem* in that the latter requires something to be proved, a relation or identity to be shown or established. The Greek word is used in this sense by Pappus, in the third century after Christ.

34. In English universities, a public disputation.
—Absolute problem. See *absolute*. — **Alhazan's problem.** The problem from two given points in the plane of a given circle to draw lines intersecting on the circumference and making equal angles with the tangent at the point of intersection. — **Apollonius's problem.** The problem to draw a circle tangent to three given circles in a plane. This celebrated problem was proposed, according to Pappus, by Apollonius in his work on contacts. — **Busemann's problems.** The following problems: (1) to cut a square into eight pieces which will fit together to make two squares, one twice as large as the other; (2) to cut a regular hexagon into five parts which will make a square; (3) to cut a regular pentagon into seven parts which will make a square. — **Characteristic problem.** See *characteristic*. — **Cheese problem.** A given position of chess pieces in which it is required that one side mate the other (or sometimes compel the other to give mate) in a stipulated number of moves. — **Comparative problem.** A question in regard to the degree of any quality possessed by any subject. — **Crown, Delian, determinate problem.** See the qualifying words. — **Fermat's problem.** Given two media separated by a plane and the velocities of light in them, to find the path of quickest transmission between two given points. — **Florentine, goniometrical, imperial, indeterminate, inverse problem.** See the adjectives. — **Gergonne's problem.** The problem to cut a cube so that the section shall enter at a diagonal of one face and emerge at the non-parallel diagonal of the opposite face, making the surface of section the smallest possible. — **Huygens's problem.** A problem proposed by Christian Huygens in 1693, to this effect: a given number of perfectly elastic spheres lie in one straight line; the masses of the first and last are known; the first strikes the second with a given velocity; what must the masses of the intermediate ones be to make the velocity imparted to the last a maximum? This was solved by Huygens for three bodies, by Lagrange in 1750 for five, and by Poncelet in 1874 completely. — **Isoperimetric problem.** A problem relating to a maximum or minimum condition to be fulfilled by the form of a function: so called because the earliest problems of this kind were of isoperimetry in the narrower sense. — **Kepler's problem.** The problem from a given point on the diameter of a semicircle to draw a line dividing the area in a given proportion; to solve the equation $a = x - b \sin x$; to find the position of a planet at a given time from its elements. This problem, of capital importance, was proposed by Kepler in 1609. — **L'Huilier's problems.** The following problems: (1) to cut a given triangular prism so that the plane section shall be equal to a given triangle; (2) on a given triangle as base to erect an oblique prism so that the perpendicular section shall be similar to a given triangle. — **Limited problem, in math.** A problem that has but one solution, or some determinate number of solutions. — **Linear, local, notional problem.** See the adjectives. — **Malfatti's problem.** A problem of elementary geometry, mentioned by Pappus about 300, but first solved by Gianfrancesco Malfatti (1731-1807) in 1788: namely, to inscribe in a given triangle three circles, each touching two sides of the triangle, and all tangent to one another. The best construction was given by Steiner in 1826. — **Mechanical solution of a problem.** See *mechanical*. — **Nonius's problem.** The problem to find the day of shortest twilight for a given latitude. — **Pappus's problem.** In a given circle to inscribe a triangle whose sides produced shall contain three given points. — **Pell's problem.** The problem to solve the equation $x^2 - Ay^2 = \pm B$. — **Petersburg problem.** A celebrated problem in probabilities, to determine how much ought to be paid for the assurance of being paid \$2^m, where m is the number of times that a coin will be tossed up without coming up head: so called because mentioned by Daniel Bernoulli in the Memoirs of the St. Petersburg Academy, but already treated by Nicolas Bernoulli the first in 1713. — **Pfaff's problem.** The problem to transform an expression $X_1 dx_1 + X_2 dx_2 + \dots$ into another of similar form with a given number of terms, and to determine the smallest possible number of terms. — **Pothot's problem.** To find a point from which two given segments are seen under given angles. — **Problem of duration of play.** To find the probability that one player will ruin another within a given number of bets, and the probable number of bets before he is ruined. — **Problem of squaring the circle.** See *squaring*. — **Problem of the couriers.** See *courier*. — **Problem of the duplication.** See *duplication*. — **Problem of the inscription of the heptagon.** The impossible problem to inscribe a regular heptagon in a circle with a ruler and compass. — **Problem of the school-girls.** The problem to show how fifteen school-girls might walk out in ranks of three every day for a week, without any one walking a second time in the same rank with any other. — **Problem of three bodies.** The problem to determine the motions of three mutually gravitating particles. — **Surround problem, in math.** A problem which cannot be resolved but by curves of a higher kind than the conic sections. — **Viviani's problem.** To pierce a hemispherical dome with four equal windows so that the rest of the surface shall be quadrable.

problematic (prob-le-mat'ik), *a.* [= *F. problématique* = *Sp. problemático* = *Pg. It. problematico*, < *L. problematicus*, < *Gr. προβληματικός*, pertaining to a problem, < *πρόβλημα* (*r*), a problem: see *problem*.] 1. Of the nature of a problem; questionable; uncertain; unsettled; disputable; doubtful.

The probability of foreign rivalry was not believed in, or was treated as at least distant and problematic.

W. R. Greg, *Misc. Essays*, 1st ser., p. 3.

2. In logic, of the nature of a question, possible or doubtful.

I call a concept *problematic* if it is not self-contradictory, and if, as limiting other concepts, it is connected with other kinds of knowledge, while its objective reality cannot be known in any way. . . . The concept of a noumenon is problematical—that is, the representation of a thing of which we can neither say that it is possible nor that it is impossible, because we have no conception of any kind

of intuition but that of our senses, or of any kind of concepts but of our categories, neither of them being applicable to any extraneous object.

Kant, *Critique of Pure Reason* (tr. by Müller), III.

Problematic proposition. See *proposition*.
problematical (prob-le-mat'i-kal), *a.* [*< problematic + -al*.] Same as *problematic*.

Wagers are laid in the city about our success, which is yet, as the French call it, *problematical*.

Johnson, to Mrs. Thrale, Nov. 1, 1777.

problematically (prob-le-mat'i-kal-i), *adv.* [*< problematical + -ly*.] In a problematic manner; doubtfully; dubiously; uncertainly.

problematist (prob'lem-a-tist), *n.* [*< Gr. πρόβλημα* (*r*), a problem, + *-ist*.] One who proposes problems. [Rare.]

This learned *problematist*.

Evelyn, To Dr. Beale, Aug. 27, 1668.

problematize (prob'lem-a-tiz), *v. i.*; pret. and pp. *problematized*, ppr. *problematizing*. [*< Gr. πρόβλημα* (*r*), a problem, + *-ize*.] To propose problems.

Tip. Hear him *problematize*.

Pro. Bless us, what's that?

Tip. Or syllogize, elenchize. B. Jonson, *New Inn*, II. 2.

pro bono publico (prō bō'nō pub'li-kō), [*L.*: *pro*, for; *bono*, abl. of *bonum*, good; *publico*, abl. of *publicus*, public: see *pro*, *bona*, *public*.] For the public good.

Proboscidae (prō-bos'i-dē), *n. pl.* [NL., for **Proboscidiæ*, < *Gr. προβόσκis* (*-kid*), proboscis, + *-idæ*.] The family of the elephants: now called *Elephantidae*.

proboscidal (prō-bos'i-dal), *a.* [*< L. proboscis* (*-cid*), < *Gr. προβόσκis* (*-kid*), proboscis, + *-al*.] Same as *proboscidean*.

A *proboscidal* prolongation of the oral organs. Shuckard.

proboscideate (prō-bos'i-dāt), *a.* [*< L. proboscis* (*-cid*), < *Gr. προβόσκis* (*-kid*), proboscis, + *-ate*.] Having a proboscis; proboscidean. — **Proboscideate insect.** An insect having a proboscideate mouth. — **Proboscideate mouth.** In *entom.*, a haustellate mouth; a mouth in which the organs are modified to form a proboscis, as in most flies. See cut under *house-fly*.

proboscide (prō-bos'id), *n.* [*< F. proboscide*, < *L. proboscis*, proboscis: see *proboscis*.] In *her.*, the trunk of an elephant used as a bearing or part of a bearing.

Proboscidea (prō-bos'id-ē), *n. pl.* [NL. (Illiger, 1811), < *L. proboscis* (*-cid*), < *Gr. προβόσκis* (*-kid*), proboscis: see *proboscis*.] 1. An order of *Mammalia* having a long flexible proboscis or trunk. It now contains only the elephants and their allies, as the mammoths and mastodons. The legs are mostly exerted beyond the common integument of the trunk and all their joints are extensible in a right line. The teeth are enameled; the incisors are—in the living elephants two above and none below, in some extinct *Proboscidea* none above and two below, or two above and below, any of which may be developed into long tusks curving out of the mouth. The feet are all five-toed, so far as is known, incased in broad shallow hoofs, one to each digit, and the palmar and plantar surfaces are padded. The carpal bones are broad and short, in two separate, not interlocking, rows; the scaphoid and lunar are separate from each other; the cuneiform is broad, extended inward, and attached to the ulna; the unciform is directly in front of the cuneiform, and the magnum in front of the lunar; in the hind foot the astragalus articulates in front only with the navicular. The placenta is deciduate, zonary. The *Proboscidea* belong to the higher or edacibular series of placental mammals. Their nearest living relatives are the *Hyracidae*. There are 2 families—*Elephantidae*, containing the elephants, mammoths, and mastodons, and *Dinotheriidae*, the dinotheres, the latter all extinct, the former now represented by only 2 living species. See cuts under *Dinotherium*, *elephant*, *Elephantidae*, and *Mastodontina*.

2. A class of ciliate protozoans, also called *Rhynchostagellata*, represented by the noctilucans. E. R. Lankester.

proboscidean (prō-bos'id-ē-an), *a.* and *n.* [*< L. proboscis* (*-cid*), < *Gr. προβόσκis* (*-kid*), proboscis, + *-ean*.] 1. *a.* 1. Having a proboscis or trunk; proboscideate or proboscidean; belonging to the mammalian order *Proboscidea*. — 2. Of or pertaining to a proboscis: as, "the proboscidean sheath of the Nemertines," *Encyc. Brit.*, XXIV. 184.

Also *proboscidian*, *proboscoid*.

Proboscidean flukes, the trematoids of the family *Tetrarhynchidae*.

II. *a.* A mammal of the order *Proboscidea*; an elephantid or dinotheriid.

Also *proboscidian*.

proboscideous (prō-bos'id-ē-us), *a.* [*< L. proboscis* (*-cid*), < *Gr. προβόσκis* (*-kid*), proboscis, + *-eous*.] In *bot.*, having a hard terminal horn, as the fruit of *Martynia*. *Treasury of Botany*.

probosciscian, *n.* Latin plural of *proboscis*.

probosciscial (prō-bos'id-i-al), *a.* [*< L. proboscis* (*-cid*), < *Gr. προβόσκis* (*-kid*), proboscis, + *-ial*.] Same as *proboscidean*.

proboscidian (prō-bos'id-i-an), *a.* and *n.* [*< L. proboscis* (*-cid*), < *Gr. προβόσκis* (*-kid*), proboscis, + *-ian*.] Same as *proboscidean*.

Proboscidifera (prō-bos'id-i-fē-rā), *n. pl.* [NL., neut. pl. of *proboscidifer*: see *proboscidiferous*.] A division of pectinibranchiate gastropods with a small head, a proboscis retractile under the base of the tentacles, and variable teeth on a long cartilaginous lingual ribbon. It includes a large number of carnivorous gastropods, among the best-known of which are the *Muricidae* and the *Buccinidae*. Contrasted with *Rostrifera*.

proboscidiferous (prō-bos'id-i-fē-rus), *a.* [*< NL. proboscidifer*, < *L. proboscis* (*-cid*), proboscis, + *ferre* = *E. bear*.] 1. Having a proboscis. — 2. In *conch.*, pertaining to the *Proboscidifera*.

proboscidiform (prō-bos'id-i-fōrm), *a.* [*< L. proboscis* (*-cid*), proboscis, + *forma*, form.] Proboscis-like. Also *proboscidal*, *probosciform*, *probosciformed*.

probosciform (prō-bos'i-fōrm), *a.* [*< L. proboscis*, proboscis, + *forma*, form.] Same as *proboscidiform*. *Encyc. Diet.*

probosciformed (prō-bos'i-fōrm-d), *a.* [*< probosciform + -ed*.] Same as *proboscidiform*.

The surface of the *probosciformed* mouth, facing the first pair of cirri, has a deep central longitudinal fold.

Darwin, *Cirripedia*, p. 176.

Probosciger (prō-bos'i-jēr), *n.* [NL. (Kuhl, 1820), < *L. proboscis*, proboscis, + *gerere*, carry.] A genus of black cockatoos: synonymous with *Microglossa*.

proboscigerous (prō-bos-i-jēr-us), *a.* [*< L. proboscis*, proboscis, + *gerere*, carry.] Having a proboscis; proboscideiferous.

proboscis (prō-bos'is), *n.*; pl. *proboscides* (*-idēs*). [= *F. proboscide* = *Sp. proboscide* = *Pg. proboscis* = *It. proboscide*, proboscis, < *L. proboscis*, < *Gr. προβόσκis* (*-kid*), the trunk or proboscis of an elephant, the proboscis of a fly, an arm of a cuttlefish, < *πρό*, before, + *βόσκω*, feed, graze.] 1. An elephant's trunk; hence, a long flexible snout, as the tapir's, or the nose of the proboscis-monkey. See cut under *Nasalis*.

The unwieldy elephant, To make them mirth, used all his might, and wreathed His lithe proboscis.

Milton, *P. L.*, IV. 347.

2. Any proboscideiform part or organ; anything that sticks out in front of an animal like an elephant's trunk. See cut under *Cystophorine*. (a) The human nose, especially when very large. [Humorous.] (b) In *entom.*: (1) The rostrum or beak of a rhynchophorous beetle, or snout-beetle. (2) The long coiled haustellate organ of lepidopterous insects; an antilla. See cut under *haustellum*. (3) The sucking-mouth of a fly, a cylindrical membranous or fleshy organ terminating in a dilated portion which is applied to the substance to be sucked up. (See *promuscia*, and cut under *house-fly*.) (4) The extensible mouth-organs of a bee, consisting of the labium and lingua with their various divisions, and the maxillæ, united at their bases with the labium. (5) In *vermes*, a diversified buccal, oral, or pharyngeal organ of many worms, as errant annelids, cephalopods, turbellarians, and nemerteans. In the last the proboscis is a tubular invaginated eversible organ opening in the anterior part of the body above the mouth, formed by a differentiation of the integument; it is variable in details of structure: it may be divided, coiled, glandulous, and furnished with stylets, a retractor muscle, etc. (For various proboscides of this kind, see cuts under *Acanthocephala*, *Balanoglossus*, *Cestoides*, *Nereis*, *Proctocha*, *Rhabdocera*, and *Rhynchocera*.) (d) In *conch.*, the tongue of certain gastropods, such as shell-snails, when it is so long as to be capable of being protruded for some distance from the mouth, in which case it is used for boring the shells of other testaceans, and for destroying by suction the soft parts of the inhabitant: distinguished from *rostrum*. (e) In polyps, the central polypite of a medusan. (f) In gregarines, the epimerite.

proboscis-monkey (prō-bos'is-mung'ki), *n.* A semnopithecine ape, *Nasalis larvatus*; a kahau: so called from the elongated and flexible snout, which resembles the human nose in size and shape. See cut under *Nasalis*.

proboscis-rat (prō-bos'is-rat), *n.* Same as *elephant-shrew*.

proboscoid (prō-bos'oid), *a.* [*< Gr. προβόσκis*, proboscis, + *eidōs*, form.] Same as *proboscidean*.

probouleutic (prō-bō-lū'tik), *a.* [*< Gr. προβουλευτικός* (*-teut*), previous deliberation (cf. *McGr. προβουλευτικός*, one who deliberates before), < *προβουλεύειν*, contrive before, < *πρό*, before, < *βουλεύειν*, take counsel, deliberate: see *boule*.] Concerned with the preparation of measures for action: noting specifically the Senate, or Council of Five Hundred, in the ancient Athenian constitution.

A misapprehension as to the powers of the Roman Senate, which is represented as being a *probouleutic* body, like that of Athens, which prepared business for the Assembly.

W. F. Allen, *Penn. Monthly*, Feb., 1879, p. 124.

procacious (prō-kā'shūs), *a.* [= OF. *procace* = It. *procace*, < L. *procax* (-ac-), forward, bold, shameless, impudent, < *procare*, ask, demand, akin to *precari*, pray: see *pray*¹.] Pert; petulant; saucy.

I confess these [personal comeliness and beauty] are commonly but the temptations of women and procacious youth. *Baxter, Self-Denial*, xlv.

Now abating a procacious youth, now heartening a shy homely one. *Dr. J. Brown, Spare Hours*, 3d ser., p. 297.

procacity (prō-kas'i-ti), *n.* [= OF. *procacite* = Sp. *procacidad* = Pg. *procacidade* = It. *procacità*, < L. *procaçit*(-is), forwardness, impudence, < *procax* (-ac-), forward, bold: see *procacious*.] Impudence; petulance.

In valne are all your knaveries,

Delights, deceptions, procacities.

Burton, Anat. of Mel., p. 541.

procambial (prō-kam'bi-āl), *a.* [*procambium* + -al.] In bot., pertaining to or resembling the procambium.

A procambial bundle being first formed.

Encyc. Brit., IV, 106.

procambium (prō-kam'bi-um), *n.* [NL., < L. *pro*, before, + NL. *cambium*: see *cambium*².] In bot., a long-celled initial strand of a vascular bundle; a similar or homogeneous formative cell of a bundle. Compare *cambium*².

This mass [of elongated cells] is termed the *procambium* of the fibro-vascular bundle. *Encyc. Brit.*, IV, 93.

procardium (prō-kār'di-um), *n.*; pl. *procardia* (-i). [NL., < Gr. *prō*, before, + *kardia* = E. *heart*.] The pit of the stomach; the scrobiculus cordis.

procarp (prō'kärp), *n.* [*NL. procarpium*, < Gr. *prō*, before, + *καρπός*, a fruit.] In bot., in certain algae and fungi, a unicellular or pluricellular female sexual organ, which consists of a filamentous receptive part called the *trichogyne* and a dilated part called the *carpogonium*. The protoplasm is not rounded off to form an oosphere, but is excited by fertilization to a process of growth which results in a sporocarp.

In the Floridae it is the procarpium (*procarp*), which consists of a single cell or a small cell-group.

De Bary, Fungi (trans.), p. 121.

procarpium (prō-kär'pi-um), *n.*; pl. *procarpia* (-i). [NL.: see *procarp*.] Same as *procarp*.

procatartetic (prō-kat-ä'lek'tik), *a.* [*Gr. πρόκαταρτικός*, leaving off: see *catalectic*. Cf. *προκαταλείπειν*, leave off beforehand.] In anc. pros., catalectic at the beginning; wanting the arsis (metrically unaccented part) of the first foot. Thus, the following colon in an iambic period is procatartetic: — — — — — (for — — — — —).

procatartetic (prō-kat-ä'lek'tik), *a.* [*Gr. προκαταρτικός*, beginning beforehand, being the immediate cause, < *προκαταρχειν*, begin first, < *πρό*, before, + *καταρχειν*, begin upon, < *κατά*, upon, + *ἀρχειν*, be first, begin.] Being the immediate cause; in med., noting a cause which immediately kindles a disease into action when there exists a predisposition to it. The procatartetic cause is often denominated the exciting cause. See *efficient cause*, under *efficient*.

procatartical (prō-kat-ä'lek'ti-kal), *a.* [*procatartetic* + -al.] Same as *procatartetic*.

The procatartical and proeugmental causes are of great use in physic; for the physicians reduce almost all diseases to three causes: *procatartical*, proeugmental, and synectical or containing. The procatartical is with them the external and evident cause. . . . For example: The procatartical cause of the fever is either cold or the astringent bathes. *Burgesdicus*, tr. by a Gentleman, l. 17.

procatartix (prō-kat-ä'lek'sis), *n.* [*Gr. προκαταρτίς*, a first beginning, < *προκαταρχειν*, begin first: see *procatartetic*.] In med., the kindling of a disease into action by a procatartetic cause, when a predisposition exists; also, the procatartetic cause of a disease.

procathedral (prō-kat-thē'dral), *n.* [*L. pro*, for, + ML. *cathedrālis*, a cathedral: see *cathedral*.] A church used temporarily as a cathedral.

procedet, *v. i.* An obsolete spelling of *proceed*. **procedendo** (prō-sē-den'dō), *n.* [L., abl. sing. gerundive of *procedere*, go forward, proceed: see *proceed*.] In law, a writ which formerly issued out of the English Court of Chancery in the exercise of its common-law jurisdiction, when judges of any subordinate court wrongfully delayed the parties, and would not give judgment either on the one side or on the other. It commanded the judges to proceed to give judgment, without specifying any particular judgment to be given. A writ of *procedendo* also lay where an action had been removed from an inferior to a superior court, and it appeared to the superior court that it was removed on insufficient grounds.

procedure (prō-sē'dūr), *n.* [*OF. procedure*, F. *procédure* = It. *procedura*, < L. *procedere*,

go forward, proceed: see *proceed*.] 1†. The act of proceeding or moving forward; progress.

He overcame the difficulty in defiance of all such pretences as were made even from religion itself to obstruct the better *procedures* of real and material religion.

Jer. Taylor, Works, III, vii.

2. Manner of proceeding or acting; a course or mode of action; conduct.

Those more complex intellectual *procedures* which acute thinkers have ever employed.

H. Spencer, Prin. of Psychol.

He would learn if they

Connive at Fym's *procedures*!

Browning, Strafford.

3. A step taken; an act performed; a proceeding.—4†. That which proceeds from something; product.

No known substance but earth, and the *procedures* of earth, as tile and stone.

Bacon.

5. The modes, collectively, of conducting business, especially deliberative business; specifically, in law, the modes of conduct of litigation and judicial business, as distinguished from that branch of the law which gives or defines rights. It includes practice, pleading, and evidence.

By itself indeed the lately revealed Irish law would carry us a very little way. Its great peculiarity is the extraordinary prominence it gives to *Procedures*.

Maine, Early Law and Custom, p. 374.

Civil *procedures* . . . is chiefly intended to realize and enforce the legalized interests or "rights" of individuals.

Polit. Sci. Quarterly, II, 123.

Common-law *procedures* acts. See common.—New or reformed *procedures*. See *equity*, 2 (b).—Syn. 2. *Proceeding*, *Operation*, etc. See *process*.

proceed (prō-sēd'), *v. i.* [Early mod. E. also *procede*; < ME. *proceden*, < OF. *proceder*, F. *proceder* = Sp. Pg. *proceder* = It. *procedere*, < L. *procedere*, go forth, go forward, advance, come forth, issue, go on, result, proceed, < *pro*, forth, + *cedere*, go: see *cede*.] 1. To move, pass, or go forward or onward; continue or renew motion or progress; advance; go on, literally or figuratively; as, to *proceed* on one's journey; the vessel touched at Queenstown, and then *proceeded* on her voyage.

Come, cite them, Crites, first, and then *proceed*.

B. Jonson, Cynthia's Revels, v. 3.

Hadst thou . . . *proceeded*

The sweet degrees that this brief world affords.

Shak., T. of A., iv. 3, 252.

Proceeding the space of a flight-shoot, they find another Arch, like unto the first. *Purchas, Pilgrimage*, p. 200.

I shall . . . *proceed* to more complex ideas.

Locke, Human Understanding, II, xviii, 2.

Having already mentioned those *Speeches* which are assigned to the Persons in this Poem, I *proceed* to the Description which the Poet gives us of Raphael.

Addison, Spectator, No. 327.

2. To issue or come, as from an origin, source, or fountain; go forth: with *from*.

Excuse me that I am as free with you; what I write *proceeds* from the clear Current of a pure Affection.

Howell, Letters, I, v. 11.

From the death of the old the new *proceeds*.

Whittier, The Preacher.

3. To carry on some series of actions; set one's self at work and go on in a certain way and for some particular purpose; act according to some method.

If you promise vs peace, we will beleene you; if you *proceed* in revenge we will abandon the Country.

Quoted in *Capt. John Smith's Works*, I, 225.

From them I will not hide

My judgments, how with mankind I *proceed*.

Milton, P. L., xl, 69.

He that *proceeds* on other principles in his inquiry into any sciences posts himself in a party.

Locke.

But how severely with themselves *proceed*
The men who write such verse as we can read!

Pope, Imit. of Hor., II, ll. 157.

4†. To be transacted or carried on; be done; pass; go on.

He will, after his sour fashion, tell you

What hath *proceeded* worthy note to-day.

Shak., J. C., I, 2, 130.

5. To begin and carry on a legal action; take any step in the course of procedure: as, to *proceed* against an offender.—6. To come into effect or action. [Rare.]

This rule only *proceeds* and takes place when a person cannot of common law condemn another by his sentence.

Ayliffe, Parergon.

7. To take an academic degree: now used only in the universities of Great Britain and Ireland. "To *proceed* master" is an abbreviated form of "to *proceed* to the degree of master."

Ignorance in stiltis . . .

With parrot tongue perform'd the scholar's part,
Proceeding soon a graduated dunce.

Conquer, Task, II, 739.

The oldest [surviving graduate] *proceeded* Bachelor of Arts the very Commencement at which Dr. Stiles was elected to the Presidency.

Woolsey, Discourse, Yale Coll., Aug. 14, 1850, p. 33.

(*College Words*.)

=Syn. 2. To arise, emanate, flow, accrue, result, be derived.

proceed (prō'sēd), *n.* [Early mod. E. also *procede*; < *proceed*, *v.*] The amount proceeding or accruing from some possession or transaction; especially, the sum derived from the sale of goods: now used only in the plural: as, the consignee was directed to sell the goods forwarded and invest the *proceeds* in coffee.

The only *Proceeds* (that I may use the mercantile Term) you can expect is Thanks, and this Way shall not be wanting to make you rich Returns.

Howell, Letters, I, 1, 29.

Net proceeds. See *net* 2.—*Proceeds* of a cargo, in general, the return or substituted cargo, acquired by sale or exchange of the goods originally shipped. *Dow v. Hope Ins. Co.*, 1 Hall, 106.

proceeder (prō-sē'dēr), *n.* 1. One who proceeds or goes forward; one who makes a progress.

Let him not set himself too great nor too small tasks; for the first will make him dejected by often failing, and the second will make him a small *proceeder*, though by often prevailing.

Bacon, Nature in Men (ed. 1887).

Specifically—2. One who takes an academic degree.

A little before the Reformation, the greatest part of the *proceeders* in divinity at Oxford were monks and Regular canons.

Tanner, quoted in *Forewords to Babes Book*, p. xxxvi.

proceeding (prō-sē'ding), *n.* [Verbal *n.* of *proceed*, *v.*] 1. A going forward; a procession; the act of one who proceeds; especially, a measure or step taken; a doing; a transaction; as, an illegal *proceeding*; a cautious *proceeding*; a violent *proceeding*. In the plural the term is specifically applied to suits and judicial actions of all kinds involving rights of persons or of property, as well as to the course of steps or measures in the prosecution of actions at law: as, to institute *proceedings* against a person.

The *proceeding* was thus ordered: viz., First the City Marshal, to follow in the rear of His Majesty's Life Guards.

England's Joy (Arber's Eng. Garner, I, 29).

The clerk . . . should keep a record of the *proceedings*.

Robert, Rules of Order, § 51.

We have learned some of us to approve, and more perhaps to acquiesce in, *proceedings* which our fathers looked on as in the last degree unrighteous and intolerable.

Stubbs, Medieval and Modern Hist., p. 3.

2†. Advancement.

My dear dear love

To your *proceeding* bids me tell you this.

Shak., J. C., II, 2, 103.

3. *pl.* A record or account of the transactions of a society: as, the *Proceedings* of the American Philological Association. The *proceedings* of this and other societies differ from the *transactions*, in that the *proceedings* are the record of all the business done, with mere abstracts of the papers read, while the *transactions* consist of the papers themselves.—*Collateral proceeding*. See *collateral*.—*Dispossession proceedings*. See *dispossession*.—*Proceeding via executiva*, in civil law, executory process (which see, under *executory*).—*Special proceeding*, a judicial proceeding other than an action, as a writ of mandamus, a petition to appoint a trustee, etc.—*Stay of proceedings*. See *stay*.—*Summary proceedings*, in law, certain legal remedies authorized by statute to be taken without the formal bringing of an action by process and pleading—an affidavit laid before a magistrate under warrant issued thereon being usually substituted; more specifically, such proceedings taken to dispossess a tenant for non-payment of rent, or for holding over, etc.—*Supplementary proceedings*, sometimes called *supplemental proceedings*, proceedings supplementary to judgment and execution for the enforcement thereof, when the execution remains unsatisfied. Courts of equity have given such a remedy by bill compelling examination of a debtor under oath, and by injunction against disposing of his assets; and the codes of procedure have added as an alternative remedy, at the option of the creditor, a supplementary proceeding, either entitled in the original cause or a special proceeding issuing out of it, by which, on affidavit, an order is granted compelling the debtor, or a third person holding his assets or indebted to him, to appear for examination, and forbidding disposal of assets meanwhile; and, if assets are discovered, a receiver can be appointed. =Syn. 1. *Procedure*, *Operation*, etc. (see *process*), measure, performance, step.

proceleusmatic (pros'e-lūs-mat'ik), *a.* and *n.* [*LL. proceleusmaticus*, < Gr. *προκελευσματικός* (sc. *ποῦς*), a foot consisting of four short syllables, lit. 'pertaining to incitement'; < *προκελεύω*, < *προκελεῖν*, arouse to action beforehand, incite before, < *πρό*, before, + *κελεῖν*, order, < *κέλλειν*, urge, drive on, incite.] I. *a.* 1. Inciting; animating; encouraging.

The ancient *proceleusmatic* song, by which the rowers of Gallies were animated, may be supposed to have been of this kind.

Johnson, Jour. to Western Isles, p. 140.

2. In *pros.*, consisting, as a metrical foot, of four short syllables; of or pertaining to feet so constituted.

II. n. In *anc. pros.*, a foot consisting of four short times or syllables. The proceleusmatic (◡ ◡ ◡ ◡) is tetrasemic and isorhythmic.

Procellaria (pros-e-lā-ri-ā), *n.* [NL., < L. *procella*, a storm, a hurricane; see *procellous*.] A Linnean genus of *Procellariidae*, or petrels, formerly conterminous with the family, later variously restricted, now usually confined to the very small black-and-white species known as *Mother Carey's chickens*, as *P. pelagica*, the stormy petrel; in this restricted sense synonymous with *Thalassidroma* of Vigors. See cut under *petrel*.

procellarian (pros-e-lā-ri-an), *a.* and *n.* [*< Procellaria + -an.*] *I. a.* Of or pertaining to the genus *Procellaria*, in any sense; resembling or related to a petrel; belonging to the family *Procellariidae*.

II. n. A member of the genus *Procellaria* or family *Procellariidae*; a petrel of any kind.

Procellariidae (pros-e-lā-ri-i-dē), *n. pl.* [NL., < *Procellaria + -idae*.] A family of oceanic or pelagic natatorial birds, named from the genus *Procellaria*, belonging to the order *Longipennes* and suborder *Tubinares*, having tubular nostrils, epignathous bill with discontinuous horny covering, and webbed feet with very small, elevated, functionless or rudimentary hallux, if any; the petrels. The *Procellariidae* are birds of the high seas, of unsurpassed volitional powers, of all birds the most nearly independent of land. They abound on all seas. There are probably about 90 species, of numerous modern genera, divisible into three subfamilies—*Diomedinae*, albatrosses; *Procellariinae*; and *Halodrominae*, sea-runners; to which is to be added *Oceanitinae*, if the so-called *Oceanitidae* are referred back to this family. Also *Procellariade*, *Procellariades*.

Procellariinae (pros-e-lā-ri-i-nē), *n. pl.* [NL., < *Procellaria + -inae*.] The largest and leading subfamily of *Procellariidae*; this family, divested of the albatrosses and sea-runners; the petrels proper. They are characterized by the union of the nostrils in one double-barreled tube lying horizontally on the base of the culmen, and the presence of a hallux, however minute. There are five groups of species—the fulmars; the petrels of the genus *Oestrelata* and its relatives; the stormy petrels; the shearwaters or hagdens; and the saw-billed petrels. The genus *Oceanites* and three others, usually ranged with the stormy petrels, are sometimes detached as type of a family *Oceanitidae*. Also *Procellariinae*. See cuts under *Daption*, *Fulmar*, *hagden*, *Oestrelata*, *petrel*, and *shearwater*.

procellas (prō-sel-ās), *n.* [Origin unknown.] In *glass-blowing*, a jaw-tool for pinching in the neck of a bottle, or giving to it some peculiar shape, as it is revolved on the extremity of the pontil. Also called *pucellas*. *E. H. Knight*.

procellous (prō-sel-us), *a.* [= OF. *procellous* = Sp. *proceloso* = Pg. It. *proceloso*, < L. *procellosus*, tempestuous, boisterous, < *procella*, a storm, a hurricane (by which things are prostrated), < *procellere*, throw down, prostrate, < *pro*, forward, + *cellere*, drive, urge: see *excel*, *celerity*.] Stormy. *Bailey*, 1731.

procephalic (prō-se-fal'ik or prō-sef'a-lik), *a.* [*< Gr. πρό, before, + κεφαλή, head.*] *1.* Of or pertaining to the fore part of the head.—*2.* In *Crustacea*, specifically noting certain lobes or processes which form an anterior part of the wall of the head. See the quotation.

Two flat calcified plates, which appear to lie in the interior of the head (though they are really situated in its front and upper wall) on each side of the base of the rostrum, and are called the *procephalic processes*. *Huxley*, *Crayfish*, p. 160.

3. In *anc. pros.*, same as *macrocephalic*.—*Procephalic lobe*, one of a pair of rounded expansions, developed on the anterior end of the ventral aspect of the embryo of arthropods, which becomes one side and part of the front of the head.

The neural face of the embryo is fashioned first, and its anterior end terminates in two rounded expansions—the *procephalic lobes*. *Huxley*, *Anat. Invert.*, p. 219.

proception (prō-sep'shən), *n.* [*< L. as if *proceptio(n)-, < pro, before, + capere, pp. captus* (in comp. -ceptus), take: see *capable*. Cf. *conception*, *inception*, *perception*, etc.] The act of taking or seizing something beforehand; pre-occupation. [Rare.]

Having so little power to offend others that I have none to preserve what is mine own from their *proception*. *Bikon Basilike*.

proceret (prō-sēr'), *a.* [= Sp. *procer*, *procero* = Pg. It. *procerus*, < L. *procerus*, high, tall, long, < *pro*, for, before, + *cer-* as in *creare*, create: see *create*.] High; tall; lofty. Also *procerous*.

Such liguous and woody plants as are hard of substance, *proceri* of stature. *Bosley*, *Sylv.*, Int., § III.

procerebral (prō-ser'ē-brāl), *a.* [*< procerebrum + -al.*] Pertaining to the fore-brain or procerebrum; prosencephalic.

procerebrum (prō-ser'ē-brum), *n.* [NL., < L. *pro*, before, + *cerebrum*, the brain.] The fore-brain, comprising the cerebral hemispheres, corpora striata, and olfactory lobes; the prosencephalon.

proceres (pros'g-réz), *n. pl.* [L., pl. of *procer*, rarely *procus*, a chief, noble, magnate; cf. *procerus*, high: see *procere*, *a.*] *1.* The nobles or magnates of a country.

In 1323 it was with the counsel and consent of the prelates and *proceres*, earls, barons, and commons, that Edward resigned his claims on Scotland.

Stubbs, *Const. Hist.*, § 294.

2. [*cap.*] [NL.] In Sundevall's system, an order of birds: same as the *Proceri* of Illiger.

Proceri (prō-sē-ri), *n. pl.* [NL., pl. of L. *procerus*, high: see *procere*.] In *ornith.*, in Illiger's system of classification, a group of birds, the same as *Ratites* of Merrem, embracing the struthious birds, or ostriches and their allies: so called from their proceres or tall stature.

Proceridae (prō-ser'i-dē), *n. pl.* [NL., < *Procerus + -idae*.] A family of coleopterous insects, named by Laporte in 1834 from the genus *Procerus*, and now merged with the *Carabidae*.

procerite (pros'g-rit), *n.* [*< Gr. πρό, before, + κέρας, horn, + -ite*.] In *Crustacea*, the long many-jointed filament which terminates the antenna or feeler of many species, as lobsters and crawfish. It constitutes nearly the whole length of the organ in such cases, the several other named joints of the feeler being short and close to the base. It is the last one of a series of joints named *coxae*, *basiscite*, *scaphocerite*, *ischio-cerite*, *merocerite*, *carpocerite*, and *procerite*, and is an excellent illustration of an organ with so many joints (technically *subjoints*) that they are not taken into separate morphological consideration. See cuts under *antenna*, *Atacus*, *lobster*, and *Palinurus*.

proceritic (pros'g-rit'ik), *a.* [*< procerite + -ic.*] Pertaining to the procerite of a crustacean.

procerity (prō-ser'i-ti), *n.* [*< OF. procerite*, *F. procerité* = Sp. *proceridad* = Pg. *proceridade* = It. *procerità*, < L. *proceritas*, height, tallness, < *procerus*, high, tall: see *procere*.] Tallness; loftiness.

They were giants for their cruelty and covetous oppression, and not in stature or procerity of body. *Latimer*, *Sermon bef. Edw. VI.*, 1550.

Experiments in consort touching the procerity, and lowness, and artificial dwarfing of trees. *Bacon*, *Nat. Hist.*, § 532, note.

His insufferable procerity of stature, and uncorresponding dwarfishness of observation. *Lamb*, *Popular Fallacies*, xiii.

procerous (prō-sē-rus), *a.* [*< L. procerus*, high, tall: see *procere*.] *1.* Same as *procere*.

The compass about the wall of this new mount is five hundredth foot, . . . and the procerous stature of it, so emballing and girdling in this mount, twenty foot and six inches. *Nash*, *Lenten Stufe* (Harl. Misc., VI. 153).

2. Tall, as a bird; belonging to the *Proceres* or *Proceri*.

Procerus (pros'g-rus), *n.* [NL. (Megerle, 1821), < Gr. πρό, before, + κέρας, horn.] *1.* A genus of beetles, giving name to the family *Proceridae*, containing a number of east European and west Asiatic species, found on forest-covered mountain-slopes. These beetles resemble *Carabus*, but differ in having the anterior tarsi simple in both sexes.—*2.* [*i. c.*; pl. *proceri* (-ri).] A pyramidal muscle on the bridge of the nose, more fully called *procerus nasi* and *pyramidalis nasi*. See *pyramidalis*.

Procervulus (prō-ser'vū-lus), *n.* [NL. (Gaudry, 1878), < L. *pro*, before, + NL. *cervulus*, q. v.] A Miocene genus of *Cervidae*.

process (pros'es), *n.* [Early mod. E. also *proces*, *processe*; < ME. *processe*, *proces*, *proses*, < OF. *proces*, *F. procès* = Sp. *proceso* = Pg. It. *processo*, < L. *processus*, a going forward, progress, an appearance, an attack, a projection, lapse of time, < *procedere*, pp. *processus*, go forward, advance, proceed: see *proceed*.] *1.* A proceeding or moving forward; progressive movement; gradual advance; continuous proceeding.

So multiply ye sail
Ay furth in fayre *processes*.
York Plays, p. 13.

That there is somewhat higher than either of these two no other proof doth need than the very *process* of man's desire. *Hooker*.

The whole vast sweep of our surrounding prospect lay answering in a myriad fleeting shades the cloudy *process* of the tremendous sky. *H. James, Jr.*, *Pasa Pilgrim*, p. 41.

2. Course; lapse; a passing or elapsing; passage, as of time.

And therfor we muste abide, and wirke be *processes* of tyme. *Hampole*, *Prose Treatises* (E. E. T. S.), p. 20.

By *process*, as ye knownen everichoon,
Men may so longe graven in a stoon
Till some figure therein emprented be.
Chaucer, *Franklin's Tale*, l. 101.

Swich fire by *processes* shal of kynde colden.

Chaucer, *Troilus*, iv. 415.

Three beauteous springs to yellow autumn turn'd
In *process* of the seasons have I seen.

Shak., *Sonnets*, civ.

The thoughts of men are widen'd with the *process* of the suna.
Tennyson, *Locksley Hall*.

3. Manner of proceeding or happening; way in which something goes on; course or order of events.

Now I pas will to Pirrus by *process* agayne.

Destruction of Troy (E. E. T. S.), l. 13670.

Commend me to your honourable wife;

Tell her the *process* of Antonio's end.
Shak., *M. of V.*, iv. l. 274.

Our parts that are the spectators, or should hear a comedy, are to await the *process* and events of things.
R. Johnson, *Magnetick Lady*, iv. 2.

Saturnian Juno now with double care

Attends the fatal *process* of the war.
Dryden, *Æneid*, vii.

4. An action, operation, or method of treatment applied to something; a series of actions or experiments: as, a chemical *process*; a manufacturing *process*; mental *process*.

When the result or effect is produced by chemical action, or by the application of some element or power of nature, or of one substance to another, such modes, methods, or operations are called *processes*.

Piper v. Brown, 3 Fish. Pat. Cas., 175.

Cable-car lines are in *process* of construction.

Appleton's Ann. Cyc., 1886, p. 184.

5. Series of motions or changes going on, as in growth, decay, etc.: as, the *process* of vegetation; the *process* of decomposition.

He who knows the properties, the changes, and the *processes* of matter must, of necessity, understand the effects.
Bacon, *Physical Fables*, vii., Expl.

To him was given

Furl many a glimpse . . . of Nature's *processes*

Upon the exalted hills.
Wordsworth, *On the Side of the Mountain of Black Comb*.

6. In law: (*a*) The summons, mandate, or command by which a defendant or a thing is brought before the court for litigation: so called as being the primary part of the proceedings, by which the rest is directed. Formerly the superior common-law courts of England, in the case of personal actions, differed greatly in their modes of *process*; but since the passing of the Process Uniformity Act personal actions in general, except replevin, are begun in the same way in all the English courts—namely, by a writ of summons. In chancery the ordinary *process* was a writ of subpoena. The mode common in probate and ecclesiastical courts is by a citation or summons. In criminal cases, if the accused is not already in custody, the *process* is usually a writ or warrant.

The Abbot of S. Isidor is of my acquaintance and my great friend, . . . and now of late there hath bene *process* against him to appear in this your audience.

Guevara, *Letters* (tr. by Hellowes, 1577), p. 202.

I'll get out *process*, and attach 'em all.

Middleton (and others), *The Widow*, ii. l.

The next step for carrying on the suit, after suing out the original, is called the *process*; being the means of compelling the defendant to appear in court.

Blackstone, *Com.*, III. xix.

They [the bishops] regarded the *processes* against heretics as the most distressing part of their office.
R. W. Dixon, *Hist. Church of Eng.*, iii.

(*b*) The whole course of proceedings in a cause, real or personal, civil or criminal, from the original writ to the end of the suit. Hence —*7.* A relation; narrative; story; detailed account.

But hennas forth I wol my *process* holde

To speke of adventures and of batailles.
Chaucer, *Squire's Tale*, l. 650.

To teche chyllder curtasy is myne entent,

And thus forth my *process* I purpos to be-gynne.
Books of Precedence (E. E. T. S., extra ser.), l. 56.

In brief, to set the needless *process* by,
How I persuaded, how I pray'd, and kneel'd,
How he rehell'd me, and how I replied.

Shak., *M. for M.*, v. l. 92.

8. Proclamation.

When Pelleus his *process* hade publiht on highe,
And all soborly said with a sad wille,
Jason was Joly of his Juste wordes,
That in presens of the pepull tho profers were made,
And mony stythe of *astate* standing aboute.

Destruction of Troy (E. E. T. S.), l. 247.

9. In *anat.* and *zool.*, a *processus*; an outgrowth or outgrowing part; a protuberance; a prominence; a projection: used in the widest sense, specific application being made by some qualifying term: as, coracoid *process*.

A third comes out with the important discovery of some new *process* in the skeleton of a mole.

Goldsmith, *Citizen of the World*, lxxxix.

10. In *bot.*, a projection from a surface; specifically, in mosses, one of the principal divisions or segments of the inner peristome.—*11.* Same as *photo-process*: commonly used attributively:

as, *process blocks*, *process cuts*, *process pictures*, etc.

The bare floor was clean, and the walls were hung with cheap prints of the kind known as *process pictures*.

The Standard, VII. 12.

Abating process. See *abate*.—**Abuse of process.** See *abuse*.—**Accessory process.** Same as *anapophysis*.—**Acromial or acromion process.** See *acromion*.—**Actinic process.** See *actinic*.—**Alar processes,** two small wing-like processes proceeding from the crista galli in front against the frontal bone, and partially including the foramen cæcum.—**Albumin process,** in *photog.* See *albumin*.—**Alinassal, alveolar, angular processes.** See the adjectives.—**Ammonia ore process.** See *ammonia*.—**Anconeus process.** Same as *olecranon*.—**Annular, anteorbital, auditory, autographic process.** See the adjectives.—**Articular process of the lower jaw.** See *articular*.—**Augustin's process,** a method of extracting silver from the ground chloridized ores of that metal, by the use of a solution of common salt. The silver chlorid, formed in the chloridizing roasting, is soluble in the saline solution, a double chlorid of silver and sodium being formed. From this solution the silver is precipitated by means of copper.—**Barff's process,** a method of protecting the surface of iron from rust by forming upon it a thin film of magnetic oxid. It is done by subjecting it at a red heat to the action of superheated steam.—**Basic process.** See *basic*.—**Basilar process.** See *basilar*.—**Basipterygoid process.** See *basipterygoid*.—**Beer process,** in *photog.* See *beer*.—**Bessemer process,** a method, invented by Bessemer, of decarburizing cast-iron. It is of great importance, since by this process steel can now be made much more cheaply than was formerly possible. See *steel*.—**Bethell process,** a process for preserving wood, consisting in its impregnation with tar, oil of tar, and carbolic acid; this mixture is commercially known as *gallatin*, and is obtained by the distillation of coal.—**Bird's-head process,** one of the avicularia of a polyzoon, which are shaped and have a snapping motion like the beak of a bird.—**Bitumen process,** in *photog.* See *bitumen*.—**Boucherie's process,** the injection of a solution of sulphate of copper into the pores of wood.—**Burnettizing process,** the introduction of zinc chlorid into the pores of wood.—**Capitular, carbon, Carinthian process.** See the qualifying words.—**Cazo process** (Sp. *cazo*, a pan), in *metal.*, the treatment of silver ores in the moist way, with the aid of heat, which in the patio process is not used. See *patio process*.—**Chenot process,** a process, invented by the French metallurgist Chenot, for producing cast-steel. Wrought-iron in the form of a metallic sponge is first obtained directly from the ore by cementation with charcoal. This iron is then carburized by being impregnated with some liquid substance rich in carbon, then torrefied, and finally melted in crucibles, as in the ordinary method of manufacturing cast-steel.—**Chlorination, chlorin, ciliary, clay, clinoid, cochleariform process.** See the qualifying words.—**Colloid process,** in *photog.* See *colloid*.—**Condylod process.** Same as *articular process of the lower jaw*.—**Coracoid, coronoid, costal process.** See the adjectives.—**Cordur's process,** a method of desinification, by the use of superheated steam, of lead from which the silver has been separated by the Parkes process.—**Cresoting process,** the application of cresote to wood (especially telegraph-poles) for its preservation.—**Direct process.** See *blooming*.—**Dry process.** (a) In *photog.*, the use of dry plates or films; specifically, the use of gelatinobromide emulsions as a sensitive coating for plates or films which are used in a dry state. See *photography*. (b) In *fish-culture*, a process of fecundating spawn, invented by V. P. Vraaski. It differs from the *moist process* by requiring two vessels, one for the spawn, which is placed in it without water, and the other for the milk, to which water is added to moisten the eggs. By the dry process, scarcely one per cent. of the eggs escape fecundation, while in the moist method ten or twelve per cent. of the spawn may be lost. (c) In *assaying*. See *assaying*.—**Due process of law.** See *due*.—**Eckart's process,** a method of preserving meats, game, fish, etc., by means of a solution of 1,240 parts salt, 10 parts saltpeter, and 25 parts salicylic acid in 8,725 parts of clean water, applied under a pressure of 180 to 200 pounds per square inch.—**Enamiform process.** Same as *metasternum*.—**Ethmoidal process,** a small projection on the posterior superior border of the turbinate bone for articulation with the uncinat process of the ethmoid.—**Executive process.** See *executory*.—**Falciform process.** Same as *falc cerebri* (which see, under *falc*).—**Fallacy of an illicit process.** See *fallacy*.—**Final process,** the writ of execution used to carry the judgment into effect.—**Floccular process,** the flocculus.—**Foreign Process Act.** See *foreign*.—**Fox-Talbot process.** Same as *Fox type 1*.—**Frontonasal, galvanoplastic, gelatin, geniculate, Ingrassian process.** See the qualifying words.—**Hamular process.** (a) Of the lacrymal bone, a hook-like projection at the lower extremity, curving forward in the lacrymal notch of the maxilla. (b) Of the sphenoid, the inferior hook-like extremity of the internal pterygoid plate, under which the tendon of the tensor palati plays.—**Heliotype process.** See *heliotype*.—**Intercoaxal, jugal, jugular process.** See the adjectives.—**Iron-reduction process,** a method of smelting lead in which metallic iron is employed as an accessory agent of desulphurization, or else some oxidized compound of iron, which during the process will yield metallic iron. This process has been extensively experimented with at Tarnowitz in Silesia, and in the Harz, and there abandoned. It has also been tried in other localities, and is (or was recently) in use to some extent in Japan. Also called *precipitation process*, a translation of the German name for it (*niederschlagarbeit*).—**Jugular process,** in man, a thickened part of the occipital bone to the back and outer side of the jugular fossa, articulating with the mastoid part of the temporal.—**Kenogenetic process.** See *kenogenetic*.—**Kyanizing process.** See *kyanizing*.—**Lacrymal process,** a small projection on the upper anterior border of the turbinate bone for articulation with the lacrymal bone.—**Le Blanc process.** See *soda*.—**Lenticular process.** See *lentic* (a).—**Long process of the malleus,** a slender process received in the Glaserian fissure. Also called *processus gracilis, longus, tenuis, foliatus, anterior, and tertius*. See cut under *hyoid*.—**Malar process,** a thick triangular projection of the maxilla for articulation with the malar bone.—**Mamillary, mas-**

toid, meane process. See the adjectives.—**Martin process.** See *steel*.—**Maxillary process.** (a) Of the palate-bone, a tongue-shaped projection on the anterior border of the vertical plate, overlapping the orifice of the antrum of Highmore in the articulated skull. (b) Of the turbinate bone, a flattened plate descending from the attached margin, forming, when articulated, a part of the inner wall of the antrum below the entrance.—**Monteith's process,** the discharging of color from mordanted cotton cloth by the direct application of chlorine.—**Morphine or morphia process.** See *morphine*.—**Nasal process.** (a) The slender tapering process on the anterior superior part of the maxilla articulating with the frontal above. (b) Same as *lacrymal process*. (c) Same as *nasal spine* (which see, under *nasal*).—**Nutant process.** See *nutant*.—**Oblique processes of the vertebra.** See the adjectives.—**Obliterate, odontoid, orbital process.** See the adjectives.—**Olivary process.** Same as *olivary eminence* (which see, under *olivary*).—**Orbicular process.** See *incus* (a).—**Palatal or palatine process,** any marked outgrowth of a palate-bone, especially the flat horizontal plate of that bone which meets its fellow in mid-line, the pair together forming the hinder part of the hard palate or bony roof of the mouth.—**Palingenetic process.** See *palingenetic*.—**Paramastoid process,** in man, an obtuse projection of the under surface of the jugular process, at the insertion of the rectus capitis lateralis muscle, corresponding to a prominent process present in many mammals, especially the ungulates and rodents. Also called *paracondylod process*.—**Parkes process,** a method of separating silver from lead by fusion with metallic zinc. When a molten mixture of these two metals is allowed to cool, the zinc separates and solidifies first, forming a crust on the other metal. If the lead contains silver, this is concentrated in the solidified crust of zinc, from which it may afterward be separated by distillation.—**Parotic process.** See *parotic*.—**Patera process.** See *Von Patera process*, below.—**Patio process** (Sp. *patio*, an open space), in *metal.*, a method of obtaining the silver from argentiferous ores by amalgamation, extensively practised in Mexico and South America. It is suited for ores in which the silver is present in the form of simple or complex sulphids, without a large percentage of blende or galena, or more than three or four per cent. of copper pyrites. In this process the ore, ground by arrastra, is mixed with common salt, roasted copper pyrites (called *magnet*), and quicksilver. The whole mass is thoroughly mixed, usually by being trodden by mules, the result being that the silver becomes amalgamated with the quicksilver, and can then be easily separated. The mixing (as indicated by the name) takes place on large level floors in the open air.—**Pattinson process,** in *metal.*, a method of desilverizing lead, in general use in the treatment of argentiferous lead, and capable of being profitably employed even when the precious metal is present in the lead in so small quantity as two or three ounces to the ton of the baser metal. The process depends on the fact that melted lead containing silver solidifies gradually on cooling, small particles like crystals separating from the liquid mass, which latter is much richer in silver than the other part—the part which solidifies or crystallizes first yielding up a large part of its silver to that part of the lead which remains fluid. By several repetitions of the operation, the remaining lead becomes at last so enriched with silver that this metal can be easily and profitably separated. The process, which is one of great importance in the metallurgical treatment of argentiferous galena, was the invention of Hugh Lee Pattinson of Alston in Cumberland, and was first applied on a scale of some magnitude in 1833. Before this invention silver had always been separated from lead (these two metals being almost always found associated together in nature) by cupellation, through which process a proportion of silver less than about eight ounces to the ton of lead could not be separated with profit. The process is sometimes called *pattinsonization*.—**Pectineal, phalangeal, photolithographic process.** See the adjectives.—**Photogelatin process,** in *photog.*, any process in which gelatin plays an important part, as in the ordinary gelatinobromide dry plates and films.—**Plaster process.** See *plaster*.—**Plattner's process,** a method of separating gold from pyrites by the employment of chlorine gas, by which the gold is converted into a soluble chlorid, which can then be washed out with water, and precipitated by sulphureted hydrogen in the form of a sulphuret, from which combination the precious metal is easily obtained. See *chlorination*.—**Polychromatic, postauditory, postfrontal, post-tymppanic, prepubic process.** See the adjectives.—**Precipitation process.** Same as *iron-reduction process*.—**Process acts,** United States statutes of 1789 and 1792 (1 Stat. 93, 275), the first requiring the writs, executions, and other processes of the United States courts in suits at law to conform to those used in the supreme courts of the several States where such courts were held, except as to their style and tests. The second, in effect, reenacted the first, but allowed the courts or the Supreme Court of the United States by rule to make such alterations or additions as might seem expedient, and regulated the fees of court-officers, etc.—**Process caption.** See *caption*.—**Process of augmentation.** See *augmentation*.—**Process work,** any form of relief-printing plate made by photographic or etching processes, and not by cutting with a graver. See *photo-process*.—**Prosternal, pterygoid, etc., process.** See the adjectives.—**Pyramidal process.** Same as *tuberosity of the palate-bone*.—**Russell's process,** a modification of the Von Patera process for the separation of silver from its ores. The peculiarity of the process depends on the fact that a solution of thiosulphate of copper and soda has a powerful decomposing influence on the sulphureted, antimoniated, and arseniated combinations of silver. The roasted ore is first lixiviated with sodium thiosulphate to dissolve the silver chlorid, and afterward with copper thiosulphate. This latter solvent is called the "extra solution," and by its use an additional amount of silver is saved, which would otherwise have been lost in the tailings.—**Short process of malleus,** a small conical eminence at the root of the manubrium. Also called *processus brevis, obtusus, externus, conoides, or secundus, or tuberculum mallei*.—**Siemens-Martin process.** See *steel*.—**Siemens process.** See *steel*.—**Solvay process.** See *soda*.—**Sphenoidal process,** the posterior of the two processes surmounting the vertical plate of the palate-

bone. It curves inward and backward on the under surface of the body of the sphenoid bone.—**Spinous process.** See *spinous*.—**Styloid process.** (a) A conical eminence at the upper extremity of the fibula. (b) A short, stout, pyramidal process projecting downward from the outer part of the distal extremity of the radius. (c) A short cylindrical eminence at the inner and back part of the distal extremity of the ulna. (d) A long, slender, tapering process projecting downward and forward from the outer part of the under surface of the petrous portion of the temporal bone; it is developed from independent centers of ossification, corresponding to the tympanohyal and stylohyal bones.—**Supracondylar process,** a small hook-like process, with its point directed downward, not unfrequently found in front of the internal condylar ridge of the humerus in man. It represents a part of the bone inclosing a foramen in carnivorous animals.—**Thomas-Gilchrist process.** Same as *basic process*.—**To obstruct process.** See *obstruct*.—**Trustee process.** See *garnishment*, 2 (b).—**Turbinate process.** (a) Superior, a short sharp margin of the ethmoid overhanging the superior meatus. (b) Inferior, the folded margin of the sphenoid overhanging the middle meatus. Also called *superior and middle spongy bones*.—**Uchatius process,** a method of making steel which has been tried in various places, but is not in general use. It consists in decarburizing pig-iron by fusing it with a material which will give up oxygen, especially iron peroxid or roasted spathic ore.—**Uncinate process.** See *processus uncinatus*, under *processus*.—**Vaginal process.** (a) Of the sphenoid, a slightly raised edge at the base of the internal plate of the pterygoid, articulating with the everted margin of the vomer. (b) Of the temporal, a flattened plate of bone on the under surface of the petrous portion, immediately back of the glenoid fossa, and partly surrounding the styloid process at its base.—**Vermiform process,** the elevated median portion or lobe between the hemispheres of the cerebellum—that portion on the upper surface being known as the *superior*, that on the under surface the *inferior*.—**Von Patera process,** a method of separating silver from its ores, after a chloridizing roasting, by means of a solution of hypophosphite of soda or lime, which takes up the chlorid of silver, from which solution the metal can be precipitated by an alkaline sulphuret.—**Waahoe process,** in *metal.* See *pani*, 3.—**Wet process,** in *photog.*, the collodion process.—**Zier-vogel's process,** the separation of silver from the sulphate by lixiviation with hot water containing some sulphuric acid. It is used in the treatment of argentiferous copper mattes in which the silver has been transformed into the sulphate by a peculiar kind of roasting. This process is one of very limited application, as great skill is required for the management of the roasting, and but few silver-ores can be profitably treated by the method.—**Zygomat process,** a horizontal bar, directed forward from the squamous part of the temporal bone, and articulating in front with the malar. Also called *zygoma*.—**Syn. Process, Proceeding, Procedure, Operation.** In this connection *process* applies to a way of doing something by rule or established method: as, the Bessemer process; the process of drilling an artesian well; a legal process. *Proceeding* expresses a complex action making a whole: as, it was a very strange proceeding. *Jefferson and Cushing*, in their manuals of parliamentary procedure, use *proceeding*, perhaps as a participial noun, where *procedure*, being more exact, would be the better word. *Procedure* applies to a way of doing things formally; a legal proceeding is a thing done legally; a legal process is a legal form gone through for the attainment of a definite purpose; legal procedure is the way of doing things in the administration of law, as in the courtroom; a legal procedure is a less desirable form of expression for a legal proceeding. *Operation* may be used for the way in which a thing works or operates: as, the operation of a nail-making machine; it is rarely used thus of personal activity, except in a bad sense: as, the operations of a gang of thieves. See *act*, v. t.

process (pros'es), v. t. [*process*, n.] 1. To proceed against by legal process; summon in a court of law.

He was at the quarter-sessions, *processing* his brother for tin and tinpence, hay-money.

Miss Edgeworth, Ennui, viii.

If a man *processes* a neighbour for debt, he is in danger of being paid with a full ounce of lead.

Fortnightly Rev., N. S., XI. 430.

2. To reproduce, as a drawing, etc., by any mechanical process, especially by a photographic process. See *photo-process*. [Recent.]

Of course all American readers saw at once that every cut in Mr. Pyle's admirable book was *processed*—to use a new verb invented to fit a new thing.

New York Evening Post, Jan. 28, 1884.

Both [books], we should say, are rather well illustrated. Lady J—'s with heliographic portraits . . . and Capt. B—'s with copies (also *processed* in some way) of drawings.

Athenæum, No. 3251, p. 207.

processal (pros'es-al), a. [*process* + -al.] Pertaining to or involving a process. [Rare.]

All Sorts of Damages, and *processal* Charges, come to above two hundred and fifty thousand Crowns.

Howell, Letters, I. iii. 8.

procession (prô-sesh'on), n. [*process*, n.] 1. The act of proceeding or issuing forth or from anything. The Greek churches deny the *procession* of the Holy Ghost from the Son.

Jer. Taylor, Works (ed. 1835), II. 290.

In the *procession* of the soul from within outward, it enlarges its circles ever, like . . . the light proceeding from an orb.

Emerson, Essays, 1st ser., p. 163.

It is obvious that the Effect is always the *Procession* of the Cause, the dynamical aspect of the statistical conditions. *G. H. Lewis, Proba. of Life and Mind, I. ii. 87.*

2. A succession of persons walking, or riding on horseback or in vehicles, in a formal march, or moving with ceremonious solemnity.

Goth with faire procession

To Jerusalem thow the town.

King Horn (E. E. T. S.), p. 91.

All the priests and friars in my realm

Shall in procession sing her endless praise.

Shak., I Hen. VI., I. 6. 30.

The whole body, clothed in rich vestments, with candles in their hands, went in procession three times round the holy sepulchre. *Pococke, Description of the East, II. i. 18.*

Let the long, long procession go,

And let the sorrowing crowd about it grow.

Tennyson, Death of Wellington, III.

3. An office, form of worship, hymn, litany, etc., said or sung by a number of persons advancing with a measured and uniform movement.—*Procession of the Holy Ghost, in thek, the emanation or proceeding of the Holy Ghost either from the Father (single procession) or from the Father and the Son (double procession).* See *Pilgrimage*, and *Nicene Creed* (under *Nicene*).—*Procession week.* Same as *Rogation week* (which see, under *rogation*).—*To go procession*, to take part in a procession of parishioners, led by the parish priest or the patron of the church, making the round of the parish, and invoking blessings on the fruits, with thanksgiving.

Bury me

Under that holy-oke or gospel-tree,

Where, though thou see'st not, thou may'st think upon

Me when thou yearly go'st procession.

Herrick, To Anthea.

procession (prō-sesh'ōn), *v.* [= *It. processione*, *< ML. processionare*, go in procession; from the noun.] *I. intrans.* To go in procession.

There is eating, and drinking, and processioning, and masquerading. *Colman, Man and Wife, I. (Davies.)*

Two weary hours of processioning about the town, and the inevitable collation. *Josiah Quincy, Figures of the Past, p. 368.*

II. trans. 1. To treat or beset with processions. [Rare.]

When they feasting dayes come, they are . . . with no small solemnitye mattedness, massed, candelighted, processioned, censured, etc. *Bp. Bale, English Votaries, I.*

2. In some of the American colonies, to go about in order to settle the boundaries of, as land. The term is still used in North Carolina and Tennessee. Compare to *beat the bounds*, under *bound*.

Once in every four years [in the Virginia colony] the vestry, by order of the county court, divided the parish into precincts, and appointed two persons in each precinct to *procession* the lands. These surveyors, assisted by the neighbors, examined and renewed, by blazing trees or by other artificial devices, the old landmarks of the fathers, and reported the result to the vestry, who recorded the same in the parish books. *Johns Hopkins Hist. Studies, III. 64.*

processional (prō-sesh'ōn-əl), *a.* and *n.* [*ME. processional* (*n.*), *< OF. processionale*, *F. processionale* = *Sp. procesional* = *Pg. processional* = *It. "processionale* (in adv. *processionalmente*), *< ML. "processionalis*, in neut. *processionale*, a processional (book), *< L. processio(n)*, procession: see *procession*.] *I. a.* Pertaining to a procession; consisting in, having the movement of, or used in a procession: as, a *processional* hymn.—*Processional cross.* See *cross*.

II. n. 1. An office-book containing the offices with their antiphons, hymns, rubrical directions, etc., for use in processional litanies and other religious processions.

The ancient service books, . . . the Antiphoners, Missals, Gradals, *Processionals*, . . . in Latin or English, written or printed. *R. W. Dixon, Hist. Church of Eng., xvi.*

2. A hymn sung during a religious procession, particularly during the entry of the clergy and choir into the church before divine service.

processionalist (prō-sesh'ōn-əl-ist), *n.* [*processional* + *-ist*.] One who walks in a procession; a processionist.

processionally (prō-sesh'ōn-əl-i), *adv.* In the manner of a procession; in solemn or formal march.

Henry (V.) himself rode between long glittering rows of clergy who had come *processionally* forth to bring him into Rouen by its principal gate. *Rock, Church of our Fathers, III. 1. 306.*

processionary (prō-sesh'ōn-ə-ri), *a.* and *n.* [*ME. processionary*, *n.*; = *F. processionnaire* = *Sp. procesionario* = *Pg. processionario*, *< ML. processionarius*, pertaining to a procession, *< L. processio(n)*, procession: see *procession*.] *I. a.* 1. Consisting in formal or solemn procession. *Hooker, Eccles. Polity, v. § 41.*—2. In entom., specifically, forming and moving in a procession: said of certain caterpillars.—*Processionary caterpillar*, the larva of the European bombycid moth *Oncophanes processionea*, which travels up

and down the trunks of trees in single, double, or quadruple file. The name is also extended to other larvae of similar habit. See the quotation.

You will see one caterpillar come out and explore the ground with care; a second immediately follows, a third following the second, and after these come two which touch each other and the one that precedes them; these are followed by three; then comes a row of four, then a row of five, then a row of six, all these following with precision the movements of the leader. From this circumstance is derived their name of *processionary caterpillar*. *S. G. Goodrich, in H. J. Johnson's Nat. Hist.*

II. n. Same as *processioner*, 2.

processioner (prō-sesh'ōn-ēr), *n.* [*< ME. processionare* (def. 2), *< OF. processionaire*, *F. processionnaire*, *< ML. processionarius*, pertaining to a procession, neut. *processionarium*, a processional (book): see *processionary*.] 1. One who goes in a procession. [Rare.]

The *processioners*, seeing them running towards them, and with them the troopers of the holy brotherhood with their cross-bows, began to fear some evil accident. *Jardie, tr. of Don Quixote, I. iv. 25. (Davies.)*

2. A county officer in North Carolina and Tennessee charged with the duty of surveying lands at the request of an occupant claiming to be owner.

procession-flower, *n.* See *milkwort*, 1.

processioning (prō-sesh'ōn-ing), *n.* [Verbal *n.* of *procession*, *v.*] A survey and inspection of boundaries periodically performed in some of the American colonies by the local authorities, for the purpose of ascertaining and perpetuating correct boundaries of the various landowners. It was analogous in part to the perambulations practised in England (see *perambulation*, 4), and was superseded by the introduction of the practice of accurate surveying and of recording. The term is still used of some official surveys in North Carolina and Tennessee.

processionist (prō-sesh'ōn-ist), *n.* [*< procession* + *-ist*.] One who takes part in a procession.

A few roughs may have thrown stones; and certainly the *processionists* gave provocation, attacking and wrecking the houses of Protestants, especially at the Broadway. *Fortnightly Rev., N. S., XI. 239.*

processive (prō-sesh'iv), *a.* [= *F. processif* = *It. processivo*, *< ML. "processivus* (in adv. *processive*), *< L. procedere*, pp. *processus*, go forward: see *proceed*, *process*.] Going forward; advancing. *Coleridge.*

process-server (prō-sesh'sēr-vēr), *n.* One who processes or summonses; a sheriff's officer; a bailiff.

He hath been . . . a *process-server*, a bailiff.

Shak., W. T., iv. 3. 102.

processual (prō-sesh'ū-əl), *a.* [*< L. processus*, process (see *process*), + *-al*.] In civil law, relating to legal process or proceedings: as, *processual* agency (the peculiar agency of a cognitor appointed in court by a party to act in his place, or of a procurator appearing instead of an absent party to take his place in the cause).

processum continuando (prō-sesh'ūm kon-tin-ū-an-dō), [*L.: processum*, accus. sing. of *processus*, process; *continuando*, abl. gerund. of *continuaré*, continue: see *continue*.] In Eng. law, a writ for the continuance of process after the death of the chief justice or other justices in the commission of oyer and terminer.

processus (prō-sesh'us), *n.*; pl. *processus*. [*NL.*, *< L. processus*, a process: see *process*.] In anat., a process; an outgrowth; a part that proceeds to or toward another part.—*Processus a cerebello ad cerebrum*, the anterior peduncles of the cerebellum. See *peduncle*.—*Processus a cerebello ad testes*, the anterior peduncles of the cerebellum. See *peduncle*.—*Processus ad medullam*, the inferior peduncles of the cerebellum. See *peduncle*.—*Processus ad pontem*, the middle peduncles of the cerebellum. See *peduncle*.—*Processus anonyms*, an obtuse tubercular projection on either side of the cerebral surface of the basilar process, in front of the orifice of the precondylar foramen.—*Processus brevis*, the short process of the malleus. Also called *processus conoides externus*, *obtusus*, and *secundus*.—*Processus caudatus*, the tail of the antherid of the ear. See *second cut under ear*.—*Processus clavatus*, the clava or superior enlargement of the funicular gracilis.—*Processus cochleariformis*, a thin lamina of bone above the Eustachian canal in the petrous section of the temporal bone, separating that canal from the canal for the tensor tympani muscle.—*Processus costarius*, (a) The ventral root of a cervical transverse process. (b) A transverse process of a lumbar vertebra.—*Processus cuneatus*, the tuberculum cuneatum, or slight superior enlargement of the funicular cuneatus.—*Processus e cerebello ad cerebrum*, the superior peduncle of the cerebellum. See *peduncle*.—*Processus e cerebello ad medullam oblongatam*, the inferior peduncle of the cerebellum.—*Processus e cerebello ad pontem*, the middle peduncle of the cerebellum.—*Processus e cerebello ad testes*, the superior peduncle of the cerebellum.—*Processus falciformis*, the falciform process of the eye of a fish.—*Processus foliatus*, *gracilis*, *longus*, *tenuis*, etc. See *long process of the malleus*, under *process*.—*Processus interjugal*, a process from the occipital bone uniting with the petrous part of the tem-

poral, and dividing the jugular inclosure into two foramina, a large outer, and smaller inner one.—*Processus lenticularis*, the lenticular process.—*Processus muscularis*, the projection at the external angle of the arytenoid cartilage, where the posterior and lateral crico-arytenoid muscles are inserted.—*Processus reticularis*, a reticulated offset of gray matter near the middle of the outer surface of the gray crescents of the spinal cord. See figure under *spinal cord*.—*Processus uncinatus*, the hooked process of a rib, as of a bird, which is articulated with and projects backward from the rib, overlying the next rib or several ribs; an epipleura. See cut under *epipleura*.

The vertebral pieces are distinguished by backwardly direct processes (*processus uncinati*), which are applied to the body of the succeeding rib.

Gegenbaur, Comp. Anat. (trans.), p. 440.

Processus vaginalis peritonei, a pouch of peritoneum extending into the scrotum during the descent of the testicle. Afterward the upper part becomes obliterated, leaving the lower part as a closed sac, which is known as the *tunica vaginalis*.—*Processus vocalis*, the horizontal projection at the anterior angle of the base of the arytenoid cartilage, for the insertion of the true vocal cord.

procès verbal (pro-sā-ver-bal'), [*F.*, a minute, an authenticated statement in writing: *procès*, a process; *verbal*, verbal: see *verbal*.] In French law, a detailed authenticated account of an official act or proceeding; a statement of facts, especially in a criminal charge; also, the minutes drawn up by the secretary or other officer of the proceedings of an assembly.

prochein, *a.* [*F. prochain*, next, neighboring, *< L. proximus*, near: see *proximate*.] Next; nearest: used in the law phrase *prochein amy* (or *ami*), the next friend, a person who undertakes to assist an infant or minor in prosecuting his or her rights.—*Prochein avoidance*, in law, a power to present a minister to a church when it shall become void.

prochilus (prō-kī'lus), *a.* [*< Gr. πρόχίλος*, with prominent lips, *< πρό*, before, forward, + *χίλος*, lip, snout.] Having protuberant or protrusile lips. *Coues.*

prochlorite (prō-klor'it), *n.* [*< pro-* + *chlorite*.] In mineral., a kind of chlorite occurring in foliated or granular masses of a green color: it contains less silica and more iron than the allied species clinocllore and ripidolite.

prochoanite (prō-kō'a-nīt), *a.* and *n.* *I. a.* Belonging to the *Prochoanites*.

II. n. A cephalopod of the group *Prochoanites*. *Prochoanites* (prō-kō'a-nī'tēs), *n. pl.* [*NL.*, *< Gr. πρό*, before, + *χοάνη*, a funnel: see *choana*, *choanite*.] A group of holocoanoid nautiloid cephalopods whose septal funnels are turned forward: contrasted with *Metachonites*. *Hyat, Proc. Bost. Soc. Nat. Hist., 1883, p. 260.*

prochondral (prō-kon'drāl), *a.* [*< Gr. πρό*, before, + *χόνδρος*, cartilage: see *chondral*.] Prior to the formation of cartilage; about to become cartilage.

prochoos (prō'kō-os), *n.*; pl. *prochooi* (-oi). [*< Gr. πρόχοος, πρόχους* (see def.), *< προχύν*, pour forth.] In *Gr. antiq.*, a small vase of elegant form, resembling the oinochoë, but in general more slender, and with a handle rising higher above the rim: used especially to pour water on the hands before meals were served.

The holding the *prochous* up high (*ἀνύχων*) is often observed in those who pour out for a libation. *C. O. Müller, Manual of Archaeol. (trans.), § 296.*

Greek Prochoos with black-figure decoration.

prochorion (prō-kō-ri-on), *n.*; pl. *prochoria* (-ia). [*NL.*, *< L. pro-*, before, + *NL. chorion*, q. v.] The primitive chorion; the outer envelop of an ovum: in man and some other animals specially known as the *zona pellucida*. It is the yolk-sac or vitelline membrane, not entering into the formative changes which go on within it during the germination and maturation of the ovum, but in the course of development becoming the chorion proper, and forming the outermost of the membranes which envelop the fetus.

prochorionic (prō-kō-ri-on'ik), *a.* [*< prochorion* + *-ic*.] Of or pertaining to the prochorion.

prochronism (prō'kron-izm), *n.* [= *Pg. prochronismo* = *Sp. It. procrónismo*; *< Gr. πρόχρονος*, preceding in time, previous (*< πρό*, be-

fore, + *χρόνος*, time), + *-ism*.] An error in chronology consisting in antedating something; the dating of an event before the time when it happened, or the representing of something as existing before it really did.

The *prochronisms* in these [Towneley] Mysteries are very remarkable. *Archæologia*, XXVII. 252. (Davies.)

"Puffed with wonderful skill" he [Lord Macaulay] introduces with the half-sally "to use the modern phrase"; and that though he had put the verb, and without *prochronism*, into the mouth of Osborne, the book-seller knocked down by Dr. Johnson.

F. Hall, *Mod. Eng.*, p. 180.

providence (pros'i-dens), *n.* [= F. *providence* = Sp. Pg. *providencia* = It. *providenza*, < L. *providentia*, a falling down or forward, < *proci-*den(t)-s, ppr. of *proci-*dere, fall forward or prostrate: see *proci-*dent.] A falling down; in *pathol.*, a prolapsus.

proci-dent (pros'i-dent), *a.* [*<* L. *proci-*dent(t)-s, ppr. of *proci-*dere, fall forward or prostrate, < *pro*, forward, + *cadere*, fall: see *cadent*.] Falling or fallen; in *pathol.*, affected by prolapsus.

proci-dentia (pros-i-den'ti-a), *n.* [L.: see *proci-*dent.] In *pathol.*, a falling downward or forward; prolapsus.—**Proci-**dentia iridis, prolapse of the iris.—**Proci-**dentia recti, the descent of the upper part of the rectum, in its whole thickness, or all its coats, through the anus.—**Proci-**dentia uteri, complete prolapsus of the uterus, with inversion of the vagina, and extrusion of the uterus through the vulva.

proci-duous (prō-sig'ū-us), *a.* [*<* L. *proci-*duus, fallen down, prostrate, < *proci-*dere, fall forward or prostrate: see *proci-*dent. Cf. *deciduous*.] Falling from its proper place. *Imp. Dict.*

proci-net (prō-singkt'), *n.* [= Sp. It. *proci-*nto, < L. *proci-*netus, preparation or readiness for battle, < *proci-*netus, pp. of *proci-*gere, gird up, prepare, equip, < *pro*, before, + *cingere*, gird, encircle: see *cincture*.] Preparation or readiness, especially for battle.—In *proci-*net or *proci-*nets [L. in *proci-*netu], at hand; ready: a Latinism.

He stood in *proci-*nets, ready with oil in his lamp, watching till his Lord should call.

Jer. Taylor, *Works* (ed. 1885), II. 141.

War he perceived, war in *proci-*net. *Milton*, P. L., vi. 19.

proclaim (prō-klām'), *v. t.* [*<* ME. *proclaymen*, < OF. *proclamer*, F. *proclamer* = Sp. Pg. *proclamar* = It. *proclamare*, < L. *proclamare*, call out, < *pro*, before, + *clamare*, call, cry: see *claim*.] 1. To make known by public announcement; promulgate; announce; publish.

The pardon that the legat hadde graunted and *pro-*claimed though all cristendom.

Martin (E. E. T. S.), III. 577.

He hath sent me to . . . *proclaim* liberty to the captives. Isa. lxi. 1.

The countenance *proclaims* the heart and inclinations.

Sir T. Browne, *Christ. Mor.*, II. 9.

The schoolhouse porch, the heavenward pointing spire, *Proclaim*, in letters every eye can read, Knowledge and Faith, the new world's simple creed.

Holmes, *A Family Record*.

2. To make announcement concerning; publish; advertise, as by herald or crier: said of persons.

I heard myself *proclaim'd*: And by the happy hollow of a tree Escaped the hunt. *Shak.*, *Lear*, II. 3. 1.

You should have us'd us nobly, And, for our doing well, as well *proclaim'd* us, To the world's eye have shew'd and sainted us. *Fletcher*, *Loyal Subject*, II. 1.

3. To apply prohibition to by a proclamation.—**Proclaimed** district, any county or other district in Ireland in which the provisions of the Peace Preservation Acts are for the time being in force by virtue of official proclamation. = *Syn.* 1. *Declare*, *Publish*, *Announce*, *Proclaim*, etc. (see *announce*), blaze abroad, trumpet, blazon.

proclaim (prō-klām'), *n.* [= Sp. Pg. It. *pro-*clama, proclaim; from the verb.] A calling or crying out; proclamation. [Rare.]

Hymns of festival, . . . Voices of soft *proclaim*, and silver stir Of strings in hollow shells. *Keats*, *Hyperion*, I.

proclaimant (prō-klā'mant), *n.* [*<* *proclaim* + *-ant*.] A proclaimer.

I was spared the pain of being the first *proclaimant* of her flight. *E. Brontë*, *Wuthering Heights*, xii.

proclaimer (prō-klā'mér), *n.* One who proclaims or publishes; one who announces or makes publicly known.

proclamation (prok-lā-mā'shon), *n.* [*<* F. *pro-*clamation = Sp. *proclamacion* = Pg. *proclamacao* = It. *proclamazione*, < LL. *proclamatio*(n)-, a calling or crying out, < L. *proclamare*, pp. *proclamatus*, cry out: see *proclaim*.] 1. The act of proclaiming, or making publicly known; publication; official or general notice given to the public.

King Ass made a *proclamation* throughout all Judah.

1 Ki. xv. 22.

2. That which is put forth by way of public notice; an official public announcement or declaration; a published ordinance.

The Prince and his Lordship of Rochester passed many hours of this day composing *Proclamations* and Addresses to the Country, to the Scots, . . . to the People of London and England. *Thackeray*, *Henry Esmond*, III. 11.

The deacon began to say to the minister, of a Sunday, "I suppose it's about time for the Thanksgiving *proclamation*." *H. B. Stowe*, *Oldtown*, p. 337.

3. Open declaration; manifestation; putting in evidence, whether favorably or unfavorably.

Upon that day that the gentleman doth begin to houre vp money, from thence forth he putteth his fame [reputation] in *proclamation*.

Guevara, *Letters* (tr. by Hellowes, 1577), p. 153.

You love my son; invention is ashamed, Against the *proclamation* of thy passion, To say thou dost not. *Shak.*, *All's Well*, I. 3. 180.

4. In *law*: (a) A writ once issued to warn a defendant in outlawry, or one failing to appear in chancery. (b) In modern public law, usually, if not always, an executive act in writing and duly authenticated, promulgating a command or prohibition which the executive has discretionary power to issue, or a notification of the executive intent in reference to the execution of the laws. In early English history positive laws were to some extent made by proclamation, which were usually allowed the force of statutes. The opinion of some that a proclamation usually ceased to operate on a demise of the crown does not seem to be well founded.—*Case of proclamations*, a noted case in English constitutional history, decided in 1610 (2 How. St. Tr., 723, and 12 Coke, 74), upon questions submitted by the lord chancellor and others, wherein it was held "that the king by his proclamation cannot create any offense which was not an offense before"; "that the king hath no prerogative but that which the law of the land allows him"; and that, "if the offense be not punishable in the star-chamber, the prohibition of it by proclamation cannot make it punishable there."—*Emancipation proclamation*. See *emancipation*.—*Fine with proclamations*. See *fine*.—*Proclamation Act*, an English statute of 1539 (31 Hen. VIII., c. 8), enacting that proclamations made by the king and council which did not prejudice estates, offices, liberties, etc., should be obeyed as if made by act of Parliament, and providing for the prosecution and punishment of those who refused to observe such proclamations.—*Proclamation of a fine*, at common law, the public notice repeatedly to be given of a fine of lands.—*Proclamation of neutrality*. See *neutrality*.

proclamator (prok-lā-mā-tor), *n.* [= F. *pro-*clamateur = Pg. *proclamador* = It. *proclamatore*, < L. *proclamator*, a crier, < *proclamatus*, pp. of *proclamare*, cry out: see *proclaim*.] In *Eng. law*, an officer of the Court of Common Pleas.

procline (prō-klīn'), *v. i.*; pret. and pp. *proclined*, ppr. *proclining*. [*<* L. *proclinare*, lean forward, < *pro*, forward, + *clinare*, lean: see *cline*.] To lean forward.

Cf. *enclitic*.] I. *a.* In *Gr. gram.*, dependent in accent upon the following word: noting certain monosyllabic words so closely attached to the word following as to have no accent.

II. *n.* In *Gr. gram.*, a monosyllabic word which leans upon or is so closely attached to a following word as to have no independent accent. The proclitics are certain forms of the article, certain prepositions and conjunctions, and the negative *οὐ*. Compare *anotic*.

proclive (prō-kliv'), *a.* [*<* OF. *proclif*, *m.*, *proclive*, *f.*, = Sp. It. *proclive*, < L. *proclivis*, sloping downward, < *pro*, forward, + *clivus*, a declivity or slope: see *clivus*, *clivous*.] Inclined; prone; disposed; proclivous.

A woman is frail, and *proclive* unto all evils.

Latimer, 1st Sermon bef. Edw. VI.

The world knows a foolish fellow somewhat *proclive* and hasty. *B. Jonson*, *Case is Altered*, I. 2.

proclive (prō-kliv'), *v.*; pret. and pp. *proclived*, ppr. *procliving*. [*<* *proclive*, *a.*] I. *trans.* To incline; make prone or disposed.

That guilt *proclives* us to any impiety.

Rev. T. Adams, *Works*, III. 190.

II. *intrans.* To be prone. *Hallucell*.

proclivity (prō-kliv'i-ti), *n.* [*<* F. *proclivité* = Sp. *proclividad* = It. *proclività*, < L. *proclivitas*, a declivity, a propensity, < *proclivus*, sloping, disposed to: see *proclive*.] 1. Inclination; propensity; proneness; tendency.

And still retain'd a natural *proclivity* to ruin.

Fletcher, *Purple Island*, I.

Mr. Adams' *proclivity* to grumble appears early. *T. Parker*, *Historic Americans*, John Adams, I.

When we pass from vegetal organisms to unconscious animal organisms, we see a like connexion between *proclivity* and advantage. *H. Spencer*, *Data of Ethics*, § 32.

2. Readiness; facility of learning.

He had such a dexterous *proclivity* that his teachers were fain to restrain his forwardness. *Sir H. Wotton*.

"Ventilate" and "*proclivity*," after having been half-gotten, have come again into brisk circulation; and a comparison of the literature of the seventeenth, eighteenth, and nineteenth centuries will show multitudes of words common to the first and last of these periods, but which were little used in the second.

G. P. Marsh, *Lects. on Eng. Lang.*, xii, note.

=*Syn.* 1. Bent, bias, predisposition, aptitude, turn (for). **proclivous** (prō-kliv'us), *a.* [*<* L. *proclivis*, *pro-*clivus, sloping downward: see *proclive*.] Inclined; slanting or inclined forward and upward or downward: as, *proclivous* teeth.

proclivousness (prō-kliv'us-nes), *n.* Inclination downward; propensity. *Bailey*, 1727.

Progne (prok'nē), *n.* Same as *Progne*.

Procnias (prok'ni-as), *n.* [NL. (Illiger, 1811), < L. *Progne*, *Progne*, < Gr. *Προκνή*, in myth., daughter of Pandion, transformed into a swallow. Cf. *Progne*.] A notable genus of tanagers,

Procnias terna.

proctor (prok'tor), *n.* [Early mod. E. also *proctur*, *proctour*; < ME. *prokture*, *proketour*, *proketoure*, abbr. of OF. *procurator*, < L. *procurator*, a manager, agent: see *procurator*. Cf. *proxy*, contr. of *procuracy*.] 1. One who is employed to manage the affairs of another; a procurator.

Where the sayde marriage was by writings and instrumentes couenanted, condiscended, and agreed, and affiances made and taken by *proctors* and deputies on bothe parties. *Hall*, Rich. III., an. 8.

The most clamorous for this pretended reformation are either atheists or else *proctors* suborned by atheists. *Hooker*.

2. Specifically, a person employed to manage another's cause in a court of civil or ecclesiastical law, as in the court of admiralty or a spiritual court. Proctors discharged duties similar to those of solicitors and attorneys in other courts. The term is also used in some American courts for practitioners performing functions in admiralty and in probate corresponding to those of attorneys at law.

"What is a *proctor*, Steerforth?" said I. "Why, he is a sort of monkish attorney," replied Steerforth. "He is to some faded courts held in Doctors' Commons—a lazy old nook near St. Paul's Churchyard—what solicitors are to the courts of law and equity."

Dickens, David Copperfield, xliii.

During the whole of Stafford's primacy the pope filled up the sees by provision, the council nominated their candidates; at Rome the *proctors* of the parties contrived a compromise. *Stubbs*, Const. Hist., § 386.

3. One of the representatives of the clergy in the Convocations of the two provinces of Canterbury and York in the Church of England. They are elected by the cathedral chapters and the clergy of a diocese or an archdeaconry.

The clerical *proctors* . . . were originally summoned to complete the representation of the spiritual estate, with an especial view to the taxation of spiritual property; and in that summons they had standing-ground from which they might have secured a permanent position in the legislature. By adhering to their ecclesiastical organisation in the convocations they lost their opportunity, and, almost as soon as it was offered them, forfeited their chance of becoming an active part of parliament.

Stubbs, Const. Hist., § 432.

4. An official in a university or college whose function it is to see that good order is kept. In the universities of Oxford and Cambridge the proctors are two officers chosen from among the masters of arts.

It is the *Proctors'* duty to look after the business of the University, to be assessors of the Chancellor or Vice-Chancellor in the causes heard in the University, to count the votes in the Houses of Convocation and Congregation, . . . and to exact fines and other penalties for breaches of University discipline among Undergraduates.

Dickens, Dict. Oxford, p. 96.

We, unworthing, told
Of college: he had climb'd across the spikes, . . .
And he had breath'd the *Proctor's* dogs.

Tennyson, Princess, Prol.

5. A keeper of a spital-house; a liar. *Harman*, Caveat for Cursetors, p. 115.—6t. One who collected alms for lepers or others unable to beg in person. [Cant.]

According to Kennett, beggars of any kind were called *proctors*. The Fraternity of Vagabondes, 1575, has the following notice:—"Proctor is he that wil tary long, and bring a lye, when his maister sendeth him on his errand."

Halliwel.

The centres of this organization of trade were the cloth-halls, to which the masters brought their *products* to market.
English Guilds (E. E. T. S.), Int., p. cixxi.

Most of those books which have obtained great reputation in the world are the *products* of great and wise men.
Watts, Improvement of the Mind, l. 2.

Some of the richest land in England lies in the fen country, and that land is as much the *product* of engineering skill and prolonged labour as Portland Harbour or Menai Bridge.
Rae, Contemporary Socialism, p. 446.

(d) Effect; result; something resulting as a consequence.

He, with all his capacities, and desires, and beliefs, is not an accident, but a *product* of the time.

H. Spencer, Social Statics, p. 517.

[Show me]
What thy life last put heart and soul into;
There shall I taste thy *product*.

Browning, Ring and Book, II. 178.

(e) In *math.*, the result of multiplying one quantity or expression by another. Thus, 72 is the *product* of 8 multiplied by 9; and dy/dx is the *product* of y multiplied by the operator d/dx . The quantities multiplied together are usually termed *factors*. *Product* results from multiplication, as *sum* does from addition. (f) In *chem.*, a compound not previously existing in a body but formed during decomposition: as, the *products* of destructive distillation: contradistinguished from *educt*.

—Direct, genital, organic, etc., *products*. See the adjectives. Homogeneous *product*, *product* of abstract numbers or quantities of one kind.—*Product* of inertia. See *inertia*.—Resolvent *product*, the *product* $fa \cdot fa' \cdot fa'' \cdot fa'''$, where a is a fifth root of unity and $fa = a$, $fa' = a^2$, $fa'' = a^3$, $fa''' = a^4$, the a 's being roots of a quintic equation.—Skew *product*, the *product* of the tensors of two vectors into the sine of the angle between them, and the whole multiplied by a unit vector perpendicular to the two vectors and directed in the way in which the revolution from the first factor to the second appears counter-clockwise.

productibility (prō-duk-ti-bil'i-ti), *n.* [*< producible + -ity* (see *-bility*).] Capability of being produced. [Rare.]

No produce ever maintains a consistent rate of *productibility*.
Ruskin, Unto This Last, p. 53, note.

productible (prō-duk'ti-bl), *a.* [*< L. productus*, pp. of *producere*, lead forth, produce (see *product*), + *-ible*.] Capable of being produced; producible. [Rare.]

productile (prō-duk'til), *a.* [*< L. productilis*, that may be drawn out, *< productus*, pp. of *producere*, lead forth, draw out, *product*: see *produce*, *product*.] Capable of being extended in length.

production (prō-duk'shon), *n.* [*< F. production* = *Sp. produccion* = *Pg. produccão* = *It. produzione*, *< L. productio(n)-*, a prolonging, lengthening, *< producere*, pp. *productus*, lead forth, prolong, produce: see *produce*, *product*.] 1. The act or process of producing. (a) The act of bringing forward or adducing.

Public documents in general must be proved either by the *production* of the original or by the official copies.
Encyc. Brit., VIII. 742.

(b) The act of making or creating.

It can also be shown that the *production* of the two sorts of flowers by the same plant has been effected by finely-graduated steps.
Darwin, Origin of Species, p. 182.

Certain it is that hate and destruction are just as necessary agents as love and *production* in nature.
Maudsley, Body and Will, xi. p. 239.

The component elements of *production* are labour and capital, acting by natural forces upon raw material.
Encyc. Brit., XXIV. 48.

(c) In *polit. econ.*, the creation of values; the producing of articles having an exchangeable value.

Besides the primary and universal requisites of *production*, labour and natural agents, there is another requisite, . . . namely, a stock, previously accumulated, of the products of former labour. *J. S. Mill*, Pol. Econ., I. iv. § 1.

2. That which is produced or made; a product of physical or mental labor; specifically, a work of literature or art.

The Lion and the Leviathan are two of the noblest *Productions* in this World of living Creatures.

Addison, Spectator, No. 339.

We have had our names prefixed at length to whole volumes of mean *productions*.
Swift.

So one, whose story serves at least to show
Men loved their own *productions* long ago,
Woo'd an unfeeling statue for his wife.

Cowper, Progress of Error, l. 527.

3. In *zool.* and *anat.*, the act of drawing forth or out; the state of being produced (see *produced*, *p. a.*); extension; protrusion: as, the *production* of the pike's jaws.—4. *pl.* In *Scots law*, in judicial proceedings, written documents or other things produced in process in support of the action or defense.—Interdict for *production*. See *interdict*, 2.—Syn. 1. Work, performance.—1 and 2. *Produce*, *Product*, *Production*. Of these only *production* may mean the act of producing. As standing for the thing or things produced, *produces* applies now almost exclusively to the raw *products* or yield of land: as, to bring fresh *produce* to market. Where Jonathan Edwards spoke of regarding "all free actions as the *products* of free choice, or, better, as its effects. There is a lingering use of *produce* in such expressions as "the *produce* of a tax," but better now the *product*, or, still better, the proceeds. The word is always collective; we do not speak of a *produce*. *Product* and *production*, on the other hand, are particular. *Product* is the most general of the three words, but expresses the result of some operation, generally, but not necessarily, physical: as, the apple is especially an American *product*; Great Britain exports chiefly manufactured *products*. Thus, the word may apply to almost anything where emphasis is laid upon the fact of its being produced by some cause, especially by some cause that is named; but, apart from this, the word is applied chiefly to things having a material value, covering *produces*, manufactures, etc. *Production* applies now almost exclusively to the visible results of the operation of mind or the handwork of art, as a book, a poem, an oration, a statue, a painting, a piece of needlework—the act or fact of producing being only subordinate in mind. *Product* is also a technical word of mathematics, but the others are not.

productive (prō-duk'tiv), *a.* [= *F. productif* = *Sp. Pg. productivo* = *It. produttivo*, *< L. productivus*, serving to produce or prolong, *< producere*, pp. *productus*, lead forth, produce: see *produce*, *product*.] 1. Serving to produce; having the power of producing: as, an age *productive* of great men.

Productive in herb, plant, and nobler birth
Of creatures animate with gradual life.

Milton, P. L., ix. 111.

Chaste as cold Cynthia's virgin light,
Productive as the Sun.

Pope, Chorus to Brutus, II.

Heav'n would sure grow weary of a world
Productive only of a race like ours.

Cowper, Task, II. 584.

2. Fertile; producing abundant crops: as, a *productive* soil.

Fruitful vales so *productive* of that grain.

Swift.

3. In *polit. econ.*, causing or tending to cause an increase in the quantity or quality of things of value; causing commodities to possess exchangeable value: as, *productive* labor.

The business of transporting merchandise or passengers by land or by sea is as much a *productive* industry as the raising of wheat, the spinning of fibres, or the smelting or forging of iron.

D. A. Wells, Our Merchant Marine, p. 85.

Productive imagination. See *imagination*, I. = Syn. 1 and 2. *Profligate*, etc. See *fruitful*.

productively (prō-duk'tiv-li), *adv.* [*< productive + -ly*.] In a productive manner; by production; with abundant produce.

productiveness (prō-duk'tiv-nes), *n.* [*< productive + -ness*.] The character of being productive: as, the *productiveness* of land or labor.

productivity (prō-duk'tiv-i-ti), *n.* [*< productive + -ity*.] The power of producing; productiveness.

They have reinforced their own *productivity* by the creation of that marvellous machinery which differences this age from any other age.
Emerson, Eng. Traits, x.

Labourers who do not possess the average *productivity* are turned off on the ground that they are unable to do a minimum day's work.

Rae, Contemporary Socialism, p. 166.

productress (prō-duk'tres), *n.* [*< *productor* (*< LL. productor*, one who leads away, one who produces, *< L. producere*, pp. *productus*, lead forth, produce: see *produce*, *product*) + -ess.] A female who produces.

proegumenal (prō-ē-gū'mē-nal), *a.* [*< Gr. προηγούμενος*, pp. of *προηγούμενος*, go first, lead the way, *< πρό*, before, + *ηγείσθαι*, lead: see *hegemony*.] In *med.*, serving to predispose; predisposing; preceding: as, a *proegumenal* cause of disease. See quotation under *procatartical*.

proem (prō'em), *n.* [Formerly also *proeme*; *< ME. proeme*, *proem*, *proheme*, *< OF. proeme*, *proesme*, *F. proème* = *Sp. Pg. It. proemio*, *< L. proemium*, *< Gr. προίμιον*, Attic *φοίμιον*, an

opening, an introduction, < πρό, before, + ὁμος, a path, road.] A preface; introduction; preamble; preliminary observations prefixed to a book or writing.

In the *prohem* of his notable book.

Rom. of Partenay (E. E. T. S.), Int., l. 80.

So glosed the tempter, and his *proem* tuned.

Milton, P. L., ix. 549.

Thus much may serve by way of *proem*;
Proceed we therefore to our poem.

Swift, Death of Dr. Swift.

The *proem*, or preamble, is often called in to help the construction of an act of parliament.

Blackstone, Com., I., Int., II.

proem† (prō'em), *v. t.* [*proem*, *n.*] To preface. [Rare.]

Moses might here very well *proem* the repetition of the covenant upbraiding reprehension.

South, Sermons, VIII. xiii.

proembryo (prō-em'bri-ō), *n.* [*Gr.* πρό, before, + ἐμβρυον, embryo; see *embryo*.] In bot.: (a) In *Characeæ*, the product of the development and division of the oöspore, upon which the characeous plant develops as a lateral bud. (b) In *Archegoniata*, the product of the development and division of the oöspore before the differentiation of the embryo. *Goebel*. (c) In phanerogams, same as *suspensor*.

proembryonic (prō-em'bri-on'ik), *a.* [*Gr.* as if *proembryo* + *-ic*.] In bot., of or relating to the proembryo. *Vines*, Physiol. of Plants, p. 599. — **Proembryonic branch**, in the *Characeæ*, a propagative body, with the structure of a proembryo, which springs from a node of the stem.

proemial (prō-ē'mi-āl), *a.* [*Gr.* as if *proem* + *-ial*.] Having the character of a proem; introductory; prefatory; preliminary.

This contempt of the world may be a piece of *proemial* piety, an usher or Baptist to repentance.

Hammond, Works, IV. 492.

proemptosis (prō-emp-tō'sis), *n.* [*Gr.* as if *προεμπίπτω*, < *προεμπίπτειν*, fall or push in before, < πρό, before, + ἐμπίπτειν, fall upon (> ἐμπίπτω, a falling upon), < ἐν, in, upon, + πίπτειν, fall.] In chron., an anticipation, or occurrence of a natural event sooner than the time given by a rule; especially, the falling of the new moon earlier than the nineteen-year period would make it, amounting to one day in 312½ years according to Clavius and the constructors of the Gregorian calendar (really 310 years), in consequence of which a lunar correction is introduced into the tables for calculating Easter; also, the effect of the precession of the equinoxes in making these come before the sun has performed his circuit among the stars. See *metemptosis*.

proepimeral (prō-ep-i-mē'ral), *a.* [*Gr.* as if *προεπιμερόν*, < *προεπιμερόν*, of or pertaining to the proepimeron.

proepisternal (prō-ep-i-stēr'nāl), *a.* [*Gr.* as if *προεπιστήριον*, < *προεπιστήριον*, of or pertaining to the proepisternum.

proepisternum (prō-ep-i-stēr'num), *n.*; pl. *proepisterna* (-nā). [*NL.*, < *L.* *pro*, before, + *NL.* *episternum*, *q. v.*] The prothoracic episternum; the episternal sclerite of the propleuron.

proethnic (prō-eth'nik), *a.* [*Gr.* πρό, before, + ἔθνικος, ethnic; see *ethnic*.] Prior to division into separate races: said of an original prehistoric stock, for example, Indo-European or Aryan.

proenulpolyzoön (prō-ū-pol-i-zō'on), *n.* [*NL.*, < *L.* *pro*, before, + *NL.* *Eupolyzoa*, *q. v.*] The hypothetical ancestral form of the *Eupolyzoa*. *E. R. Lankester*. [Rare.]

profacet, *interj.* [*OF.* *prou face*, *prou fasse*: *prou*, profit (see *prou*); *face*, *fasse*, 3d pers. sing. pres. subj. of *faire*, do: see *fact*.] Much good may it do you! an old exclamation of welcome.

The cardinal came in, booted and spurred, all sodainly amongst them — and bade them *proface*.

Stow, Chron., p. 528.

Sweet sir, sit. . . *Proface*! What you want in meat well I can drink.

Shak., 2 Hen. IV., v. 3. 80.

profanate† (prof'ā-nāt), *v. t.* and *i.* [*L.* *profanatus*, pp. of *profanare*, consecrate, desecrate: see *profane*.] To profane.

And there, in a certain chappell not hallowed, or rather in a profane cottage, hath in contempt of the keyes presumed of his owne rashnesse to celebrate, nay rather to *profanate*.

Foote, Martyrs, p. 430, an. 1591.

profanation (prof-ā-nā'shōn), *n.* [Formerly also *prophanation*; < *OF.* *profanation*, *prophanation*, *F.* *profanation* = *Sp.* *profanacion* = *Pg.* *profanação* = *It.* *profanazione*, < *LL.* *profanatio* (*n.*), *profanation*, < *L.* *profanare*, pp. *profanatus*, desecrate, also consecrate: see *profane*.] 1. The act of violating sacred things, or of treating them with contempt or irreverence; desecration: as, the *profanation* of the Lord's day; the *profanation* of a sanctuary.

Here I observed a great *profanation* of the Lord's supper.

Coryat, Crudities, I. 3.

I held it no *Profanation* of this Sunday-evening . . . to employ some hours to meditate on you, and send you this friendly Salute.

Hocell, Letters, I. v. 11.

2. The act of treating with too little reserve or delicacy, or of making common.

'Twere *profanation* of our joys

To tell the lady our love.

Donne, Valediction Forbidding Mourning.

Distorted from its [poetry's] use and just design,

To make the pitiful possessor shine, . . .

Is *profanation* of the basest kind.

Conner, Table-Talk, I. 758.

= *Syn.* 1. *Profanation*, *Desecration*, *Sacrilege*, *pollution*. The first three words express offenses, amounting almost or quite to outrages, against the religious sentiment, in connection with places, days, etc., taking off their sacred character. They are in the order of strength. *Profanation* is perhaps most distinctly a matter of irreverence. *Sacrilege* seems most directly an invasion of the rights of God.

Great men may jest with saints; 'tis wit in them,

But in the less, foul *profanation*.

Shak., M. for M., II. 2. 128.

O double *sacrilege* on things divine,

To rob the relic, and deface the shrine!

Dryden, To the Memory of Mrs. Anne Killigrew, l. 160.

profanatory (prō-fan'ā-tō-ri), *a.* [*Gr.* as if *profane* + *-atory*.] Profaning or desecrating; destructive to sacred character or nature; apt to produce irreverence, contempt, or the like.

Every one now had tasted the wassail-cup except Paulina, whose pas de déce on de fantasia nobody thought of interrupting to offer so *profanatory* a draught.

Charlotte Brontë, Vilette, xxv.

profane (prō-fān'), *a.* [Formerly also *prophane*; < *OF.* *profane*, *prophane*, *F.* *profane* = *Sp.* *Pg.* *It.* *profano* = *D.* *profan* = *G.* *Sw.* *Dan.* *profan*, < *L.* *profanus*, *ML.* also often *prophanus*, not sacred, unholy, profane; of persons, not initiated (whence, in *LL.*, ignorant, unlearned), also wicked, impious; appar. orig. 'before, or outside of, the temple,' < *pro*, before, + *fanum*, temple: see *fane*.] 1. Not sacred, or not devoted to sacred purposes; not possessing any peculiar sanctity; unconsecrated; secular: as, a *profane* place; *profane* history (that is, history other than Biblical); *profane* authors.

In a certain chappell not hallowed, or rather in a *profane* cottage.

Foote, Martyrs, p. 430, an. 1591.

Our holy lives must win a new world's crown,

Which our *profane* hours here have stricken down.

Shak., Rich. II., v. 1. 25.

There is met in your majesty a rare conjunction, as well of divine and sacred literature as of *profane* and human.

Bacon, Advancement of Learning, I. 5.

The seven *Profane* Sciences begin at the right hand as you face the fresco, the seven Theological at the left.

The Century, XXXVII. 672.

2. Irreverent toward God or holy things; speaking or spoken, acting or acted, in manifest or implied contempt of sacred things; blasphemous: as, *profane* language; *profane* swearing.

Then was the Sacred Bible sought out of the dusty corners where *profane* falsehood and Neglect had thrown it.

Milton, Reformation in Eng., I.

I din'd with y^e Treas^r, where was y^e Earle of Rochester, a very *profane* wit.

Evelyn, Diary, Nov. 24, 1670.

3. Not initiated into certain religious rites; hence, of less dignity or standing; inferior; common.

Hence, ye *profane*, I hate you all,

Both the great vulgar and the small.

Cowley, tr. of Horace's Odes, III. 1.

"Far hence be souls *profane*,"

The Sibyl cried, "and from the grove abstain."

Dryden, Æneid, vi. 368.

= *Syn.* 1. Temporal, unhallowed, unholy. — 2. *Impious*, *Atheistic*, etc. (see *irreligious*); Irreverent, sacrilegious.

profane (prō-fān'), *v.*; pret. and pp. *profaned*, ppr. *profaning*. [Formerly also *prophan*; < *F.* *profaner* = *Sp.* *Pg.* *profanar* = *It.* *profanare*, < *L.* *profanare*, *ML.* also often *prophanare*, desecrate, profane, also consecrate, < *profanus*, *profane*: see *profane*, *a.*] 1. *trans.* 1. profecy†, *n.* A Middle English form of *prophesy*. *profert*, *v.* and *n.* An obsolete form of *proffer*.

profert (prō'fērt), *n.* [The first word of the *L.* phrase *profert in curia*, he produces in court: *profert*, 3d pers. sing. of *profferre*, bring forward, produce: see *proffer*.] In law, an exhibition of a record or paper in open court. At common law, a party who alleged a deed was generally obliged to make proof of such deed — that is, to produce it in court simultaneously with the pleading in which it was alleged. According to present usage this *profert* consists of a formal allegation that he shows the deed in court, it being, in fact, retained in his own custody.

profess (prō-fes'), *v.* [*ME.* *professen* (first in pp. *professed*, after *OF.* *profes*, *professed*), < *OF.* (and *F.*) *professer* = *Sp.* *profesar* = *Pg.* *professar* = *It.* *professare*, < *ML.* *professare*, *profess*, receive on profession, < *L.* *professus*, pp. of *profiteri*, declare publicly, acknowledge,

What would he [Balaam] have given if words and feelings might have passed for deeds! See how religious he was so far as *profession* goes!

J. H. Newman, Parochial Sermons, I. 160.

3. The calling or occupation which one professes to understand and to follow; vocation; specifically, a vocation in which a *professed* knowledge of some department of science or learning is used by its practical application to affairs of others, either in advising, guiding, or teaching them, or in serving their interests or welfare in the practice of an art founded on it. Formerly theology, law, and medicine were specifically known as the *professions*; but, as the applications of science and learning are extended to other departments of affairs, other vocations also receive the name. The word implies *professed* attainments in special knowledge, as distinguished from mere skill; a practical dealing with affairs, as distinguished from mere study or investigation; and an application of such knowledge to uses for others as a vocation, as distinguished from its pursuit for one's own purpose. In *professions* strictly so called a preliminary examination as to qualifications is usually demanded by law or usage, and a license or other official authority founded thereon required. In law the significance of the word has been contested under statutes imposing taxes on persons pursuing any "occupation, trade, or profession," and under statutes authorizing arrest in civil actions for misconduct in a "professional employment"; and it has been, in the former use, held clearly to include the vocation of an attorney, and upon the same principle would doubtless include physicians, unless the mention of trade, etc., in the same clause of the statute be ground for interpreting the statute as relating only to business vocations. Professional employment, in statutes allowing arrest, is regarded as not including a private agency like that of a factor or a real-estate broker, which can be taken up and laid down at pleasure.

Being mechanical, you ought not walk
Upon a labouring day without the sign
Of your *profession*. Speak, what trade art thou?

Shak., J. C., I. 1. 5.

I hold every man a debtor to his *profession*.

Bacon, Maxims of the Law, Pref.

New *professions* have come into existence, and the old *professions* are more esteemed. It was formerly a poor and beggarly thing to belong to any other than the three learned *professions*.

W. Beant, Fifty Years Ago, p. 262.

4. The collective body of persons engaged in a calling: as, practices disgraceful to the *profession*; to be at the head of one's *profession*.—5. The act by which a novice enters into a religious order and takes its vows. In the Roman Catholic Church he or she must be at least sixteen years of age and must have completed a year of probation.

He . . . yalt [yieldeth himself] into somme covente [convent] . . .

If he there make his mansloun [abiding-place]
For to abide *professioun*.

Rom. of the Rose, I. 4910.

A religious or regular *profession* is "a promise freely made and lawfully accepted, whereby a person of the full age required, after the completion of a year of probation, binds him- (or her-) self to a particular religious institute approved by the Church."

Bacon, Advancement of Learning, I. 58.

2. One who makes open profession of religious faith and conversion, and attaches himself to some religious denomination. This use, probably originating among the English Puritans, is chiefly confined to English and Scottish nonconformists and their descendants.

Then the name of a *professor* was odious.

Bunyan, Pilgrim's Progress, II, House of Mnason.

A mere *professor*, though a decent one, looks on the Bible as a dull book, and peruseth it with such indifference as you would read the title-deeds belonging to another man's estate.

Berridge.

"As he was a *professor*, he would drive a nail for no man on the Sabbath, or kirk-fast, unless it were in a case of absolute necessity, for which he always charged sixpence each shoe." . . . The hearer . . . wondered what college this veterinary professor belonged to—not aware that the word was used to denote any person who pretended to uncommon sanctity of faith and manner.

Scott, Waverley, xxx.

I'm a *professor*, and I ain't ashamed of it, week-days nor Sundays neither. S. O. Jewett, Deephaven, p. 197.

3. A public teacher in a university, especially one to whom this title has been formally granted. The title, now the highest that a teacher can receive, appears to have originated in the Italian universities. In Oxford and Cambridge, the professors, and the instruction which they convey by lectures, are only auxiliary instead of principal agents, the routine work of instruction being carried on by the tutors connected with the several colleges. In the universities of Scotland and Germany, on the other hand, the professors are at once the governing body and principal functionaries for the purposes of education. In American universities there is generally a professor at the head of each department of instruction, having often other professors and assistant professors under him. The title is often given, also, to teachers of special branches in secondary schools, and locally to principals of common schools (a use derived from the French).

At the present moment we want a *Professor* of Later Ecclesiastical History, to take up the subject at the point at which the department assigned to the *Regius Professor* comes to an end. Stubbs, Medieval and Modern Hist., p. 48.

4. In a loose use, any one who publicly teaches or exercises an art or occupation for pay, as a dancing-master, phrenologist, balloonist, juggler, acrobat, boxer, etc.

There be many *professors* of the science of defence, and very skilful men in teaching the best and most offensive and defensive use of verie many weapons.

profilograph (prō'fīl'ō-grāf), *n.* [*< E. profile + Gr. γράφειν, write.*] An instrument used for making an automatic record of the profile of the ground over which it moves. It consists of a light four-wheeled vehicle so arranged that as it advances a band of paper is moved mechanically over a table on top of the machine a distance corresponding to the distance traveled according to a prearranged scale of distances. Beneath the machine is suspended a pendulum always hanging vertically, and serving to actuate a pencil the point of which rests on the paper and leaves a trace upon it. Any inequality of the surface causes the machine to incline from the level, and produces a corresponding deviation from a straight line in the mark traced by the pencil. The data obtained from these indications are sufficient for reproduction to scale of the profile traversed.

profit (prō'fit), *v.* [*< ME. profit, profet, profit, profet, prophete = D. profit = G. Sw. Dan. profit, < OF. profit, F. profit = It. profitto, advantage, profit, < L. profectus, advance, progress, growth, increase, profit, < proficere, pp. profectus, go forward, advance, make progress, be profitable or useful: see proficient. Sandys, *Travels*, p. 21.

2. A poke; a prod. [Scotch.]

But I was not so kittle as she thought, and could thole her *progs* and jokes with the greatest pleasure and composure.
Galt, *The Steam-Boat*, p. 155. (*Jamieson*.)

3. Victuals got by begging; hence, victuals in general; food. [Colloq.]

The Abbot also every Saturday was to visit their beds, to see if they had not . . . purloined some *progs* for themselves.
Fuller, *Ch. Hist.*, V. 290. (*Davies*.)

You can junket together at nights upon your own *prog*, when the rest of the house are a-bed.
Swift, *Directions to Servants*, II.

Living on hard-tack an' salt *prog*.
The Century, XXXV. 621.

4. One who goes from place to place begging for victuals. *Imp. Dict.*

progamete (prō-gam'e-tān), *n.* [*L. NL. progametangium*.] Same as *progametangium*.

progametangium (prō-gam'e-tān-jū'm), *n.*; pl. *progametangia* (-jā). [*NL.*, < *L. pro*, before, + *NL. gametangium*.] In bot., an immature or resting gametangium, as that which occurs in the development of *Protomyces macrosporus*. See *gametangium*.

progenerate (prō-jen'e-rāt), *v. t.* [*L. progenerare*, pp. of *progenerare* (> *It. progenerare*), beget, < *pro*, forth, + *generare*, beget, produce: see *generate*.] To beget; propagate.

They were all *progenerated* colonies from a Scythian or Tartar race.
Archæologia (1773), II. 250. (*Davies*.)

What then, I pray thee, is there dead? . . . Surely not he who is yet to *progenerate* a more numerous and far better race.
Landor, *Imaginary Conversations*.

progeneration (prō-jen'e-rā-shon), *n.* [*L. NL. progeneratio* (-n-), a begetting, < *L. progenerare*, pp. *progenerare*, beget: see *progenerate*.] The act of begetting; propagation.

progenial (prō-jē-ni-āl), *a.* [*L. progenies*, descent, progeny (see *progeny*), + *-ial*.] Pertaining to descent or lineage.

Whether [the intellectual Soul is] immediately produced, without any *progenial* tradition or radiation.
Evelyn, *True Religion*, I. 159.

progenitiveness (prō-jen'i-tiv-nes), *n.* [Irreg. < *L. progenies*, progeny, + *-itive* + *-ness*. Cf. *philoprogenitiveness*.] Philoprogenitiveness, in a modified biological sense. [Rare.]

There is another difficulty in the way of accepting metaphysical peculiarity or *progenitiveness* as isolating species. It is marked often strongly in races or varieties which no one pretends to have had distinct origin.
E. D. Cope, *Origin of the Fittest*, p. 111.

progenitor (prō-jen'i-tōr), *n.* [Early mod. E. *progenitor*, < *OF. progeniteur* = *Sp. Pg. progenitor* = *It. progeneritore*, < *L. progenitor*, the founder of a family, an ancestor, < *pro*, forth, + *gignere*, beget, produce: see *genitor*.] An ancestor in the direct line; a forefather; a parent.

If children pre-decease *progenitors*,
We are their offspring, and they none of ours.
Shak., *Lucrece*, I. 1756.

Ah! whither shall we go?
Down to the grave, down to those happy shades below.
Where all our brave *progenitors* are blest
With endless triumph and eternal rest.
Pomfret, *A Prospect of Death*.

By the term fresh stock I mean a non-related plant the *progenitors* of which have been raised during some generations in another garden.
Darwin, *Cross and Self Fertilisation*, p. 257.

progenitorial (prō-jen-i-tōr-i-āl), *a.* [*L. progenitor* + *-ial*.] Pertaining to or constituting a progenitor.

Some abnormal growth, like and unlike the species to which the *progenitorial* germ belonged.

The Congregationalist, Oct. 29, 1879.

progenitress (prō-jen'i-tres), *n.* [*< progenitor + -ess.*] A female progenitor or parent; an ancestress.

Yet she was a worthy *progenitress* of a long line of most charming women novelists. *The Century*, XXVI. 291.

All French and France exclaims on thee, Doubting thy birth and lawful *progeny*.

Shak., 1 Hen. VI., iii. 3. 61.

Now show thy *progeny*; if not to stand, Cast thyself down; safely, if Son of God.

Milton, P. R., iv. 554.

2. Children; offspring, whether of the human kind or of the lower animals; descendants.

Did ever joyful Mother see

So bright, so brave a *Progeny*?

Steele, Tender Husband (song).

What idle *progeny* succeed

To chase the rolling circle's speed,

Or urge the flying ball?

Gray, Prospect of Eton College.

Around this fort a *progeny* of little Dutch-built houses, with tiled roofs and weathercocks, soon sprang up, nestling themselves under its walls for protection.

Irving, Knickerbocker, p. 182.

=Syn. 2. *Issue*, *Posterity*, etc. See *offspring*.

progermination (prō-jēr-mi-nā'shon), *n.* [*< LL. as if *progerminatio(n)-, < L. progerminare, shoot forth, germinate, < pro, forth, + germinare, germinate: see germinate.*] Origin; birth; issue.

Ignoble births which shame the stem

That gave *progermination* unto them.

Herrick, To Sir John Berkeley.

progger (prog'ēr), *n.* One who progs; a rambling or aimless searcher; specifically, one who progs for clams, oysters, etc., alongshore; a pot-fisherman. [Eastern U. S.]

The class of men who get them [quahaugs] and the soft clams mainly are a miserable set who help the oystermen in winter and "go clamming" in summer. They are locally known as *progers*. *Fisheries of U. S.*, V. II. 604.

proglottic (prō-glōt'ik), *a.* [*< proglottis + -ic.*] Of or pertaining to a proglottis. Also *proglottidean*.

proglottid (prō-glōt'id), *n.* [*< proglottis (-id-).*] One of the detached sexually mature segments of a tapeworm or tænia; a proglottis.

In this way the Tænia-chain is formed, the last metamorphosis of which (the so-called *proglottide*) break off at a certain stage of development, and form more or less independent individuals.

Gegenbauer, Comp. Anat. (trans.), p. 129.

proglottidean (prō-glōt'id-ē-an), *a.* [*< proglottid + -an.*] Same as *proglottic*.

proglottis (prō-glōt'is), *n.*; pl. *proglottides* (-idéz). [NL., < Gr. *προγλωττίς*, *προγλωττίς*, the point of the tongue, < *πρό*, before, + *γλωττίς*, tongue.] A detachable sexually mature segment of a cestoid worm; one of the zooids of the *Scolecida*, propagated by gemmation from a scolex, which in their turn produce ova; a proglottid, or generative joint. The joints of a tapeworm, for example, are proglottides. This is what makes tapeworms such formidable parasites and so difficult to eradicate. For they are continually budded off from the scolex or "head" (really the whole worm) to the number sometimes of hundreds, like successive links of a chain; each such link or "joint" contains all the sexual elements, and is thus capable itself of starting a new series of the parasites in the eggs it produces. See cut under *Cestoidæ*.

Each segment [of a tapeworm] is eventually found to contain a set of male and female organs. . . . At the extreme end of the body the segments become detached, and may for some time retain an independent vitality. In this condition each segment is termed a *proglottis*, and its uterus is full of ova. *Huxley*, Anat. Invert., p. 184.

prognathic (prog-nath'ik), *a.* [*< prognath-ous + -ic.*] Having protrusive jaws; characterized by or exhibiting prognathism. Also *prognathous*.

The relative large size of the jaws and lower parts of the face we see in the negro races, especially, as compared with our own, and to this type we give the name *prognathic*. *Pop. Sci. Mo.*, XIII. 432.

prognathism (prog'nā-thizm), *n.* [*< prognath-ous + -ism.*] The prognathic state or condition; the quality of being prognathic; the condition of having a small facial or a large craniofacial angle. See *orthognathous*.

This [a large craniofacial angle] is the fundamental condition of *prognathism*. *Huxley*, Anat. Vert., p. 420.

Alveolodentary prognathism. See *alveolodentary*.

prognathous (prog'nā-thus), *a.* [*< Gr. πρό, before, forward, + γνάθος, jaw, mouth.*] Same as *prognathic*: opposed to *opisthognathous* and *orthognathous*.

The lower race had long snouty noses, *prognathous* mouths, and retreating foreheads.

Harper's Mag., LXXVII. 290.

prognathy (prog'nā-thi), *n.* Same as *prognathism*.

Progne (prog'nē), *n.* [Also *Progne*; < L. *Progne*, *Progne*, < Gr. *Πρόγνη*, in myth. the daughter of Pandion, transformed into a swallow; hence poet., in L., a swallow.] 1. [L. c.] A swallow. *Dryden*.—2. An American genus of *Hirundinidæ* or swallows, containing several species of large size, robust form, and dark coloration, some of which are known as *purple martins*, as

Purple Martin (*Progne subis*).

P. subis or *P. purpurea*, the very common and familiar purple martin of the United States. This bird is deep lustrous steel-blue, with black bill and blackish wings, tail, and feet, about 7½ inches long and 15½ in extent of wings. The female is greenish-brown glossed with steel-blue, the under parts whitish shaded with gray. It is a sociable loquacious bird, which breeds naturally in holes of trees, and now, in populous districts, often in boxes provided for its accommodation. The eggs are pure white. It is migratory and insectivorous, like other swallows. There are several other species in the warmer parts of America.

prognosis (prog-nō'sis), *n.* [= F. *prognose* = It. *prognosi*, < L. *prognosis*, < Gr. *προγνώσις*, foreknowledge, forecast, < *προγνῶσκειν*, know beforehand, < *πρό*, before, + *γινῶσκειν*, know, perceive: see *know*, *gnosis*.] 1. A foreknowing of the course of events; forecast.

An intimate knowledge of the domestic history of nations is therefore absolutely necessary to the *prognosis* of political events. *Macaulay*, History.

2. A forecast of the probable course and termination of a case of disease; also, what is thus forecast.

In a fever, great prostration, high temperature, and rapid pulse . . . must lead to the formation of an unfavourable *prognosis*. *Quain*, Med. Dict., p. 392.

prognostic (prog-nos'tik), *a.* and *n.* [I. *a.* < F. *prognostique* = Pg. *pronostico*, *prognostico*, < NL. **prognosticus*, < Gr. *προγνώστικός*, adj., < *προγνῶσκειν*, see or know beforehand: see *prognosis*. II. *n.* First in E. as a noun, < ME. *pronostique*, *prenostik*, < OF. *pronostique*, *prognostique*, m., F. *prognostic*, usually *pronostic*, m., = Sp. *pronóstico* = Pg. *pronostico*, *prognostico* = It. *pronostico*, *prognostico*, < L. *prognosticon*, *prognosticum*, < Gr. *προγνώστικόν*, a token of the future, a prognostic, neut. of *προγνώστικός*, adj.: see above.] I. *a.* Foreshowing; indicating something in the future by signs or symptoms: as, the *prognostic* indications of a disease.

It will become a gentleman to have some knowledge in medicine, especially the diagnostic part, whereby he may take timely notice of a disease, and by that means timely prevent it, as also the *prognostic* part, whereby he may judge of the symptoms either increasing or decreasing in the disease, as also concerning the crisis or indication thereof. *Lord Herbert of Cherbury*, Life (ed. Howells), p. 44.

II. *n.* 1. That which prognosticates or foretells; a sign by which a future event may be known or foreshown; an omen; a token.

The negardye in kepnyng hyr rychease

Prenostik is thou wolt hir towr asayle.

Chaucer, Fortune, l. 54.

He saith for suche a *pronostike*

Most of an hounde was to him like.

Gower, Conf. Amant., li.

Therefore [I] believe that those many prodigies and ominous *prognostics* which forerun the ruins of states, princes, and private persons are the charitable premonitions of good angels. *Sir T. Browne*, Religio Medici, l. 81.

Careful observers may foretell the hour

(By sure *prognostics*) when to dread a shower.

Swift, Descrip. of a City Shower.

2. A prediction; a foretelling.

Though your *prognosticks* run too fast,

They must be verified at last.

Swift, Death of Dr. Swift.

=Syn. *Sign*, *Presage*, etc. See *omen*, and *foretell*, *n.*

prognostic (prog-nos'tik), *v. t.* [*< OF. prognostiquer = Sp. pronosticar = Pg. pronosticar, prognosticar = It. pronosticare, prognosticare, < ML. prognosticare, prognosticate: see prognosticate.*] To prognosticate.

When the sun shines waterishly and *prognosticks* rain.

Dr. H. More, Immortal. of Soul, III. III. 5.

I never dreamed that ministers should be compelled to impugn ministers; the adversaries have good sport betwixt themselves to *prognosticate* the likelihood.

Bp. Burnet, Records, II. III. No. 8, Parker's Answer.

prognosticable (prog-nos'ti-kā-bl), *a.* [*< prognostic(ate) + -able.*] Capable of being prognosticated, foreknown, or foretold.

The causes of this inundation cannot indeed be regular, and, therefore, their effects not *prognosticable* like eclipses, *Sir T. Browne*, Vulg. Err., vi. 8.

prognosticate (prog-nos'ti-kāt), *v.*; pret. and pp. *prognosticated*, ppr. *prognosticating*. [*< ML. prognosticatus, pp. of prognosticare, foretell, prognosticare, < L. prognosticon, a prognostic: see prognostic.*] I. *trans.* 1. To foretell by means of present signs; predict.

I neither will nor can *prognosticate*

To the young gaping heir his father's fate.

Dryden, tr. of Juvenal's Satires, III.

Cassandra-like, *prognosticating* woe.

Longfellow, Birds of Killingworth.

2. To foreshow or betoken; presage.

The other [top of Vesuvius] towards the South aspireth more high, which when hid in clouds *prognosticates* rain to the Neapolitana. *Sandys*, Travels, p. 208.

The death of a monarch or prince of some corner of the world, *prognosticated* by an eclipse or comet.

Jer. Taylor, Works (ed. 1835), I. 371.

=Syn. 1 and 2. *Predict*, *Presage*, etc. See *foretell*.—2. To betoken.

II. *intrans.* To judge or pronounce from presage or foreknowledge.

If any man's father be sick, the son straight goes vnto the sooth-saying or *prognosticating* priest, requesting him to demand of his God whether his father shall recover of that or no. *Hakluyt's Voyages*, II. 58.

prognostication (prog-nos'ti-kā'shon), *n.* [*< ME. pronosticacioun, < OF. (and F.) pronosticacion = Sp. pronosticacion = Pg. pronosticação = It. pronosticazione, < ML. prognosticatio(n)-, < prognosticare, prognosticate: see prognosticate.*] 1. The act of prognosticating, foretelling, or foreshowing future events by present signs; a presage; a prediction.

—**State of progress** [tr. of Gr. *πρόκοσις*], a state which the Stoical and other philosophies claim to confer of becoming constantly wiser and better, without danger of relapse.

= Syn. 1-4. *Progress*, *Progression*, *Advance*, *Advancement*, and *Proficiency* agree in expressing the idea of a forward movement, literally or figuratively. *Proficiency* applies only to a person; thereto to a person or thing. *Progress* is a lively word for continued improvement in any respect, or it may mean simply a course, whether good or evil: as, "The Rake's *Progress*" (Hogarth). *Progression* is less common and not general; it emphasizes the act of moving. *Progress* and *advance* are high words for the promotion of human knowledge, character, and general welfare. *Advancement* is essentially synonymous with *advance*, but is not so general; the word applies chiefly to things mental: as, "The *Advancement* of Learning" (Bacon); but we speak also of the *advancement* of human welfare; here the word suggests the help given by men, viewing it as external, and thus is essentially synonymous with *promotion*. *Advance* and *progress* seem figurative when not physical. *Proficiency* is the state resulting from having made *progress* in acquiring either knowledge or skill: as, *proficiency* in Latin or in music.

Human *progress* is gradual, by slow degrees, evil by degrees yielding to good, the spiritual succeeding the natural by almost imperceptible processes of amelioration.

O. B. Frothingham, George Ripley, p. 188.

proin, proiner. Obsolete or dialectal forms of *pruned*, *pruner*.

pro indiviso (prō in-di-vi'sō). [L.: *pro*, for, in manner of; *indiviso*, abl. sing. neut. of *indivisus*, not divided or cleft, < *in*-priv. + *divisus*, pp. of *dividere*, separate, divide: see *divide*.] In law, a term applied to rights held by two or more persons undivided, and otherwise termed *indivisible rights*.

project (prō-jekt'), v. [*OF. projecter, projeter*, F. *projeter* = Sp. *proyectar* = Pg. *proyectar*, project, < LL. *proicere*, thrust forth, L. reproach, accuse, freq. of L. *proicere, proicere*, pp. *proiectus*, throw before, thrust out, < *pro*, forth, before, + *jacere*, throw, cast: see *jet*. Cf. *abject*, *deject*, *eject*, *inject*, *object*, etc.] I. trans. 1. To throw out or forth; cast or shoot forward.

Before his feet her selfe she did project.

Spenser, F. Q., VI. l. 45.

The ascending villas on my side

Project long shadows o'er the crystal tide.

Pope, Windsor Forest, l. 376.

A ball once *projected* will fly on to all eternity with undiminished velocity, unless something checks.

Macaulay, Utilitarian Theory of Government.

2. To cast forward in the mind; scheme; contrive; devise; plan.

This end I never did project,

To hang upon a tree.

Macpherson's Rant (Child's Ballads, VI. 266).

What sit we then projecting peace and war?

Milton, P. L., II. 329.

A world which has Alla for its contriver is much more wisely formed than that which has been *projected* by Mahomet.

Goldsmith, Asem.

3. In geom.: (a) To throw forward in rays or straight lines, especially from a center; draw such rays through every point of.

To *project* from a fixed point, S (the centre of projection), a figure ABCD . . . *abcd*, . . . composed of points and straight lines, is to construct the straight lines or projecting rays SA, SB, SC, SD, . . . and the projecting planes Sa, Sb, Sc, Sd, . . . We thus obtain a new figure composed of straight lines and planes which all pass through S.

Cremona, Projective Geometry, § 2.

(b) To throw forward (lines) from a center through every point of the figure said to be projected, and then cut these with a surface upon which the figure is said to be projected. (c) To delineate according to any system of correspondence between the points of a figure and the points of the surface on which the delineation is made.—4. To throw, as it were, from the mind into the objective world; give an objective or real seeming to (something subjective).

Thoughts became things, and ideas were projected from her vivid fancy upon the empty air around her.

J. A. Symonds, Italy and Greece, p. 58.

5. To set forth; set out. [Rare.]

I cannot *project* mine own cause so well
To make it clear, but do confess I have
Been laden with . . . frailties.

Shak., A. and C., v. 2. 121.

II. intrans. 1. To shoot forward; extend beyond something else; jut; be prominent: as, a cornice or a promontory *projects*. The rays thrown forward in geometrical projection are said to *project* in this sense.

The craggy Rock *projects* above the sky.

Prior, Solomon, 1.

As the boughs all temptingly *project*.

Burns, Address spoken by Miss Fontenelle.

2t. To form a scheme or project. Fuller.—**3t.** In *alchemy*, to make projection—that is, to throw philosopher's stone into a crucible of melted metal, and thus convert the latter into silver, gold, or the philosopher's stone.

My only care is

Where to get stuff enough now to *project* on.

B. Jonson, Alchemist, II. 1.

=**Syn.** 1. To protrude, bulge (out), stand out.

project (proj'ekt), *n.* [*< OF. project, projet, F. projet = Sp. proyecto = Pg. projecto = It. progetto, a project, purpose, < L. projectum, a projection, jutting, something thrust out, neut. of projectus, pp. of projicere, proicere, throw forth, thrust out; see project, v.*] That which is projected or devised; a plan; a scheme; a design: as, *projects* of happiness.

Amo. What say you to a masque?

Hed. Nothing better, if the *project* were new and rare.

B. Jonson, Cynthia's Revels, IV. 1.

Here this mad fickle Crew were upon new *Projects* again.

Dampier, Voyages, I. 507.

I have a *project* of publishing in the spring a pamphlet, which I think of calling "Common-Sense for 1810."

Sydney Smith, To Lord Holland.

=**Syn.** Scheme, Design, etc. See plan.

projectile (proj'ek'til), *a.* and *n.* [*< F. projectile = Sp. proyectil = Pg. proyectil = It. proiettile; as project + -ile.*] **I. a.** 1. Impelling, throwing, driving, or shooting forward: as, a *projectile* force.

The planets are constantly acted upon by two different forces, viz. gravity or attraction, and the *projectile* force.

G. Cheyne, On Regimen, v.

2. Caused by impulse; impelled or driven forward.

Good blood, and a due *projectile* motion or circulation, are necessary to convert the aliment into laudible animal juices.

Arbutnot, Alimenta, p. 35.

3. In *zool.*, capable of being thrust forward or protruded, as the jaws of a fish; protusile.

II. n. 1. A body projected, or impelled forward by force, particularly through the air. Thus, a stone thrown from the hand or a sling, an arrow shot from a bow, and a ball discharged from a cannon are *projectiles*. The path of a *projectile*, or its trajectory (neglecting the effect of air-resistance), is a parabola.

The motion of a *projectile*—that is to say, of a body thrown in any direction and falling under the influence of gravity—was investigated by Galileo.

W. E. Clifford, Lectures, II. 13.

2. Specifically, a missile intended to be projected from a cannon by the explosive force of gunpowder or some similar agent. *Projectiles* used in smooth-bore guns are usually spherical, though sometimes oblong, as is the case in the Manby, Parrott, and Lyle life-saving *projectiles*. *Projectiles* for rifled guns are oblong, the cylindroconoidal form being generally adopted. It is essential for the range and accuracy of such a *projectile* that it should pass through the air in the direction of its longer axis, and the only certain method of effecting this is to give it a rapid rotary motion about this axis. To this end the *projectile* must be so prepared that it will engage and follow grooves in the bore of the gun. This is done in several ways: (a) By the *flange system*, in which the *projectile* is provided with flanges, studs, or buttons made of a soft metal, as copper, zinc, or brass, which fit into the grooves of the bore. (b) By the *expansive method*, often called the *American system*, in which the *projectile* is fitted with an expanding device made of softer material, such as brass, copper, or papier-maché, which is wedged into the grooves by the explosive force of the charge. This system requires more and shallower grooves than the flange system. Both the preceding methods are applicable to muzzle-loaders. (c) By the *compressive system*, in which the *projectile* is surrounded by a soft metal bed or jacket, the diameter of which is greater than that of the bore without the grooves, the *projectile* being forced into and through the rifled part of the bore by the explosive force of the charge. The bands in the bore cut grooves in the encircling bands, which center and give rotation to the *projectile*. The rifling is polygroove and shallow, sometimes narrowing toward the muzzle. This system is in use in breech-loading guns.—**Armor-piercing projectile**, a *projectile* adapted, by its material and by special methods of hardening its point, to pierce modern armor-plate. A great advance in power of penetration has been secured by placing upon the point of the shell a soft metal cap which protects it from being broken by the hardened surface of the plate.

—**Amplitude of the range of a projectile**.—See *derivation*.—**Horizontal range of a projectile**.—See *horizontal*.—**Subcaliber projectile**, a *projectile* made of less diameter than that of the bore of the piece from which it is fired, but having a cup or disk large enough to

fill the bore, allowing the ordinary windage; or it may have a cup or disk capable of being forced out to fill the bore when the gun is discharged. A high initial velocity is obtainable in subcaliber *projectiles*, for while their weight and hence inertia are much less than those of the full-sized shot, the area acted upon by the expanding gases is the same.—**Theory of projectiles**, that branch of mechanics which treats of the motion of bodies thrown or driven by an impelling force from the surface of the earth, and affected by gravity and the resistance of the air, as the motion of a cannon- or rifle-ball, or of a jet of water, etc.

projecting (proj'ek'ting), *p. a.* Inventive; enterprising. [Rare.]

projectingly (proj'ek'ting-li), *adv.* In the manner of something that juts out or projects.

A . . . hat . . . *projectingly* and out of all proportion

cocked before. Annals of Phil. and Penna., I. 381.

projection (proj'ek'shon), *n.* [*< F. projection = Sp. proyeccion = Pg. projecção = It. proiezione, < L. projectio(n)-, a throwing forward, a stretching out, < projicere, proicere, pp. projectus, throw forth; see project.*] 1. The act of projecting, throwing, or shooting forward: as, the *projection* of a shadow upon a bright surface; hence, the act or process of throwing, as it were, something that is subjective into the objective world; the act of giving objective or seeming reality to what is subjective: as, the *projection* of a sensation of color into space as the quality of an object (a colored thing).—2. That image or figure which results from the act of projecting an idea or a sensation.

Soon or late to all our dwellings come the spectres of the mind,

Doubts and fears and dread forebodings, in the darkness

undefined; Round us throng the grim *projections* of the heart and of

the brain. Whittier, Garrison of Cape Ann.

3. That which projects; a part projecting or jutting out, as of a building extending beyond the surface of the wall; a prominence.

The main peculiarity in the outside [of the amphitheater at Pola] is to be found in four tower-like *projections*.

E. A. Freeman, Venice, p. 117.

4. The act of projecting, or scheming or planning: as, he undertook the *projection* of a new enterprise.

Which, of a weak and niggardly *projection*,

Doth, like a miser, spoil his coat with scanting

A little cloth. Shak., Hen. V., II. 4. 46.

5. (a) In *geom.*, the act or result of constructing rays or right lines through every point of a figure, according to certain rules. These rays are called *projecting rays*. In *central projection*, often called *projection* simply, the *projecting rays* all pass through one point called the *center of projection*. In this way a point is projected into a ray, a straight line into a plane. In *axial projection*, a plane, called a *projecting plane*, is passed through every point of the figure, all these planes containing one line called the *axis of projection*. (b) The act or result of constructing rays through every point of a figure, all passing through one point, and cutting these rays by a plane or other surface, so as to form a section on that surface which corresponds point for point with the original figure. (c) In *cartography*, the act or result of constructing a figure upon a plane or other surface, which corresponds point by point with a sphere, spheroid, or other figure; a map-projection (which see, below).—6. The mental operation in consequence of which objects of the imagination or retinal impressions appear to be seen external to us.

What we call the field of view is naught else than the external *projection* into space of retinal states.

Le Conte, Sight, p. 71.

7. In *alchemy*, the act of throwing anything into a crucible or other vessel, especially the throwing of a portion of philosopher's stone upon a metal in fusion with the result of transmuting it; hence, the act or result of transmutation of metals; humorously, the crisis of any process, especially of a culinary process.

The red ferment

Has done his office; three hours hence prepare you

To see *projection*. B. Jonson, Alchemist, II. 1.

At the same time a ring was shewed to the King, pretended to be a *projection* of mercury.

Evelyn, Diary, June 1, 1667.

It is indeed the great business of her life to watch the skill on the fire, to see it simmer with the due degree of heat, and to snatch it off at the moment of *projection*.

Johnson, Rambler, No. 51.

Had he not had *projection*, think you? Saw you no ingots in the crucibles?

Scott, Kenilworth, xli.

Center of projection. See def. 5 (a).—**Central projection**. See *central* and def. 5 (a).—**Cylindrical projection**. See *map-projection*.—**Gauche projection**. See *gauche*.—**Geometric projection**, a parallel perspective projection equally inclined to the three principal axes of the body to be represented, as a machine.—**Homographic, horizontal, imaginary, isometric, loxodromic projection**. See the adjectives.—**Globular projection**. See *map-projection*.—**Map-projection**, a

system of continuous correspondence between the points of a spherical or spheroidal surface and those of a plane, this correspondence determining what points on a map represent given points on the earth, and conversely. Of the systems in use, only a small number are perspective representations (or rather perversions of such representations), so that the word *projection* must here be understood in a peculiar technical sense, not implying any simple geometrical relation between the sphere and the plane. The theory of projections is in itself one of the most scientific branches of applied mathematics; it may, indeed, be said to be simply the theory of functions viewed under the strong perspective of a practical standpoint. But only certain parts of the subject, such as the theory of orthomorphic projections, have as yet taken scientific shape. No satisfactory classification of map-projections is known; but orthomorphic, equivalent, zenithal (including the perspective), meridional, and conical projections are some of the main kinds. The following are the more important: **Airy's map-projection**. See *map-projection by balance of errors*.—**Albers's map-projection**, an equivalent map-projection in which the entire sphere appears as the space bounded by two lines and by two arcs of circles having their center at the intersections of these lines, these two arcs representing the infinitesimal parallels about the poles. The other parallels are concentric arcs having the same boundaries, and the meridians are straight lines radiating from the center. This map-projection was invented by H. C. Albers in 1805, and has been used for the map of Europe by Reichard.—**Apianus's map-projection**, a discontinuous map-projection in which the equator is represented by a limited straight line, and one of the meridians by a circle whose center bisects that line, while its circumference bisects each half formed by the first bisection; then, the semi-meridians toward the center are represented by arcs of circles cutting the equator orthogonally at equidistances, and bisecting the first circle at the points most distant from the equator; but the semi-meridians more distant from the center are represented by semicircles of the same radius as the full circle, and cutting the equator orthogonally at the same distances as the inner meridians; and the parallels are represented by equidistant straight lines parallel to the equator. This map-projection was much used in the sixteenth century, having been introduced by Peter Bennewitz or Apianus in 1524.—**Arago's map-projection**, a map-projection in which one of the meridians is a circle, and the parallels are parallel straight lines dividing the circumference of this circle into equal arcs, while the other meridians are ellipses dividing the parallels into equal parts. This projection was invented by the French astronomer Arago in 1834.—**Arrowsmith's map-projection**. See *globular map-projection* (b).—**Babinet's map-projection**. See *homolographic map-projection*.—**Bennewitz's map-projection**. Same as *Apianus's map-projection*.—**Bonne's map-projection**, an equivalent map-projection in which all the parallels are represented by concentric and equidistant arcs of circles, and the central meridian by a straight line, the central parallel being cut orthogonally by all meridians. The entire spheroid appears in a kidney shape. This map-projection was invented by Ptolemy, and described in his geography, although his rules for drawing it did not contemplate a degree of precision which the geographical knowledge of his time would not warrant. It was extensively used during the sixteenth century. It bears the name of the French geodesist Bonne, who improved the theory of it. It has been employed in several of the government maps of European countries. Also called *modified Flamsteed's map-projection*.—**Boole's map-projection**. Same as *Lagrange's map-projection*.—**Broken map-projection**. Same as *discontinuous map-projection*.—**Cassini's map-projection**, an equivalent map-projection, the development of a cylinder tangent to the sphere along a meridian, upon which cylinder the sphere has been orthogonally projected from the axis of the cylinder. This projection was used for Cassini de Thury's great map of France, of which the publication was begun in 1745.—**Central equivalent map-projection**. Same as *isometric map-projection*. It was proposed by J. H. Lambert.—**Central map-projection**. (a) Same as *gnomonic map-projection*. (b) Same as *zenithal map-projection*.—**Clark's map-projection**, a perspective map-projection in which the distance of the eye from the center of the sphere is 1.368 times the radius. This projection was invented by the English geodesist Colonel A. R. Clarke.—**Collignon's map-projection**. (a) The quadrilateral map-projection. (b) The central equivalent projection.—**Conform map-projection**. Same as *orthomorphic map-projection*.—**Conical map-projection**. (a) Properly, a map-projection the development of a tangent or secant cone upon which the sphere is conceived to have been projected by lines of projection perpendicular to its axis. (b) Any projection of a projection upon a cone.—**Cylindrical map-projection**. (a) A parallelogrammatic or square map-projection. (b) A map-projection showing the earth in repeated stripes, as Mercator's. (c) A perspective or central projection in which the center is at infinity.—**Delisle's map-projection**, the secant conical projection proposed by Mercator, and applied by J. N. Delisle to the great map of Russia.—**Discontinuous map-projection**, a map-projection which follows one law in one part, and another in another part. Also called *broken map-projection*, *irregular map-projection*.—**English map-projection**. Same as *globular map-projection* (b).—**Equivalent map-projection**, a zenithal map-projection in which the radius of each almucantar is equal to its angular distance from the zenith. This map-projection, invented by the French mathematician Postel in the sixteenth century, is frequently employed for star-maps, etc.—**Equivalent map-projection**, a map-projection which represents all equal surfaces on the spheroid by equal areas on the map. Also called *equal-surface map-projection*.—**Equivalent stereographic map-projection**, an equivalent

Bonne's Projection.

Also called *equal-surface map-projection*.—**Equivalent stereographic map-projection**, an equivalent

alant map-projection in which the parallels are represented by parallel straight lines at distances from the equator proportional to the tangents of half the latitudes. This projection was proposed in 1822 by M. de Prépéit Foucault. — *Famstead's map-projection*. Same as *sinusoidal map-projection*. — *Foucault's map-projection*, the equivalent stereographic map-projection. — *Fournier's map-projection*. (a) A meridional map-projection in which the meridians are equidistant ellipses, while the parallels are circular arcs equally dividing the central and extreme meridians. (b) A map-projection in which the meridians are as in (a), but the parallels are straight lines as in the meridional orthogonal projection. These map-projections were proposed in 1846 by the French geographer Fournier. — *Gauss's map-projection*. Same as *Lagrange's map-projection*. — *Glareanus's map-projection*, a discontinuous map-projection differing from that of Apianus only in setting the parallels at the same distances as in the meridional orthogonal map-projection. It was invented by the Swiss mathematician Loritl or Glareanus, and published in 1527. — *Globular map-projection*. (a) Any projection of a hemisphere with curvilinear meridians and parallels. (b) A meridional hemispherical map-projection in which the equator is a straight line, the semimeridians are circular arcs dividing the equator into equal parts, and the parallels are circular arcs dividing the extreme and central meridians into equal parts. This projection, invented in 1660 by the Italian Nicolosi, has been extensively employed ever since. (c) La Hire's map-projection. — *Gnomonic map-projection*. (a) A perspective map-projection from the center of the sphere. All great circles are represented by straight lines. Hence, by extension — (b) Any map-pro-

jection representing all great circles by straight lines. Such a projection can contain but one half of the sphere on an infinite plane. This system is probably ancient. — *Harding's map-projection*. Same as *Lagrange's map-projection*. — *Herschel's map-projection*. Same as *Lagrange's map-projection*. — *Honolographic or homolographic map-projection*, an equivalent map-projection in which the meridians are ellipses meeting at the poles, and the parallels and equator are parallel straight lines: invented by the German mathematician Mollweide in 1805. It has been considerably used. — *Intermediary map-projection*, a zenithal map-projection in which, z being the zenith distance of an almucantar, r its radius on the map, and n a constant,

$$r = n \tan z/n.$$

This projection was invented by A. Germain. — *Irrregular map-projection*. Same as *discontinuous map-projection*. — *Isocylindric map-projection*, an equivalent map-projection the development of a cylinder upon which the sphere has been orthogonally projected. It was invented by the German mathematical philosopher J. H. Lambert. — *Isomeria map-projection*, the zenithal equivalent map-projection, invented by J. H. Lambert, and the best of the equivalent projections. — *Isocephal map-projection*. Same as *isomeria map-projection*. — *Jaeger's map-projection*, a discontinuous projection in the shape of an eight-pointed star. It was proposed by Jaeger in 1866, and was modified by Petermann. — *James's map-projection*, a perspective map-projection in which the center of projection is distant from that of the sphere by 1.5 times the radius. It was invented by the English geodesist Sir Henry James. — *Lagrange's map-projection*, an orthomorph map-projection in which the sphere is shown a finite number of times on a finite number of sheets, but in which all the north poles (or zeniths) coincide, as well as all the south poles (or nadirs). The projection was invented by J. H. Lambert, and has been called by many names. It has been used in a government map of Russia. — *La Hire's map-projection*, a perspective projection having the center of projection at a distance from the center of the sphere equal to 1.707 times the radius. This projection, proposed by the French geodesist La Hire in 1701, has been frequently used. — *Littrow's map-projection*, an orthomorph map-projection in which the meridians are hyperbolas and the parallels ellipses, all these conics being confocal. This projection has two north and two south poles, all four coincident at infinity, and shows the sphere twice on two sheets, which are merely perversions of each other. It has many remarkable properties. It was invented by the Bohemian astronomer Littrow in 1838. — *Lorgna's map-projection*. Same as *isomeria map-projection*. — *Map-projection by balance of error*, that zenithal projection which makes the "misrepresentation" a minimum, as determined by least squares. If r is the radius of an almucantar on the chart, z its zenith distance, and Z that of the limit of the chart, which cannot exceed $126^\circ 24' 58''$, then

$$r = \cot \frac{1}{2} \log \sec \frac{1}{2} z + \tan \frac{1}{2} \cot \frac{1}{2} Z \log \sec \frac{1}{2} Z.$$

Map-projection by development, a projection upon a developable surface which is then developed into a plane. — *Mercator's map-projection*, an orthomorph map-projection in which the whole sphere is shown in equal repeating stripes. The point at infinity represents the whole sphere, and the zenith and nadir do not elsewhere appear. As ordinarily used, the poles are taken as these points, when the meridians appear as equidistant parallel lines, and the parallels as parallel lines cutting them at distances from the equator

proportional to $\log \tan \frac{1}{2}$ latitude. This has the advantage that the points of the compass preserve the same direc-

tions all over the map. This projection, invented by the Flemish cosmographer Mercator in 1569, is the most useful of all. — *Meridional map-projection*, a map-projection which seems to be projected upon the plane of a meridian, showing the poles at the extremities of a central meridian. — *Modified Flamstead's map-projection*. Same as *Bonne's map-projection*. — *Mollweide's map-projection*. Same as *homolographic map-projection*. — *Murdoch's map-projection*, one of three conical map-projections in which the part of the cone of which the map is a reduced development is equal to the spherical zone represented. These were invented by Patrick Murdoch in 1763. — *Orthographic map-projection*, a perspective map-projection from an infinitely distant center. — *Orthomorph map-projection*, a map-projection which preserves all angles — that is, the shapes of all infinitesimal portions of the sphere. When one such map-projection has been obtained, say the polar stereographic, which is the simplest, all others may be derived from this by a transformation of the plane. Let r and θ be the polar coordinates of any point on the polar stereographic projection, let ξ denote the imaginary whose square is -1 , and let F denote any function having a differential coefficient. If, then, $F(r \cos \theta + r \sin \theta \cdot \xi)$ be put into the form $x + yi$, x and y will be the rectangular coordinates of the corresponding point on another orthomorph projection. Also called *conform map-projection*. — *Parallelogrammatic map-projection*, a map-projection in which the parallels are represented by equidistant straight lines, and the meridians by equidistant straight lines perpendicular to the parallels. This is an ancient projection. Also called *rectangular map-projection*. — *Parent's map-projection*, one of two perspective map-projections. In Parent's first map-projection the center of projection is distant from the center of the sphere 1.686 times the radius. In his second this distance is 1.752. — *Perspective map-projection*, a true projection of the sphere by straight lines from a center of projection intersecting the plane of the map. — *Petermann's map-projection*, a discontinuous map-projection showing the sphere in the form of an eight-pointed star. It is used to decorate the title-page of Stieler's atlas. — *Polar map-projection*, a map-projection showing one of the poles in the center. — *Polyconic map-projection*, a map-projection in which the surface of the earth is cut into an infinite number of zones parallel to the equator; a central meridian is then developed into a straight line, and then each zone is developed separately. This projection, invented by Haasler, superintendent of the United States Coast Survey, is used in all government maps of the United States. — *Quadrilateral map-projection*, a broken equivalent projection in which one meridian has the form of a square, of which another meridian and the equator are the diagonals. It was invented by Collignon. — *Quincuncial map-projection*, an orthomorph pro-

jection of the earth into repeating squares, invented by C. S. Peirce in 1876. — *Rectangular map-projection*. Same as *parallelogrammatic map-projection*. — *Ryach's map-projection*, a conical projection in which the cone cuts the equator and has its vertex at one pole, and the sphere is projected upon the cone by lines perpendicular to the axis. It was invented by Ryach in 1508. — *Sanson's map-projection*. Same as *sinusoidal map-projection*. — *Schmidt's map-projection*, a meridional map-projection in which the meridians are represented by ellipses cut at equal distances by the parallels. It was proposed by the physicist G. G. Schmidt in 1901. — *Sinusoidal map-projection*, an equivalent map-projection in which the parallels are equidistant straight lines to which the central meridian is perpendicular. This projection (so called from the form of the meridians) was first used by the French cartographer Sanson in 1650. — *Square map-projection*, the projection of a map which the successive meridians and parallels cut up into squares. — *St-*

noterous map-projection, an equivalent projection which represents the whole earth on the sector of a circle, the pole being at the center and the parallels concentric circles. It was invented by J. H. Lambert. — *Stereographic map-projection*, the simplest of all projections, representing the whole sphere once on one infinite plane, the parts at infinity being considered as a point. All circles on the sphere

Stereographic Projection of the World.

are represented circles, and the angles are preserved. The stereographic projection of the sphere is a perspective projection, a point on the surface being the center of projection; but the stereographic map-projection of the sphere is not a perspective projection. The stereographic projection was known to the ancients, and has always been employed for special purposes. — *Tector's map-projection*, a modification of the isocylindric map, by J. C. von Tector, 1808. — *Transverse map-projection*, a meridional map-projection. — *Trapeziform map-projection*, a map-projection in which the space between two meridians and two parallels is represented by a trapezoid, the sides of which are divided proportionally to determine other straight lines representing meridians and parallels. — *Werner's map-projection*, that equivalent map-projection which has the parallels concentric and equidistant arcs of circles, with the north pole at the center. The whole sphere has a heart shape. This was invented by Johann Werner, 1514. — *Zenithal map-projection*, a map-projection which is symmetrical about a central point, the almucantars being represented by concentric circles. — *Mercator's projection*. See *Mercator's chart* (under *chart*) and *Mercator's map-projection* (above). — *Natural projection*, a perspective delineation of a surface on a given plane. — *Stormonth*. — *Oblique projection*, a cylindrical projection upon a plane not at right angles to the sides of the cylinder. — *Orthogonal projection*, a projection by means of rays all perpendicular to the plane of projection. — *Orthographic projection*. See under *map-projection*, above. — *Parallel projection*, a perspective projection in which the center is at infinity. — *Plane of projection*. Same as *perspective plane* (which see, under *perspective*). — *Powder of projection*, in alchemy, a powder added to base metals in a molten state, and supposed to have the power of transmuting them into gold or silver. — *Stereoscopic projection*, a double perspective projection adapted to be viewed one part by one eye, the other by the other.

projective (prō-jek'tiv), *a.* [*< project + -ive.*]

1. Produced by projection. — 2. In *geom.*, relating to incidences and coincidences; not metrical: as, a *projective* theorem or property. — 3. Capable, as two plane figures, of being derived from one another by a number of projections and sections.

Thus, let the plane pencil OABCD be cut by the line AD in the points A, B, C, D, and from the center P let these points be projected into the rays AE, BF, CG, DH, and let these be cut by the line EH in the points E, F, G, H. Then, the range of points EFGH is projective with the plane pencil OABCD. — *Projective geometry*. See *geometry*. — **projectivity** (prō-jek-tiv'i-ti), *n.* [*< projective + -ity.*] The character of being projective, as two plane figures.

projectment (prō-jekt'ment), *n.* [*< project + -ment.*] Projection; design; contrivance. [Rare.]

She never doubted but that men that were never so dishonest in their *projectments* of each other's confusion might agree in their allegiance to her.

Clarendon, Great Rebellion.

projector (prō-jek'tor), *n.* [*< NL. "projector," < L. projicere, proicere, pp. projectus, project: see project.*] 1. One who forms projects; one who forms a scheme or design; a schemer.

Projective Points.

Fitz. But what is a projector?
I would conceive.

Eng. Why, one, sir, that projects
Ways to enrich men, or to make them great
By suits, by marriages, by undertakings.

B. Jonson. Devil is an Ass, I. 3.

Well, Sir, how fadges the new Design? have you not the
Luck of all your Brother Projectors, to deceive only your-
self at last? *Wycherley.* Country Wife, iv. 1.

Sir Gilbert Heathcote, who was one of the projectors of
the Bank of England. *N. and Q.*, 7th ser., II. 102.

2. That which projects; specifically, a para-
bolic mirror, or a lens or combination of lenses,
used for projecting a beam of light. The source
of light is usually arranged in relation to the projector so
that the beam is composed of rays nearly parallel.

The search-light projector, which is hung in a cage over
the ship's bow. *Engineer*, LXVI. 313.

On May 4th there were placed in position two electric
projectors, which from the Eiffel Tower will throw their
powerful rays of light over Paris.

Electric Rev. (Eng.), XXIV. 540.

3. A camera for throwing an image on a screen
by means of electric, magnesium, oxyhydrogen,
or other suitable light.—4. The square of the
area of a plane triangle divided by the contin-
ued product of the sides.

projectrix (prō-jek'trīks), *n.* A curve derived
from another curve by composition of projec-
tions.

projecture (prō-jek'tūr), *n.* [*F.* *projecture* =
Sp. *projectura* = *Pg.* *projectura* = *It.* *progettura*,
← *L.* *projectura*, something jutting out, ← *proji-*
ciare, *proicere*, pp. *projectus*, thrust forth or for-
ward: see *project*.] A jutting or standing out
beyond the line or surface of something else;
projection.

projet (prō-zhā'), *n.* [*F.*: see *project*.] Scheme;
plan; design; specifically, in *international law*,
the draft of a proposed treaty or convention.

proke (prōk), *v. t.*; pret. and pp. *proked*, ppr.
proking. [*W.* *procio*, poke, thrust, stab. Cf.
prog and *prowl*.] To poke; stir; goad; urge.
[Now only prov. Eng.]

The queene ever at his elbowe to pricke and proke him
forward. *Holland*, tr. of Ammanus (1600). (*Nares*.)

prokecyet, *n.* A Middle English form of *prozy*.
Prompt. Parv., p. 414.

prokeimenon (prō-kī'me-non), *n.* [*Gr.* *προκει-
μενον*, neut. ppr. of *προκειμαι*, be placed before,
← *πρό*, before, + *κειμαι*, lie, be placed.] In the
Gr. Ch., a short anthem preceding the epistle,
consisting of two verses, generally from the
psalms. There is also a prokeimenon at Sun-
day lauds and at vespers.

proker (prō'kér), *n.* That which prokes or
pokes; particularly, a poker. [*Prov. Eng.*]

Before the antique Hall's turf fire
Was stretch'd the Porter, Con Maguire,
Who, at stout Uaquebaugh's command,
Snor'd with his proker in his hand.

Colman, Poetical Vagaries, p. 46. (*Davies*.)

The prokers are not half so hot, or so long,
By an inch or two, either in handle or prong.
Barham, Ingoldsby Legends, II. 227.

prokeratour, *n.* A Middle English form of
procurator. *Prompt. Parv.*, p. 414.

proketowret, *n.* A Middle English form of *pro-
cator*. *Prompt. Parv.*, p. 414.

proking-spit (prō'king-spit), *n.* A sword used
for thrusting or poking; a rapier; a weapon.
[Humorous.]

Piping hote, puffs toward the pointed plaine
With a broad Scot, or proking-spit of Spaine.
Bp. Hall, Satires, IV. iv. 57.

prokiet, *v. t.* and *i.* [*ME.*; cf. *Dan.* *prække* =
Sw. *pracka*, go a-begging, = *G.* *prachen*,
prachern, beg; perhaps ← *L.* *procare*, *procari*,
ask. Cf. *proke*, *prog*.] To beg.

Prokryn or styfly askyn, *procor*, *procto*.
Prompt. Parv., p. 414.

prolabial (prō-lā'bi-āl), *a.* [*←prolabium* + *-al*.]
Of or relating to the prolabia. *Lancet*, No.
3465, p. 182.

prolabium (prō-lā'bi-um), *n.*; pl. *prolabia* (-i).
[NL., ← *L.* *pro*, before, + *labium*, lip: see *labi-
um*.] One of the oral margins of the lips, form-
ing the red exposed part.

prolapse (prō-laps'), *v. i.*; pret. and pp. *pro-
lapsed*, ppr. *prolapsing*. [*←L.* *prolapsus*, pp. of
prolabi, fall or slide forward, ← *pro*, before, +
labi, fall: see *lapse*.] To fall down or out;
chiefly a medical term. See *prolapse*, *n.*

prolapse (prō-laps'), *n.* [*←L.* *prolapsus*, a fall-
ing, ← *prolabi*, pp. *prolapsus*, fall or slide forward:
see *prolapse*, *v.*] In *pathol.*, a falling down of
some part of the body, as the uterus or rectum,
from the position which it normally occupies.

prolapsion (prō-lap'shon), *n.* [*←L.* *prolap-
sio*(-n-), a slipping or falling forward, ← *pro-*

labi, fall forward: see *prolapse*, *v.*] *Prolapse*.
[Rare.]

prolapsus (prō-lap'sus), *n.*; pl. *prolapsus*. [*LL.*:
see *prolapse*, *n.*] In *pathol.*, *prolapse*.

prolate (prō-lāt'), *v. t.* [*←L.* *prolatus*, pp. of
proferre, bring forward, carry out or forth, pro-
duce: see *proffer*.] To utter, especially in a
drawing manner; lengthen in pronunciation
or sound.

The pressures of war have somewhat cowed their spirits,
as may be gathered from the accent of their words, which
they *prolate* in a whining querulous tone, as if still com-
plaining and crest-fallen. *Howell*.

For the sake of what was deemed solemnity, every note
was *prolated* into one uniform mode of intonation.
W. Mason, Eng. Church Music, p. 261. (*Latham*.)

prolate (prō-lāt'), *a.* [*←L.* *prolatus*, brought for-
ward, pp. of *proferre*, bring forward, produce:
see *prolate*, *v.*] Lengthened along one direc-
tion. A *prolate spheroid* is produced by the
revolution of a semi-ellipse about its larger di-
ameter. See *oblate*.—**Prolate cycloid**. See *cycloid*, 1.
prolateness (prō-lāt-nes), *n.* The condition or
character of being *prolate*.

prolation (prō-lā'shon), *n.* [*ME.* *prolatioun*,
← *OF.* (and *F.*) *prolation* = *Sp.* *prolacion* = *Pg.*
prolação = *It.* *prolazione*, ← *L.* *prolatio*(-n-), a
bringing forward or putting forth, ← *prolatus*,
pp. of *proferre*, bring out or forth: see *prolate*.]
1. Bringing forth; utterance; pronunciation.

It is a most easy and gentle letter, and softly hisseth
against the teeth in the *prolation*.

B. Jonson, Eng. Grammar, i. 4.

2. Delivery; measure; tune.

With rethorice com forth musice, a damoisel of oure
hous, that syngeth now lyghter moodes or *prolaciouns* (var.
prolaciouns), now hevyr. *Chaucer*, Boethius, II. prose 1.

3. The act of deferring; delay.—4. In *medi-
eval music*, a method of subdividing the semi-
breve into minims—that is, rhythmical subdivi-
sion. Two varieties were recognized—the greater or
perfect, which was triple, and the less or imperfect, which
was duple.

proleclation, *n.* [*←OF.* *proleclation* = *Sp.* *pro-
leclacion* = *It.* *proleclazione*, ← *L.* as if **proleclat-*
io(-n-), ← *proleclare*, allure, entice, freq. of *pro-*
licere, allure, entice, ← *pro*, forth, + *licere*,
allure: see *allect*.] Enticement; allurement.
Minsheu.

proleg (prō'leg), *n.* [*←L.* *pro*, for, + *E.* *leg*.]
In *entom.*, a false leg; a proleg; one of the ab-
dominal limbs or ambulatory processes of the

Larva of Milkweed Butterfly (*Ameletus flexipennis*).

larvæ of insects, usually fleshy and always distinct
from the true thoracic legs. The ten post-
erior legs of a caterpillar of ordinary form are prolegs.
Also called *prop-leg*. See also cut under *Amara*.—**Coro-
nate prolegs**. See *coronate*.

prolegate (prō-leg'āt), *n.* [*←L.* *prolegatus*, the
substitute of a legate or lieutenant-governor,
← *pro*, for, + *legatus*, legate: see *legate*.] A
deputy legate.

prolegomenary (prō-le-gom'e-nā-ri), *a.* [*←pro-
legomenon* + *-ary*.] Having the character of
prolegomena; preliminary; introductory; con-
taining prefixed explanations. *Imp. Dict.*

prolegomenon (prō-le-gom'e-non), *n.*; pl. *pro-
legomena* (-nā). [*NL.*, ← *Gr.* *προλεγόμενον*, neut.
of *προλεγομενος*, ppr. pass. of *προλέγειν*, say
before, foretell, ← *πρό*, before, + *λέγειν*, tell,
speak: see *legend*, *Logos*.] A preliminary ob-
servation; chiefly used in the plural, and ap-
plied to an introductory discourse prefixed to
a book or treatise.

"Tis a pithy *prolegomenon*," quoth I—and so read on.
Sterne, Tristram Shandy, vii. 35.

The mention of the Venetian scholia leads us at once to
the Homeric controversy; for the immortal *Prolegomena*
of Wolf appeared a few years after Villosion's publication.
Encyc. Brit., XII. 115.

prolegomenous (prō-le-gom'e-nus), *a.* [*←pro-
legomenon* + *-ous*.] 1. Preliminary; intro-
ductory; prefatory.

The *prolegomenous* or introductory chapter.
Felding, Tom Jones, viii. 1.

2. Given to making long exordiums or prefatory
remarks.

While the curt, pithy speaker misses the point entirely,
a wordy, *prolegomenous* babbler will often add three new
offences in the process of excusing one.

R. L. Stevenson, Virginibus Puerisque, iv.

prolepsis (prō-lep'sis), *n.* [*←L.* *prolepsis*, ← *Gr.*
πρόληψις, an anticipating, ← *προλαμβάνειν*, take
beforehand, receive in advance, ← *πρό*, before,
+ *λαμβάνειν*, λαβεῖν, take, receive.] Anticipa-
tion. (a) In the *Stoic philos.*, a common notion, axiom, or
instinctive belief which is not irrefragable, and which may
be in conflict with the truth. (b) In the *Epicurean philos.*,
a general conception based on sense-experience.

A certain anticipation of the gods, which he calls a *pro-*
lepsis, a certain preventive, or foreconceived information
of a thing in the mind. *J. Howe*, Works, I. 22.

(c) In *rhet.*: (1) A name sometimes applied to the use of an
adjective (or a noun) as objective predicate (see *predicate*),
as if implying an anticipation of the result of the verb's
action. (2) A figure consisting in anticipation of an oppo-
nent's objections and arguments in order to preclude his
use of them, answer them in advance, or prepare the reader
to receive them unfavorably. This figure is most fre-
quently used in the exordium. Also called *procatlepsis*.
(d) An error in chronology, consisting in dating an event
before the actual time of its occurrence; an anachronism.

Mr. Errington, called Lord Errington in the dispatches,
by a *prolepsis* we suppose. *The American*, VI. 87.

proleptic (prō-lep'tik), *a.* [*←Gr.* *προληπτικός*,
anticipating, ← *προληψις*, an anticipation: see
prolepsis.] 1. Pertaining to prolepsis or an-
tipication; anticipatory; antecedent.

Far different and far nobler was the hard simplicity and
noble self-denial of the Baptist. It is by no idle fancy
that the mediæval painters represent him as emanated by
a *proleptic* asceticism. *Farrar*, Life of Christ, viii.

Specifically—(a) In *med.*: (1) Anticipating the usual time:
noting a periodical disease whose paroxysm returns at an
earlier hour at every recurrence. (2) Prognostic. (b) In
rhet., implying prolepsis.

2. Axiomatic; of the nature of prolepsis.

To lead him by induction through a series of proposi-
tions depending upon and orderly deduced from your first
proleptic principles. *Parker*, Platonic Philosophy.

proleptical (prō-lep'ti-kāl), *a.* [*←proleptic* +
-al.] Same as *proleptic*.

So that our knowledge here is not after singular bodies,
or secondarily or derivatively from them; but in order of
nature, before them, and *proleptical* to them.

Cudworth, Intellectual System, p. 732.

proleptically (prō-lep'ti-kāl-i), *adv.* [*←prolep-
tical* + *-ly*.] By prolepsis; in a proleptic man-
ner; by way of anticipation.

The particle has also the power of indicating *prolep-
tically* in the subordinate clause that the principal one will
spring from it. *Amer. Jour. Philol.*, VI. 46.

proleptics (prō-lep'tiks), *n.* [Pl. of *proleptic*
(see *-ics*).] The art or science of prognosticat-
ing in medicine. *Imp. Dict.*

proles (prō'lēz), *n.* [*L.*, offspring, progeny, ←
pro, forth, forward, + *al* in *alere*, nourish
(see *aliment*), or *olere*, grow (see *adolescent*).]
Progeny; offspring.

proletaire (prō-le-tār'), *a.* and *n.* [*F.* *prolé-
taire*: see *proletary*.] Same as *proletarian*.

These ancestors of Roman prelates were poor dirty *pro-*
letaires, without distinction, without manners.

E. Renan, Hilbert Lectures, 1830 (tr. by C. Beard), II.

The plant is the ideal *proletaire* of the living world, the
worker who produces. *Huxley*, An. and Veg. Kingdoms.

proletarism (prō-le-tār'izm), *n.* [*←proletaire*
+ *-ism*.] Same as *proletarianism*.

proletaneous (prō-le-tā'nē-us), *a.* [*←L.* *prole-
taneus*, equiv. to *proletarius*: see *proletary*.]
Having a numerous offspring. [Rare.]

proletarian (prō-le-tā'ri-an), *a.* and *n.* [*←pro-
letary* + *-an*.] 1. *a.* Of or belonging to the
lower classes; hence, mean; vile; vulgar.

Low proletarian tything men.

S. Butler, Hudibras, I. l. 720.

II. *n.* A member of the poorest class of a
community; one who is without capital or reg-
ular employment.

We have considered the forcible creation of a class of
outlawed proletarians, the bloody discipline that turned
them into wage-labourers. *Marx*, Capital (trans.), xxix.

A proletarian is a person who is possessed of labour-
force, and of nothing else. *Westminster Rev.*, CXXVI. 221.

Also *proletaire*.

proletarianism (prō-le-tā'ri-an-izm), *n.* [*←pro-
letarian* + *-ism*.] The condition, or the politi-
cal influence, of the lower classes of the com-
munity. Also *proletarism*.

The bourgeoisie had played a most revolutionary part
in history. They had overturned feudalism, and now they
had created proletarianism, which would soon swamp
themselves. *Rae*, Contemp. Socialism, p. 129.

proletarianize (prō-le-tā'ri-an-iz), *v. t.*; pret.
and pp. *proletarianized*, ppr. *proletarianizing*.
[← *proletarian* + *-ize*.] To make proletarian;
reduce to a state of proletarianism.

The largesses pauperized and proletarianized the popu-
lace of the great city. *Pop. Sci. Mo.*, XXX. 233.

proletariat (prō-le-tā'ri-at), *n.* Same as *pro-
letariate*.

proletariate¹ (prō-le-tā'ri-āt), *a.* [*←proletary*
+ *-ate*.] Cf. *proletariate*².] Of or pertaining

to the proletariat; relating to the proletarians; proletarian.

The very efforts of philanthropy at the improvement of the proletarian classes.

The Academy, June 29, 1899, p. 441.

proletariate², **proletariat** (prō-le-tā-rī-āt, -at), *n.* [*F. proletariat*, the state or condition of a proletary, < *L. proletarius*, a proletary: see *proletary* and *-ate*.] Proletarians collectively; a body of proletarians; the class of wage-workers dependent for support on daily or casual employment; the lowest and poorest class in the community.

The *proletariat*, as the agitators delighted to call the standing class of operatives: meaning, by this Roman term for the lowest class in that republic, those who had only hands to work with and no laid-up capital.

Woolsey, *Communism and Socialism*, iv. § 1.

These [socialistic] doctrines had in the west [of Europe] been bred among the *proletariate*, the large class of society who had no property, no stable source of income, no steady employment, and no sure hope for the morrow.

Rae, *Contemp. Socialism*, p. 268.

proletary (prō-le-tā-rī), *a.* and *n.* [= *F. prolétaire* = *Sp. Pg. It. proletario*, < *L. proletarius*, according to a division of the state traditionally ascribed to Servius Tullius, a citizen of the lowest class, without property, and regarded as useful to the state only as the parent of children, < *proles*, offspring, progeny: see *proles*.] *I. a.* Of or belonging to the lowest or poorest class of people; pertaining to those who are dependent on daily or casual employment for support; proletarian.

II. n.; pl. *proletaries* (-riz). A common person; one belonging to the lower orders.

Of 15,000 *proletaries* slain in a battle, scarce fifteen are recorded in history.

Burton, *Anat. of Mel.*, To the Reader, p. 33.

prolicide (prō-li-sid), *n.* [*L. proles*, offspring, + *-cidium*, < *cedere*, kill.] The crime of destroying one's offspring, either before or after birth; feticide or infanticide.

proliferate (prō-lif-ē-rāt), *v.*; pret. and pp. *proliferated*, ppr. *proliferating*. [*L. proles*, offspring, + *ferre* = *E. bear*¹, + *-ale*².] *I. intrans.* 1. To reproduce; grow by multiplication of elementary parts.

All the cells of the body possess a latent capacity which enables them, under various stimuli, to *proliferate* and form new tissue.

Electric Rev. (Eng.), XXIV. 498.

2. Specifically, in *zool.*, to generate or reproduce by the act of proliferation; bear generative persons or zooids, as distinguished from nutritive persons, as is the usual process in the hydroid polyps.

The annual stock is . . . composed of nutritive and *proliferating* persons, the latter again bearing the buds or generative persons. . . . The *proliferating* persons of a colony present various degrees of degeneration.

Gegenbaur, *Comp. Anat.* (trans.), p. 95.

II. trans. To bear; form by reproduction.

The mesoblast is completed ventrally by the downgrowth on each side of the mesoblastic plates. These *proliferate* cells at their edge.

A. E. Shipley, *Proc. Roy. Soc.*, XXXIX. 246.

proliferation (prō-lif-ē-rā-shon), *n.* [*L. proles* + *-ation*.] 1. In *zool.*, the origination and development of generative zooids, as in the formation of medusa-buds (planoblasts or hedrioblasts) by a polyp. See *planoblast*.—2. In *bot.*, same as *proliferation*.—*Entogastric proliferation*. See *entogastric*.

proliferative (prō-lif-ē-rā-tiv), *a.* [*L. proliferare* + *-ive*.] Reproductive; budding or sprouting into new similar forms.

Ulceration may be attended with *proliferative* vegetations which may occlude the air-passages.

Med. News, LIII. 507.

proliferous (prō-lif-ē-rus), *a.* [= *F. prolifère* = *Sp. proliero* = *Pg. proliero*, < *L. proles*, offspring, progeny, + *ferre* = *E. bear*¹.] Bearing offspring. (*a*) In *bot.*, subject to or affected by proliferation. See *proliferation*. 2. Also *prolific*, *proligerous*. (*b*) In *zool.*, proliferating; bearing generative persons; producing medusa-buds, as a polyp.

The *proliferous* Polyps develop generative buds on their walls.

Clarus, *Zoology* (trans.), p. 287.

Proliferous cyst, in *pathol.*, a cyst producing highly organized and even vascular structures.

proliferously (prō-lif-ē-rus-li), *adv.* [*L. proliferous* + *-ly*².] In a proliferous manner.

Fronds originating *proliferously* from other fronds sometimes, when mature, disconnect themselves from their parents.

H. Spencer, *Prin. of Biol.*, § 192.

prolific (prō-lif-ik), *a.* [*F. prolifique* = *Sp. proliico* = *Pg. It. prolifico*, < *ML. *prolificus*, producing offspring, < *L. proles*, offspring, + *facere*, make, produce: see *-fic*. Cf. *prolify*.] 1. Producing young or fruit, especially in an abun-

dance; fruitful; fertile; productive in general: as, a *prolific* female; a *prolific* tree; *prolific* seed.

The branches, sturdy to his utmost wish,

Prolific all, and harbingers of more.

Cowper, *Task*, iii. 581.

That in the capital, and in great manufacturing towns, marriages are less *prolific* than in the open country, we admit, and Mr. Malthus admits.

Macaulay, *Sadler's Ref. Refuted*.

2. Serving to give rise or origin; having the quality of generating: as, a controversy *prolific* of evil consequences; a *prolific* brain.

With warm

Prolific humour softening all her globe.

Milton, *P. L.*, vii. 280.

The extant remains of the literary work of the period are so great that, if we suppose them to bear the ordinary proportion to the lost works of the same age, they would prove it to be enormously *prolific*.

Stubbs, *Medieval and Modern Hist.*, p. 150.

3. Same as *proliferous* (*a*).—*Syn.* 1 and 2. *Productive*, etc. See *fruitful*.

prolificacy (prō-lif-ik-ā-si), *n.* [*L. prolific* + *-acy*.] Fruitfulness; great productiveness.

With plants like carrots, cabbages, and asparagus, which are not valued for their *prolificacy*, selection can have played only a subordinate part.

Darwin, *Var. of Animals and Plants*, xvi. 9.

prolificant (prō-lif-ik-āl), *a.* [*L. prolific* + *-al*.] Same as *prolific*.

Every dispute in religion grew *prolificant*, and in ventilating one question many new ones were started.

Decay of Christian Piety.

prolifically (prō-lif-ik-āl-i), *adv.* [*L. prolific* + *-ly*².] In a prolific manner; fruitfully; with great increase. *Imp. Dict.*

prolificate (prō-lif-ik-āt), *v. t.*; pret. and pp. *prolificated*, ppr. *prolificating*. [*L. ML. prolificatus*, pp. of *prolificare*, beget: see *prolify*.] To impregnate; make prolific. *Sir T. Browne*.

prolification (prō-lif-ik-ā-shon), *n.* [= *OF.* (and *F.*) *prolification* = *Pg. prolificação*, < *ML. prolificatio(n)*, < *prolificare*, produce offspring: see *prolificate*, *prolify*.] 1. The generation of young animals or plants.—2. In *bot.*, the development of an organ or a shoot from an organ which is itself normally ultimate, as a shoot or new flower from the midst of a flower, a frond from a frond, etc. Thus, a rose not unfrequently gives birth to a second from its center, a pear bears a leafy shoot on its summit, and species of *Juncus* and *Scirpus* emit small sprouts from their flower-heads. This is often a case of morphological reversion, the axis whose leaves were altered to make the flower resuming its onward and foliating tendency. Also *proliferation*. Compare *proliferous*.

Abundant nutrition will abbreviate the intervals between the successive *prolifications*; so that eventually, while each frond is yet imperfectly formed, the rudiment of the next will begin to show itself.

H. Spencer, *Prin. of Biol.*, § 194.

prolificness (prō-lif-ik-nes), *n.* [*L. prolific* + *-ness*.] The character or state of being prolific.

If there are classes of creatures that expend very little for self-support in comparison with allied creatures, a relatively extreme *prolificness* may be expected of them.

H. Spencer, *Prin. of Biol.*, § 356.

prolified (prō-li-fid), *a.* [*L. prolify* + *-ed*².] In *bot.*, developed proliferously. [Rare.]

This plant (the water-avena) is frequently found in a *prolified* state, that is, with a branch or a second flower in the center of the original one. *Treasury of Bot.*, p. 530.

eater: see *Merops*.] 1. In *ornith.*, a generic name variously used. (a) Applied to many different tenuirostral or slender-billed birds of the passerine families *Paridae*, *Meliphagidae*, and *Nectariniidae*, and of the picarian family *Upupidae*, as of the genera *Epimachus*, *Cinnyris*, *Irisor*, and others not specially related. (b) Properly restricted to an African genus of oscine passerine birds of the family *Meliphagidae* and subfamily *Meliphaginae*, having a slender curved bill about twice as long as the head and not bristled, unfeathered operculated nostrils, scutellate tarsi, and extremely long tail. The type is the Cape promerops, *P. cafer*, of South Africa; there is a second species, *P. gurneyi*. Also called *Falcinellus*, and *Ptiloturus* or *Ptilurus*.

2. [*l. c.*] A species of the genus *Promerops*, in any sense; a promerope. **promesset**, *v.* A Middle English form of *promise*.

promethea (prō-mē-thē-ā), *n.* [NL.: see *Prometheus*.] In *entom.*, same as *prometheus*.

Promethean (prō-mē-thē-an), *a. and n.* [*l.* *Prometheus*, of or pertaining to Prometheus, < *Prometheus*, < Gr. *Προμηθεΐς*, Prometheus, lit., according to the usual explanation, 'Fore-thinker' (brother to *Ἐπαιθεΐς*, Epimetheus, 'Afterthinker'), cf. *προμύθη*, forethinking, provident, < *πρό*, before, + *μύθεω*, pres. *μυθάζω*, learn, find out (or, as commonly supposed, *μῦθος*, counsel, providence, *μύθεσθαι*, intend, devise, *μύθις*, counsel, all ult. < *√ μα*, think). In another view this is merely popular etymology, the name being compared with Skt. *pramantha*, a stick which by friction produces fire.] 1. *a.* 1. Of, pertaining to, or resembling Prometheus in Greek mythology, who showed men various arts, including the use of fire, and by the will of Zeus was chained to a rock and tortured by a vulture.

These vultures in my breast

Gripe my Promethean heart both night and day.

Quarles, Emblems, iv. 14.

I know not where is that Promethean heat
That can thy light relume. Shak., Othello, v. 2. 12.

Promethean fire
Is quite extinct in them; yea, use of sense
Hath within them no place of residence.

Times Whistle (E. E. T. S.), p. 67.

2. [*l. c.*] In *entom.*, of or pertaining to the prometheus; being or known as the prometheus; as, a *promethean* silkworm.

II. *n.* [*l. c.*] A small glass tube containing sulphuric acid, and surrounded by an inflammable mixture which it ignited on being pressed: formerly used for affording a ready light.

prometheus (prō-mē-thūs), *n.* [NL., < *L. Prometheus*, < Gr. *Προμηθεΐς*, Prometheus; see *Promethean*.] 1. In *entom.*: (a) The popular name and also the technical specific name of a large silk-spinning moth, *Attacus prometheus*, or *Telea* or *Callosamia promethea*. The male moth is of a dark rich smoky or amber brown, the female of a lighter rusty or reddish brown. In both sexes the wings are crossed by a wavy whitish line near the middle, and have a wide clay-colored border. Near the tip of the fore wings there is an eye-like spot within a bluish-white crescent, and in the female there is an angular reddish-white spot, edged with black, near the middle of each wing. The eggs are laid in little clusters of five or six upon twigs in the spring. The larva or worm is delicate bluish-white with a faint pruinose, with four black tubercles on the thorax. It feeds on ash, sassafras, wild cherry, lilac, maple, plum, poplar, birch, and other trees. The cocoon is oblong, dense, gray, and remarkable for the long tough band of silk which suspends it and which is securely wrapped around the supporting twig. Also *promethea*, *promethia*.

Promethean Silkworm (*Attacus prometheus*).

a, larva of third stage, natural size; b, head of larva of fourth stage, enlarged; c, side view of segment of larva of fourth stage, enlarged; d, full-grown larva, natural size.

prominent (prom'i-nent), *a. and n.* [*OF. prominent* = Sp. Pg. It. *prominente*, < *L. prominen* (t)-s, ppr. of *prominere*, project, jut out, < *pro*, forth, + **minere*, project, jut. Cf. *eminent*, *imminent*.] 1. *a.* 1. Standing out beyond the line or surface of something; jutting; protuberant; in high relief: as, a prominent figure on a vase.

It compresses hard
The prominent and most unsightly bones,
And blinds the shoulders flat.

Cowper, Task, ii. 588.

2. In *entom.*: (a) Raised above the general surface: as, prominent eyes. (b) Projecting horizontally: as, prominent angles of the prothorax. The head of an insect is said to be prominent when its upper surface is horizontal and continuous with that of the thorax.

3. Standing out so as to be easily seen; most visible or striking to the eye; conspicuous: as, the figure of a man is prominent in the picture.

The side of things which is most prominent when they are looked at from European soil may not always be the most prominent when they are looked at from American soil.

E. A. Freeman, Amer. Lects., p. 8.

4. Standing out from among the multitude; distinguished above others: as, a prominent citizen.—*Syn.* 1. Projecting, bulging.—4. Eminent, leading.

II. *n.* 1. A promontory.

(The winds asleep) he freely pours, till highest Prominents,
Hill tops, low meadows, and the fields, that crowne with
most contents
The toiles of men, sea-ports, and shores, are hid.

Chapman, Illad, xii.

2. One of certain bombycid moths; a tooth-back or pebble. The American red-humped prominent is *Notodonta coccinea*; the European coxcomb prominent is *N. camelina*. See cut under *Notodonta*.

prominently (prom'i-nent-li), *adv.* In a prominent manner; so as to stand out beyond the other parts; eminently; in a striking manner; conspicuously.

promiscuity (prō-mis-kū-i-ti), *n.* [= *F. promiscuité* = Pg. *promiscuidade* = It. *promiscuità*, < *L. promiscuus*, mixed, not separated: see *promiscuous*.] 1. Promiscuousness; confusion; indiscriminate mixture.

The God-abstractness of the modern polytheism are nearly in as sad a state of perplexity and *promiscuity* as were the more substantial deities of the Greeks.

Poe, Marginalia, lxxv. (Davies.)

Lady Charlotte . . . was fond of flooding the domestic hearth with all the people possessed of any sort of a name. . . . Mr. Wynnstay loathed such *promiscuity*.

Mrs. Humphry Ward, Robert Elsmere, xvii.

2. Promiscuous sexual union, as among some races of people.

Promiscuity may be called indefinite polyandry joined with indefinite polygyny; and one mode of advance is by a diminution of the indefiniteness.

H. Spencer, Prin. of Sociol., § 297.

promiscuous (prō-mis-kū-us), *a.* [= *OF. promiscue* = Sp. Pg. It. *promiscuo*, < *L. promiscuus*, mixed, not separated, < *pro*, forth, + *miscere*, mix: see *mix*.] 1. Consisting of parts or individuals grouped together without order; mingled indiscriminately; confused.

Distinction in *promiscuous* Noise is drown'd.

Congreve, On the Taking of Namur.

In rushed at once a rude *promiscuous* crowd.

Dryden, Pal. and Arc., iii. 551.

He went on contentedly enough, picking up a *promiscuous* education chiefly from things that were not intended for education at all. George Eliot, Mill on the Floss, i. 4.

2. Forming part of a mingled or confused crowd or mass.

This, like the public inn, provides a treat

Where each *promiscuous* guest sits down to eat.

Crabbe, The Newspaper.

3. Distributed or applied without order or discrimination; common; indiscriminate; not restricted to one individual: as, *promiscuous* sexual intercourse.

Heaps on heaps expire;

Nations with nations mixed confusedly die,
And lost in one *promiscuous* carnage lie.

Addison, The Campaign.

4. Casual; accidental. [Prov. Eng.]

I walked in gentlemen, just to say good mornin', and went, in a *promiscuous* manner, up stairs, and into the back room.

Dickens, Pickwick Papers, xxxiv.

= *Syn.* 1. *Promiscuous*, *Miscellaneous*. *Promiscuous* emphasizes the complete lack of arrangement; *miscellaneous* the throwing together of different kinds. Hence we speak of *promiscuous*, but not of *miscellaneous*, confusion; of *miscellaneous*, not *promiscuous*, articles in a magazine. A work-bag contains a *miscellaneous* collection of things, which should never be allowed to become *promiscuous*.

It is an argument of a loose and ungoverned mind to be affected with the *promiscuous* approbation of the generality of mankind.

Steele, Spectator, No. 188.

What the people but a herd confused,

A *miscellaneous* rabble? Milton, P. R., iii. 50.

promiscuously (prō-mis-kū-us-li), *adv.* In a promiscuous manner; in a crowd or mass without order; with confused mixture; indiscriminately; without distinction of kinds or individuals.

Like beasts and birds *promiscuously* they join. Pope.

promiscuousness (prō-mis-kū-us-nes), *n.* The state or character of being promiscuous, or of being mixed without selection, order, or distinction.

promise (prom'is), *n.* [Early mod. E. also *promys*, *promes*; < ME. *promys*, *promesse*, < OF. *promesse*, F. *promesse* = Sp. *promesa* = Pg. It. *promessa*, < ML. *promissa*, f., < *L. promissum*, neut., a promise, fem. and neut. of *L. promissus*, pp. of *promittere*, send or put forth, let go forward, say beforehand, promise: see *promit*.] 1. A declaration in reference to the future, whether written or verbal, made by one person to another, purporting to assure the latter that the former will do or forbear from a specified act, or cause it to be done or refrained from; a declaration intended to give to the person to whom it is made assurance of his right to expect from the promisor the thing promised; especially, a declaration that something shall be done or given for the benefit of the promisee or another.

In law, a promise is not binding in such sense as to be directly enforceable through the courts, unless made upon a consideration good or valuable; in which case the promise and the consideration together form a contract or agreement (if under seal, termed a *covenant*) which binds the promisor, and it may be his legal representative, and gives the promisee, and in some cases a third person for whose benefit the promise was made, the right to enforce it by suit, or to recover damages for its breach.

Also, no Strangers cometh before him but that he maketh him sum *Promys* and Graunt, of that the Strangers asketh reasonably. *Manderile, Travels*, p. 40.

O Rome, I make thee *promise*;
If the redress will follow, thou receivest
Thy full petition at the hand of Brutus!
Shak., J. C., II. 1. 56.

Statesman, yet friend to Truth! of soul sincere, . . .
Who broke no *promise*, served no private end.
Pope, To Addison, I. 69.

2. Ground or basis of expectation; earnest; pledge.

There buds the *promise* of celestial worth!

Young, The Last Day, III.

Thy (Friendship's) blossoms deck our unsuspecting years;
The *promise* of delicious fruit appears.

Couper, Valediction.

3. That which affords a ground or basis for hope or for expectation of future excellence or distinction: as, a youth of great *promise*.

You have an unspeakable comfort of your young prince
Mamillius; it is a gentleman of the greatest *promise* that
ever came into my note. *Shak., W. T., I. 1. 30.*

O, I see the crescent *promise* of my spirit hath not set.
Tennyson, Locksley Hall.

4. That which is promised; fulfilment or grant of what is promised.

And . . . commanded them that they should not depart
from Jerusalem, but wait for the *promise* of the Father.

Act 1. 4.

Glou. Look, when I am king, claim thou of me
The earldom of Hereford.

Buck. I'll claim that *promise* at your grace's hands.
Shak., Rich. III., III. 1. 197.

Absolute promise, a promise which pledges fulfilment at all events; a promise unqualified by a condition.—**Breach of promise**. See *breach*.—**Conditional promise**, a promise the obligation to fulfil which depends on the performance of a condition, or on a contingent or yet unknown event.—**Express promise**, a promise expressed orally or in writing.—**Implied promise**, a promise which the law implies from conduct, as when one employs a man to perform a day's labor, without any express promise to pay him. The law then presumes a promise on the employer's part to give the man a reasonable reward, and it will enforce such implied promise.—**Land of Promise**, Canaan: so called because promised by God to Abraham in Haran; figuratively, heaven. Also called *The Promised Land*.

By faith he [Abraham] sojourned in the *land of promise*, . . . dwelling in tabernacles with Isaac and Jacob.

Heb. xi. 9.

Mesmeric promise, mutual promises, new promise. See the adjectives.—**Parole promise**. (a) A promise made orally. (b) A promise made without seal, either orally or in writing, as distinguished from one made under seal, which is technically called a *covenant*.—**Promise and offer**. In *Scots law*, an offer is a proposal made to give or to do something, either gratuitously or on an onerous consideration; a *promise* is an offer of such a nature that the promisor takes the other party's assent for granted. An offer is not binding till it is accepted; a *promise* is binding as soon as it is known by the party it is made to.—**Special promise**, an actual promise as distinguished from an implied promise. The *Promise*, according to the account given in the Bible, the assurance given by God to Abraham that his descendants should become the chosen people, and that in him all the families of the earth should be blessed.

"So help me the *promise*, fair sirs," said Isaac, . . .
"as no such sounds ever crossed my lips!"

Scott, Ivanhoe, xxxii.

To give a lick and a *promise* of better. See *lick*.—**Syn. 1. Assurance, Promise, Engagement, Pledge, Covenant**. These words are arranged in the order of strength; it would be dishonorable to fail to keep what even the weakest of them expresses. The formality and solemnity of each are proportioned to its strength. A *covenant* is a mutual obligation; the others are not. Each of them may be either spoken or written, but the written is generally more formal, and may have greater legal obligation.

promise (prom'is), *v.*; pret. and pp. *promised*, ppr. *promising*. [*ME. promysen, promysen*; *< promise, n.*] **I. trans.** 1. To make a promise of; engage to do, give, grant, or procure for some one; especially, to engage that some benefit shall be conferred.

you should keep God's commandments.

Book of Common Prayer, Catechism.

2. To afford reason to expect: as, the year
promises a good harvest; the clouds *promise*
rain.

Surely this seemeth a plott of great reason and small
difficulty, which *promiseth* hope of a shorte end.

Spenser, State of Ireland.

Seeing the old castle of the state,
That *promis'd* once more firmness, so assail'd.

Couper, Task, v. 526.

3. To assure. [*Colloq.*]

And what that euer be withynne this place,
That wolle for the entrete in eny wise,
He shall not spede, I yow *promyse*.

Generydes (E. E. T. S.), I. 1603.

I do not like thy look, I *promise* thee.

Shak., Much Ado, IV. 2. 47.

I *promise* you I don't think near so ill of you as I did.

Sheridan, School for Scandal, IV. 3.

4. To make as promisor; be the promisor in.

They whisper:—sever them quickly, I say, officers! why do you let them prompt one another?

Beau. and Fl., Coxcomb, v. 2.

If she should flag in her part, I will not fail to prompt her.

Congreve, Way of the World, iii. 18.

3. To dictate; suggest to the mind; inspire.

And whispering angels prompt her golden dreams.

Pope, Eloisa to Abelard, l. 216.

By these Steps I strive to climb up to Heaven, and my Soul prompts me I shall go thither.

Howell, Letters, i. vi. 32.

4*t.* To remind; put (one) in mind.

Soft and delicate desires,
All prompting me how fair young Hero is,
Saying I liked her ere I went to wars.

Shak., Much Ado, i. 1. 806.

=*Syn.* 1. *Actuate, Impel, Induce, etc.* (see *actuate*), incline, dispose, suggest to. See list under *impel*.

prompt (prompt), *n.* [*< prompt, v.*] 1. In com., a limit of time given for payment for merchandise purchased, the limit being stated on a note of reminder called a *prompt-note*.

He does pay in money—that is, he gives his acceptance at two or three months or whatever *prompt* is customary in the trade, and when the bill falls due he pays it.

Nineteenth Century, XIX, 892.

2. Information suggested or prompted.

Few [children in schools] will not give, and not many will not take *prompts*, or peep in their books.

G. S. Hall, Amer. Jour. Psychol., III, 68.

prompt-book (prompt'būk), *n.* A copy of a play prepared for the prompter's use, and containing the text as cut and altered for representation, with all the stage business and other directions required for performance.

prompt-center (prompt'sen'tēr), *n.* See *stage*.

prompter (prompt'ēr), *n.* [*< ME. promptiere, promptiare, promptuere; < prompt + -er.*] 1. One who or that which prompts, or admonishes or incites to action.

We understand our duty without a teacher, and acquit ourselves as we ought to do without a *prompter*.

Sir R. L'Estrange.

We find in ourselves some *prompter* called a desire; and, the more essential the action, the more powerful is the impulse to its performance.

H. Spencer, Social Statics, p. 30.

Specifically—2. A person stationed behind the scenes or in a covered box at the front of the stage in a theater, for the purpose of assisting the actors when they are at a loss by repeating to them the first words of a sentence; also, any person who aids a public speaker, etc., by suggesting words he may be at a loss for.

No without-book prologue, faintly spoke
After the *prompter*, for our entrance.

Shak., R. and J., i. 4. 8.

The play is done; the curtain drops,
Slow falling to the *prompter's* bell.

Thackeray, The End of the Play.

prompting (prompt'ing), *n.* [*Verbal n. of prompt, v.*] 1. The act of inciting, instigating, suggesting, or reminding.—2. An incitement or impulse, especially from inner desires or motives: as, the promptings of affection.

Many sane persons have experienced horrid promptings when standing looking over a precipice.

Pop. Sci. Mo., XXXVI, 83.

The later the date the more likely that he [the architect] built his arcade according to the promptings of his own genius.

E. A. Freeman, Venice, p. 254.

promptitude (prompt'it-üd), *n.* [*< F. promptitude = Sp. prontitud = It. prontitudine, < LL. prontitudo, promptitudo, < L. promptus, ready, prompt: see prompt.*] 1. Promptness; readiness; quickness of decision or action when occasion demands; cheerful alacrity.

Much will depend on the promptitude with which these means can be brought into activity.

Jefferson, Works, VIII, 69.

2. Prompting.

Those who were contented to live without reproach, and had no promptitude in their minds towards glory.

Steele, Spectator, No. 497.

promptly (prompt'li), *adv.* [*< prompt + -ly.*] In a prompt manner; readily; quickly; expeditiously; cheerfully.

promptness (prompt'nes), *n.* [*< prompt + -ness.*] The state or quality of being prompt; readiness; quickness of decision or action; especially, quickness of action in executing a decision; cheerful willingness; alacrity.

Cassius alone, of all the conspirators, acted with promptness and energy in providing for the war which he foresaw the death of Caesar would kindle.

Ames, Works, II, 271.

A good judgment combines promptness with deliberation.

J. Sully, Outlines of Psychol., p. 409.

They seemed desirous to prove their title to them by their thorough discipline and by their promptness to execute the most dangerous and difficult services. *Prescott.*

prompt-note (prompt'not), *n.* In *com.*, a note of reminder of the day of payment and sum due, etc., given to a purchaser at a sale of merchandise. See *prompt*, *n.*

prompt-side (prompt'sid), *n.* See *stage*.

promptuary (prompt'jū-ri), *n.*; pl. *promptuaries* (-riz). [= *F. promptuaire* = *Sp. prontuario* = *Pg. promptuario*, < *L. L. promptuarium*, *promptuarium*, a repository, storehouse, store-room, hence in *ML.* used (like *E. magazine*) for a repository of information, handbook (in this sense also irreg. *promptorium*, *promptorius*), as in *Promptuarium Parvulorum Clericorum* or *Promptorium Parvulorum*, 'the little scholars' handbook,' or *Promptorius Puerorum*, 'the boys' handbook,' the name of an English-Latin dictionary of the 15th century; < *L. promptus*, *promptus*, pp. of *promere*, produce, bring out: see *prompt*.] That from which supplies are drawn; a storehouse; a magazine; a repository.

History, that great treasury of time and *promptuary* of heroic actions. *Hosell*, *Forreline Travell*, p. 22.

Bid Naddo think, at Mantua, he had but

To look into his *promptuary*, put

Finger on a set thought in a set speech.

Browning, *Sordello*.

prompture (prompt'tūr), *n.* [*< prompt* + *-ure*.] Suggestion; incitement; instigation.

I'll to my brother;

Though he hath fall'n by *prompture* of the blood.

Shak., *M. for M.*, II. 4. 178.

promulgate (prō-mul'gāt), *v. t.*; pret. and pp. *promulgated*, ppr. *promulgating*. [*< L. promulgatus*, pp. of *promulgare*, make known, publish, < *pro*, forth, + *mulgare*, of uncertain origin. Cf. *promulge*.] To make known by open declaration, as laws, decrees, or tidings; publish; announce; proclaim.

'Tis yet to know—

Which, when I know that boasting is an honour,

I shall *promulgate*—I fetch my life and being

From men of royal sieges. *Shak.*, *Othello*, I. 2. 21.

The Statute of Uses was delayed until 1536, and the Statute of Wills until 1540, but both statutes were promulgated in 1532.

Stubbs, *Medieval and Modern Hist.*, p. 255.

=*Syn. Declare, Announce, Proclaim*, etc. See *announce*. **promulgation** (prō-mul-gā'shon), *n.* [= *F. promulgation* = *Sp. promulgación* = *Pg. promulgação* = *It. promulgazione*, < *L. promulgatio* (n-), a proclamation, a publication, < *promulgare*, pp. *promulgatus*, publish, make known: see *promulgate*.] 1. The act of promulgating; publication; open declaration.

The stream and current of this rule hath gone as far, it hath continued as long, as the very *promulgation* of the gospel. *Hooker*, *Eccles. Polity*. (*Latham*.)

The doctrine of evolution at the present time rests upon exactly as secure a foundation as the Copernican theory of the motions of the heavenly bodies did at the time of its *promulgation*. *Huxley*, *Amer. Addresses*, p. 90.

2. In *law*: (a) The first official publication of a law which has been passed, or of an ordinance or a proclamation. (b) More strictly, the final order of the sovereign power which puts an enacted law into execution. *Clark*.

promulgator (prō-mul-gā-tor), *n.* [= *F. promulgateur* = *Sp. Pg. promulgador* = *It. promulgatore*, < *L. promulgator*, one who publishes or proclaims, < *promulgare*, pp. *promulgatus*, publish, make known: see *promulgate*.] One who promulgates or publishes; one who makes known or teaches publicly.

An old legacy to the *promulgators* of the law of liberty.

Warburton, *Sermons*, XI. (*Latham*.)

promulge (prō-mulj'), *v. t.*; pret. and pp. *promulged*, ppr. *promulging*. [= *F. promulguer* = *Sp. Pg. promulgar* = *It. promulgare*, < *L. promulgare*, publish, make known: see *promulgate*.] To promulgate; publish; teach publicly.

Extraordinary doctrines these for the age in which they were *promulged*. *Prescott*. (*Webster*.)

Considering his Highness's wisdom, . . . they would henceforth make, *promulge*, or execute no such constitutions without his consent.

R. W. Dixon, *Hist. Church of Eng.*, II.

promulger (prō-mul'jēr), *n.* Same as *promulgator*.

Its [the gospel's] *promulgators* delivered it not out by parcels, as is the way of cunning and designing men, but offered the whole of it to be altogether examined and compared. *Bp. Atterbury*, *Sermons*, I. III.

promuscidae (prō-mus'i-dāt), *a.* [*< promuscis* (muscid-) + *-ate*.] In *entom.*: (a) Having the form of a promuscis: as, a *promuscidae* mouth. (b) Furnished with a promuscis: as, a *promuscidae* insect.

promuscis (prō-mus'is), *n.*; pl. *promuscides* (-i-dēz). [*NL.*, < *L. promuscis*, a corrupt form for *proboscis*, proboscis: see *proboscis*.] In *entom.*, a proboscis; a beak or rostrum of various insects: originally applied by Illiger (1806) to the mouth-parts of bees; applied by Kirby and Spence (1818) and subsequent authors to the oral instrument of hemipterous insects, in which the ordinary trophi are replaced by a sheath containing four hair-like lancets or scapella.

Punctures the cuticle with a proboscis (a very short three-jointed *promuscis*) springing as it were from the breast, but capable of being greatly protracted.

E. P. Wright, *Anim. Life*, p. 472.

promycele (prō-mi-sē'l), *n.* [*< NL. promycelium*.] In *bot.*, same as *promycelium*.

promycelial (prō-mi-sē'li-al), *a.* [*< promycelium* + *-al*.] In *bot.*, of or pertaining to the *promycelium*.

The *promycelial* tube is divided by transverse walls into a series of two or more short cells.

De Bary, *Fungi* (trans.), p. 177.

promycelium (prō-mi-sē'li-um), *n.* [*NL.*, < *L. pro*, before, + *NL. mycelium*, q. v.] In *bot.*, a short and short-lived filamentous product of the germination of a spore, which bears sporidia and then dies. Also *promycele*.

pron. An abbreviation of (a) *pronoun*; (b) *pronounced*; (c) *pronunciation*.

pronaos (prō-nā'os), *n.* [*< Gr. πρόναος*, also neut. *prónaos*, a porch before a temple, prop. adj., *prónaos*, *prónaos*, Attic *prónaos*, before a temple, < *πρό*, before, + *ναός*, a temple, a cella: see *naos*.] In *arch.*: (a) An open vestibule or

Pronaos.—Heroum adjoining the baths at Assos in the Troad, as discovered and restored by the Archaeological Institute of America, 1881-2.

portico in front of the naos or cella of a temple. See *naos*, 2.

The temple . . . consists of a *pronaos* or vestibulum . . . and of the naos proper. *Schliemann*, *Troja*, p. 79.

(b) Same as *narthex*, 1. [This use is not to be recommended.]

pronaos (prō-nā'os), *v. t.*; pret. and pp. *pronaos*, ppr. *pronaosing*. [*< LL. pronatus*, pp. of *pronaare*, bend forward, bow, < *L. pronus*, bent: see *prone*.] To render prone; specifically, to rotate (the hand) so that its palmar surface faces in the same direction as the posterior surface of the ulna.

pronation (prō-nā'shon), *n.* [= *F. pronation* = *Sp. pronación* = *Pg. pronação* = *It. pronazione*, < *LL. pronare*, pp. *pronatus*, bend forward, bow: see *pronaos*.] The act or result of pronating; the prone position of the fore limb, in which the bones of the forearm are more or less crossed, and the palm of the hand is turned downward: the opposite of *supination*. Pronation and its reverse movement, supination, are free and perfect in man and in some other mammals which use their fore paws as hands. In pronation the bones of the forearm are crossed: in supination they lie parallel to each other. The fore limbs of most quadrupeds are permanently fixed in the state of pronation, with the palmar surface or sole of the fore foot downward or backward, and the knuckles or convexities of the joints of the digits upward or forward; supination is absent, and the ulna is often reduced to a mere appendage of the radius, ankylosed at the upper end of the latter.

pronator (prō-nā'tor), *n.*; pl. *pronatores*, *pronators* (prō-nā-tō'rēz, prō-nā'tor-z). [= *F. pronateur* = *Sp. Pg. pronador* = *It. pronatore*, < *LL. pronare*, pp. *pronatus*, bend forward, bow: see *pronation*.] A muscle of the forearm whose action pronates the hand or assists in pronation: opposed to *supinator*.—**Pronator quadratus**, a flat muscle on the lower part of the forearm in front, passing from the ulna to the radius. Also called *cubitoradialis*, *quadratus pronator*, and more fully *pronator radii quad-*

ratus.—**Pronator radii teres**, a pronator and flexor of the forearm. It arises chiefly from the inner condyle of the humerus, and passes across obliquely in front, to be inserted in the outer side of the radius near its middle. Also called *pronator teres*, and *round or terete pronator*. See out under *muscle*.

prone (prōn), *a.* [*< F. prone* = *Sp. Pg. It. prono*, < *L. pronus*, bent, leaning forward, < *pro*, forward: see *pro*.] 1. Bending forward with the face downward; inclined; lying flat; not erect.

A creature who, not prone

And brute as other creatures, but endowed

With sanctity of reason, might erect

His stature. *Milton*, *P. L.*, vii. 508.

Ancient tow'rs,

And roofs embattled high, . . .

Fall prone. *Cowper*, *Task*, II. 125.

2. Lying with the face or front downward.

The lamb prone,

The serpent towering and triumphant.

Browning, *King and Book*, II. 56.

Specifically, in *anat.*: (a) Lying face downward; stretched at full length on the belly. (b) Lying with the palm downward; pronated, as the hand. In both senses, the opposite of *supine*.

3. Moving or sloping downward; descending; inclined.

The sun,

Declined, was hastening now with *prone* career

To the ocean lares. *Milton*, *P. L.*, iv. 353.

Prone down the rock the whitening sheet descends.

Burns, *Written by the Fall of Fyera*.

Since the floods demand

For their descent a *prone* and sinking land,

Does not this due declivity declare

A wise director's providential care?

Sir R. Blackmore.

Just where the *prone* edge of the wood began

To feather toward the hollow.

Tennyson, *Enoch Arden*.

4. Inclined by disposition or natural tendency; propense; disposed: usually in an ill sense.

He is . . . as *prone* to mischief

As able to perform 't. *Shak.*, *Hen. VIII.*, I. 1. 160.

Anna's mighty Mind,

To Mercy and soft Pity *prone*.

Congreve, *Pindaric Odes*, I.

Prone mouth, a mouth which lies entirely on the lower surface of the head, owing to the fact that the head itself forms a right angle with the thorax, as in the grasshoppers.—**Prone surface**, the lower surface.—*Syn.* 1 and 2. See *prostrate*.

proneily (prōn'li), *adv.* In a prone manner or position; so as to bend downward.

proneness (prōn'nes), *n.* The state of being prone. (a) The state of bending downward: as, the *proneness* of beasts that look downward: opposed to the *erectness* of man. (b) The state of lying with the face or front downward: contrary to *supineness*. (c) Descent; declivity: as, the *proneness* of a hill. (d) Inclination of mind, heart, or temper; propensity; disposition: as, *proneness* to self-gratification or to self-justification.—*Syn.* (d) *Tendency, Disposition*, etc. See *bent*.

pronephron (prō-nēf'ron), *n.*; pl. *pronephra* (-rā). [*NL.*, < *L. pro*, before, + *Gr. νεφρός*, a kidney.] A part of the primitive kidney of the lower vertebrates, which appears at the most anterior end of the archinephric duct before the rest of the kidney and at some distance from it. It consists of a number of coiled tubuli, beginning with ciliated infundibula or nephrostomata: its duct is the Müllerian duct. See *mesonephron*.

pronephros (prō-nēf'ros), *n.* Same as *pronephron*.

prong¹ (prōng), *n.* [*ME.*, also *pronge*, *prange*, a pang: see *pang*], which is an altered form of the same word.] A pang. *Prompt. Parv.*, pp. 415, 493.

prong² (prōng), *n.* [Early mod. *E.* also *prongue*: cf. *prog*, thrust, *proke*, thrust.] 1. A sharp point or a pointed instrument; especially, one of several points which together make up a larger object: as, the *prong* of a fork; the *prong* of a deer's antler.

I dine with forks that have but two *prongs*.

Swift, to Gay, March 19, 1729

The *prongs* of rock rose spectral on every side.

N. Y. Semi-weekly Tribune, Sept. 28, 1878.

2. A hay-fork. *Halliwel*. [*Prov. Eng.*]

Would not sell me,

But, being his domestic friend, expell me

With forks and *prongs*, as one insend with ire.

Heywood, *Dialogues* (Works, ed. Pearson, 1874, VI. 164).

3. A fork or branch of a stream or inlet. [*Southern U. S.*].—4. A prawn (?).

They speed their way through the liquid waste;

Some are rapidly borne along

On the mailed shrimp or the prickly *prong*.

J. R. Drake, *Culprit Fay*, p. 29.

prong² (prōng), *v. t.* [*< prong²*, *n.*] To stab with or as with a fork. [*Humorous*.]

Dear brethren, let us tremble before those august portals. I fancy them guarded by grooms of the chamber with flaming silver forks with which they *prong* all those who have not the right of the entrée.

Thackeray, *Vanity Fair*, II.

prongbuck (prông'buk), *n.* The American antelope or pronghorn, *Antilocapra americana*.

prong-chuck (prông'chuk), *n.* A burnishing-chuck with a steel prong. *E. H. Knight.*

prongdoe (prông'dô), *n.* The female of the prongbuck.

prong-hoe (prông'hô), *n.* A hoe with prongs to break the earth.

pronghorn (prông'hörn), *a.* and *n.* *I. a.* Having horns with a prong or snag, as the prongbuck: as, the *pronghorn* antelope.

II. n. The prongbuck or cabrit. This remarkable animal is an isolated American type, like the saiga of the Old World; it has no near relatives living, and is supposed to be in the line of descent from some stock more or less like the fossil *Stiatherium* of India. It is not an antelope in any proper sense, though universally so called in the regions it inhabits—the first literary use of the name dating about 1812. The pronghorn was first scientifically described from material furnished by Lewis and Clarke to George Ord, who called it *Antilocapra americana* in 1815, but very soon instituted the genus *Antilocapra* (which see, and *Antilocapridae*, for technical characters). The male stands about 3 feet high at the croup and withers; the limbs are very slender; the general form is that of a deer, but rather stouter (contrary to a general impression); the eyes are extremely large and full, and placed directly under the base of the horns; these in the male are from 6 or 8 inches to a foot in length, curved variously, but always with the characteristic prong or snag—in the female mere hairy cones tipped with a horny thimble an inch long. The horns are shed annually, late in the fall or early in winter. The pelage is close, without any flowing tufts, but coarse and brittle, and nearly worthless; the hide makes a valuable buckskin when dressed. The venison is excellent, resembling mutton rather than deer-meat. There is an extensive set of cutaneous sebaceous glands, eleven in number, which during the rut exhale a strong hircine odor. The prongdoe regularly drops twins, usually late in spring or early in summer, and the kids are not spotted (as the young of *Cervidae* usually are), but resemble their parents. The bucks and does are alike of a tawny or yellowish-brown color, with a large white disk on the buttocks, a white crescent and triangle on the fore part of the neck, and the under parts and inner sides of the limbs white; the forehead, muzzle, a spot on the neck over the gland, and the horns and hoofs are mostly black or blackish. During most of the year the animals go in bands, sometimes numbering thousands, but oftener of much less extent. They range over all the region of the great plains, from British America far into Mexico, excepting where they have of late years been driven off by the settlement of the country. Unlike the bison, the pronghorn does not appear to have ever ranged east of the Mississippi. It is noted for its fleetness, and for a singular mixture of timidity and curiosity, which renders it susceptible of being "flagged," or decoyed within rifle-range by the exhibition of any unusual object, as a handkerchief tied to a pole. The gait is buoyant and easy, and when bounding at full speed the animal is probably the fleetest of any American game. But it lacks bottom, and its astonishing bursts of speed cannot be long sustained. Almost any pack of hounds can overtake it, if the game has not too much advantage at the start. The pronghorn is subject to an epidemic disease of unknown character, which in some years has destroyed many thousands. This fact, together with the incessant persecution it suffers, has very appreciably diminished its numbers as well as contracted its range of late years, though it appears to be still very far from the point of extermination.

pronty (prông'ni-ti), *n.* [= *It. prontà* (cf. *Sp. prontidad* = *Pg. prouideade*), < *L. pronita* (-*s*), inclination, < *pronus*, bent, inclined: see *prone*.] Same as *prone*.

Saint Paul in his Pistle to y^e Rom. speketh of the *pronty* and motions in the fleshe remaining as the reliques of original sinne. *Sir T. More, Works*, p. 550.

pronominal (prông-nom'i-nal), *a.* [= *F. Sp. pronominal* = *It. pronominale*, < *L. pronominalis*, pertaining to a pronoun, < *pronomēn*, a pronoun: see *pronoun*.] Belonging to or of the nature of a pronoun: as, a *pronominal* root.

In Siam, when asking the king's commands, the *pronominal* form is, as much as possible, evaded. *H. Spencer, Prin. of Sociol.*, § 897.

pronominally (prông-nom'i-nal-i), *adv.* With the effect or force of a pronoun; by means of a pronoun.

"What was that notion of his"—they usually spoke of the minister *pronominally*. *Hocells, Annie Kilburn*, xxx.

pronotal (prông-nô'tal), *a.* [*< pronomum* + *-al*.] Situated on the pronotum; of or pertaining to the pronotum.

pronoratory, *n.* Same as *prothonotary*.

And I knew you a *Pronoratory* boy,
That wrote indentures at the tounne house doore.
Daniel, Queen's Arcadia, iii. 1.

pronotum (prông-nô'tum), *n.*; pl. *pronomia* (-tâ). [*NL.*, < *Gr. πρό*, before, + *νῶτος*, back: see *notum*.] The anterior one of the three divisions of the notum of an insect, preceding the mesonotum; the dorsal or tergal section of the prothorax; the upper part of the first thoracic segment or prothoracic tergum. It is typically divided into four sclerites (the prescutum, scutum, scutellum, and postscutellum), which sclerites are, however, usually more or less consolidated and therefore indistinguishable. See cut under *Insecta*.—*Cruciate*, emarginate, obovate, pulvinate, etc., *pronotum*. See the adjectives.—*Produced pronotum*. See *produced*.

pronoun (prông'noun), *n.* [Not found in ME.; appar. altered (to suit the earlier noun) < *F. pronom* = *Sp. pronombre* = *Pg. pronome* = *It. pronome*, < *L. pronomēn*, a word standing in place of a noun, < *pro*, for, + *nomen*, a noun: see *noun*.] In *gram.*, a word used instead of a noun to avoid the repetition of it; a demonstrative word, pointing to a person or thing, but not describing it otherwise than by designating position, direction, relation to the speaker, or the like; one of a small body of words, in Indo-European and other families of language, coming from a few roots, different from those from which come in general verbs and nouns, and having the office of designating rather than describing: they are believed to have borne an important part in the development of inflective structure in language. They are divided into various classes: *personal* (doubleless originally demonstrative), as *I, thou, he*, etc.; *possessive*, which are the adjective forms of the personal, as *my, thy, his*, etc.; *demonstrative*, as *this, that*, etc.; *interrogative*, as *who, what*, etc.; *relative* (which are always either demonstratives or interrogatives with changed office, implying an antecedent to which they refer or relate), as *that, which, who*, etc.; and *indefinite*, which are of various meaning, and shade off into ordinary nouns, as *each, either, some, any, such*, etc. Abbreviated *pr.*, *pron.*

pronounced (prông'nounst'), *p. a.* [*Pp. of pronounce*, *v.*] Strongly marked or defined; decided.

Our friend's views became every day more pronounced. *Thackeray.*

The outline of the tower is not unlike that of the Parasurameswara temple, . . . but the central belt is more pronounced. *J. Ferguson, Hist. Indian Arch.*, p. 438.

Wolsey was too great a man, and More too good a man, to be tools of Henry, especially after the inclination towards tyrannic caprice became more pronounced.

Stubbs, Medieval and Modern Hist., p. 248.

pronouncedly (prông'noun'sed-li), *adv.* In a pronounced manner; markedly.

"Fatal Water," the most pronouncedly pathetic of the tales. *The Academy*, Feb. 8, 1890, p. 98.

pronouncement (prông'nouns'ment), *n.* [*< F. pronouncement* = *Fr. prononciamen* = *Sp. pronunciamiento* = *It. pronunciamiento*; < *ML. pronunciamētum*, < *L. pronuntiare*, pronounce: see *pronounce*.] The act of pronouncing; a proclamation; a formal announcement.

The law is apprehended by ocular inspection, audible pronouncement, and other like natural ways of cognition. *Bushnell, Forgiveness and Law*, p. 114.

pronouncer (prông'noun'ser), *n.* One who pronounces, or utters or declares.

pronouncing (prông'noun'sing), *p. a.* [*Ppr. of pronounce*, *v.*] Pertaining to, indicating, or teaching pronunciation: as, a *pronouncing* dictionary.

pronubial (prông-nū'bi-al), *a.* [*< L. pronubus*, pertaining to marriage, < *pro*, for, + *nubere*, marry, wed: see *nubile*.] Presiding over marriage. *Congreve*. [*Bare*.]

pronuclear (prông-nū'klē-är), *a.* [*< pronucle-us* + *-är*.] Pertaining to a pronucleus, or having its character.

pronucleate (prông-nū'klē-ät), *a.* [*< pronucle-us* + *-ate*.] Having a pronucleus or pronuclei.

pronucleus (prông-nū'klē-us), *n.*; pl. *pronuclei* (-i). [*< L. pro*, before, + *nucleus*, nucleus.] 1. A primitive nucleus; the nucleus of an ovum or of a spermatozoon before these have united to form the definitive nucleus of an impregnated ovum. That of the ovum is the female, that of the spermatozoon the male pronucleus. The formation of the female pronucleus commonly occurs in a ripe ovum after the extrusion of the particles of yolk known as the polar globules of Robin, and it is that part of the original germinal vesicle which remains behind after such extrusion, receding from the surface of the ovum and assuming a spherical form. The male pronucleus is simply the head of a spermatozoon buried in the yolk, and about to blend its substance with that of the female pronucleus. See *femininucleus*, *masculinucleus*.

2. In bot., the nucleus of a conjugating gamete, which on coalescing with another pronucleus forms the germ-nucleus. *Goebel*.

pronunciableness (prông-nun'gi-ä-bl), *a.* [= *It. pronunziabile*, < *L. pronuntiare*, *pronunciare*, pronounce (see *pronounce*), + *-able*.] Pronounceable.

Vowels *pronunciableness* by the intertexture of a consonant. *Jer. Taylor, Works* (ed. 1885), I. 54.

pronuncial (prông-nun'gi-al), *a.* [*< L. pronuntiare*, *pronunciare*, pronounce (see *pronounce*), + *-al*.] Pertaining to pronunciation.

pronunciamento (prông-nun'si-a-men'tô), *n.* Same as *pronunciamiento*.

pronunciamiento (Sp. pron. prông-nôn-thê-ä-mien'tô), *n.* [*Sp.*, = *E. pronouncement*.] A manifesto or proclamation; a formal announcement or declaration: often applied to the declarations of insurrectionists. Also *pronunciamento*.

They [the people of Suez] are, according to all accounts, a turbulent and somewhat fanatic set, fond of quarrels, and slightly addicted to *pronunciamentos*. *R. F. Burton, El-Medinah*, p. 118.

pronunciation (prông-nun'gi-ä'shon), *n.* [*< F. pronunciation* = *Sp. pronunciacion* = *Pg. pronunciação* = *It. pronunziatione*, < *L. pronuntiation* (-*n*), *pronuntiatio* (-*n*), a proclamation, a publication, < *pronuntiare*, *pronunciare*, proclaim, announce: see *pronounce*.] 1. The act of pronouncing, or uttering with articulation; the manner of uttering words or letters; specifically, the manner of uttering words which is held to be correct, as based on the practice of the best speakers: as, the *pronunciation* of a name; distinct or indistinct *pronunciation*. Abbreviated *pron.*

The standard of *pronunciation* is not the authority of any dictionary, or of any orthoepist; but it is the present usage of literary and well-bred society.

Nuttall, quoted in *N. and Q.*, 7th ser., VII. 174.

2. The art or manner of uttering a discourse with euphony and grace: now called *delivery*.

Well-placing of words for the sweetness of *pronunciation* was not known till Mr. Waller introduced it. *Dryden, Def. of Epil.* to second part of *Conq. of Granada*, II.

Pronunciation of Greek and Latin. (a) *Continental pronunciation or system of pronunciation*, a system of pronunciation of Latin or Greek conforming or approximating to that in use on the continent of Europe, especially in the vowel-sounds. As each of the principal nations in western Europe pronounces Latin, and the most of them Greek also, in the main after the analogy of its own language, it is only in their chief points of agreement that a usage which can justify this epithet *continental* exists. The system of pronunciation known as *continental* retains, for the most part, the English sounds of the consonants, and pronounces the vowels as in German or Italian. There is a stricter form of continental pronunciation of Latin, approaching the Roman, and a modified form, approaching the English. The continental system of pronouncing Greek is often called *Erasmian*, as closely resembling the modified or modern Erasmian pronunciation used in Germany. (b) *Eclectic pronunciation (of Greek)*, a system of pronunciation of ancient Greek which seeks to approximate to the actual ancient pronunciation. It agrees on the whole with the stricter continental system, and pronounces the diphthongs so that each element can be heard separately. (c) *English pronunciation (of Greek)*, a system of pronouncing Greek with the English sounds of the corresponding Latin letters. This system is now little used in the United States. (d) *English pronunciation (of Latin)*, a system of pronouncing Latin which follows, with some exceptions, the general analogy of the modern pronunciation of English. The Latin rule of accentuation determines the place of the accent; but the vowels are given their long or short English sounds without regard to their Latin quantity. The English long sounds are used at the end of a word (but final *a* is usually obscure, as in *coma*), before another vowel, and at the end of an accented penult or of any unaccented syllable (except penultimate *i*). The English short sounds are used in a syllable ending with a consonant (except final *es, os*), before two consonants (not a mute and liquid) and *x* (= *cs*), and (excepting *u*) in an accented antepenult before a single consonant, if not followed by two vowels the former of which is *e, i, or y*. *C, s, and z*, succeeding the accent, are equivalent to *sh*, and *x* is sounded like *kah*, before two vowels the former of which is an unaccented *i* or *y*, unless *s, t, or x* precedes. Initial *z* is pronounced *z*. If the second of two initial consonants is not *h, l, or r*, the first (if not *s*) is silent. Initial *ch* and *ph* are pronounced *th*. There are no silent vowels. Different authorities vary these rules somewhat, or acknowledge various exceptions to them. The English system of pronunciation of Latin regulates the pronunciation in English of all proper names which have not altered their Latin spelling, and of all Latin words and phrases which have become Anglicized. (e) *Erasmian pronunciation (of Greek)*, a system the earliest champion of which was Erasmus in his treatise "De Recta Latini Graecique Sermonis Pronuntiatione" (Basel, 1528). The pronunciation universally in use at that time was the modern Greek as used in the middle ages and supported by Byzantine scholars at the time of the revival of letters. Investigation led to a general conviction among scholars in the west of Europe that the Erasmian theory of the ancient pronunciation was correct; and by the end of the sixteenth century—after considerable controversy, embittered by the fact that the traditional or modern pronunciation was favored by supporters of the papacy, and the Erasmian system by the Reformers—the Erasmian system had come into general use, and the Byzantine method of pronouncing Greek as a living language—also called the *Reuchlinian*, from Johann Reuchlin, the first great representative of Greek scholarship in Germany—became obsolete in the western schools. In its original form the Erasmian pronunciation was distinguished from the Reuchlinian by giving most of the vowels the sounds which they have in Latin as pronounced by most of the western nations, the Italians, Germans, etc., and by pronouncing the diphthongs so that each vowel in them should preserve its own sound. As, however, this pronunciation closely approached that of the modern western languages in the sixteenth century, it became practically the usage that every nation should pronounce Greek after the analogy of its own language, and as this has gradually changed in each country, the pronunciation of Greek has varied with it. In England, in the time of Henry VIII., the pronunciation of vowels was nearly the same as in continental languages. This is evident from the fact that the relation of the Greek vowels, as pronounced by the Erasmian system, to those in the Latin alphabet, as used in the vernacular, is treated by writers of that time as identical in England and on the continent. In England, accordingly, the Erasmian system of pronunciation was insensibly transformed into what is now called the *English pronunciation* of Greek. The system known as the *continental* is a partial revision of the Erasmian; that designated as the *eclectic* restores the Erasmian with some alterations. (f) *Modern Greek pronunciation*, the pronunciation of Greek, ancient and modern, actually in use in Greece at the present day. The change from the ancient to the present pronunciation was very gradual. The first signs of its prevalence are found in the Boeotian dialect and among Hellenists. Confusion of *e* with *i* became general about 200–100 B. C., but good speakers still made some difference between these sounds till after 200 A. D. The vowel *η* began to be frequently confounded with *ι* about 250–150 B. C., but persons of culture retained the sound of a Latin *e* (English *a*) for it till 500 A. D. or later. The diphthong *αι* became identical in sound with *e* about 150–200 A. D., and somewhat later *οι* was pronounced like *υ* (*υ*). The vowel *υ* was distinguished from *ι* till late Byzantine times. After about 150–200 A. D., *av, ev* came to be sounded as *av, ev*, and later as *af, ef*, before *surda*. During the Roman imperial period distinctions of quantity fell more and more into disuse, and merely accentual poetry began as early as the fourth century. In Egypt and other countries outside of Greece these changes of pronunciation began very early, and even the older manuscripts are accordingly full of their effects (*iotacisms*). This system of pronunciation prevailed throughout the middle ages not only in the East, but in the West till the time of the Reformation. Also called *iotacism, iotacism, Reuchlinian pronunciation*. (g) *Reuchlinian pronunciation (of Greek)*. Same as (f). See (e). (h) *Roman pronunciation (of Latin)*, a system of pronunciation of Latin which seeks to approximate to the actual ancient pronunciation. It differs from the stricter continental system chiefly in the sounds given to *e, a, c*, and

v, and in having only one sound for each vowel. In the ancient pronunciation *e* and *a* varied in sound, and there are indications that the short vowels in general differed somewhat in quality from the long vowels. The following tables exhibit the leading systems described above.

Rough breathing ()	h	h	Silent.

In all these systems *κ, λ, μ, ν, π, ρ, σ, τ, φ*, and *ψ* respectively have the same sounds as *k, l, m, n, p, r, s, t, f*, and *ph*. The sounds given in parentheses represent the stricter continental pronunciation. *γ* is *y* before *γ, κ, ξ, χ* (*γ* being *y* elsewhere); *gh* represents the corresponding sound to *ch* (nearly as German *g* in *Wagen* as pronounced by most Germans). In the Modern Greek system *χ* is *ch* as in German *ich*, and *γ* is *y* before *ā* and *ē* sounds (*e, i*, etc.); *γ* is *ngg*, *μ* is *mb*, and *ν* is *nd*. The strict continental system and the Modern Greek pronounce by the written accent, while the English and the modified continental accent Greek by the rule for accent in Latin. The two last-named systems generally make *a* and *i* long in open syllables and short in closed syllables (the English pronunciation treating them as *a* and *i* in Latin), but *v* is always long.

PRONUNCIATION OF LATIN.

y	ū	ū	ē, i	ī, i
z	dz (z)	dz	z	ph

In all these systems *b, d, f, h, k, l, m, n, p, r, s, t, φ* (*qu* = *kw*), *τ, θ* (in *thin*), have the ordinary English sounds. *C* and *g* represent *c* and *g* before *e, ae, i*, and *y*; *cl* and *gl̄* represent *c* and *g* before other letters than these. The short vowel-sounds are used in the English and in the modified continental system in closed syllables, and the long vowel-sounds in open syllables, regardless of the ancient quantity. The Roman system gives the same quality of sound to a short vowel as to a long, but makes it more rapid in pronunciation. In continental pronunciation *e* is by some pronounced *z* between two vowels, and in the modified system final *z* is pronounced *āz*, and final *ds* *ōs*. For the pronunciation of *e, s*, and *t* as *sh*, and of *x* as *kah* or *z*, see (d). Pronounce *ū* as in German, or as French *u*.

pronunciative (prō-nun'gi-ā-tiv), *a.* [= It. *pronunziativo*, < L. *pronuntiativus*, *pronunciativus*, declarative, enunciative, < *pronuntiare*, *pronunciare*, proclaim, enounce: see *pronounce*.] 1. Of or pertaining to pronunciation; pronunciatory.—2. Uttering confidently; dogmatical.

The confident and *pronunciative* school of Aristotle.
Bacon, *Prometheus*.

pronunciator (prō-nun'gi-ā-tor), *n.* [= Sp. Pg. *pronunciador* = It. *pronunziatore*, < L. *pronunziator*, *pronunciator*, a reciter, a relater, < *pronuntiare*, *pronunciare*, publish, proclaim: see *pronounce*.] One who pronounces.

pronunciatory (prō-nun'gi-ā-tō-ri), *a.* [*< pronunciator* + *-y*.] Relating to pronunciation.
Prony's dynamometer. A dynamometer, named after its inventor, much used for obtaining data for computing the power delivered by turbines and other water-wheels, or

from the fly-wheel of an engine, or transmitted by shafting. The principle of this apparatus is the same in all of its forms. In the accompanying illustration, which represents a form of the apparatus used in laboratories, *c* is a shaft provided with a winch *e*, and supported in bearings *d* in a frame *A*; *f* is a lever having a scale-pan suspended from the point *m* near the extremity of the longer arm as shown at *b*, on which, when in use, a weight or weights *i* are placed; *a* is a counterpoise; *f* is a chain connected at its ends to tightening-bolts *k, k'*; *l* indi-

cates wooden brake-shoes, which, by tightening the chain *f*, can be made to press strongly against the projecting end of the shaft *e*; *g, g'* are stop-rests, which limit the motion of the lever, used only for convenience in applying the brake, and not essential to its action. In the determination of the power transmitted through the shaft *e*, moving in the direction shown by the arrow, the counterpoise is first adjusted to counterbalance the long arm of the lever and the empty scale-pan. The chain *f* is then tightened and the scale-pan loaded, so that at a given velocity the lever is by the friction of the brake held away from the rest *g*, but not in contact with *g*. Under conditions so established, if *L* = the perpendicular distance in feet of the point *l* from the axis of *e*, *S* = the weight in pounds placed in the pan, *r* = the radius in feet or fractions of a foot of the shaft *e*, and *M* = the moment of torsion in pounds, then will $LS/r = M$, and $2\pi rM$ = the power transmitted in foot-pounds during each turn of the winch. Also called *Prony's brake*.

proemiac (prō-ē'mi-ak), *a.* [*< proemium* + *-ac*.] Relating to or constituting a proemium or preface.

The 104th (Psalm) is the *Proemiac*, because it commences *Vespers*.
J. M. Neale, *Eastern Church*, l. 866.

proemium, **proemion** (prō-ē'mi-um, -on), *n.* [*L. proemium*, < Gr. *προίμιον*, an opening: see *proem*.] 1. Same as *proem*.

Forgetful how my rich *proemion* makes
Thy glory fly along the Italian field,
In lays that will outlast thy Delty.

Tennyson, *Lucretius*.

In his *proemium* he plainly intimates that he is putting forth a kind of commonplace book of historical anecdotes.
Encyc. Brit., XXIV. 41.

2. In *rhet.*, the exordium.

proof (prōf), *n.* and *a.* [Early mod. E. *prooffe*, *proffe*, < ME. *proof*, *prooff*, *proffe*, also (whence early mod. E. *prief*, *preef*) *preef*, *preeve*, *preve*, *preove*, < OF. *prove*, *proeve*, *preuve*, F. *preuve* = Pr. *prova*, *proa*, a proof, < LL. *proba*, a proof, < L. *probare*, prove: see *prove*.] I. *n.* 1. Any effort, act, or operation made for the purpose of ascertaining any truth or fact; a test; a trial: as, to make *proof* of a person's trustworthiness or courage.

The verry *preeve* sheweth it indede.
Chaucer, *Nun's Priest's Tale*, l. 163.

Here and se, and sey thou nought,
Than schall thou not to *profe* be brought.

Babes Book (E. E. T. S.), p. 23.

Madam, you may make *Proof* of him, and if your Ladyship find him too saucy or wasteful, you may return him whence you had him.
Howell, *Letters*, l. v. 36.

Let there be
Once every year a joust for one of these;
For so by nine years' *proof* we needs must learn
Which is our mightiest.

Tennyson, *Lancelot and Elaine*.

2. Evidence and argumentation putting the conclusion beyond reasonable doubt; demonstration, perfect or imperfect.

Trifles light as air
Are to the jealous confirmations strong
As *proofs* of holy writ. *Shak.*, *Othello*, III. 3. 334.

They [miracles] are not private, but public *proofs*; not things to be done in a corner, for the sake of single persons, but before multitudes, and in the face of the sun.
Bp. Atterbury, *Sermons*, l. xli.

Credulous enough
To swallow much upon much weaker *proof*.
Cowper, *Conversation*, l. 722.

3. A thing proved or tried; truth or knowledge gathered by experience; experience.

Out of your *proof* you speak; we, poor unfledged,
Have never wing'd from view o' the nest, nor know not
What air's from home. *Shak.*, *Cymbeline*, III. 3. 27.

4. The state of having been tested and approved; firmness, hardness, or impenetrability: specifically applied to arms or armor of defense, to note that they have been duly tested and are impenetrable.

There died of his hand Sarpedon, Plistonax, Strophilus, and Hippolytus, men of great proof in war.

Sir P. Sidney, Arcadia, iii.

She hath Dian's wit;

And, in strong proof of chastity well arm'd,
From love's weak childish bow she lives unharm'd.

Shak., R. and J., I. 1. 216.

They harness'd him from head to foot with what was of proof, lest perhaps he should meet with assaults in the way.

Bunyan, Pilgrim's Progress, p. 124.

5. In law: (a) The convincing effect of evidence; the manifestation of the truth of a proposition by presenting the reasons for assenting to it; such an array of evidence as should determine the judgment of the tribunal in regard to a matter of fact. In criminal cases, to be effectual as proof, the evidence must satisfy beyond a reasonable doubt. In civil cases it is enough that the evidence preponderates.

Evidence is the medium of proof; proof is the effect of evidence.

Judge Danforth, 108 N. Y., 73.

(b) *pl.* In equity practice, the instruments of evidence in their documentary form, as depositions, deeds, etc., received in a cause. (c) The presentation of sufficient evidence: as, the burden of proof lies with the plaintiff. Proof is either written or parole. The former consists of records, deeds, or other writings; the latter of the testimony of witnesses personally appearing in court or before a proper officer, and, as a rule, sworn to the truth of what they depose. In this sense the word is used to designate either the task of going forward with the giving of evidence at the trial or the task of satisfying the minds of the jury. Owing to the different functions of the judge and the jury, the distinction is of great practical importance, because when the plaintiff has given evidence which would entitle him if unanswered to go to the jury, it is proper for him to tell counsel that the burden of proof is on defendant, meaning that if the defendant adduces no evidence the plaintiff will be entitled to have the case submitted to the jury; but it is error for him thereupon, whether defendant offers evidence or not, to tell the jury that the burden of proof is on defendant to contradict plaintiff's case, for, considered as a task of satisfying the jury, the burden of proof remains upon the plaintiff throughout. The burden of proof is never on the defendant in this sense, except in respect to an affirmative defense in avoidance as distinguished from a denial. (d) In Scots law, the taking of evidence by a judge upon an issue framed in pleading. Sometimes disputed facts may be sent to a jury, but, except in actions of damages, a proof is almost invariably the course adopted. . . . The evidence as the proof is taken down in shorthand, and counsel are heard at the close. *Henry Goudy.*

6. A test applied to manufactured articles or to natural substances prepared for use; hence, the state of that which has undergone this test, or is capable of undergoing it satisfactorily. Compare *armor of proof*.—7. In alcoholic liquors, the degree of strength which gives a specific gravity of 0.920. See II., 2. Liquors lighter than this are said to be above proof, and heavier liquors are below proof. See *overproof* and *underproof*.

The expressions "20 per cent over proof," "20 per cent under proof," mean that the liquor contains 20 volumes of water for every 100 volumes over or under this fixed quantity, and that, in order to reduce the spirit to proof, 20 per cent of water by volume must be subtracted or added as the case may be. *Spons' Encyc. Manuf., I. 215.*

8. In printing, a trial impression from composed type, taken for correction. Generally a number of successive proofs are read before the matter is ready for the press, corrections being made first in the printing-office until what is technically called a *clean proof* can be submitted to the author. The final proof is called a *press-proof* or a *foundry-proof*, the first being used of letterpress work, and the latter of plate-work.

Lap. What says my printer now?

Gal. Here's your last proof, sir. [Giving proof-sheet.] You shall have perfect books now in a twinkling.

Fletcher (and another?), Nice Valour, iv. 1 (circa 1625).

9. In engraving and etching, an impression taken from an engraved plate to show its state during the progress of executing it; also, an early and superior impression, or one of a limited number, taken before the title or inscription is engraved on the plate, and known as *proof before letter*. There may be first, second, and third proofs, marking successive states of the work. See also *artist's proof*, *India proof*, *proof with open letters*, and *proof with remargue*, below.

10. In numis., any early impression struck at the mint from a coin-die used for producing the current coins of the realm. Proofs are often distinguished from the coins struck off for actual currency by having their edges left plain instead of being milled or inscribed. They are also often struck in a metal of greater or less value than that which is proper to the current coin: thus, there are gold, silver, and bronze proofs of the English copper farthing issued by George III. in 1799. Compare *pattern*, 8.

11. In bookbinding, the rough uncut edges of the shorter leaves of a trimmed book, which prove that the book has not been cut down too much.—12. In arith., an operation serving to check the accuracy of the calculation.—*Acroamatic proof*. See *acroamatic*.—*A priori proof*. (a) A proof deduced from principles. (b) Proof independent of experi-

ence.—*Armor of proof*, armor which has been proved trustworthy, or which is known to be trustworthy, as against ordinary weapons.—*Artist's proof*, in engraving, a first impression taken from an engraved plate or block after its completion.—*Burden of proof*. See *burden* and *def. 5 (c)*.—*Composite proof*, direct proof. See the adjective.—*Dogmatic or discursive proof*. Same as *acroamatic proof*.—*Empirical proof*, proof from actual experience.—*Foul proof*, imperfect proof. See the adjective.—*India proof*. See *India*.—*Indirect proof*, in logic, same as *apagoge*, 1 (b).—*Irregular proof*, a proof the external form of which is different from the standard form of logic.—*Making proof*, under United States land laws, furnishing to the proper officer the requisite affidavits of actual residence, etc., to entitle a settler to a patent for his land.—*Marked proof*. See *marked*.—*Mathematical proof*, proof from construction of concepts, from a diagram or its equivalent.—*Mixed proof*, a proof partly analytic and partly synthetic.—*Monosyllogistic proof*, a proof consisting of a single syllogism.—*Ontological, ostensive, positive proof*. See the adjective.—*Proof before letter*, an early proof of a plate taken before the title or explanatory lettering has been engraved.—*Proof by notoriety*. Same as *judicial notice* (which see, under *notice*).—*Proof of gunpowder*, a test of strength, one ounce of powder being used with a 24-pound ball, which must be driven a distance of not less than 250 yards.—*Proof of ordnance and small arms*, tests by means of hydraulic pressure and the firing of heavy charges.—*Proof with open letters*, or *open letter proof*, an early proof of an engraving, on which the title is engraved in letters that are merely outlined.—*Proof with remark*, or *remark proof*, a proof of an engraving or etching in which the early state is denoted by one or more croquis or fanciful marks traced on the margin, or by the absence of certain lines in different parts of the plate. These remarks are sometimes used to denote the different states of the plate up to the point of completion.—*Pure proof*. See *pure*.—*To the proof* to the quick; so as to touch a vital part.

But now I'll speak, and to the proof, I hope.

Marlowe, Edward II., I. 1.

We must be patient: I am vex'd to the proof too.

Fletcher, Wildgoose Chase, iii. 1.

—*Syn. 1.* Experiment, essay, ordeal.—2. *Testimony*, etc. (see *evidence* and *inference*), demonstration, certification.

II. a. [Elliptical for *proof*: see *proof*, n., 4.] 1. Impenetrable; able to resist, physically or morally: as, *water-proof*, *fire-proof*, *shot-proof*, *bribe-proof*: often followed by *to* or *against* before the thing resisted.

Now put your shields before your hearts, and fight,
With hearts more proof than shields.

Shak., Cor., I. 4. 25.

Now am I high proof
For any action; now could I fight bravely,
And charge into a wildfire.

Beau. and Fl., Captain, iv. 2.

I . . . have found thee
Proof against all temptation.

Milton, P. R., iv. 538.

I do not know . . . a task so difficult in human life as to be proof against the importunities of a woman a man loves.

Steele, Spectator, No. 510.

If James had not been proof to all warnings, these events would have sufficed to warn him.

Macaulay, Hist. Eng., vi.

2. Noting alcoholic liquors which have the specific gravity 0.91984, usually considered as 0.920, which is sufficiently accurate for practical purposes. Such spirits contain 0.495 of their weight, or 0.5727 of their volume, of absolute alcohol. The strength is usually determined by a hydrometer. See *alcoholometry*, *overproof*, and *underproof*.

3. Of excellent quality: said of land. *Halliwell*. [Prov. Eng.]—*Proof strength*. See the quotation.

The proof strength is the load required to produce the greatest strain of a specific kind consistent with safety.

Rankine, Steam Engine, § 58.

proof-armt, v. t. [*< proof + arm²*.] To arm as with proof; make secure.

Men. She is a handsome wench.

Leu. A delicate, and knows it;

And out of that proof-arms herself.

Fletcher, Humorous Lieutenant, II. 8.

proof-armor (pröf'är'mör), n. Same as *armor of proof* (which see, under *proof*).

proofed (pröft), a. [*< proof + -ed²*.] Made proof; specifically, made water-proof: as, *proofed silk*. [Trade term.]

proof-ful (pröf'fü), a. [*< proof + -ful*.] Conveying proof; bearing testimony.

Had you been so honest

To give such honour to your captains' counsels

As their alacrities did long to merit

With proof-ful action. *Chapman, Caesar and Pompey.*

proof-galley (pröf'gal'i), n. In printing, a brass galley flanged at one end and on both sides. The type to be proved is held in position by a sidestick secured by quoins. See *galley*, 5.

proof-glass (pröf'gläs), n. A cylindrical glass vessel very deep in proportion to its diameter, and having a foot and a lip for pouring out liquids; a hydrometer-glass. It is principally used for holding liquids while testing their densities or specific gravities by the use of a hydrometer. See cut under *hydrometer*.

proof-house (pröf'hous), n. In gun-manuf., a building in which gun-barrels are proved or tested for flaws or defects by firing them with critical test-charges of a definite weight of a standard powder, and also by hydraulic pressure. See *proof*, n., 6. In London a proof-house is established by law, to which gun-barrels of different makers can be sent for proof. Gun-barrels which meet the test are then stamped with authorized proof-marks.

proof-leaf (pröf'lëf), n. A proof; a proof-sheet.

They appear printed in a few proof-leaves of it in my possession.

Bonwell, Johnson, I. 204.

proofless (pröf'les), a. [*< proof + -less*.] Lacking sufficient evidence to constitute proof; not proved.

Such questionable, not to say altogether proof-less conceits.

Boyle, Works, II. 290.

prooflessly (pröf'les-li), adv. Without proof.

The maxim . . . *Locus conservat locum* . . . has been proof-lessly asserted.

Boyle, Works, IV. 390.

proof-mark (pröf'märk), n. In gun-making, a mark stamped in the metal of a gun-barrel to show that it has been tested and found good.

proof-plane (pröf'plän), n. In elect., a small thin metallic disk, insulated on a non-conducting handle, by which electricity may be carried from one place to another. It is used in experiments on the distribution of electricity on conductors. When it is laid against the surface whose electric density it is intended to measure, it forms, as it were, a part of the surface, and takes the charge due to the area which it covers, which charge may be carried to an electrometer and measured.

proof-press (pröf'pres), n. A printing-press used exclusively for taking proofs.

proof-print (pröf'print), n. An early impression of an engraving, taken with greater care than an ordinary print; a proof.

proof-printer (pröf'prin'tër), n. In engraving, a skilled workman whose especial province is the printing of proofs from engraved or etched plates.

proof-reader (pröf'rë'dër), n. A person who reads printers' proofs for correction; one whose occupation is to discover errors in proofs and note on them the necessary changes. A critical or editorial proof-reader is one who not only corrects the compositor's errors, but notes or points out the lapses of the original text, or makes or indicates changes for its improvement. Proof-readers were originally called *correctors of the press*, and that phrase still remains in literary or formal use, especially for those who read proofs for criticism as well as for correction.

proof-reading (pröf'rë'ding), n. The correction of errors in printers' proofs. See *proof-reader*.

In marking a proof, the places in the text where changes are to be made are indicated in the following modes. A caret (^) is inserted in the bottom of a line at a point where something is to be put in or a new paragraph is to be made; a line is drawn through anything to be taken out or changed for something else, and under anything to be changed to different type; the mark [] is made to the left of a word to be shifted in that direction, and] to the right; and letters or parts of a word improperly separated are connected by a curve or curves (~ or ~). In the last two cases the same marking is repeated in the margin. The other indicative marks or signs made in the margin (besides a few strictly technical ones, which admit of much variation) are the following: 8 or 3 (*dele-mark*), representing d (8) for *dele*, take out; 9 (*turn-mark*) for turning an inverted letter; # (*space-mark*), for inserting a space, or more space; ↓, for putting down space; □, for inserting an em-quadrat, or increasing the space to that amount; ¶ (*paragraph-mark*), for making a new paragraph; x, for a broken or imperfect letter; set (let it stand), for something that is to remain after being crossed out; a row of dots being made under the erasure; tr. for *transpose*; w. f. for *wrong font* (meaning a letter or letters of different size or face from the others); ital. for *italic*, and rom. for *roman*; cap. or caps. for *capital* or *capitals*; s. c. for *small capitals*; l. c. for *lower-case*. In the last five cases, where only a single letter is involved, proof-readers usually write the letter itself in the margin, in the form desired, or with the proper underscoring. In underscoring, italics are indicated by a single line, small capitals by two lines, and capitals by three lines. A single letter written as a capital does not usually need to be underscored. Where two paragraphs in the text are to be joined or "run in," a line curving at the ends is drawn between them, and "No ¶" written in the margin. A marginal correction should always be written as nearly as possible opposite the place affected in the text; and where the connection cannot thus be made clear, a line should be drawn between the place and the correction.

proof-sheet (pröf'shët), n. A printers' proof.

Mr. Arthur Pendennis having written his article, . . . reviewed it approvingly as it lay before him in its wet proof-sheet at the office of the paper.

Thackeray, Pendennis, xlv.

She recognized the name as that of a distinguished publisher, and the packet as a roll of proof-sheets.

H. James, Jr., Harper's Mag., LXXVII. 100.

proof-spirit (pröf'spir'it), n. In com., an alcoholic liquor which has a specific gravity of 0.920, and contains 0.495 of its weight, or 0.5727 of its volume, of absolute alcohol.

proof-staff (pröf'stáf), *n.* A metallic straight-edge used as a standard to correct a wooden staff made for ordinary service.

proof-stick (pröf'stik), *n.* In *sugar-manuf.*, a rod of wood for dipping in boiling syrup to test its condition by the rapidity and character of the crystallization. *E. H. Knight.*

proof-text (pröf'tekst), *n.* A passage of Scripture brought forward to prove a special doctrine.

It is not a legitimate use of the Old Testament to seek in it *proof-texts* for all the doctrines that are found in the New Testament. *Bibliotheca Sacra*, XLIII. 563.

proof-valiant (pröf'val'yant), *a.* Of tried courage.

Believe me, captain, such distemper'd spirits,
Once out of motion, though they be *proof-valiant*,
If they appear thus violent and fiery,
Breed but their own disgraces.

Beau. and Fl., Captain, II. 1.

proostracal (prö-os'tra-kal), *a.* [*< proostracum + -al.*] Forming or formed by the proostracum; of or pertaining to a proostracum.

proostracum (prö-os'tra-kum), *n.* [NL., *< Gr. πρόστρον*, before, + *δορᾶκον*, shell: see *Ostracea*.] The broad and projecting lamella of the thick covering of the phragmacone of a cephalopod, extending beyond the base of the phragmacone, and being a continuation of the wall of the most anterior chamber of the shell; the foremost part of the guard or rostrum of a fossil cephalopod of the belemnite group. It is variously shaped, usually lamellate, and with the rostrum represents the pen of the squid. See cuts under *belemnites*, *Belemnitidae*, and *calamary*.

The genus *Acanthotenthis*, . . . in which the guard is almost rudimentary, while the *proostracum* is large and penlike. *Huxley*, *Anat. Invert.*, p. 465.

prootic (prö-ō'tik), *a. and n.* [*< Gr. πρός*, before, + *ὄτις* (ōtis), ear, + *-ic*.] I. *a.* Anterior with reference to the otic capsule or among otic bones; of or pertaining to the prootic: correlated with *opisthotic*, etc. See II., and *otic*.

II. *n.* In *zool.* and *anat.*, a bone of the ear, an anterior ossification of the petrotic capsule, forming with the epiotic and opisthotic the petrosal or petromastoid bone, developed in especial relation with the anterior vertical semicircular canal of the bony labyrinth of the ear. It frequently remains distinct from the other otic bones; in man it assists the opisthotic in the formation of the mastoid as well as the petrous part of the temporal bone. See cuts under *Crocodylia*, *Gallinae*, and *periotic*.

The *pro-otic* is, in fact, one of the most constant bones of the skull in the lower Vertebrata, though it is commonly mistaken on the one hand for the alisphenoid, and on the other for the entire petro-mastoid.

Huxley, *Anat. Vert.*, p. 26.

prop¹ (prop), *n.* [Early mod. E. *proppe*, *< ME. proppe*, a prop; = MD. *proppe*, a prop, support; cf. MD. *proppe*, *prop*, a stopple, D. *prop*, a stopple, cork, plug, wad, pellet, = MLG. *prop*, *proppe*, LG. *propp* = G. *propf*, *propfen*, a stopple, cork (not found before the 19th century), = Sw. *propp* = Dan. *prop*, a cork, stopple, plug. The origin of these words is uncertain; some compare G. *pfropf*, *propfen*, a graft, MHG. *pfropfen*, OHG. *pfropfo*, *pfroffo*, a set, slip, *< L. propago*, a set, slip, layer of a plant: see *propago*, *propagate*, etc. The Gael. *prop*, Ir. *propa*, a prop, support, are prob. borrowed from E.] 1. A stick, staff, pole, rod, beam, or other rigid thing used to sustain an incumbent weight; that on which anything rests for support; a support; a stay; a fulcrum: usually applied to something not forming a part of the object supported: as, a *prop* for vines; a *prop* for an old wall.

Proppe, longe (staffe), contus. *Prompt. Parv.*, p. 415.

You take my house when you do take the *prop*
That doth sustain my house.

Shak., M. of V., iv. 1. 375.

Justice and religion are the two chief *props* and supporters of a well-governed commonwealth.

Burton, *Anat. of Mel.*, p. 603.

But wit's like a luxuriant vine,
Unless to virtue's *prop* it join,
Firm and erect towards heaven bound.

Cowley, *Death of Mrs. C. Phillips*.

They are the *props* of national wealth and prosperity, not the foundations of them.

D. Webster, Speech, House of Representatives, Jan. 2, 1815.

2. In bot., same as *fulcrum*, 3.—3. pl. Legs.

Halliwell. [Prov. Eng.] = *syn.* 1. See *staff*.

prop¹ (prop), *v.*; pret. and pp. *proppe*, ppr. *proping*. [Early mod. E. *proppe*; = MD. *proppe*, *propfen*, *prop*, stay, or bear up (cf. MLG. *propfen* = G. *propfen* = Sw. *propa* = Dan. *proppe*, stop up, cork); appar. from the noun, but the verb may possibly be older: see *prop*, *n.*] I. *trans.* 1. To support or prevent from falling by pla-

cing something under or against: as, to *prop* a roof or wall.

Here wee saw certain great Serraglias, exceeding high, and *prop* up by buttresses. *Sandys*, *Travels*, p. 106.

What shalt thou expect,
To be dependor on a thing that leans,
Who cannot be new built, nor has no friends,
So much as but to *prop* him?

Shak., *Cymbeline*, I. 5. 60.

He was *proppe* up on a bed-rest, and always had his gold-headed stick lying by him.

George Eliot, *Middlemarch*, xxxii.

2. To support by standing under or against: as, a pillar *props* a roof; beams *prop* a wall.

He whose Arms alone sustain'd the Toll,
And *proppe*d the nodding Frame of Britain's Isle.

Congreve, *Birth of the Muse*.

Eternal snows the growing mass supply,
Till the bright mountains *prop* th' incumbent sky.

Pope, *Temple of Fame*, I. 58.

But build a castle on his head,
His skull will *prop* it under.

Burns, *Epigram on a Coxcomb*.

3. To support or sustain in a general sense: as, to *prop* a failing cause.

Wise men must be had to *prop* the republic.
Fletcher (and another?), *Prophets*, I. 3.

It behoved our Merchants to get an Interest here to *prop* up their declining Trade. *Dampier*, *Voyages*, II. 1. 182.

To *prop* fair Liberty's declining Cause,
And fix the jarring World with equal Laws.

Prior, *To Boileau Despreaux* (1704).

4. To help; assist. *Halliwell*. [Prov. Eng.]

II. *intrans.* To stop or pull up suddenly; balk: said of a horse or other beast. *Douglas*

Sladen. [Australia.]

prop² (prop), *n.* A shell used in the game of props. See *props*¹.

prop. An abbreviation of (a) *proposition*; (b) *property*.

propædæutic (prö-pæ-dü'tik), *a. and n.* [*< Gr. προπαιδευτικός*, teach beforehand, *< πρό*, before, + *παιδευέω*, teach, bring up or rear: see *pædæutics*.] I. *a.* Pertaining to propædæutics, or the introduction to any art or science; relating to preliminary instruction; instructing beforehand.

The conceptual suppositions, which are taken for assumed premises and are in truth erroneous, and at best propædæutic, but are dragged unnoticed into the conclusion. *Westminster Rev.*, CXXVI. 475.

II. *n.* A branch of knowledge introductory to a particular art or science; a subject to be mastered as a preliminary to some other subject.

It [logic] is a *propædæutic* to all other sciences.

Atwater, *Logic*, p. 37.

That study [physical geography] which Kant justly termed the "*propædæutic* of natural knowledge."

Huxley, *Physiology*, Pref., p. vi.

propædæutical (prö-pæ-dü'ti-kal), *a.* [*< propædæutic + -al.*] Same as *propædæutic*.

propædæutics (prö-pæ-dü'tiks), *n.* [Pl. of *propædæutic* (see *-ics*).] The preliminary body of knowledge and of rules necessary for the study of some particular art, science, etc.; the introduction to an art or a science.

It [our secular life] is not a mere instrumentality for the purpose of silencing the beast of the body, but rather is it the *propædæutics* of human combination and communication, wherein spiritual life becomes a reality.

A. B. Alcott, *Table-Talk*, p. 114.

propagable (prop'a-ga-bl), *a.* [= It. *propagabile*, *< L.* as if "*propagabilis*, *< propagare*, propagate: see *propagate*.] 1. Capable of being propagated, or of being continued or multiplied by natural generation or production.

Such creatures as are produced each by its peculiar seed constitute a distinct *propagable* sort of creatures. *Boyle*.

2. Capable of being spread or extended by any means, as tenets, doctrines, or principles.

propagand (prop'a-gand), *n.* [*< F. propagande*: see *propaganda*.] Same as *propaganda*.

A grand scheme for the union of Protestant Christendom, and his [Hartlib's] *propagand* of Comenius's school-reform. *Mark Pattison*, *Life of Milton*, p. 33.

propaganda (prop-a-gan'dä), *n.* [= F. *propagande* = Sp. Pg. It. *propaganda*; short for L. (ML.) *congregatio de propaganda fide*, association for propagating the faith (see def.): *propaganda*, abl. fem. gerundive of *propagare*, propagate: see *propagate*.] 1. A committee of cardinals (Congregation of *Propaganda Fide*, 'for propagating the faith') which has the supervision of foreign missions in the Roman Catholic Church. It was founded by Pope Gregory XV. in 1622. One of its chief instrumentalities is the Propaganda College in Rome. See *congregation*, 6 (a), 10.

Hence—2. Any kind of institution or organization for propagating a new doctrine or system of doctrines, or for proselytizing.

The first attempts at a *propaganda* of liberty, and the first attempts at a *propaganda* of nationality, were marked by great excesses and great mistakes.

Stubbs, *Medieval and Modern Hist.*, p. 237.

The rules of the association [the National Secular Society] inform us that it is the duty of an "active member" to promote the circulation of secular literature, and generally to aid the Free-thought *propaganda* of his neighbourhood. *Saturday Rev.*

propagandic (prop-a-gan'dik), *a.* [*< propaganda + -ic.*] Pertaining to a propaganda or to propagandism.

propagandism (prop-a-gan'dizm), *n.* [= F. *propagandisme* = Pg. *propagandismo*; as *propaganda + -ism*.] The system or practice of propagating tenets or principles; zealous dissemination of doctrines; proselytism.

We have attempted no *propagandism*, and acknowledged no revolution. *Lincoln*, in *Raymond*, p. 309.

What were the causes which made his [Mohammed's] disciples the leaders of a successful armed *propagandism*? *Sillie*, *Stud. Med. Hist.*, p. 102.

propagandist (prop-a-gan'dist), *n. and a.* [= F. *propagandiste* = Pg. *propagandista*; as *propaganda + -ist*.] I. *n.* One who devotes himself to the propagation or spread of any system of principles.

Bonaparte selected a body to compose his Sanhedrim of political *propagandists*. *R. Walsh*.

The eager *propagandists* who prowled about for souls. *Hawthorne*, *Marble Faun*, xx.

II. *a.* Pledged to or employed in such propagation; given to proselytizing.

On the second day after Kullmann's murderous attempt, the authorities had been ordered to deal with the Catholic Press, and with *propagandist* societies under the influence of the Jesuits, according to the utmost rigour of the law. *Lowie*, *Bismarck*, II. 321.

propagate (prop'a-gät), *v. t.*; pret. and pp. *propagated*, ppr. *propagating*. [*< L. propagatus*, pp. of *propagare* (*> It. propagare* = Pg. Sp. *propagar* = F. *propager*), peg down (a layer), set (slips or cuttings), propagate, extend, continue (cf. *propago*, a layer of a plant, a set, slip, shoot, hence offspring, progeny), *< pro*, forth, + *pangere* (*> pag*), fasten, set: see *pact*. Hence ult. *proin*, *prune*.] I. *trans.* 1. To multiply or continue by natural generation or reproduction; cause to reproduce itself: applied to plants and animals: as, to *propagate* fruit-trees; to *propagate* a breed of horses or sheep.

I sought the purchase of a glorious beauty,
From whence an issue I might *propagate*.

Shak., *Pericles*, I. 2. 73.

The wriggling fry soon fill the creeks around, . . .
The *propagated* myriads spread.

Couper, *Progress of Error*, I. 484.

But cockle, spurge, according to their law,
Might *propagate* their kind with none to awe.

Browning, *Child Roland*.

2. To transmit or spread from person to person or from place to place; carry forward or onward; diffuse; extend: as, to *propagate* a report; to *propagate* the Christian religion.

I first upon the mountains high built altars to thy name,
And grav'd it on the rocks thereby to *propagate* thy fame.

Drayton, *Quest of Cynthia*.

By newspaper reports, any great effect in one assize town, or electoral town, has been *propagated* to the rest of the empire.

De Quincy, *Style*, I.

The idle writers of the day continued to *propagate* dulness through a series of heavy tomes.

Prescott, *Ferd. and Isa.*, I. 18.

Throw a stone into the stream, and the circles that *propagate* themselves are the beautiful type of all influence.

Emerson, *Nature*.

3. To promote; augment; increase.

Griefs of mine own lie heavy in my breast,
Which thou wilt *propagate*, to have it preat
With more of thine. *Shak.*, R. and J., I. 1. 193.

While tender airs and lovely dainties inspire
Soft melting thoughts, and *propagate* desire.

Addison, *The Greatest English Poets*.

4. To produce; originate; invent.

Thence to visit honest and learned Mr. Hartlib, a public spirited and ingenious person, who had *propagated* many useful things and arts.

Evelyn, *Diary*, Nov. 27, 1655.

For the greatest part of the Island of Sumatra *propagates* this Plant [pepper], and the Natives would readily comply with any who would come to Trade with them.

Dampier, *Voyages*, II. i. 116.

5. To scatter; disperse. [Rare.]

This short harangue *propagated* the Juncto, and put an end to their resolves; however, they took care of their fee, but then left all concern for the lady behind them.

Gentleman Instructed, p. 544. (*Davies*.)

= *syn.* 1. To increase, spread, disseminate.

II. *intrans.* To be multiplied or reproduced by generation, or by new shoots or plants; bear young.

Fix'd like a plant on his peculiar spot,
To draw nutrition, *propagate*, and rot.

Pope, *Essay on Man*, II. 64.

Every thread of silk in the rich vestments seems only a provision from the worms that spin, for the behoof of worms that propagate in sepulchres.

Dickens, Pictures from Italy, ix.

propagating-bench (prop'a-gā-ting-bench), *n.* In hort., a stationary shallow box, usually filled with fine sand, but sometimes with earth, which is kept moist, and into which cuttings or slips are inserted until they have taken root. The propagating-bench is usually so placed that heat can be applied beneath it.

propagating-box (prop'a-gā-ting-boks), *n.* In hort., a shallow wooden box or pan, properly movable (compare *propagating-bench*), for holding slips and cuttings in sand. It is usually placed over the hot flues or water-pipes in a shady part of a plant-house, or on the sand-bed in a propagating-house. Sometimes the cuttings in the box are covered with a propagating-glass.

propagating-glass (prop'a-gā-ting-glas), *n.* In hort., a bell-glass used to cover cuttings or seedlings in a hotbed, nursery, or garden.

propagating-house (prop'a-gā-ting-hous), *n.* In hort., etc., any greenhouse especially adapted or used for the propagation or increase of plants from cuttings, or for growing them from the seeds.

propagation (prop'a-gā-shon), *n.* [*ME. propagacion*, < *OF. propagation*, *propagation*, *F. propagation* = *Sp. propagacion* = *Pg. propagação* = *It. propagazione*, < *L. propagatio* (*n.*), a propagating, an extension, < *propagare*, pp. *propagatus*, propagate: see *propagate*.] 1. The act of propagating; the multiplication or continuance of the kind or species by natural generation or reproduction: as, the propagation of plants or animals. In the greater number of flowering plants propagation is effected naturally by means of seeds: but many plants are also propagated by the production of runners or lateral shoots, which spread along the surface of the soil, and root at the joints, from which they send up new stems. Plants are also propagated by suckers rising from rootstocks, and by various other natural means. Propagation may be effected artificially by cuttings, grafting, budding, inarching, etc.

In September the propagation
In landes such as to be of before,
Is best to sette in occupation.

Palladius, Husbandrie (E. E. T. S.), p. 180.

How is it that in the propagation of the race such a marvel is repeated as that . . . every germ of a bodily organism receives the quickening breath of its spirit?

Lotze, Microcosmos (trans.), I. 370.

There is not in nature any spontaneous generation, but all come by propagation.

Ray, Works of Creation.

2. The spreading or extension of anything; diffusion: as, the propagation of Christianity; the propagation of socialistic ideas.

The Apostle [Paul] did act like a prudent Governour, and in such a manner as he thought did most tend to the propagation of the Gospel. *Stillington*, Sermons, II. vi.

It [speech] may be used for the propagation of slander. *H. Spencer*, Social Statics, p. 106.

3†. Increase; augmentation; enlargement; aggrandizement.

For propagation of a dower
Remaining in the coffer of her friends.

Shak., M. for M., I. 2. 154.

The spoil and waste they [the Jews] had made upon all nations round about them for the propagation of their empire, which they were still enlarging as their desires.

South, Sermons, XI. ii.

4. Transmission from one point to another, as of sound by waves of condensation and rarefaction in the air, and of radiant heat and light by undulations in the ether. See *sound*, *heat*, *light*, and *radiant energy* (under *energy*).

To account for the enormous velocity of propagation of light, the substance which transmits it is assumed to be both of extreme elasticity and of extreme tenuity.

Tyndall, Light and Elect., p. 60.

=*Syn.* 1. Increase, generation, procreation, breeding.—2. Dissemination.

propagative (prop'a-gā-tiv), *a.* [= *Sp. Pg. propagativo*; as *propagate* + *-ive*.] Having the power of propagation; propagating.

Every man owes more of his being to Almighty God than to his natural parents, whose very propagative faculty was at first given to the human nature by the only virtue, efficacy, and energy of the divine commission and institution. *Sir M. Hale*, Origin of Mankind, p. 364. (*Latham*.)

A church without propagative power in the world cannot be other than a calamity to all within its borders. *H. Drummond*, Natural Law in the Spiritual World, p. 356.

propagator (prop'a-gā-tor), *n.* [= *F. propagateur* = *Sp. Pg. propagador* = *It. propagatore*; < *L. propagator*, a propagator, enlarger, extender, < *propagare*, pp. *propagatus*, generate, increase: see *propagate*.] One who propagates; one who continues by generation or successive production; one who causes something to extend or spread; a promoter; a diffuser: as, a

propagator of heresies. The name is given to one whose business is the propagation of plants in nurseries, etc., by budding, grafting, etc.

The Author then of Original Sinne is the propagator of our Nature. *Purchas*, Pilgrimage, p. 29.

Socrates . . . the greatest propagator of morality. *Addison*, Freeholder, No. 45.

Jacobus Baradaeus, a Syrian, who was a chief propagator of the Eutychian doctrines.

E. W. Lane, Modern Egyptians, II. 312.

propagatorium (prop'a-gā-tō-ri-um), *n.*; pl. *propagatoria* (-ā). [*NL.*, neut. of *propagatorium*, propagatory: see *propagate*.] In biol., the reproductive apparatus; the entire physical mechanism of reproduction; the organs of generation of either sex, consisting essentially of a sexual gland producing ova or spermatozoa, passages for the conveyance of the product, or for detaining it until mature in the body, and, usually, organs of sexual congress. Compare *nutritorium*, *locomotorium*, *sensorium*.

propagatory (prop'a-gā-tō-ri), *a.* [*< NL. propagatorium*, < *L. propagator*, propagator: see *propagate*.] Serving to accomplish propagation, as the organs of generation; reproductive, as a system of physical organs.

propago (prō-pā'gō), *n.*; pl. *propagines* (prō-pā'j-i-nēz). [*L.*, < *propagare*, propagate: see *propagate*.] 1. In hort., a branch laid down in the process of layering.—2. In bot., same as *bulblet*.

propagule (prō-pag'ūl), *n.* [*< NL. propagulum*, *q. v.*] In bot., same as *propagulum*.

propagulum (prō-pag'ū-lum), *n.*; pl. *propagula* (-lā). [*NL.*, dim. of *propago*.] In bot.: (a) A shoot, such as a runner or sucker, which may serve for propagation. (b) In algæ, a modified branch by which non-sexual reproduction is effected. (c) One of the powder-like grains which form the soredia of lichens.

Palæotherium (prō-pā'lē-ō-thē-ri-um), *n.* [*NL.*, < *Gr. pālō*, before, + *παῖς*, ancient, + *θηρίον*, a wild beast: see *Palæotherium*.] A genus of fossil tapirid mammals from the Eocene of Europe.

propale (prō-pāl'), *v. t.*; pret. and pp. *propaled*, ppr. *propaling*. [= *Sp. Pg. propalar* = *It. propalare*, < *LL. propalare*, make public, divulge, < *L. propalam*, openly, publicly, < *pro*, forth, + *palam*, openly.] To publish; disclose. *Scott*.

propalinal (prō-pāl'i-nal), *a.* [*< Gr. πρό*, before, + *πάλη*, back, backward, + *-al*.] Moving forward and backward; relating to forward and backward movement; protracted and retracted, as the lower jaw when it moves forth and back in the act of chewing: as, the *propalinal* movement in mastication.

The propalinal mastication is to be distinguished into the proal, from behind forwards, . . . and the palinal, from before backwards. *Cope*, Amer. Nat., XXII. 7.

proparapteral (prō-pa-rap'te-ral), *a.* [*< proparapteron* + *-al*.] Of or pertaining to the proparapteron.

proparapteron (prō-pa-rap'te-ron), *n.*; pl. *proparaptera* (-rā). [*NL.*, < *Gr. πρό*, before, + *NL. parapteron*.] In entom., the parapteron of the prothoracic segment; the third sclerite of the propleuron.

proparent (prō-pār'ent), *n.* [*< L. pro*, for, + *paren* (-t-s), parent.] One who stands in the place of a parent. *Imp. Dict.*

proparoxytone (prō-par-ok'si-tōn), *a.* and *n.* [*< Gr. προπαροξύτωνος* (see def.), < *πρό*, before, + *παροξύτωνος*, paroxytone: see *paroxytone*.] 1. *a.* In *Gr. gram.*, having or characterized by the acute accent on the antepenultimate: sometimes applied to words in English and other languages to signify that they have the tonic accent on the antepenultimate.

II. In *Gr. gram.*, a word which has the acute accent on the antepenultimate.

proparoxytone (prō-par-ok'si-tōn), *v. t.*; pret. and pp. *proparoxytoned*, ppr. *proparoxytoning*. [*< Gr. προπαροξύτωνειν*, < *προπαροξύτωνος*, proparoxytone: see *proparoxytone*, *a.*] In *Gr. gram.*, to write or pronounce (a word) with the acute accent on the antepenultimate.

proparoxytonic (prō-par-ok-si-tōn'ik), *a.* [*< proparoxytone* + *-ic*.] Accented on the antepenult; proparoxytone.

passion (prō-pash'on), *n.* [*< ML. passio* (-n-), < *L. pro*, before, + *passio* (-n-), passion: see *passion*.] A feeling antecedent to passion; an inchoate passion; the first stir of passion.

The philosopher calls it [anger] the whetstone to fortitude, a spur intended to set forward virtue. This is simply rather a *passion* than a passion.

Rev. T. Adams, Works, I. 476.

Not the first motions [of anger] are forbidden: the twinkling of the eye, as the philosophers call them, the *propassions* and sudden and irresistible alterations.

Jer. Taylor, Works (ed. 1835), I. 211.

propatagial (prō-pat-ā-jī'al), *a.* and *n.* [*< NL. propatagialis*, < *propatagium*, *q. v.*] 1. *a.* Of or pertaining to the propatagium; as, a *propatagial* fold of integument; a *propatagial* muscle.

[*< ME. propellen*, < *L. propellere*, drive or push forward, < *pro*, forward, + *pellere*, drive, push: see *pulse*.] Cf. *expel*, *impel*, *repel*, etc.] To drive forward; move or cause to move on; urge or press onward by force.

Ferre awale propella

Horrend odour of kychen, bath, gutters
Palladius, Husbandrie (E. E. T. S.), p. 38.

That overplus of motion would be too feeble and languid to propel so vast and ponderous a body with that prodigious velocity.

Bentley.

The rate of succession may be retarded by insisting upon one object, and propelled by dismissing another before its time.

Kames, Elem. of Criticism, ix.

propellant (prō-pel'ant), *n.* [Erroneous form of *propellent*.] That which propels or drives forward; a propelling agent.

Though not as a military propellant, it [gun-cotton] has been used with great success in sporting cartridges.

The Engineer, LXIX. 117.

In all saloon rifles and pistols the propellant is fulminating powder contained in a small copper case.

W. W. Greener, The Gun, p. 368.

propellent (prō-pel'ent), *a.* [*< L. propellent* (-t-s), ppr. of *propellere*, drive or push forward: see *prope*.] Driving forward; propelling.

propeller (prō-pel'er), *n.* [*< propel* + *-er*.] 1. One who or that which propels; in *marine engine*, broadly, any contrivance or appliance, as a sail, paddle, oar, paddle-wheel, screw, etc., used for moving vessels floating upon the surface of water, or under the surface; in a more restricted and more generally accepted sense, any instrument or appliance, and especially a screw, used for marine propulsion and actuated by machinery (usually a steam-engine called a *marine engine*) carried by the vessel so propelled. A principle common to all this class of propellers is that a vessel is moved forward by the reaction on the propeller of the water thrown rearward, the propelling machinery being at some part or parts rigidly attached to the ship. The net propelling power is therefore determined by the mass of water thrown rearward multiplied into the square of the velocity with which it is thrown, allowance being made for prejudicial resistance.

2. A boat or vessel driven by a propeller.—3. In *fishing*, a kind of trolling-hook with artificial bait, fitted with wings or flanges to make it spin in the water; a spinning-bait.—*Archimedeal*, *fish-tail*, *screw*, etc., *propeller*. See the qualifying words.

propeller-engine (prō-pel'er-en'jin), *n.* A marine engine for driving a screw propeller.

propeller-mower (prō-pel'er-mō'er), *n.* Same as *front-cut mower* (which see, under *mower*).—1.

propeller-pump (prō-pel'er-pump), *n.* A form of rotary pump with helical blades inclosed in a casing and submerged in the water.

propeller-shaft (prō-pel'er-shāft), *n.* The rigid metallic shaft which carries the propeller of a marine engine.

propeller-well (prō-pel'ér-wel), *n.* A vertical aperture over the screw in the stern of a ship which has a hoisting propeller. When it is desired to proceed under sail, the screw, a two-bladed one, is hoisted off the end of the shaft into the propeller-well, so that it may not retard the ship by dragging in the water.

propeller-wheel (prō-pel'ér-hwél), *n.* A marine propeller or screw; a screw propeller.

propellent (prō-pel'ment), *n.* [*< propel + -ment.*] 1. The act of propelling.—2. In clock-work, electrical recording-instruments, calculating-machines, etc., the propelling mechanism; more particularly, an escapement mechanism in which the primary propulsive power is applied to the escapement, and the pallets of the escapement drive the scape-wheel, instead of the latter operating the escapement, as in ordinary clocks.

propend† (prō-pend'), *v. t.* [= OF. *porpendre*, *pourpendre*, *< L. propendere*, hang forward or down, be inclined or disposed, *< pro*, forward, + *pendere*, hang: see *pendent*.] To lean forward; incline; be propense or disposed in favor of anything.

Ne'ertheless,
My spritely brethren, I *propend* to you
In resolution to keep Helen still.

But Thou art the same Lord, Whose *property* is always to have mercy.
Book of Common Prayer, Communion Office, Prayer of [Humble Access].

Property is correctly a synonym for peculiar quality; but it is frequently used as co-extensive with quality in general.
Sir W. Hamilton.

Strictly speaking, we ought to confine the term *property* to Bodies, not to Matter; for an abstraction can have no *properties*; and it is the bodies which severally manifest the qualities.

G. H. Lewes, Probs. of Life and Mind, II. iv. § 42.

Soft iron loses almost all magnetic *properties* at a red heat.
Atkinson, tr. of Mascart and Joubert, I. 384.

2. In *logic*, a character which belongs to the whole of a species, and to nothing else, but not to the essence or definition.

Propriety is a natural promeness and manner of dooing whiche agreeth to one kinde and to the same onely and that evermore.
Wilson, Rule of Reason (1551).

What is *property*? It is a natural inclination or *property*, incident to one special kind; which is to be understood four manner of waies. First, it is called proprium, which is proper to one only kind, as to be a poet or musician is proper to man, but not to every man; secondly, it is called proper that belongeth to all the kind, but not to that kind alone: thirdly, it is said to be proper when it belongeth to one only kind and to all that kind, but yet not always, as to be bare-headed or bald is proper to man in old age, but yet not always: fourthly, it is said to be proper, or rather most proper, which is incident to one kind alone, to all that kind, and always, as to have a natural aptnesse to laugh or to speake is proper to man onely, to every man, and always, and therefore this kind of *property* is said to be convertible with the kind whereunto it belongeth, as whatsoever hath naturally power to speake or laugh the same is man, and whatsoever is man the same hath power to speake or laugh.
Blunderville, Arte of Logique, I. 4.

3. The right to the use or enjoyment or the beneficial right of disposal of anything that can be the subject of ownership; ownership; estate; especially, ownership of tangible things.

In the broader sense, a right of action is *property*; so is a mere right to use or possess, if it be a right as against the general owner, but is usually termed *special property*, to distinguish it from the right of the general owner, which is termed the *general property*. The *entire property* is the exclusive right of possessing, enjoying, and disposing of a thing. *See bailment, and item 2.*

Ne truste no wright to finden in Fortune
Ay *property*; hir giftes ben comune.
Chaucer, Troilus, iv. 392.

Jack has an unrealising good nature, which makes him incapable of having a *property* in any thing.
Steele, Spectator, No. 82.

The idea of *property* being a right to any thing.
Locke, Human Understanding, IV. III. 18.

Property . . . denotes in every state of society the largest powers of exclusive use or exclusive control over things (and sometimes, unfortunately, over persons) which the law accords, or which custom, in that state of society, recognizes.
J. S. Mill, Socialism, p. 129.

4. A thing or things subject to ownership; anything that may be exclusively possessed and enjoyed; chattels and land; possessions.

The King has also appropriated the Queen's jewels to himself, and conceives that they are his undoubted private *property*.
Greville, Memoirs, Jan. 8, 1823.

It was the misfortune of my friend . . . to have embarked his *property* in large speculations.
Irvine, Sketch-Book, p. 86.

English political economy and English popular notions are very deeply and extensively pervaded by the assumption that all *property* has been acquired through an original transaction of purchase, and that, whatever be the disadvantages of the form it takes, they were allowed for in the consideration for the original sale.
Matine, Early Law and Custom, p. 325.

5. A thing required for some peculiar or specific use, as a tool; an accessory; specifically, in theaters, a stage requisite, as any article of costume or furniture, or other appointment, necessary to be produced in a scene (in this specific sense used also attributively).

This devil Photinus
Employs me as a *property*, and, grown useless,
Will shake me off again.
Fletcher (and another), False One, v. 3.

To hire some of our *properties*: as a sceptre and crown for Jove; and a caduceus for Mercury.
B. Jonson, Poetaster, iv. 2.

Not to be of any Use or Consequence in the World as to your self, but merely as a *Property* to others.
Steele, Tender Husband, I. 1.

I had seen many rehearsals, and sometimes got a peep at the play, having been taken on "in arms" as a *property* child in groups of happy peasantry.
J. Jefferson, Autobiog., I.

6. Propriety.

Our poets excel in grandity and gravity, smoothness and *property*, in quickness and brevity.
Camden.

7. Individuality; that which constitutes an individual. [Rare.]

Property was thus appalled
That the self was not the same.
Shak., Phoenix and Turtle, I. 37.

8. A cloak or disguise. *Halliwel.* [Prov. Eng.]

Hadst thou so cheap opinion of my birth,
My breeding, or my fortunes, that none else
Could serve for *property* of your lust but I?
Shirley, Wedding, I. 3.

T. inspired discourse, prediction (see def. 2), < προφητεύω, prophesy, predict, < προφήτης, a prophet: see prophet.*] 1. Inspired discourse; specifically, in *Christian theol.*, discourse flowing from the revelation and impulse of the Holy Spirit.

Some a Jew stode vp in hy,
And thus he said thurgh *prophecy*.
Holy Rood (E. K. T. S.), p. 83.

The rest of the acts of Solomon, . . . are they not written in the book of Nathan the prophet, and in the *prophecy* of Ahijah?
2 Chron. ix. 29.

For the *prophecy* came not in old time by the will of man, but holy men of God spake as they were moved by the Holy Ghost.
2 Pet. i. 21.

2. A prediction; declaration of something to come; especially, a foretelling under divine inspiration.

In them is fulfilled the *prophecy* of Esaias. *Mat. xlii. 14.*

A *prophecy*, which says that G
Of Edward's heirs the murderer shall be.
Shak., Rich. III., I. 1. 39.

3. Interpretation of Scripture; religious exhortation or instruction.

The words of king Lemuel, the *prophecy* that his mother taught him.
Prov. xxxi. 1.

Mr. Wilson, praying and exhorting the congregation to love, &c., commended to them the exercise of *prophecy* in his absence.
Winthrop, Hist. New England, I. 60.

4. In *liturgics*: (a) A lesson from the Old Testament, especially a eucharistic or missal lesson; also, a lesson in the Mozarabic daily office, and in the Greek Church at sabbath vespers on certain festivals. (b) The canticle Benedictus (Luke i. 68-79) as sung in the Gallican liturgy, afterward displaced by the Gloria in Excelsis.—*Syn. I. Divination, etc.* See *prediction*.

prophecy-monger (prof'e-si-mung'gér), *n.* One who deals in prophecies: so called in contempt.

The English [are] observed by forerunners to be the greatest *prophecy-mongers*, and whilst the Devil knows their diet, they shall never want a dish to please the palate.
Fuller, Ch. Hist., IV. II. 46. (Davies.)

prophesier (prof'e-si-ér), *n.* [*< prophesy + -er.*]

One who prophesies or predicts.

Saynt Dauid of Wales, the great archbishop of Menevia, had many *prophesiers* and manye angels sent afore to geue warning of his coming . . . years ere he was borne.
Bp. Bale, English Votaries, I.

The counterfeit module has deceived me, like a double-meaning *prophesier*.
Shak., All's Well, iv. 3. 115.

prophecy (prof'e-si), *v.*; pret. and pp. *prophesied*, ppr. *prophesying*. [Formerly also *prophecy*, < late ME. *prophecie, proficy*; < *prophecy, n.* The orig. long final syllable, having retained its accent, though now secondary, has undergone the usual change of long accented ME. *i*, as in

Tennyson, St. Simeon Stylites.

II. intrans. 1. To speak by divine inspiration; utter or tell as prophet.

Again he said unto me, *Prophecy* upon these bones, and say unto them, O ye dry bones, hear the word of the Lord. *Ezek. xxxvii. 4.*

The prophets . . . *propheesied* of the grace that should come unto you. *1 Pet. i. 10.*

2. To utter predictions; foretell future events.

Prophecy not in the name of the Lord, that thou die not by our hand. *Jer. xi. 21.*

3. To interpret or explain Scripture or religious subjects; preach; exhort.

In the afternoon, Mr. Roger Williams (according to their custom) propounded a question, to which the pastor, Mr. Smith, spake briefly: then Mr. Williams *propheesied*.
Winthrop, Hist. New England, i. 109.

They also allowed greater liberty to *prophecy* than those before them; for they admitted any member to speak and pray as well as their pastor.

Penn. Rise and Progress of Quakers, i.

propheying (prof'e-si-ing), *n.* [Verbal *n.* of *prophecy*, *v.*] 1. Preaching; religious exhortation; the act of speaking on religious subjects.

The Liberty of *Propheying*. [Title.] *Jer. Taylor.*

The Puritans maintained frequent religious exercises, in which texts of Scripture were interpreted or discussed, one speaking to the subject after another, in an orderly method. This was called *propheying*, in reference to 1 Corin. xiv. 31: Ye may all *prophecy*, that all may learn, and all may be comforted.

Neal, in New England's Memorial, p. 171, note.

2. The act of foretelling.

prophet (prof'et), *n.* [*< ME. propheta, profet, profite, < OF. prophete, profete, F. prophete = Pr. Pg. propheta = Sp. It. profeta = OFries. propheta = D. profet = MLG. prophete = MHG. prophete, G. prophet = Sw. Dan. profet, < LL. propheta, prophetes = Goth. prauftēs, prauftēs, < Gr. προφήτης, Doric προφήτης, one who speaks for a god, an interpreter (as Tiresias was of Zeus, Orpheus of Bacchus, Apollo of Zeus, the Pythia of Apollo), expounder (as those who interpreted the words of the inspired seers), proclaimer, harbinger (as the bowl is of mirth, or the cicada of summer), in the Septuagint an interpreter, spokesman, usually an inspired prophet, also a revealer of the future, in N. T. and eccl. an interpreter of Scripture, a preacher, < προφάνα, say before or beforehand, < πρό, before, in public, + φάνα, speak, say: see *fable, fame, fate.*] 1. One who speaks by a divine inspiration as the interpreter through whom a divinity declares himself. In the times of the Old Testament there was an order of prophets, for the duties of whose office men were trained in colleges called *schools of the prophets*. The members of these schools acted as public religious teachers, and the prophets in the stricter sense (inspired teachers) generally belonged to this order. In the New Testament, Christian prophets were recognized in the church as possessing a charism distinct from that of mere teachers, and as uttering special revelations and predictions. They are often mentioned with apostles, and next after them in order.*

Ihesus that sprong of Iesse roote,
As us hath prechid thi *prophete*.
Hymns to Virgin, etc. (E. E. T. S.), p. 12.

The word *prophet* (προφήτης) was derived in the first instance from the interpreters of the will of the gods (see Pindar, N., i. 91); later and especially it was applied to those who expounded the unintelligible oracles of the Pythoness of Delphi, or the rustling of the leaves of Dodona. In a metaphorical sense it was used of poets, as of interpreters of the gods or Muses. It was then adopted by the Septuagint as the best equivalent of the *nabi* or *prophet* of the Old Testament. . . . In all these cases (Acts ii. 17, 18; xiii. 1; xv. 32; Rev. i. 3; xl. 3, 6, 10, 18; xvi. 6; xviii. 20, 24; xix. 10; xxii. 6, 7, 9, 10, 18), in the New Testament as in the Old, and it may be added in the Koran, the prominent idea is not that of prediction, but of delivering inspired messages of warning, exhortation, and instruction; building up, exhorting, and comforting; convincing, judging, and making manifest the secrets of the heart (1 Cor. xiv. 3, 24, 25). The ancient classical and Hebrew sense prevails everywhere. Epimenides and Mahomet on the one hand, Elijah and Paul on the other, are called *prophets*, not because they foretold the future, but because they enlightened the present.

A. P. Stanley, Com. on Corinthians, p. 243.

2. One who foretells future events; a predictor; a foreteller; especially, a person inspired to announce future events.

As he spake by the mouth of his holy *prophets*, which have been since the world began: That we should be

saved from our enemies, and from the hand of all that hate us. *Luke i. 70.*

Polybius was of the best sort of *prophets*, who predict from natural causes those events which must naturally proceed from them. *Dryden, Character of Polybius.*

I do rest

A *prophet* certain of my prophecy,
That never shadow of mistrust can cross
Between us. *Tennyson, Geraint.*

3. An orthopterous insect of the family *Mantidae*. [Local, U. S.]—**French prophets**, a name sometimes given in England to the Camisards.—**Major prophets**, Isaiah, Jeremiah, Ezekiel, and Daniel; also, the books of their prophecies in the Old Testament.—**Minor prophets**, the writers of the Old Testament from Hosea to Malachi inclusive; also, their books. The distinction between *major* and *minor* relates to the size of the books.—**School of the prophets**, among the ancient Jews, a school or college in which young men were educated and qualified to be public teachers. One elderly or leading prophet presided over them, called their *father* or *master*; hence the students were called *sons of the prophets*. Their chief subject of study was the law and its interpretation, but music and sacred poetry were subsidiary branches of instruction.—**The prophets**, those books of the Old Testament which are largely composed of prophecies, or which were written or compiled by members of the order of prophets. The ancient Jews sometimes divided the Old Testament into the Law (Pentateuch) and the *Prophets*, and sometimes (as still in Hebrew Bibles) into Law, *Prophets*, and *Hagiographa*. In Hebrew Bibles the *Former Prophets* are Joshua, Judges, I. and II. Samuel, and I. and II. Kings; the *Latter Prophets* are the books from Isaiah to Malachi inclusive, with the exception of Lamentations and Daniel, which are placed in the *Hagiographa*.

On these two commandments hang all the law and the *prophets*. *Mat. xxii. 40.*

=**Syn. 1. Prophet, Seer, Soothsayer.** A *prophet* is properly one who discloses or speaks forth to others the will of God; a *seer* is one who has himself learned God's will by a vision. Both titles were applied in the Old Testament to the same class of men, but at different times. The extra-Biblical uses of the words correspond to the Biblical. The word *prophet* is sometimes used in the Bible of a candidate for the prophetic office, or of an inspired preacher or interpreter. *Soothsayer*, as used in the Bible, implies imposture, and in other literature its standing is little better.

Beforetime, in Israel, when a man went to enquire of God, thus he spake, Come, and let us go to the *seer*: for he that is now called a *Prophet* was beforetime called a *Seer*. *1 Sam. ix. 9.*

They had with them inspired men, *Prophets*, and it were not sober to say they did ought of moment without divine intimation. *Milton, Church-Government, l. 2.*

The secret which the king hath demanded cannot . . . the *soothsayers* shew unto the king. *Dan. ii. 27.*

prophett (prof'et), *v. i.* [*< prophet, n.*] To prophesy. [Rare.]

Nor *propheting* Helenus, when he foretold dangerous hard
haps,
Forsake this burial mourning.

Stanislaus, Æneid, iii. 727. (Davies.)

prophetet, n. A Middle English form of *prophit*.
prophetess (prof'et-es), *n.* [*< F. prophétesse = Pg. prophetiza = Sp. profetisa = It. profetessa, < LL. prophetissa, a prophetess, < propheta, a prophet: see prophet.*] A female prophet; a woman who speaks with inspiration or foretells future events.

Ourselves have often tried
Valkyrian hymns, or into rhythm have dash'd
The passion of the *prophetesses*.
Tennyson, Princess, iv.

prophet-flower (prof'et-flou'ér), *n.* A boraginaceous herb, *Arnebia Griffithii*, found in northwest India, etc., and somewhat cultivated for its interesting flowers. The corolla is funnel-shaped, of a bright primrose-yellow, the limb at opening marked with five dark spots which fade away as the day advances. The flowers are racemed, the plant hairy. The name is of Mussulman origin, probably suggested by the somewhat crescent-shaped spots.

prophethood (prof'et-húd), *n.* [*< prophet + -hood.*] The quality or condition, or the position or office, of a prophet.

His environment and rural *prophethood* has hurt him [Wordsworth] much. *Carlyle, in Froile, l. 27.*

prophetic (prō-fet'ik), *a.* [*< F. prophétique = Pg. profetico = Sp. profético = It. profetico (cf. D. profetisch = G. prophetisch = Sw. Dan. profetisk), < LL. propheticus, < Gr. προφητικός, pertaining to a prophet or to prophecy, < προφήτης, a prophet: see prophet.*] 1. Pertaining or relating to a prophet or to prophecy; having the character of prophecy; containing prophecy: as, *prophetic* writings.

Till old experience do attain
To something like *prophetic* strain.
Milton, Il Penseroso, l. 174.

It was with something of quite true *prophetic* fervour that each of these [Byron and Shelley] . . . denounced the hypocrites which they believed they saw around them. *J. C. Shairp, Aspects of Poetry, p. 119.*

2. Presageful; predictive: with of before the thing foretold.

And fears are oft *prophetic* of the event.
Dryden, tr. of Ovid's Metamorph., x. 46.

3. Anticipative; having or tending to a presentiment or an intuitive discernment of the future.

O my *prophetic* soul! my uncle!
Shak., Hamlet, i. 5. 40.

prophetic (prō-fet'i-kal), *a.* [*< prophetic + -al.*] Same as *prophetic*.

God hath ended us . . . with the heavenly support of *prophetic* revelation, which doth open those hidden mysteries that reason could never have been able to find out. *Hooker, Eccles. Polity, i. 15.*

propheticality (prō-fet-i-kal'i-ti), *n.* [*< prophetic + -ity.*] Propheticalness. *Coleridge.* [Rare.]

prophetically (prō-fet'i-kal-i), *adv.* [*< prophetic + -ly.*] In a prophetic manner; by way of prediction; in the manner of prophecy.

They *prophetically* did fore-signify all such sects to be avoided. *Jer. Taylor, Works (ed. 1835), i. 883.*

propheticalness (prō-fet'i-kal-nes), *n.* [*< prophetic + -ness.*] The character of being prophetic. [Rare.]

prophetism (prof'et-izm), *n.* [*< prophet + -ism.*] The system, practice, or doctrine of inspired teaching. *The American, XIII. 59.*

prophetizer (prof'et-iz), *v. i.* [*< F. prophétiser = Sp. profetizar = Pg. profetizar = It. profetizzare, < LL. profetizare, < Gr. προφητίζειν, be a prophet, prophesy, < προφήτης, a prophet: see prophet.*] To utter predictions; prophesy.

Nor, thril'd with bodkins, raises in frantik-wise,
And in a furie seems to *prophesize*.
Sylvester, tr. of Du Barlas's Weeks, ii. The Schiame.

Nature . . . so doth warning send
By *prophesizing* dreams. *Daniel, Civil Wars, iii.*

prophethip (prof'et-ship), *n.* [*< prophet + -ship.*] Same as *prophethood*.

To deny Mahomet's *prophethip* would excite a violent antagonism. *B. Taylor, Lands of the Saracen, p. 24.*

prophitet, n. A Middle English form of *prophit*.
prophloëm (prō-flō'ēm), *n.* [*< pro- + phloëm.*] A tissue in the sporophore of mosses, resembling the phloëm of ordinary stems in microscopic structure, and corresponding to it in position.

prophorici (prō-for'ik), *a.* [*< Gr. προφορικός, pertaining to utterance, < προφορά, a bringing forward, utterance, < προφέρω, bring forward, < πρό, forward, + φέρω, bring, bear, = E. bear.*] Enunciative. *Wright.*

O what wad ye do to me?

Lady Anne (Child's Ballads, II. 264).

propinquate (prō-ping'kwāt), *v. t.*; pret. and *pp.* *propinquated*, *ppr.* *propinquating*. [*L.* *propinquatus*, *pp.* of *propinquare*, bring near, hasten, < *propinquus*, near: see *propinquity*. Cf. *appropinque*.] To approach; be near. *Imp. Dict.*

propinque (prō-ping'k'), *a.* [= *Sp.* *propinquo* = *Pg.* *It.* *propinquo*, < *L.* *propinquus*, near, < *prope*, near.] Near; contiguous. *Swan*, Speculum Mundi, p. 81. (*Latham*.)

propinquity (prō-ping'kwī-ti), *n.* [*ME.* *propinquitie*, < *OF.* *propinquite* = *Sp.* *propinquitad* = *Pg.* *propinquitad* = *It.* *propinquità*, < *L.* *propinquità*(*t*), vicinity, nearness, < *propinquus*, near: see *propinquate*.] 1. Nearness in place; neighborhood.

It was delightful to see . . . his pure joy in her *propinquity*; he asked nothing, sought nothing, save to be near the beloved object.

Hawthorne, Marble Faun, ix.

2. Nearness in time.

Thereby was declared the *propinquity* of their desolations, and that their tranquillity was of no longer duration than those soon decaying fruits of summer.

Sir T. Browne.

3. Nearness of blood; kindred.

Here I disclaim all my paternal care,

Propinquity, and property of blood.

Shak., Lear, I. 1. 116.

They may love other individuals far better than their relatives, . . . but yet, in view of death, the strong prejudice of *propinquity* revives, and impels the testator to send down his estate in the line marked out by custom so immemorial that it looks like nature.

Hawthorne, Seven Gables, I.

propilic (prō-pi-ol'ik), *a.* [*< propi(onic) + -ol + -ic*.] Noting an acid derived from a monovalent radical C₂H₃.—**Propilic acid**, the abbreviated commercial name for ortho-nitrophenyl-propilic acid, one of the coal-tar derivatives, which, although colorless in itself, may be converted in calico-printing into indigo blue on the fiber. It is a very close approach both chemically and physically to natural indigo. In its application borax is used as a solvent, xanthate of soda as a reducing agent, and starch as a thickening.

propionate (prō-pi-ō-nāt), *n.* [*< propionic + -ate*.] In *chem.*, a compound of propionic acid and a base. See *propionic*.

propionic (prō-pi-on'ik), *a.* [*< Gr.* *πρό*(*ος*), first, + *πινω*, fat, + *-ic*.] Noting an acid (C₃H₅O₂), the third substance in the monatomic fatty series.—**Propionic acid**, a colorless liquid, with a pungent odor like that of acetic acid, found in perspiration, the juices of the stomach, the blossoms of milfoil, etc. It is monobasic, forming salts called *propionates*, which have a fatty feel, whence the name.

propisat, *a.* See *propice*.

Propithecus (prō-pi-thē'kus), *n.* [*NL.* (Bennett, 1832), < *Gr.* *πρό*, before, + *πίθηκος*, an ape: see *Pithecius*.] A genus of lemuroid animals of Madagascar, of the family *Lemuridae* and subfamily *Indridinae*, established upon the *Propithecus diademata*, the diadem-lemur.

propitiable (prō-pish'i-ā-bl), *a.* [*OF.* *propitiabile*, *propiciabile*, < *L.* *propitiabilis*, easy to be appeased, < *propitiare*, appease: see *propitiate*.] Capable of being propitiated; that may be made propitious.

It could never enter into my mind that he [God] was either irritable or *propitiable* by the omitting or performing of any mean and insignificant services.

Dr. H. More, Gen. Pref. to Philoa. Writings, p. x.

propitiate (prō-pish'i-āt), *v.*; pret. and *pp.* *propitiated*, *ppr.* *propitiating*. [*< L.* *propitiatus*, *pp.* of *propitiare* (> *It.* *propitiare* = *Pg.* *Sp.* *propiciar* = *F.* *propititer*), appease, < *propitius*, favorable, well-disposed: see *propitious*.] 1. *trans.* To appease and render favorable; make propitious; conciliate.

Let fierce Achilles, dreadful in his rage,
The god *propitiate* and the pest assuage.

Pope, Iliad, I. 192.

He [Frederic William] could always be *propitiated* by a present of a grenadier of six feet four or six feet five.

Macaulay, Frederic the Great.

II. *intrans.* To make propitiation or atonement.

propitiation (prō-pish'i-ā'shon), *n.* [*< F.* *propitiation* = *Sp.* *propiciacion* = *Pg.* *propiciacão* = *It.* *propiziazione*, < *LL.* *propitiatio*(*n*), an appeasing, an atonement, < *L.* *propitiare*, *pp.* *propitius*, appease: see *propitiate*.] 1. The act of propitiating; the act of making propitious. — 2. That which propitiates or appeases; that which furnishes a reason for not executing a punishment justly due for wrong-doing; specifically, in the New Testament, Christ himself, because his life and death furnish a ground for the forgiveness of sins.

And he is the *propitiation* for our sins; and not for ours only, but also for the sins of the whole world.

1 John II. 2.

= *Syn.* *Atonement*, *Reconciliation*, *Propitiation*, *Expiation*, *Satisfaction*. By derivation and by Biblical usage *atonement* and *reconciliation* are essentially the same: two that were alienated are made at one, or put back into friendship. *Atonement*, however, is not now applied to the relation of man to man, except in its extra-Biblical extension, by which it means also the making of full and satisfactory amends (*satisfaction*) or the enduring of proper penalties (*expiation*) for a great wrong: as, there could be no *atonement* for such an outrage. As applied to the relations of God and man, *atonement* has been lifted into much greater dignity than any other word in the list; it is now the august, chosen, and only endeared word for the effect of the life and especially of the death of Christ in establishing right relations between God and man; *reconcile* and *reconciliation* are the principal words for this in the New Testament, *atonement* being used only once, and *atone* not at all. *Propitiation* is the only one of these words having exclusive reference to the feelings or purposes of the person or being offended; it is a severe word, implying slowness to relent, and is, in regard to the attitude of God toward man, chiefly a theological term. *Expiation* regards the guilt of the offense; it is the suffering of the penalty proper for an act (as, to make *expiation* for one's crime upon the scaffold), or of an adequate substituted pain. The word is general, and only barely Biblical (Num. xxxv. 83, margin, and revised version), although the fact is by the mass of Christians believed to lie in some form in the sufferings of Christ. *Satisfaction* in this connection means adequate amends: as, *satisfaction* for an insult or for damage; the word has been taken by a school in theology to express the sufficiency of the sufferings of Christ to meet the demands of the retributive justice of God.

The *atonement* has for its object to restore that relation of man to God which sin had disturbed, and to reconcile the sinner to God.

Ulmann, Sinlessness of Jesus (trans.), IV. II. § 2.

The doctrine of *Reconciliation* has not escaped the fate of other Christian truths; it has done and is doing its work in converting the world, and consoling many a

crushed heart; but at the same time the terms in which it should be set forth have been disputed, and sometimes the doctrine itself denied.

W. Thomson, in Aids to Faith, Essay viii., Int.

We may have it as our privilege, I think, when our mind recoils from the tremendous difficulty of *propitiation* itself, to carry the whole matter up above the ranges of time, and look on him who stands there "in the midst of the throne, as it had been a Lamb slain from the foundation of the world."

H. Bushnell, Forgiveness and Law, I. 4.

In the great tragic poet *Æschylus* is a striking instance of *λύσις* in the sense of an *expiation* or *atonement* for murder. The chorus of mourning women, bewailing the untimely end of Agamemnon, exclaim, "What *atonement* is there for blood that has fallen on the ground? . . . All the rivers moving in one channel would flow in vain to purify murder." *J. P. Thompson*, Theology of Christ, v.

Satisfaction expresses the relation which the work of Christ sustains to the demands of God's law and justice.

A. A. Hodge, Outlines of Theology, xxii. 2.

propitiator (prō-pish'i-ā-tor), *n.* [*< F.* *propitiateur* = *Sp.* *Pg.* *propiciador* = *It.* *propitiatore*, < *LL.* *propitiator*, a peacemaker, < *L.* *propitiare*, *pp.* *propitius*, appease: see *propitiate*.] One who propitiates. *Johnson*.

propitiatorily (prō-pish'i-ā-tō-ri-li), *adv.* [*< propitiatory + -ly*.] By way of propitiation.

propitiatory (prō-pish'i-ā-tō-ri), *a.* and *n.* [= *F.* *propitiatoire* = *Sp.* *Pg.* *propiciatorio* = *It.* *propiziatorio*, < *LL.* *propitiatorius*, atoning, reconciling, < *L.* *propitiatus*, *pp.* of *propitiare*, appease: see *propitiate*.] 1. *a.* Having the power to make propitious; effecting or intended to effect propitiation: as, a *propitiatory* sacrifice.

Christ's sacrifice on the cross was the only perfect and all-sufficient *propitiatory* sacrifice "for the sins of the world."

J. Bradford, Works (Parker Soc., 1853), II. 285.

When the predominance of the chief has become so decided that he is feared, he begins to receive *propitiatory* presents.

H. Spencer, Prin. of Sociol., § 542.

II.† *n.* 1. In *Jewish antiq.*, the mercy-seat; the lid or cover of the ark of the covenant, lined within and without with plates of gold.

But now hath God declared Christ to be unto all people the very *propitiatory*, mercie table, and sacrifice.

J. Udall, On Rom. III.

They [Joseph and Mary], like the two cherubims about the *propitiatory*, took the Child between them.

Jer. Taylor, Works (ed. 1835), I. 76.

2. A propitiation.

God hath set forth Christ to be the *propitiatory* in his blood.

Locke, On Rom. III. 25.

propitious (prō-pish'us), *a.* [= *OF.* *propice* (> obs. *E.* *propice*) = *Sp.* *Pg.* *propicio* = *It.* *propizio*, < *L.* *propitius*, favorable, well-disposed, kind (usually said of deities); origin unknown. Some conjecture it to have been orig. a term in augury with ref. to the flying of birds, < *L.* *pro*, forward, + *petere*, seek, orig. fly (see *petition*); according to another view, < *L.* *prope*, near.] 1. Favorably disposed; ready to grant a favor or indulgence; kind; disposed to be gracious or merciful; ready to forgive and bestow favors.

My Maker, be *propitious* while I speak!

Milton, P. L., viii. 380.

Would but thy sister Marcella be *propitious*
To thy friend's vows.

Addison, Cato, I. 2.

As *propitious* Heav'n might send
What once I valu'd and could boast, a friend.

Conquer, Retirement, I. 377.

2. Affording favorable conditions or circumstances; favorable: as, a *propitious* season.

That diet which is most *propitious* to one is often pernicious to another.

Burton, Anat. of Mel., p. 224.

No time could be more *propitious* than the present.

D. Webster, Speech, June 17, 1825.

= *Syn.* 1. *Gracious*, *benign*. — 2. *Auspicious*, *Propitious*, *promising*. *Auspicious* cannot be safely used in any meaning beyond that of giving omen or indication of success; an *auspicious* event is one that seems an omen of prosperity for that which follows. *Auspicious* could be applied to a person only by a highly figurative use of the word. The earlier tendency to use the word outside of the limits here indicated is not now sanctioned by good usage. *Propitious* applies primarily to persons, but may be freely extended by figure to things. *Propitious* goes beyond *auspicious* in representing a benign disposition and manner, leading one to expect a kind reception and help.

Auspicious omens from the past and present cheer us for the future.

Sumner, Orations, I. 169.

And now 't' assuage the force of this new flame,
And make thee more *propitious* in my need,
I mean to sing the praises of thy name.

Spenser, Hymne in Honour of Love, I. 9.

Sure some *propitious* planet then did smile,
When first you were conducted to this isle.

Dryden, To Sir Godfrey Kneller, I. 133.

propitiouly (prō-pish'us-li), *adv.* In a propitious manner; favorably; kindly.

propitiousness (prō-pish'us-nes), *n.* The state or character of being propitious, in any sense of that word.

The *propitiousness* of climate to that sort of tree.

Sir W. Temple, *Anc. and Mod. Learning*.

prop-joint (prop'joint), *n.* In carriage-making, a jointed bar which spreads the bows of a ca-lash-top. *E. H. Knight*. Compare *rule-joint*.

proplasm (prō-plazm), *n.* [*Gr. πρόπλασμα*, a model, *κ πρό*, for, before, + *πλάσσειν*, form, mold, shape: see *plasm*.] A mold; a matrix.

Those shells serving as *proplasms* or moulds to the matter which so filled them.

Woodward, *Essay towards a Nat. Hist. of the Earth*.

We gather that the mysterious Spirit is merely the noumenon or *proplasm* of physical and psychical phenomena. Now it is surely far simpler and better to speak of this *proplasm* as Matter, and thus avoid the very equivocal term Spirit.

London, *Jour. of Sci.*, No. cxxiv. 242.

proplastic (prō-plas'tik), *a.* [*Gr. πρό*, for, before, + *πλαστικός*, pertaining to molding or modeling: see *plastic*.] Forming a mold or cast.

proplastics (prō-plas'tiks), *n.* [Pl. of *proplastic* (see -ics).] The art of making molds for castings, etc.

prop-leg (prop'leg), *n.* In entom., same as *pro-leg*.

propleural (prō-plō'ral), *a.* [*Gr. προπλευρον* + *-αλ*.] Anterior and lateral or pleural, as a part of the prothorax; of or pertaining to the propleura.

propleuron (prō-plō'ron), *n.*; pl. *propleura* (-rā). [NL., *Gr. πρό*, before, + *πλευρά*, side: see *pleuron*.] The lateral part of the prothorax; a prothoracic pleuron. There are two propleura, right and left; and each propleuron is typically divided into three sclerites—an episternum, an epimeron, and a parateron.

proplex (prō'pleks), *n.* [*NL. proplexus*, *q. v.*] Same as *proplexus*.

proplexus (prō-plek'sus), *n.*; pl. *proplexus* or *proplexuses*. [NL., *Gr. πρό*, before, + *πλεξω*, a braiding: see *plexus*.] The plexus of the procellia; the choroid plexus of either lateral ventricle of the brain. *Wilder and Gage, Anat. Tech.*, p. 485.

propodeum (prō-pō'dē-um), *n.*; pl. *propodea* (-ā). [NL., irreg. *Gr. πρό*, before, + *πόδες*, fundaments.] In entom., a part of the thorax immediately over and partly surrounding the insertion of the abdomen, seen principally in the *Hymenoptera*. It is originally the first abdominal segment, which, during the development of the larva and pupa, becomes transferred to the thorax, and so intimately joined with it that it appears to be a part of the last thoracic ring.

propodia, *n.* Plural of *propodium*.

propodial (prō-pō'di-al), *a.* and *n.* [*Gr. προποδια* + *-αλ*.] 1. *a.* 1. Of or pertaining to the propodium of a mollusk.—2. Of or pertaining to the propodialia.

II. *n.* Same as *propodium*.

Limbs consisting of one basal element, two *propodia*, and metapodia and digits. *Amer. Nat.*, XXIII. 852.

propodialia (prō-pō'di-ā-li-ā), *n. pl.* [NL., *Gr. προποδια*, before the feet: see *propodium*.] The bones of the proximal segment of both fore and hind limbs (that is, the humerus and femur) taken together or considered as corresponding to each other. See *epipodialia*.

propodite (prop'ō-dit), *n.* [*Gr. πρό*, before, + *πούς* (pod-), = *E. foot*, + *-ιτελ*.] In *Crustacea*, the sixth (penultimate) joint of a developed endopodite, between the carpopodite and the dactylopodite. In a lobster, for example, it is the joint which with the movable dactylopodite makes the nipper or chelate claw. *Milne-Edwards; Huxley*. Also *propodoe*. See cut under *endopodite*.

propoditic (prop'ō-dit'ik), *a.* [*Gr. προποδitic* + *-ic*.] Of or pertaining to the propodite of the limb of a crustacean.

propodium (prō-pō'di-um), *n.*; pl. *propodia* (-ā). [NL., *Gr. προποδια*, before the feet, *κ πρό*, for, before, + *πούς* (pod-), = *E. foot*.] The anterior one of the three median parts into which the foot of some mollusks may be divided: correlated with *mesopodium* and *metapodium*. Also *propodial*. Compare *epipodium*.

propodos (prop'ō-dos), *n.* Same as *propodite*.

propolis (prop'ō-lis), *n.* [*Gr. πρόπολις*, *Gr. πρόπολις*, the substance with which bees line and fence their hives, the suburb or outer part of a city, *κ πρό*, for, before, + *πόλις*, city.] A red, resinous, odorous substance having some resemblance to wax and smelling like storax. It is collected by bees from the viscid buds of various trees, and used to stop the holes and crevices in their hives to prevent the entrance of cold air, to strengthen the cells, etc. Also called *bee-glue*.

Speaking of the honey-bee reminds me that the subtle and slight-of-hand manner in which it fills its baskets with pollen and *propolis* is characteristic of much of nature's doings.

The Century, XXV. 678.

propolize (prop'ō-liz), *v. t.*; pret. and pp. *propolized*, ppr. *propolizing*. [*Gr. propolis* + *-ize*.] To cover with propolis. *Phin, Dict. Apiculture*, p. 55.

propone (prō-pōn'), *v. t.*; pret. and pp. *proponed*, ppr. *proponing*. [= *Sp. proponer* = *Pg. pro-por* = *It. proporre*, *proponere*, *L. proponere*, set forth, place before, *κ pro*, forth, before, + *ponere*, set, place: see *ponent*. Cf. *propound*, a doublet of *propone*.] 1. To put forward; propose; propound.

He [Aristotle] . . . neuer *propones* any allegation, or makes any surmise, but he yields a reason or cause to fortify and prove it. *Puttenham, Arte of Eng. Poesie*, p. 191.

He *proponed* unto me sundry questions, both touching religion, and also the state of our country.

Hakluyt's Voyages, I. 346.

2. In *Scots law*, to bring forward; state.

Denying fiercely al the other new invencions alleged and *propounded* to his charge.

Hall's Union (1548). (Halliwell.)

Pleas *propounded* and *repelled*, in *Scots law*, pleas stated in court, and overruled before decree.

proponent (prō-pō'nent), *a.* and *n.* [= *Sp. Pg. It. proponente*, *L. proponen(-t)s*, ppr. of *proponere*, set forth, place before: see *propone*.] 1. *a.* Making proposals; proposing.

For mysterious things of faith rely

On the *proponent* Heaven's authority.

Dryden, *Blind and Panther*, I. 121.

II. *n.* 1. One who makes a proposal, or lays down a proposition.—2. In law, one who propounds a will for probate.

propions (prō'ponz), *n.* [*L. pro*, before, + *pons*, bridge: see *pons*.] In anat., a small bundle of transverse fibers just below the pons, crossing the proximal end of the pyramid. Also called *ponticulus*.

proporti, *v. t.* An obsolete form of *purport*.

proportion (prō-pōr'shon), *n.* [*Gr. προποριον*, *proportion*, *OF. proportion*, *proportion*, *F. proportion* = *Sp. proporcion* = *Pg. proporção* = *It. proporzione*, *L. proportio(n)-*, comparative relation, proportion, symmetry, analogy, *κ pro*, for, before, + *portio(n)-*, share, part: see *portion*.] 1. The relation of one thing to another in respect to size, quantity, magnitude of corresponding parts, capacity, or degree.

He must be little skilled in the world who thinks that men's talking much or little shall hold *proportion* only to their knowledge.

Locke.

Every thing must bear a *proportion* with the outward value that is set upon it.

Steele, *Tatler*, No. 171.

In *proportion* as men know more and think more, they look less at individuals and more at classes.

Macaulay, *Milton*.

Justice can be well administered only in *proportion* as men become just.

H. Spencer, *Social Statics*, p. 289.

2. Specifically, the relation of one part to another or to the whole with respect to magnitude; the relative size and arrangement of parts: as, the *proportion* of the parts of an edifice, or of the human body. Commonly in the plural.

The system of definite *proportion* which the Greeks employed in the design of their temples was another cause of the effect they produce even on uneducated minds.

J. Ferguson, *Hist. Arch.*, I. 251.

The three vast recesses [of the facade of Peterborough Cathedral: see cut under *portal*] have not, as they have at Lincoln, any correspondence with the *proportions* of the nave and aisles which they terminate. Being of equal height, and the narrow one being in front of the wide central aisle while the wide ones fall in front of the narrow side aisles, they wholly contradict these *proportions*.

Moore, *Gothic Architecture*, p. 165.

3. Symmetrical arrangement, distribution, or adjustment; the proper relation of parts in a whole; symmetry or harmony.

See cometh to you with words sent in delightfull *proportion*, either accompanied with or prepared for the well enchanting skill of Musick.

Sir P. Sidney, *Apol. for Poetrie*, p. 40.

Statues which are placed on high are made greater than the life, that they may descend to the sight in their just *proportion*.

Dryden, *Essay on Dram. Poesy*.

[We.] your guilty Subjects, . . . have held pace and *proportion* with you in our evil wayes.

N. Ward, *Simple Cobler*, p. 68.

4. That which falls to one's lot when a whole is divided according to a rule or principle; just or proper share; in general, portion; lot.

Wee were all constrained to live only on that Smith had only for his owne Companie, for the rest had consumed their *proportions*.

Quoted in *Capt. John Smith's Works*, II. 1.

I have received my *proportion*, like the prodigious son.

Shak., *T. G. of V.*, II. 3. 3.

5. Form; shape; figure.

I thought King Henry had resembled thee

In courage, courtship, and *proportion*.

Shak., *2 Hen. VI.*, I. 3. 57.

Look; here 's a face now of another making,

Another mould; here 's a divine *proportion*.

Fletcher (and another), *Prophetae*, III. 3.

The people . . . [are] generally tall and straight, of a comely *proportion*.

Capt. John Smith, *Works*, I. 129.

6. In *math.*, the equality of ratios or relations; analogy. Complicated and difficult definitions of this word were given by Euclid and the old mathematicians, because they were unwilling to regard a ratio as a quantity capable of equality; but it is now recognized that such generalizations are at once the most profound and the most intelligible way throughout mathematics.

When he hadde founde his firste mansion [in astrology], He knew the remenant by *proportion*.

Chaucer, *Franklin's Tale*, I. 558.

7. In *music*: (a) The ratio between the vibration-numbers of two tones. (b) Same as *rhythm* or *meter*.—8. In *arith.*, the rule of three; that rule which, according to the theory of proportion, enables us to find a fourth proportional to three given numbers—that is, a number to which the third bears the same ratio as the first does to the second.—Academic proportions. See *Figures of academic proportions*, under *academic*.—Alternate proportion. See *alternate*.—Combining proportions. Same as *definite proportions*.—Composition of proportion. See *composition*.—Compound proportion, the equality of the ratio of two quantities to another ratio, the antecedent and consequent of which are respectively the products of the antecedents and consequents of two or more ratios.—Continued proportion, a succession of several equal ratios the consequent of each of which is identical with the antecedent of that which follows, as 8 : 12 = 12 : 18 = 18 : 27, etc.—Contra-arithmetical proportion, contraharmonical mean and proportion, definite proportions. See the adjectives.—Conversion of proportions. See *conversion*.—Direct proportion. See *direct ratio*, under *ratio*.—Discrete proportion. See *discrete*, 2.—Duplicate, geometrical, harmonic, inordinate proportion. See the adjectives.—Gunter's proportion. Same as *Gunter's line* (a) (which see, under *line*).—Inverse proportion. See *reciprocal proportion*.—Law of multiple proportion. See *multiple*.—Mixed ratio or proportion. See *mixed*.—Musical proportion. Same as *harmonic proportion*.—Reciprocal or inverse proportion, an equality between a direct and a reciprocal ratio, or a proportion in which two of the quantities are taken inversely: thus, the ratio of 4 to 2 is that of 3 to 6 taken inversely, or 4 : 2 = 3 : 6.—Simple proportion, the equality of the ratio of two quantities to that of two other quantities.—Syn. 3. See *symmetry*.

proportion (prō-pōr'shon), *v. t.* [*Gr. προποριον*, *proportion*, *OF. proportionner*, *proportionner*, *F. proportionner* = *Sp. Pg. proporcionar* = *It. proporcionare*; from the noun.] 1. To adjust in suitable relations; adapt harmoniously to something else as regards dimensions or extent: as, to *proportion* the size of a building to its height, or the thickness of a thing to its length; to *proportion* expenditure to income.

He . . . [advises] men to live within Bounds, and to *proportion* their Inclinations to the Extent of their Fortune.

Congress, tr. of Juvenal's *Satires*, xi. Arg.

Fortunately, the Sphinx proposes her conundrums to us one at a time, and at intervals *proportioned* to our wits.

Lowell, *Address at Harvard Anniversary*.

2. To form with symmetry; give a symmetrical form to.

Sir, geff thou wilt wrappe thy soneraynes bred stately, Thou must square & *porporcion* thy bred cleane and evenly.

Babees Book (E. E. T. S.), p. 130.

Nature had *proportioned* her without any fault quickly to be discovered by the senses.

Sir P. Sidney.

3. To bear proportion or adequate relation to; correspond to.

Bid him therefore consider of his ransom, which must *proportion* the losses we have borne.

Shak., *Hen. V.*, III. 6. 134.

4. To divide into portions; allot; apportion.

Next, for your monthly pains, to shew my thanks, I do *proportion* out some twenty ducats.

Fletcher, *Spanish Curate*, II. 2.

Here are my commodities, whereof take your choice, the rest I will *proportion* fit bargains for your people.

Quoted in *Capt. John Smith's Works*, I. 214.

5. To compare; estimate the relative proportions of.

Now, Penshurst, they that will *proportion* thee With other edifices, when they see Those proud ambitious heaps, and nothing else, May say their lords have built, but thy lord dwells.

B. Jonson, *The Forest*.

Fond earth! *proportion* not my seeming love To my long stay.

Quarles, *Emblems*, IV. 2.

6. In *type-manuf.*, to adjust (a font of type) so that it shall contain the proper number of each letter, point, etc.

proportionable (prō-pōr'shon-a-bl), *a.* [*OF. proportionabile*, *proportionabile* = *Sp. proporcionable* = *Pg. proporcionavel* = *It. proporzionabile*, *L. proportionabilis* (in adv. *proportionabiliter*), *L. proportio(n)-*, proportion: see *proportion*.] Capable of being proportioned or made proportional; also, being in due propor-

tion; having a due comparative relation; proportional; corresponding.

For us to levy power

Is all impossible. *Shak.*, *Rich.* II., II. 2. 125.

My encouragement in the Navy alone being in no wise proportionable to my pains or deserts.

Pepys, *Diary*, II. 317.

Such eloquence may exist without a proportionable degree of wisdom. *Burke*.

proportionableness (prō-pōr'shōn-ā-bl-nes), *n.* The state of being proportionable.

Because there will be a proportionableness of the parts of our perfection; and therefore, as our love to God and his works will be there perfected, so will be our knowledge. *Baxter*, *Dying Thoughts*.

proportionably (prō-pōr'shōn-ā-bli), *adv.* [*< proportionable + -ly>*.] Proportionally.

As he approached nearer home, his good humour proportionably seemed to increase.

Goldsmith, *Citizen of the World*, III.

proportional (prō-pōr'shōn-āl), *a.* and *n.* [*< ME. proporcionel, n., < OF. proporcionel, proportionel, F. proportionnel = Sp. Pg. proporcional = It. proporzionale, < LL. proportionalis, pertaining to proportion, < L. proportio(n)-, proportion: see proportion.>*] I. *a.* 1. Based upon proportion; pertaining to or having proportion.

Relations depending on the equality and excess of the same simple idea in several subjects may be called . . . proportional. *Locke*, *Human Understanding*, II. xxviii. 1.

2. According to or having a due proportion; being in suitable proportion or degree.

The conquerors were contented to share the conquered country, usually according to a strictly defined proportional division, with its previous occupants.

Craik, *Hist. Eng. Lit.*, I. 62.

They see a great amount of wealth in the country, and they think that their share is not proportional to their deserts. *New Princeton Rev.*, II. 52.

3. In *math.*, having the same or a constant ratio: as, *proportional* quantities.—**Directly proportional**, in *math.*, noting proportional quantities when the proportion is according to the order of the terms (that is, one thing is greater in the same ratio that another is greater): in contradistinction to *inversely* or *reciprocally proportional*, when the proportion is contrary to the order of the terms (that is, one thing is less in the same ratio that another is greater, and vice versa).

We may assume that the elastic force of the luminiferous medium called into play by a displacement is *directly proportional* to the displacement. *Tait*, *Light*, § 281.

Proportional compasses, compasses with a pair of legs at each end, turning on a common pivot. The pivot is secured in a slide which is adjustable in the slots of the legs so as to vary in any required proportion the relative distances of the points at the respective ends. The legs are provided with marks by which the ratio of proportion of the respective ends may be arranged or determined. The instrument is used in reducing or enlarging drawings, etc.—**Proportional parts**, parts of magnitudes such that the corresponding ones, taken in their order, are proportional—that is, the first part of the first is to the first part of the second as the second part of the first is to the second part of the second, and so on.—**Proportional radii**. See *radius*.—**Proportional representation**. See *representation*.—**Proportional scale**. (a) A scale on which are marked parts proportional to the logarithms of the natural numbers; a logarithmic scale. (b) A scale for preserving the proportions of drawings or parts when changing their size.

II. *n.* 1. A quantity in proportion. Specifically—(a) In *chem.*, in the theory of definite proportions, the weight of an atom or prime. See *prime*, *n.*, 6. (b) In *math.*, one of the terms of a proportion: of these the first and last are called the *extremes*, and the intermediate the *means*, or, when the proportion consists of only three terms, the *mean*. See *mean*, 3.

2. A table of proportional parts.

His *proportionales* convenientes

For his equations in every thing.

Chaucer, *Franklin's Tale*, I. 560.

Continued proportionals. See *continued*.
proportionality (prō-pōr'shōn-āl'i-ti), *n.* [*< F. proportionnalité = Sp. proporcionalidad = Pg. proporcionalidade = It. proporzionalità, < LL. proportionalitas(-)s, proportion, < proportionalis, proportional: see proportion.>*] The character or state of being in proportion.

The principle of *proportionality* of cause and effect is suspended, the smallest causes producing, if need be, the largest effects.

A. Bain, *Mind*, XII. 178.

proportionally (prō-pōr'shōn-āl-i), *adv.* In proportion; in due degree; with suitable comparative relation.

If these circles, whilst their centres keep their distances and positions, could be made less in diameter, their interfering one with another . . . would be *proportionally* diminished. *Newton*.

proportionary, *n.* [*< ME. proporcyary, < ML. proportionarius, proportional, < L. proportio(n)-, proportion: see proportion.>*] Proportion.

And so to werke it, after his *proportionary*, That it may appere to all that shall it see A thyng ryght partyte and wel in eche degree.

Rabyan, *Chron.*, I. 1. 1. 3. 8.

proportionate (prō-pōr'shōn-āt), *a.* [= *F. proportionné = Sp. Pg. proporcionado = It. proporzionato, < LL. proportionatus, proportioned, < L. proportio(n)-, proportion, symmetry, analogy: see proportion.>*] Having proportion, or due proportion; adjusted to something else according to a certain rate or comparative relation; proportional.

In the state of nature, one man comes by no absolute power to use a criminal according to the passion or heats of his own will, but only to retribute to him . . . what is *proportionate* to his transgression. *Locke*.

Is such effect *proportionate* to cause?

Browning, *Ring and Book*, II. 214.

If the demand for increase of power in some particular faculty is great and unceasing, development will go on with *proportionate* speed.

H. Spencer, *Social Statics*, p. 452.

proportionate (prō-pōr'shōn-āt), *v. t.*; pret. and pp. *proportionated*, ppr. *proportionating*. [*< proportionate, a.>*] To make proportional; adjusted according to a settled rate or to due comparative relation or proportion: as, to *proportionate* punishments to crimes.

Every single particle hath an innate gravitation towards all others, *proportionated* by matter and distance.

Bentley, *Sermons*.

proportionately (prō-pōr'shōn-āt-li), *adv.* In a proportionate manner or degree; with due proportion; according to a settled or suitable rate or degree.

To this internal perfection is added a *proportionately* happy condition. *Bp. Pearson*, *Expos. of Creed*, xii.

proportionateness (prō-pōr'shōn-āt-nes), *n.* The character or state of being proportionate.
proportioning (prō-pōr'shōn-ing), *n.* [*< Verbal n. of proportion, v.>*] Relation of size, height, etc.; adjustment of proportions.

The vertical *proportioning* [of the interior of Durham Cathedral] is quite unlike what we have seen in the eastern districts; the main arcade is much higher, and the triforium arcade relatively lower. *The Century*, XXXV. 228.

proportionment (prō-pōr'shōn-ment), *n.* [*< OF. proportionnement, < proportionner, proportion: see proportion.>*] The act of proportioning, or the state of being proportioned.

A regard to the *proportionment* of the projective motion to the vis centripeta. *Molynæus*, *To Locke*, July 28, 1697.

propos (prō-pō'), *n.* [*F.: see purpose.>*] A proposition; statement.

John the Saint,

Who maketh oft *Propos* full quaint.

Prior, *Earl Robert's Mice*.

proposal (prō-pō'zāl), *n.* [*< propose + -al.>*] 1. A proposition, plan, or scheme offered for acceptance; a scheme or design; in the plural, terms or conditions proposed: as, to make *proposals* for a treaty of peace; to make a *proposal* of marriage.

When we . . . propounded terms Of composition, straight they changed their minds. . . . If our *proposals* once again were heard, We should compel them to a quick result.

Milton, *P. L.*, vi. 618.

2. Offer or presentation to the mind; statement.

The *proposal* of an agreeable object.

South.

The truth is not likely to be entertained readily upon the first *proposal*.

Bp. Atterbury.

3. In *law*, a statement in writing of some special matter submitted to the consideration of a master in Chancery, pursuant to an order made upon an application ex parte, or a decretal order of the court. *Imp. Dict.*—**Sealed proposals**, competitive offers to furnish supplies or perform work, made as bids for a contract to be awarded therefor, each offer being inclosed in a sealed envelop when presented, and all to be opened simultaneously, so as to prevent later bidders from learning the terms offered by earlier bidders in time to underbid.—*Syn.* 1. *Proposal, Proposition, Overture*. A *proposal* is something proposed to be done, which the person addressed may accept or reject: as, a *proposal* of marriage. A *proposition* may be something proposed for discussion, with a view to ascertaining the truth or the wisdom of it: as, a *proposition* in Euclid; few now refuse assent to the *proposition* that the earth is round. *Proposition* is likely to be applied to a *proposal* which is deliberated upon, discussion and deliberation being associated with the word *proposition*, and action with the word *proposal*: as, a *proposal* to build a new dam, if it will not cost too much; a *proposal* to build it for \$10,000. Both these words imply some exactness, completeness, or formality, whereas an *overture* may be of a tentative sort. By derivation, an *overture* opens negotiation or business: as, an *overture* from an inferior to a superior ecclesiastical body; an *overture* of peace from one of two estranged friends or neighbors. An *overture*, if not rejected, may be followed by a definite *proposal*.

propose (prō-pōz'), *v.*; pret. and pp. *proposed*, ppr. *proposing*. [*< ME. proponen, < OF. proposer, F. proposer, propose, purpose, taking the place of L. proponere, pp. propositus, set forth, place before (< pro, forth, before, + ponere, set, place: see propone), as with similar words:*

see *pose*, 2.] I. *trans.* 1. To put forward or offer for consideration, discussion, acceptance, admission, or adoption: as, to *propose* a bill or resolution to a legislative body; to *propose* a question or subject for discussion; to *propose* one as a member of a club.

Sphinx is said to *propose* various difficult questions and riddles to men.

Bacon, *Physical Fables*, x., Expl.

It is hard to find a whole age to imitate, or what century to *propose* for example.

Sir T. Browne, *Christ. Mor.*, III. 1.

2. To place before as something to be done, attained, or striven after; form or declare as an intention or design.

What to ourselves in passion we *propose*,

The passion ending, doth the purpose lose.

Shak., *Hamlet*, III. 2. 204.

But ere we could arrive the point *proposed*,

Cæsar cried, "Help me, Cassius, or I sink!"

Shak., *J. C.*, I. 2. 110.

And then come to town till I begin my journey to Ireland, which I *propose* the middle of August.

Swift, *Letter*, July 8, 1726.

3. To set or place forth; place out; state.

Milton has *proposed* the Subject of his Poem in the following Verses.

Addison, *Spectator*, No. 308.

4. To place one's self before; face; confront.

Aaron, a thousand deaths

Would I *propose* to achieve her whom I love.

Shak., *Tit. And.*, II. 1. 80.

5. To speak; utter; discourse.

Of hyr lenger wold I haue spoke sure, If more of wryting therof founde myght be; . . . And sin more ther-of I can nocht *propose*, Offers moste I here take rest and repose.

Rom. of Partenay (E. E. T. S.), I. 6404.

Every one gave his consent with Surlus, yielding the choice of that nights pastime to the discretion of the La-die Flaula, who thus *proposed* her mind.

Lyly, *Euphues and his England* (ed. Arber), p. 40.

Where I stand kneel thou,

Whilst I *propose* the selfsame words to thee

Which, traitor, thou would have me answer to.

Shak., 3 *Hen. VI.*, v. 6. 20.

= *Syn.* 1. To propound, present, suggest, recommend, move, enounce.—2. To intend, mean, design.

II. *intrans.* 1. To form or declare an intention or design.

Man *proposes*, but God disposes.

Chron. of Battle Abbey (Lower's trans.), p. 27.

2. To offer; specifically, to make an offer of marriage.

Why don't the men *propose*, mamma?

T. Haynes Bayly, *Why Don't the Men Propose?*

3. To converse; discourse.

Run thee into the parlour; There shalt thou find my cousin Beatrice *Proposing* with the Prince and Claudio.

Shak., *Much Ado*, III. 1. 2.

propose (prō-pōz'), *n.* [*< propose, v.; cf. purpose, n.>*] Talk; discourse.

There will she hide her,

To listen our *propose*.

Shak., *Much Ado*, III. 1. 12.

proposedly (prō-pō'zed-li), *adv.* Designedly; purposely.

They had been *proposedly* planned and pointed against him.

Sterne, *Tristram Shandy*, I. 117.

proposer (prō-pō'zēr), *n.* [*< propose + -er.>*] 1. One who proposes; one who offers anything for consideration or adoption.

He [Nicholas Briot] was the inventor, or at least one of the first *proposers*, of coining money by a press, instead of the former manner of hammering.

Walpole, *Anecdotes of Painting*, II. 1.

The candidates should be nominated by means of a paper containing the names of a *proposer* and seconder and eight assentors.

J. McCarthy, *Hist. Own Times*, lix.

2. A speaker; an orator.

Let me conjure you, . . . by what more dear a better *proposer* could charge you withal, be even and direct with me.

Shak., *Hamlet*, II. 2. 297.

proposita, *n.* Plural of *propositum*.

proposition (prō-pō'zish-on), *n.* [*< ME. proposition, < OF. proposition, F. proposition = Sp. proposicion = Pg. proposição = It. proposizione, < L. propositio(n)-, a setting forth, a representation, < proponere, pp. propositus, propose: see propone, propose.>*] 1. The act of placing or setting forth; the act of offering.

The ample *proposition* that hope makes In all designs begun on earth below Falls in the promised largeness.

Shak., *T. and C.*, I. 3. 3.

Gums fit for incense, and oblations for the altar of *proposition*.

Jer. Taylor, *Works* (ed. 1835), I. 677.

2. That which is proposed; that which is offered for consideration, acceptance, or adoption; a proposal; offer of terms: commonly in the plural: as, *propositions* of peace.

The Governor and council of Plymouth returned answerable courteous acceptance of their loving *propositions*.

N. Morton, *New England's Memorial*, p. 133.

The enemy sent *propositions*, such as upon delivery of a strong fortified town, after a handsome defence, are usually granted. *Clarendon, Great Rebellion.*

3. A representation in thought or language of an act of the mind in thinking a quality or general sign, termed a *predicate*, to be applicable to something indicated, and termed a *subject*. This connecting of predicate and subject may range from a mental necessity to a mere impulse to look at a certain possibility. These differences are called differences in the *mode*, or *modality*, of the proposition, according to which, as ordinarily stated, propositions are either *de inesse* (that is, the mode is not considered) or *modal*. And in this case *problematical*, *contingent*, or *apodictic*. The modality may properly be said to affect the copula, or form of function of the predicate and subject. The predicate, logically speaking, embraces the whole representation of the quality of the fact. Thus, in the proposition "Elijah was caught up to heaven," the grammatical predicate is "was caught up to heaven"; but the logical predicate includes the whole picture which the sentence conveys—that of a man caught up to heaven. The predicate, however, is not a mere picture; it views the fact represented analytically, and distinguishes certain objects as identical with the subjects. There may be only one subject, or, if the predicate expresses a relation, there may be several. These subjects cannot be sufficiently indicated by any general description, but only by a real union with experience, as by a finger-pointing. In ordinary language they are for the most part but imperfectly expressed. In whatever way they are represented, they can commonly (in the last analysis always) be set forth in classes only; from such a class the subject meant is to be taken in one or other of three ways: first, by a suitable selection, so as to render the proposition true; secondly, by taking any one, no matter which; thirdly, by taking no matter what one among a selected proportion of those which present themselves in experience. The first mode of selection gives a particular proposition, as "An object can be selected which is a man caught up to heaven"; the second mode gives a universal proposition, as "Take any object you please in this world, and it is not a man caught up to heaven"; the third mode gives a statistical proposition, as "Half the human beings in the world are women." If there are several subjects, the order of their selection is often important. Thus, it is one thing to say that having taken any man you please a woman can be found who was his mother, and quite another to say that a woman can be found such that, whatever man you select, that woman was that man's mother. Several of the distinctions between propositions found in the old treatises are based on distinctions between the different categories (or, in modern logical language, *universes*) from which the subjects are understood to be drawn. Such is the distinction between a *categorical proposition*, whose subject is denoted by a noun, and a *hypothetical proposition*, whose subject is a hypothetical state of things denoted by a sentence. Such is also the distinction between a *synthetical proposition*, whose subject is drawn from the world of real experience, and may suitably be denoted by a concrete noun, and an *analytical proposition*, whose subject is drawn from a world of ideas, and may suitably be denoted by an abstract noun. Propositions are further distinguished according to the forms of their predicates; but these distinctions, unlike those already noticed, merely concern the form under which the proposition happens to be thought or expressed, and do not concern its substance. The predicates of propositions are either simple, negative, or compound; and in the latter case they may conveniently be considered (by a slight fiction) as either disjunctive or conjunctive.

A *proposition* is a perfect sentence spoken by the indicative mode, signifying either a true thing or a false without alambiguity or doubtfulness.

Wilson, Rule of Reason.

Verbal *propositions*, which are words, the signs of our ideas, put together or separated in affirmative or negative sentences. *Locke, Human Understanding, IV. v. 5.*

All that is necessary to constitute a *proposition* is that it should imply inclusion or exclusion, attribution or non-attribution. *Veitch, Int. to Descartes's Method, p. xxxv.*

4. In *math.*, a statement in terms of either a truth to be demonstrated or an operation to be performed. It is called a *theorem* when it is something to be proved, and a *problem* when it is an operation to be done. Abbreviated *prop.*

Ros. What said he? How looked he? Wherein went he?

Cd. It is as easy to count atoms as to resolve the *propositions* of a lover. *Shak., As you Like It, III. 2. 246.*

5. In *rhet.*, that which is offered or affirmed as the subject of the discourse; anything stated or affirmed for discussion or illustration; the first part of a poem, in which the author states the subject or matter of it: as, Horace recommends modesty and simplicity in the *proposition* of a poem.

It is very disproportionate for a man to persecute another certainly for a *proposition* that, if he were wise, he would know is not certain.

Jer. Taylor, Works (ed. 1835), II. 376.

Though that *proposition* had many degrees of truth in the beginning of the law, yet the case is now altered: God hath established its contradictory.

Jer. Taylor, Works (ed. 1835), I. 806.

6. In *music*: (a) The act or process of enunciating or giving out a theme or subject. Specifically—(b) The subject of a fugue, as distinguished from the *answer*.—*Absolute, adversative, affirmative, ampliative, analytical, apodictic, assertory, binary, categorical, causal, cognate proposition.* See the *adjectives*.—*Composite proposition*, a proposition consisting of several propositions all asserted at once.—*Compound proposition*, a proposi-

tion consisting of two or more propositions, associated copulatively, disjunctively, conditionally, or otherwise.—*Comprehensive proposition*, a proposition in which the subject is regarded as a whole of logical comprehension including the predicate as a part.—*Conditional, conflictive, contradictory, contrary proposition.* See the *adjectives*.—*Contrariety of propositions.* See *contrariety*.—*Converted proposition, converting proposition.* See *convert*.—*Copulative proposition*, a proposition consisting of parts united by a copulative conjunction; a composite proposition.—*Correlative proposition.* See *correlative*.—*Cumulative proposition*, a proposition regarded as a compound of singular propositions, united conjunctively or disjunctively. Thus, "every man is mortal" is cumulative, as implying the first, the second, the third, etc., man to be, each of them, mortal.—*Descriptive proposition.* See *descriptive*.—*Dialectic proposition.* (a) A probable interrogation; a problem suitable for discussion. (b) An assumption of what appears likely.—*Dilemmatic, disjunctive, disjunct, disjunctive, divided proposition.* See the *adjectives*.—*Dual proposition.* Same as *binary proposition.* See *binary enunciation*, under *binary*.—*Elementary, equal, exceptive, exclusive, exemplar, explicative, explicatory, explicit, exponent, explicable, extensive, false proposition.* See the *adjectives*.—*Finite proposition*, a proposition whose predicate is not an inhabited term.—*Form of a proposition.* See *form*.—*Fundamental, hypothetical, hypothetico-disjunctive, identical, incident proposition.* See the *adjectives*.—*Impossible proposition*, a proposition which cannot be true.—*Indefinite proposition.* See *indefinite*.—*Infinite proposition*, a proposition whose predicate, affirmed of its subject, has the form of a negative: as, Every devil is non-human.—*Intensive proposition.* See *intensive*.—*Inventive proposition*, a proposition *de inesse*.—*Loaves of proposition*, in *Jewish antiqu.* the showbread.

Under this fair heaven . . . there was the holy table, upon which was set the holy bread, called the *loaves of proposition.*

Guevara, Letters (tr. by Hellowes, 1577), p. 351.

Local proposition. See *local*.—*Major proposition*, a major premise.—*Minor proposition*, a minor premise.—*Modal, necessary, negative proposition.* See the *adjectives*.—*Numerically definite proposition*, a proposition which states how many objects, at least, there are of a given description.—*Obligatory proposition*, a proposition which has to be admitted in disputation owing to institution, petition, position, deposition, dubitation, or truth.—*Opposite propositions*, propositions having the same terms but not identical: as, Some woman is mother of some man; Some woman is mother of each man; Some woman is mother of every man; Every woman is mother of some man; All women are mothers of one man; Every woman is mother of every man.—*Particular, perfect, practical, principal, privative proposition.* See the *adjectives*.—*Possible proposition.* Same as *problematic proposition*.—*Predicative proposition.* Same as *categorical proposition*.—*Probable proposition*, a proposition stating with more or less determinacy how often within a certain genus of events a certain specific event would be found to occur, in a given range of experience.—*Problematic proposition*, a proposition asserting something to be possible in some sense.—*Proposition de inesse.* See *def. 3*.—*Proposition de necessario*, a proposition thought to be necessary. Such propositions were divided by the old logicians into (a) propositions of *necessario conditionali*, which stated something to be necessarily true, provided a certain condition held; (b) propositions of *necessario quando*, which stated something to be necessarily true at specified times; and (c) propositions of *necessario simpliciter*, or categorical apodictic propositions. The latter were further divided into propositions of *necessario simpliciter pro nunc*, or propositions stating something to be necessarily true now, and propositions of *necessario simpliciter pro semper*, stating something to be always necessarily true.—*Proposition de omni*, a universal proposition.—*Proposition in sensu composito*, a proposition in which the expression of the mode is attached to the subject or predicate. Such a proposition, as remarked by Scotus, is not, properly speaking, a modal but an ordinary proposition concerning possibility.—*Proposition in sensu diviso*, a proposition in which the expression of the mode is attached to the copula.—*Proposition per se*, a proposition which asserts something to be essentially true—that is, the universe is a universe of essences, not of existences. Four modes of such propositions are recognized by Aristotle: first, where the predicate is involved in the idea of the subject; second, where the subject is involved in the idea of the predicate; while the third and fourth modes are respectively modes of existing and of causing.—*Propositions of second adjacent, of third adjacent.* See *adjacent*.—*Pure proposition*, a proposition not modal.—*Pythagorean proposition.* See *Pythagorean*.—*Quantified proposition*, a proposition in which the manner of selecting the subject is fully expressed.—*Rational proposition*, a hypothetical proposition in which several categorical are united by a causal conjunction.—*Reciprocating proposition*, one which asserts two terms to be coextensive: as, "Man" is identical with "rational animal".—*Relative proposition*, a proposition whose predicate is a relative term.—*Remotive proposition.* See *remotive*.—*Restrictive proposition*, a proposition with a restrictive clause: as, Christ, in his divine nature, is omnipresent.—*Simple proposition.* (a) Properly, a proposition whose predicate is simple: as, There is a man. (b) Usually, a categorical proposition, or one expressed by means of a noun and a verb, as contradistinguished from a *conditional proposition*.—*Singular proposition*, a proposition whose subjects are single individuals: as, Cain killed Abel.—*Spurious proposition*, a proposition one of the subjects of which is a character designated as one of those which belong to a given group. Thus, from the premises, Every European wants some character of Americans, and Every nobleman possesses some character other than those that are common to Americans, we can infer, that every European wants some character different from some character common to noblemen, and that every nobleman possesses a character different from some character wanting to every European. These are spurious propositions.—*Statistical proposition*, a proposition which

states how many objects of one kind there are in connection with each one of another kind, in the average of a certain line of experience.—*Subaltern proposition*, a proposition asserting a part, and only a part, of what is asserted in another proposition.—*Subcontrary propositions*, propositions which have the same terms and may be true together but cannot be false together.—*Syllogistic proposition*, a proposition forming part of a syllogism.—*Synthetic proposition.* See *synthetic judgment*, under *synthetic*.—*Temporal proposition*, a proposition consisting of two categorical united by a temporal adverb.—*Ternal or trinary proposition*, a proposition of third adjacent.—*Theoretical proposition*, a proposition concerning the fact, not concerning what ought to be done.—*True proposition.* See *true*.—*Universal proposition*, a proposition whose subject is any object whatever in the universe of discourse: as, Take any object you please, you will find it not a griffin. Every such proposition states the non-existence of something. If, in addition, it asserts the existence of something, it should be regarded as a composite proposition, partly universal and partly particular. But many logicians divide universal propositions into different species according as they do or do not assert the existence of their subjects. The result of this mode of treating the subject is a highly complicated doctrine.—*Unquantified proposition*, an indefinite proposition.—*Syn. 2. Over-ture*, etc. See *propositional*.—3 and 5. Position, thesis, statement, declaration, dictum, doctrine. *Proposition* differs from the words compared under *subject*, in that it is the technical word in rhetoric for the indication of the theme of a discourse.

The *proposition* is that part of a discourse by which its subject is defined. It includes, therefore, but is not restricted to, that which is termed *proposition* in the nomenclature of logic. It embraces all varieties of rhetorical form by which a *subject* is indicated to the audience. An interrogative may be in rhetorical dialect the *proposition*. *A. Phelps, Theory of Preaching, xx. § 1.*

propositional (prop-ō-zish'on-āl), a. [*proposition* + *-al*.] Pertaining to or constituting a proposition; considered as a proposition.

If a proposition ascribing the nature of things has an indefinite subject, it is generally to be esteemed universal, in its *propositional* sense. *Watts, Logic, II. ii. § 1.*

In theology truth is *propositional*—tied up in neat parcels, systematized, and arranged in logical order. *H. Drummond, Natural Law in the Spiritual World, p. 362.*

Propositional quantity. See *quantity*.
propositionally (prop-ō-zish'on-āl-i), adv. In the manner of a proposition.

If he only uttered them [propositions] at random, or if they were only signs of emotion, they would not serve *propositionally*. *Lancet, No. 3476, p. 787.*

propositionize (prop-ō-zish'on-iz), v. i.; pret. and pp. *propositionized*; ppr. *propositionizing*. [*proposition* + *-ize*.] To make a proposition.

To speak is not merely to utter words, but to *propositionize*. *Lancet, No. 3476, p. 787.*

propositum (prō-poz'i-tum), n. [ML., < L. *propositum*, the first premise of a syllogism, an argument, neut. of *propositus*, pp. of *proponere*, set forth: see *propose*, v., and *purpose*, n.] In medieval universities, a disputation concerning the canon law, which had to be performed by every bachelor in law.

propostscutellar (prō-pōst-skū'te-lār), a. [*propostscutellum* + *-ar*.] Of or pertaining to the postscutellum.

propostscutellum (prō-pōst-skū'tel'um), n.; pl. *propostscutella* (-ā). [NL., < L. *pro*, before, + NL. *postscutellum*, q. v.] In *entom.*, the postscutellum of the pronotum; the postscutellar sclerite of the prothorax.

propound (prō-poun'd), v. t. [With unorig. -d, for earlier *propoune*, var. of *propone*, < L. *proponere*, set forth, place before: see *propone*. Cf. *compound*, *expound*.] 1. To put forward; offer for consideration; offer; put or set, as a question; propose.

If then he [the offender] appear not, they banish him, and *propound* a reward according to the greatness of the offence. *Sandys, Travalla, p. 6.*

Give me leave to *propound* to you a second question. *Bunyan, Pilgrim's Progress, p. 150.*

2. Among Congregationalists, to propose or name as a candidate for admission to membership in a church.

He was . . . (with his wife) *propounded* to be admitted a member. *Winthrop, Hist. New England, I. 131.*

propounder (prō-poun'dér), n. [*propound* + *-er*.] 1. One who propounds; one who proposes or offers for consideration.

The point of the sword thrust from him both the *propositions* and the *propounders*. *Milton, Ilkonoklastes, § 11.*

Some deny the infallibility of the present church, and only make the tradition of all ages the infallible *propounder*. *Chillingworth, Works, I. 119.*

2. A monopolist. *Blount, (Halliwell.)*
proppage (prop'āj), n. [*prop* + *-age*.] That which props or supports; materials for propping.

Hat and stick were his *proppage* and balance-wheel. *Coriella.*

proprescutal, *a.* See *proprescutal*.
proprescutum (prō-prē-skū'tum), *n.*; pl. *proprescuta* (-tā). [NL., < L. *pro*, before, + NL. *prescutum*, *q. v.*] In *entom.*, the prescutum of the pronotum; the prescutal sclerite of the prothorax.

propretor, propretorial. See *propretor, propretorial*.

propret, propretet. Middle English forms of *propret, propretet*.

Though sheep which are *proprietary* are seldom marked, yet they are not apt to straggle.

N. Grau, Cosmologia Sacra.

The recognition by kings that, if they do not recognise the *proprietary rights* of the weaker, then the stronger will not consider theirs.

Stubbs, Medieval and Modern Hist., p. 214.

Proprietary colony. See II., 1.—**Proprietary medicine**, a medicine the manufacture or sale of which is restricted through patent of the drug or combination of drugs, of the label, or of the name, or otherwise, or a medicine concerning which the person making it claims a private formula.—**Proprietary right**, the right of a proprietor; specifically, in the theatrical profession, the common-law right of the author of a drama to control exclusively its production or representation so long as the drama remains unpublished: also applied to the right when protected by copyright after publication.

II. n.; pl. *proprieties* (-riz). 1. One who has exclusive title; one who possesses or holds the title to a thing in his own right; an owner; a proprietor; specifically, in *Amer. colonial hist.*, the grantee or owner, or one of the owners, of one of those colonies called *proprietary colonies* (in distinction from charter colonies and royal colonies or provinces). See *colony*, 1.

'Tis a mistake to think ourselves stewards in some of God's gifts and *proprieties* in others.

Government of the Tongue.

To the *proprieties* of Carolina the respect of the revolution (of 1688) for vested rights secured their possessions. *Bancroft, Hist. U. S.* (12th ed.), III. 13.

2. A body of proprietors collectively: as, the *propriety* of a county.

The influence of a monopolist middleman—such as the corporate *propriety* of a railway virtually constitute—is placed in a new light. *The Academy*, July 27, 1889, p. 53.

3. The right of proprietor; ownership.
 Peasant *propriety* or occupying ownership, which are the names European economists give to that system of ownership which we have regarded as typically American, may exist for a long while among a population whose natural increase is restrained, where emigration is not thought of. *N. A. Rev.*, CXLI. 396.

4. In monasteries, a monk who had reserved goods and effects to himself, notwithstanding his renunciation of all at the time of his profession. *Imp. Dict.*

proprietor (prō'pri-e-tōr), *n.* [An accom. form, with substituted suffix -or, for **proprietier*, < OF. *proprietaire*, an owner: see *proprietary, n.*] One who has the legal right or exclusive title to something; an owner: as, the *proprietor* of a farm or of a mill.

French . . . was at any rate the only language spoken for some ages after the Conquest by our kings, and not only by nearly all the nobility, but by a large proportion even of the inferior landed *proprietors*.

Craik, Hist. Eng. Lit., I. 98. (Latham.)

Lord *proprietor*, in *Amer. colonial hist.*, same as *proprietary, 1*.

Charleston became the principal town; and to it the whole political power of the colony (South Carolina) was exclusively confined during the government of the *Lords Proprietors*.

Man did give names unto other creatures in Paradise, as they were brought before him, according unto their *proprieties*.

Bacon, Advancement of Learning, I.

A court which, if you will give me leave to use a term of logic, is only an adjunct, not a *propriety* of happiness.

Dryden, Aurengzebe, Ded.

3. An estate; a holding.

The splitting the colony into *proprieties*, contrary to the original charters.

Beverly, Virginia, I. ¶ 92.

4. Suitableness to an acknowledged or correct standard or rule; consonance with established principles, rules, or customs; fitness; justness; correctness.

Propriety's cold, cautious rules
 Warm Fervour may o'erlook.

Burns, Apogetic, to Mrs. Lawrie.

Miss Temple had always something of serenity in her air, of state in her mien, of refined *propriety* in her language.

Charlotte Brontë, Jane Eyre, viii.

After all his [Daniel Webster's] talents have been described, there remains that perfect *propriety* which animated all the details of the action or speech with the character of the whole, so that his beauties of detail are endless.

Emerson, Fugitive Slave Law.

5. Individuality; particular or proper state.

Alas! It is the baseness of thy fear
 That makes thee strangle thy *propriety* [i. e., makes thee disavow thyself].

Shak., T. N., v. 1. 150.

Silence that dreadful bell: it frights the isle
 From her *propriety* [i. e., out of herself].

Shak., Othello, II. 3. 176.

The *proprieties*, the standards of conduct and behavior adopted and approved by society; conventional customs.—Syn. 4. *Precision*, etc. (see *purity*); appropriateness, seemliness.

You will find that the will of man is his *proprium*, and that this from nativity is evil, and that thence is the false in the understanding.

Suedenborg, True Christian Religion (trans.), iv.

Their character is the majestic *proprium* of their personality. *Bushnell, Nature and the Supernat.*, II.

Religion has had but one legitimate spiritual aim, namely, the softening of the selfhood or *proprium* which man derives from nature.

H. James, Subs. and Shad., p. 256.

propretor (prō-prok'tōr), *n.* [*< pro- + proctor*.] In English universities, an assistant proctor.

props¹ (props), *n. pl.* 1. A gambling game in vogue about 1850–60, especially in Boston. It was, in effect, a crude sort of dice-throwing. Small shells were partially ground down and their hollows filled with sealing-wax. Four of these shells were shaken in the hand and thrown on a table, the stake being won or lost according to the number of red or white sides coming up.
 2. The shells used in this game.

Shells used in the Game of Props.

props² (props), *n.* [Short for *properties* (-man).] The property-man of a theater. [Theatrical slang.]

The property-man, or, as he is always called, *props* for short. *New York Tribune*, July 14, 1889.

prop-stay (prop'stā), *n.* In *steam and pneumatic engin.*, a stay used to strengthen tubes, water-spaces in steam-boilers, or large tubes and annular spaces in air-tanks, and resist pressure tending to collapse or rupture after the manner of a strut, instead of acting by tensile strength after the manner of a tie-rod. Where such stays pass through flues of steam-boilers, they are usually made tubular, thus permitting water to flow through them as a protection from overheating, while at the same time their exteriors become more or less effective heating-surfaces. The so-called Galloway boiler is a good example of the use of tubular prop-stays.

propterygial (prō-tē-rij'i-al), *a.* [*< propterygium + -al.*] Of or pertaining to the propterygium: as, the *propterygial* basale.

propterygium (prō-tē-rij'i-um), *n.*; pl. *propterygia* (-gā). [NL. (Gegenbaur), < L. *pro*, before, + NL. *pterygium*, *q. v.*] In *ichth.*, the foremost one of three basal cartilages which the pterygium of a fish, as an elasmobranch, may present. See *pterygium*.

The peculiar form of the [pectoral] fin in the Ray is due to the great development of the *propterygium*.

Gegenbaur, Comp. Anat. (trans.), p. 478.

proptosed (prop'tōst), *a.* [*< *proptose, v.* (< *proptosis*), + -ed.] Prolapsed. [Rare.]

A small portion of the bladder wall was *proptosed* through the deficient neck. *Lancet*, No. 3466, p. 246.

proptosis (prop'tō'sis), *n.* [NL., < Gr. *πρόπτωσις*, a fall forward, < *πρόπτειν*, fall forward, < *πρό*, before, + *πίπτειν*, fall.] Prolapse or protrusion, as of the eyeball.

propugnat (prō-pūn'), *v. t.* [*< OF. *propugner* = Pg. *propugnar* = It. *propugnare*, < L. *propugnare*, go forth to fight, fight for, defend, < *pro*, forth, before, + *pugnare*, fight: see *pugnacious*. Cf. *expugn*, *impugn*, *oppugn*.] To fight for; defend; vindicate.

Thankfulness is our meet tribute to those sacred champions for *propugning* of our faith.

Hammond.

propugnaclet (prō'pug-nā-kl), *n.* [*< OF. propugnacle*, also *propugnacule* = Sp. *propugnáculo* = Pg. *propugnaculo* = It. *propugnacolo*, < L. *propugnaculum*, a bulwark, rampart, defense, < *propugnare*, fight or contend for: see *propugn*.] Same as *propugnaculum*.

Rochel [La Rochelle] was the chiefest *Propugnaclet* of the Protestants there.

Hovells, Letters, I. v. 8.

propugnaculum (prō-pug-nak'ū-lum); *n.*; pl. *propugnacula* (-lā). [L.: see *propugnacle*.] A bulwark; a defense.

The Roman colonies were thus not merely valuable as *propugnacula* of the state.

Encyc. Brit., VI. 158.

propugnation (prō-pug-nā'shon), *n.* [= It. *propugnazione*, < L. *propugnatio* (-n), a defense, vindication, < *propugnare*, pp. *propugnatus*, fight or contend for: see *propugn*.] Defense.

What *propugnatio* is in one man's valour,
 To stand the push and enmity of those
 This quarrel would excite!

Shak., T. and C., II. 2. 136.

propugnator (prō-pū'nēr), *n.* [Also *propugnator*; < OF. **propugneor*, also *propugnateur*, < L. *propugnator*, a defender, < *propugnare*, defend: see *propugn*.] A defender; a vindicator.

Zealous *propugnans* are they of their native creed.

Government of the Tongue.

He [Plutarch] was an earnest *propugnator* of another third principle.

Cudworth, Intellectual System, p. 216.

propulsation (prō-pul-sā'shōn), *n.* [*L. propulsatio* (n-), a driving forth, a repulse, < *propulsare*, pp. *propulsatus*, drive forth, ward off: see *propulse*.] The act of driving away or repelling; the keeping at a distance.

The just cause of war is the *propulsion* of public injuries.

Ep. Hall, Cases of Conscience, III. 8.

propulset (prō-pul'set), *v. t.* [= *Pg. propulsare* = *It. propulsare*, < *L. propulsare*, drive forth, ward off, freq. of *propellere*, pp. *propulsus*, drive forth, push before, < *pro*, forward, before, + *pellere*, drive: see *pulse*.] To repel; drive off; keep away.

Perceivng that all succours were clerely estopped and *propulsed* from them, and so brought into utter despair of aide or comfort.

Hall, Hen. VII., I. 23. (Halliwell.)

propulsion (prō-pul'shōn), *n.* [*F. propulsion* = *Sp. propulsion* = *Pg. propulsão*, < *ML. *propulsio* (n-), < *L. propellere*, pp. *propulsus*, drive forth: see *propulse*, *propel*.] 1. The act of propelling or driving forward; impulse given.

The reasonable soul and all its faculties are in children, will and understanding, passions, and powers of action and *propulsion*.

Jer. Taylor, Works (ed. 1855), I. 181.

God works in all things; all obey His first *propulsion*.

Whittier.

2. In *pathol.*, same as *paralysis festinans*.—*Modulus of propulsion*. See *modulus*.

propulsivity (prō-pul'si-ti), *n.* [*L. propulsivus*, pp. of *propellere*, *propel* (see *propulse*), + *-ity*.] Propulsion; motive power.

It euer was; that was ere Time had room

To stirre itself by Heau'n's *propulsivity*.

Davies, Summa Totalis, p. 10. (Davies.)

The *propulsive* movement of the verse.

Coleridge.

Two *propulsive* forces, which appear to have overcome the body's inertia, and to have imparted to it a rapid motion.

J. Sully, Sensation and Intuition, p. 24.

propulsory (prō-pul'sō-ri), *a.* [*L. propulsivus* + *-ory*.] Same as *propulsive*.

propupa (prō-pū'pā), *n.* [*NL.*, < *L. pro*, before, + *NL. pupa*.] A stage of development of certain insects, intermediate between the larva and the pupa. Also called *semipupa*.

prop-wood (prop'wūd), *n.* 1. Saplings and copse-wood suitable for cutting into props.—2. Short stout lengths of fir and other wood used for propping up the roofs of collieries.

propygidium (prō-pi-jid'i-um), *n.*; pl. *propygidia* (-iā). [*NL.*, < *Gr. πρό*, before, + *πυγή*, rump, + dim. *-ιδιον*. Cf. *pygidium*.] In entom., the penultimate or subterminal dorsal segment of the abdomen: especially used in describing those beetles whose elytra do not reach to the end of the abdomen.

propylæum (prop-i-lē'um), *n.*; pl. *propylæa* (-iā). [*L.*, also *propylæon*, < *Gr. προπύλαιον*, usually in pl. *προπύλαια*, a gateway, an entrance, neut. of *προπύλαιος*, before a gate, < *πρό*, before, + *πύλη*, a gate.] An important architectural vestibule or entrance to a sacred inclosure.

Propylæa.

A plan of the propylæa of the Acropolis of Athens and Temple of Nike Apteros, as they stood in Pericles's time; B, wings, never completed, which formed part of the original project of Mnesicles; C, the earlier propylæa of Cimon, removed by Pericles; D, Roman pedestal of Agrippa; E, ancient Pelagic wall of the primitive fortification of the Acropolis; F, ramparts of the Periclean citadel.

sure or other precinct, as that of the Acropolis of Athens, or that of the sanctuary of Eleusis: usually in the plural. In its origin it was a strongly fortified gateway, but it became developed into an ornamental structure, often elaborate and magnificent, with which were combined gates of more or less defensive strength.

propylene (prop'i-lēn), *n.* [*L. prop(ionic) + -yl + -ene*.] A gaseous hydrocarbon (C₃H₆), belonging to the series of olefines. It is one of the

products of the destructive distillation of organic matters, and is produced artificially by the action of phosphorus iodide on glycerin, and in other ways.

propylite (prop'i-lit), *n.* [So called because supposed to have opened a new era in volcanic geology, or to have opened the Tertiary volcanic epoch; < *Gr. πρόπυλον*, a gateway (see *propylon*), + *-ite*.] In *litol.*, the name given by Richthofen to a volcanic rock occurring in and considered by him as characteristic of various important silver-mining regions, especially those of Washoe (in Nevada) and Hungary. It is a considerably altered form of andesite, or of some igneous rock more or less nearly related to it. The metamorphism which was displayed in the formation of the metalliferous deposits of these regions was also attended by great changes in the enclosing and associated rocks. Also called *greenschist trachyte*.

I hope shortly to be able to describe some of the chief types of these rocks, . . . their altered forms (the *propylites*), and their Plutonic representatives (diorites and quartz-diorites).

Quart. Jour. Geol. Soc., XLV. 201.

propylitic (prop-i-lit'ik), *a.* [*L. propylite* + *-ic*.] Related to or characteristic of propylite.

These rocks . . . may be traced undergoing certain changes due to both deep-seated and surface action, and also exhibiting interesting examples of the so-called *propylitic* modification.

Quart. Jour. Geol. Soc., XLV. 179.

propylon (prop'i-lon), *n.* [*L.*, < *Gr. πρόπυλον*, a gateway, a vestibule, < *πρό*, before, + *πύλη*, gate. Cf. *propylæum*.] In *anc. Egypt. arch.*, a monumental gateway, usually between two

proritation, *n.* [*L.* as if **proritatio* (n-), < *proritare*, provoke, < *pro*, forth, + **ritare*, as in *irritare*, excite, provoke, irritate: see *irritate*.] Provocation; challenging.

Your Maimonides, after all your *proritation*, holds no other than fair terms with our Samaritan Chronicle.

Ep. Hall, Works, X. 399. (Davies.)

Prorodon (prō'rō-don), *n.* [*NL.* (Ehrenberg), < *Gr. πρόρα*, prow (see *proræ*), + *ὄδον* (ōdon-) = *E. tooth*.] The typical genus of the family *Prorodontidae*, with terminal mouth and armed pharynx. There are many species, mostly of fresh water, as *P. niveus*; *P. marinus* is found in salt water.

Prorodontidae (prō-rō-don'ti-dē), *n. pl.* [*NL.*, < *Prorodon* (-don-) + *-idae*.] A family of holotrichous ciliate infusorians, named from the genus *Prorodon*, of symmetrical oval or cylindrical figure, with lateral or terminal mouth and a distinct pharynx, usually plicate or armed with rod-like teeth. It corresponds to Perty's *Decteria*, but is more restricted. *W. S. Kent*.

prorogate (prō'rō-gāt), *v. t.*; pret. and pp. *prorogated*, ppr. *prorogating*. [*L. prorogatus*, pp. of *prorogare*, prolong, extend, defer: see *prorogue*.] To prorogue; put off. *Brougham*.

prorogation (prō'rō-gā'shōn), *n.* [*F. prorogation* = *Sp. prorogación* = *Pg. prorogação* = *It. prorogazione*, < *L. prorogatio* (n-), an extension, a putting off, < *prorogare*, pp. *prorogatus*, prolong, extend: see *prorogue*.] 1. The act of continuing, prolonging, or protracting; continuance in time or duration; a lengthening out to a distant time; prolongation; the delaying of action upon anything.

When they preferred another law for the *prorogation* of the provinces and armies which Cæsar demanded, Cato would speak no more to the people to hinder it.

North, tr. of Plutarch, p. 651.

Patriarchal prorogations of existence.

Lovell, Among my Books, 2d ser., p. 253.

2. The act of proroguing; more specifically, the right which belongs to the British crown, exercised by its ministers, of terminating a session of Parliament; also, the exercise of that right.

But it now seems to be allowed that a *prorogation* must be expressly made in order to determine the session.

Blackstone, Com., I. ii.

The power of *prorogation* either before or after the day

of meeting rested with the king.

Stubbs, Hist. Eng., § 296.

Prorogation of a judge's jurisdiction, a judge's adjudication by consent of parties on matters properly outside his jurisdiction.—**Prorogation of a lease**, the extension of a lease = *Syn. 2. Rescissio, Dissolutio*, etc. See *ad-journment*.

prorogue (prō-rōg'), *v. t.*; pret. and pp. *prorogued*, ppr. *proroguing*. [Early mod. E. *proroge*; < OF. *proroguer*, F. *proroger* = *Sp. There dwells a noble pathos in the skies,
Which warms our passions, *proselytes* our hearts.
Young, Night Thoughts, ix.

I have no wish to *proselyte* any reluctant mind.
Emerson, Free Religious Associations.

proselytise, *proselytiser*. See *proselytize*, *proselytizer*.

proselytism (prōs'ē-li-tizm), n. [= F. *prosélytisme* = Pg. *proselytismo*; as *proselyte* + *-ism*.] 1. The act or practice of making *proselytes* or converts to a religion or to any doctrine, creed, system, sect, or party.
They were possessed of a spirit of *proselytism* in the most fanatical degree.
Burke.

2. Conversion to a system or creed.
Spiritual *proselytism*, to which the Jew was wont to be wash'd, as the Christian is baptiz'd.
Hammond, Works, IV. 500.

proselytist (pros'ē-li-tist), *n.* [*< proselyte + -ist.*] A proselytizer.

The Mormon *proselytists* report unusual success in their missionary work. *New York Evangelist*, June 22, 1876.

proselytize (pros'ē-li-tiz), *v.*; pret. and pp. *proselytized*, ppr. *proselytizing*. [*< proselyte + -ize.*] *I. trans.* To make a proselyte of; induce to become the adherent of some religion, doctrine, sect, or party; convert.

If his grace be one of these whom they endeavour to *proselytize*, he ought to be aware of the character of the sect whose doctrines he is invited to embrace.

Burke, To a Noble Lord.

II. intrans. To make proselytes or converts. As he was zealously *proselytizing* at Medina, news came that Abusophian Ben-Hareth was going into Syria.

L. Addison, Mahomet (1679), p. 71.

Man is emphatically a *proselytizing* creature.

Carlyle, Sartor Resartus, I. 2.

The egoism of the Englishman is self-contained. He does not seek to *proselytize*.

R. L. Stevenson, The Foreigner at Home.

Also spelled *proselytise*.

proselytizer (pros'ē-li-ti-zēr), *n.* One who makes or endeavors to make proselytes. Also spelled *proselytiser*.

There is no help for it; the faithful *proselytizer*, if she cannot convince by argument, bursts into tears.

Thackeray, Vanity Fair, xxxiii.

prose-man (prōz'man), *n.* A writer of prose; a prosier.

All broken poets, all *prose-men* that are fallen from small sense to mere letters. Beau. and Fl., Woman-Hater, IV. 2.

Verse-man or *prose-man*, term me which you will.

Pope, Imit. of Horace, II. l. 64.

Let them rally their heroes, send forth all their powers. Their *verse-men* and *prose-men*, then match them with ours. Garrick, quoted in Boswell's Johnson, II. 53.

proseminary (prō-sem'i-nā-ri), *n.*; pl. *proseminaries* (-riz). [*< pro-, before, + seminary.*] A preparatory seminary; a school which prepares students to enter a higher school or seminary.

Merchant Taylors' School in London was then just founded as a *proseminary* for Saint John's College, Oxford, in a house called the Manour of the Rose.

T. Warton, Hist. Eng. Poetry.

proseminate (prō-sem'i-nāt), *v. t.*; pret. and pp. *proseminated*, ppr. *proseminating*. [*< L. proseminatus, pp. of proseminare, sow, scatter about, < pro, forward, + seminare, sow: see seminate.*] To sow; scatter abroad, as seed.

Not only to oppose, but corrupt the heavenly doctrine, and to *proseminate* his curious cockles, dissensions, and factions.

Boswell, True Religion, II. 222.

prosemination (prō-sem'i-nā'shon), *n.* [*< proseminate + -ion.*] Propagation by seed.

We are not, therefore, presently to conclude every vegetable sponte natum, because we see not its *prosemination*.

Sir M. Hale, Orig. of Mankind, p. 208.

prosencephalic (pros'en-sē-fal'ik or pros-en-sēf'a-lik), *a.* [*< prosencephalon + -ic.*] 1. Pertaining to the prosencephalon or fore-brain.—2. Pertaining to the forehead or fore part of the head; frontal: applied to the next to the first one of four cranial vertebrae or segments of the skull. Owen.

prosencephalon (pros'en-sēf'a-lon), *n.* [NL., *< Gr. πρῶς, before, + ἐγκέφαλος, the brain.*] 1. (a) The fore-brain; the cerebral hemispheres, together with the callosus, striate bodies, and fornix. It may also include the rhinencephalon. (b) All of the parts developed from the anterior of the three primary cerebral vesicles, including, in addition to those of (a), the thalamencephalon. Also called *procerebrum*.—2. The second cranial segment, counting from before backward, of the four of which the head has been theoretically assumed to be composed. See cuts under *encephalon* and *Petromyzontidae*.

prosenchyma (pros-eng'ki-mā), *n.* [NL., *< Gr. πρῶς, to, toward, + ἔχχυμα(-r-), that which is poured in, an infusion: see enchymatous and parenchyma.*] In bot., the fibrovascular system or tissue of plants; the cells and modified cells which constitute the framework of plants, as distinguished from *parenchyma*, or the cells which constitute the soft tissues of plants. See *parenchyma*. In most of the lower plants it is barely if at all developed, but in the higher plants it exists as a skeleton which brings all the parts into closer relation. The solid wood of trunks and the veins of leaves are familiar examples. As in *parenchyma*, the cells composing this tissue are very various in form, size, etc., and have been minutely classified, yet they may be reduced to a few comparatively simple types. These cells, which are normally of considerable length in proportion to the transverse diameter, are generally more or less sharply pointed, and are divided into typical wood-cells and woody fibers (including libriform cells and secondary wood-cells) and vasiform wood-cells or tracheids. The most important modification is that in which cells belonging to this system unite

to form long rows in which the terminal partitions are nearly or quite obliterated, throwing the cavities into one, forming a duct. These ducts or vessels may be dotted, spirally marked, annular, reticulated, or trabecular. A modification in a different direction produces bast-cells, bast-fibers, or liber-fibers. See also *wood-cell*, *libriform cells* (under *libriform*), *duct*, 2 (b), *bast*, 1, 2, *liber*, 1.

prosenchymatous (pros-eng-kim'a-tus), *a.* [*< prosenchyma(-t-) + -ous.*] In bot., like or belonging to *prosenchyma*.

According to the amount of surface-growth and thickening of the cell-wall, various forms of *prosenchymatous* and *prosenchymatous* tissue result. *Encyc. Brit.*, IV. 85.

proser (prō-zēr), *n.* [*< prose + -er.*] 1. A writer of prose.

And surely Naashe, though he a *proser* were,

A branch of laurel yet deserves to bear.

Drayton, Poets and Poesy.

[See also second quotation under *prose*, v. 1, 1.]

2. One who prosers or makes a tedious narration of uninteresting matters.

But Saddle-tree, like other *proser*s, was blessed with a happy obtuseness of perception concerning the unfavourable impression which he sometimes made on his auditors. Scott, Heart of Mid-Lothian, xxvii.

Proserpina (pros-ēr-pi-nā), *n.* [NL., *< L. Proserpina: see Proserpine.*] A genus of gastropods, typical of the family *Proserpinidae*.

Proserpinaca (pros'ēr-pi-nā'kā), *n.* [NL. (Linnaeus, 1753), so called because of its partly prostrate habit; *< L. proserpinaca*, a plant, *Polygonum aviculare*, *< proserpere*, creep forward, creep along, *< pro*, forward, *& serpere*, creep: see *serpent*.] A genus of polypetalous water-plants of the order *Haloragaceae*. It is characterized by the absence of petals, and by the numerical symmetry in threes, having usually a three-sided calyx-tube, three calyx-lobes, three stamens, three stigmas, and for fruit a three-angled three-seeded nutlet. There are but 2 species, natives of North America, including the West Indies. They are smooth and low-growing aquatics, bearing alternate lanceolate leaves, pectinately toothed or cut, and minute sessile axillary flowers. They are named *mermaid-weed*, doubtless from their comb-like leaves and growth in water.

Proserpine (pros'ēr-pin), *n.* [= *F. Proserpine*, *< L. Proserpina*, OL. *Prosephna*, corrupted from Gr. Περσεφόνη, also Περσεφύνη, Proserpine (see def.), traditionally explained as 'bringer of death,' *< φέρειν*, bring (see *bear*), *+ φῶς*, death (see *bane*); but this explanation, untenable in itself, fails to apply to the equiv. Περσεφάσσα, Περσεφάρρα; these forms, if not adaptations of some antecedent name, are appar. *< περσέ-*, a form in comp. of *πέπρω*, destroy; the second element *-φον* may be connected with *φῶς*, death, *-φασσα* with *φά*, shine.] In *Rom. myth.*, one of the greater goddesses, the Greek Persephone or

Proserpine.
Relief of Ceres (Demeter), Iacchus or Triptolemus, and Proserpine (Persephone or Kora), found at Eleusis, Attica.

Kora, daughter of Ceres, wife of Pluto and queen of the infernal regions. She passed six months of the year in Olympus with her mother, during which time she was considered as an amiable and propitious divinity; but during the six months passed in Hades she was stern and terrible. She was essentially a personification of the changes in the seasons, in spring and summer bringing fresh vegetation and fruits to man, and in winter harsh and causing suffering. She was intimately connected with such mysteries as those of Eleusis. The Roman goddess was practically identical with the Greek. Compare cuts under *Pluto* and *modus*.

Proserpinidae (pros-ēr-pin'i-dē), *n. pl.* [NL., *< Proserpina + -idae.*] A family of rhypidoglossate gastropods, typified by the genus *Proserpina*. The animal has a foot truncated in front and acute behind, without appendages, and a pulmonary pouch. The shell is heliciform, with a semilunar aperture, the columella plicated or truncated at the base, and the interior is absorbed with advancing age. The operculum is wanting. The species are inhabitants of middle America and the West Indies.

prosest, *n.* An obsolete (Middle English) spelling of *process*.

prosethoid (pros-eth'moid), *n.* [*< Gr. πρῶς, toward, + E. ethmoid.*] In *ichth.*, the foremost upper bone of the cranium of typical fishes, generally regarded as homologous with the ethmoid of the higher vertebrates.

proseucha, **proseucha** (pros-ū'kē, -kā), *n.*; pl. *proseuchae* (-kē). [*< LGr. προσευχή, prayer, place of prayer, < προσευχέσθαι, pray, offer up vows, < πρῶς, toward, + εὐχέσθαι, pray.*] A place of prayer; specifically, among the Jews, one that was not a synagogue, in distinction from the temple. These *proseuchae* were usually outside the town, near some river or the sea, and built in the form of a theater, unroofed.

A *Proseucha* among the Hebrew people was simply an oratory or place of retirement and devotion.

E. H. Sears, The Fourth Gospel the Heart of Christ, (p. 27), note.

prose-writer (prōz'ri'tēr), *n.* A writer of prose; a prosaist.

A poet lets you into the knowledge of a device better than a *prose-writer*.

Addison.

prosilien (prō-sil'i-en-si), *n.* [*< L. prosilient(-t-), ppr. of prosilire, leap forth, spring up, < pro, forth, forward, + salire, ppr. salien(-t-), leap, bound: see salient.*] The act of leaping forward; hence, a standing out. [Rare.]

Such *prosilien* of relief. Coleridge. (Imp. Dict.)

prosimetrical (prō-zimet'ri-kal), *a.* [*< L. prosa, prose, + metrum, meter, + -ic(-al) (cf. metrical).*] Consisting of both prose and verse.

Prosimia (prō-sim'i-ā), *n.* [NL., *< L. pro, before, + simia, an ape.*] A genus of lemurs: same as *Lemur*. Brisson, 1764.

Prosimia (prō-sim'i-ā), *n. pl.* [NL., pl. of *Prosimia*.] A group of primate quadrumanous mammals, founded by Storr in 1780 on the genus *Prosimia* of Brisson, later called *Strepsirrhini* and *Lemuroidea*; the lemurs. It is now regarded as one of two suborders of the order *Primates*, including all the lemurine or lemuroid quadrupeds. The cerebrum leaves much of the cerebellum uncovered. The lacrymal foramen is extra-orbital, and the orbits are open behind. The ears are more or less lengthened and pointed, without a lobule. The uterus is two-horned, the clitoris is perforated by the urethra, and the mammae are variable. There are three families, *Lemuridae*, *Tarsidae*, and *Daubentonidae*. See cut under *Lemur*.

prosimian (prō-sim'i-an), *a.* and *n.* [*< Prosimia + -an.*] *I. a.* Lemurine or lemuroid; strepsirrhine, as a lemur; of or pertaining to the *Prosimia*.

II. n. A member of the *Prosimia*; a lemuroid, lemurine, or lemur.

prosinness (prō'zi-ness), *n.* [*< prosy + -ness.*] The character or quality of being prosy.

His garrulity is true to nature, yielding unconsciously to the *prosinness* of dotage. Notes Ambrosiana, Feb., 1882.

prosing (prō'zing), *n.* [Verbal *n.* of *prose*, *v.*] Dullness or tediousness in speech or writing.

He . . . employed himself rather in the task of anticipating the nature of the reception he was about to meet with . . . from two beautiful young women, than with the *prosing* of an old one, however wisely she might prove that small-beer was more wholesome than strong ale.

Scott, Pirate, xii.

prosingly (prō'zing-li), *adv.* In a prosing manner; prosily.

prosihon (prō-si'fon), *n.* [*< pro- + siphon.*]

The predecessor of the protosiphon in the *Ammonites*, consisting of a kind of ligament united to the wall of the initial chamber, or protoconch.

It is characterized by a two-lipped calyx with the lips entire or one minutely notched, and by completely two-celled anthers, usually with the back of the connective spurred, but the base not prolonged. The 88 species are all Australian. They are resinous, glandular, and powerfully odorous shrubs or undershrubs, with usually small leaves, and with white or red flowers solitary in the axils, sometimes forming a terminal raceme. They are known as *mint-tree*, *mint-bush*, or *Australian lilac*; and *P. lasiantha*, the largest species, sometimes reaching 30 feet, is also called the *Victorian dogwood*.

Prostantheres (pros-tan-thē'rē-ē), *n. pl.* [*< NL. (Bentham, 1836), < Prostanthera + -es.*] A tribe of Australian shrubs of the order *Labiatae*. It is characterized by a ten- to thirteen-nerved equal or two-lipped calyx, four stamens with two-celled or one-celled anthers, a two-lipped corolla with broad throat and broad flatish upper lip, an ovary but slightly four-lobed, and obvoid reticulated nutlets, fixed by a broad lateral scar. It includes about 93 species in 7 genera, of which *Prostanthera* is the type.

prostate (pros'tā-tē), *n.*; pl. *prostates* (-tē). [*< NL., < Gr. προστάτης, one who stands before: see prostate.*] The prostatic gland or prostate: chiefly in the phrase *levator prostate*, a part of the levator ani muscle in special relation with the prostate. Also *prostatica*.

prostatagia (pros-tā-tal'ji-ā), *n.* [*< NL., < prostata, q. v., + ἀγία, pain.*] Pain, most properly neuralgia, in the prostate gland.

prostate (pros'tāt), *a. and n.* [*< Gr. προστάτης, one who stands before, < προστάναι, stand before, < πρόσ, before, + στάναι, stand.*] I. *a.* Standing before or in front of something; prostatic: specifically noting the gland known as the prostate. — *Prostate body* or *gland*. Same as II. — *Prostate concretions*, calculi of the prostate gland.

II. *n.* The prostate gland; a large glandular body which embraces the urethra immediately in front of the mouth of the bladder, whence the name. In man the prostate is of the size and shape of a horse-chestnut, surrounding the first section of the course of the urethra. It is a pale firm body, placed in the pelvis behind and below the symphysis of the pubis, posterior to the deep perineal fascia, and resting upon the rectum, through the walls of which it may easily be felt, especially when enlarged. It is held in place by the puboprostatic ligaments, by the posterior layer of deep perineal fascia, and by a part of the levator ani muscle called on this account *levator prostate*. It measures about 1½ inches in greatest width, 1½ inches in length, and 1 inch in depth, and weighs about 6 grams. It is partially divided into a median and two lateral lobes. The prostate is enclosed in a firm fibrous capsule, and consists of both muscular and glandular tissue. The latter is composed of numerous racemose follicles whose ducts unite to form from 12 to 20 large excretory ducts, which pour their secretion into the prostatic part of the urethra.

prostatectomy (pros-tā-tek'tō-mi), *n.* [*< NL. prostata, q. v., + Gr. ἐκτομή, a cutting out.*] Excision of more or less of the prostate gland.

prostatic (pros-tat'ik), *a.* [*< Gr. προstaticός, pertaining to one who stands before, < προστάναι, one who stands before: see prostate.*] Of or pertaining to the prostate gland: as, the *prostatic fluid*, the secretion of this gland; *prostatic urethra*, the part of the urethra embraced by the prostate; *prostatic concretions*, calculi of the prostate. — *Prostatic ducts*, twelve to twenty short ducts which open upon the floor of the urethra, chiefly in the prostatic sinuses. — *Prostatic plexus*. See *plexus*. — *Prostatic sinus*, a longitudinal groove in the floor of the urethra, on either side of the crest, into which the prostatic ducts open. — *Prostatic vesicle*, a small cul-de-sac, from a quarter to a half of an inch in its greatest diameter, situated at the middle of the highest part of the crest of the urethra. It corresponds with the uterus of the female. Also called *sinus peculiaris*, *utricle*, and *uterus masculinus*.

prostatica (pros-tat'i-kā), *n.*; pl. *prostaticae* (-sē). [*< NL.: see prostatic.*] The prostate gland: more fully called *glandula prostatica*.

prostatitis (pros-tat'it'ik), *a.* [*< NL. prostatitis + -ic.*] Affected with prostatitis.

prostatitis (pros-tat'i-tis), *n.* [*< NL., < prostata, q. v., + -itis.*] Inflammation of the prostate.

prostatolithus (pros-tā-tol'i-thus), *n.* [*< NL., < prostata, q. v., + Gr. λίθος, stone.*] A calculus of the prostate gland.

prostatorrhoea, prostaticorrhoea (pros'tā-tō-rē-ā), *n.* [*< NL., < prostata, q. v., + Gr. ροία, a flow, < ρέω, flow.*] Excessive or morbid discharge from the prostate gland.

prostatotomy (pros-tā-tōt'ō-mi), *n.* [*< NL. prostata, q. v., + Gr. τομία, < τέμνειν, τμήν, cut.*] In *surg.*, incision into the prostate.

prosternal (prō-stēr-nal), *a.* [*< prosternum + -al.*] Of or pertaining to the prosternum; prothoracic and sternal or ventral, as a sclerite of an insect's thorax. — *Prosternal epimera and episterna*, the pleurae or side pieces of the prothorax, adjoining the prosternum. — *Prosternal groove or canal*, a hollow extending between the front coxae: it is found in many *Rhynchophora*, serving for the reception of the rostrum in repose. — *Prosternal lobe*, a central prolongation of the front of the prosternum, more or less completely concealing the mouth when the head is in repose, as in the *Elateridae* and *Histeridae*. — *Prosternal process*, a posterior process of the prosternum, between the anterior coxae. — *Prosternal sutures*, the impressed lines separating the side-pieces from the prosternum.

prostration (pros-tēr-nā'shon), *n.* [*< F. prostration = Sp. prosternación = Pg. prosternação = It. prosternazione, < L. prosternere, throw to the ground, overthrow: see prostrate.* Cf. *consternation*.] The state of being cast down; prostration; depression.

While we think we are borne aloft, and apprehend no hazard, the falling floor sinks under us, and with it we descend to ruine. There is a *prostration* in assaults unlookt for.
Feltham, Resolves, II. 60.

Fever, watching, and prostration of spirits.
Wiseman, Surgery.

prosternum (prō-stēr-nūm), *n.*; pl. *prosterna* (-nā). [*< L. pro, before, + NL. sternum, q. v.*] 1. In *entom.*, the ventral or sternal sclerite of the prothorax; the under side of the prothoracic somite; the middle piece of the antepectus. Also *præsternum*. — 2. [*cap.*] A genus of coleopterous insects. Also *Prosternon*. — *Lobed prosternum*. See *lobed*.

prosthaphæresis (pros-tha-fer'e-sis), *n.* [*< NL., < Gr. προσθαφαίρεσις, previous subtraction, < πρόσθεν, before, + ἀφαίρεσις, a taking away: see aphæresis.*] 1. The reduction to bring the apparent place of a planet or moving point to the mean place. — 2. A method of computing by means of a table of natural trigonometrical functions, without multiplying. It was invented by a pupil of Tycho Brahe, named Wittig, but was entirely superseded by logarithms.

prosthæca (pros-thē'kā), *n.*; pl. *prosthæcæ* (-sē). [*< NL., < Gr. προσθήκη, an addition, appendage, < προσθίδειν, put to, add: see prothesis.*] A somewhat glistly or subcartilaginous process of the inner side, near the base, of the mandibles of some coleopterous insects, as the rove-beetles or *Staphylinidae*.

prosthecal (pros-thē'kal), *a.* [*< prosthæca + -al.*] Of or pertaining to the prostheca.

prosthema (pros-thē-mā), *n.*; pl. *prosthemata* (pros-them'a-tā). [*< NL., < Gr. πρόσθεμα, an addition, appendage, < προσθίδειν, put to, add: see prosthæca.*] A nose-leaf; the leafy appendage of the snout of a bat. See cut under *Phyllorhina*.

prosthencephalon (pros-then-sef'ā-lon), *n.* [*< NL., < Gr. πρόσθεν, before, in front, + ἐγκέφαλος, the brain.*] A segment of the brain consisting essentially of the cerebellum and medulla oblongata. Spitzka.

prosthénic (pros-then'ik), *a.* [*< Gr. πρό, before, + σθένος, strength.*] Strong in the fore parts; having the fore parts preponderating in strength.

prosthesis (pros'the-sis), *n.* [*< LL. prothesis, < Gr. πρόσθεσις, a putting to, an addition, < προσθίδειν, put to, add, < πρόσ, to, + θίδειν, put, place: see thesis.*] Addition; affixion; appendage. Specifically—(a) In *gram.*, the addition of one or more sounds or letters to a word; especially, such addition at the beginning. (b) In *ana. pros.*, a disemic pause. (c) In *surg.*, the addition of an artificial part to supply a defect of the body, as a wooden leg, etc.; also, a flesh-growth filling up an ulcer or fistula. Also *prothesis*.

prosthetic (pros-thet'ik), *a.* [*< Gr. πρόσθετος, added or fitted to, < προσθίδειν, put to, add: see prothesis.*] Exhibiting or pertaining to prosthesis; added; especially, prefixed.

The *prosthetic* initial sound for words beginning with vowels is now (the infant learning to articulate is twenty months old) zh, or an aspirated y. *Pop. Sci. Mo.*, XIII. 668.

Prostobranchia (pros-thō-brang'ki-ā), *n. pl.* [*< NL., < Gr. πρόσθεν, before, + βράγχια, gills.*] Same as *Probranchiata*.

prostibulous (pros-tib'ū-lus), *a.* [*< L. prostibulum, prostibula, prostibilia, a prostitute. < prostare, stand forth, stand in a public place, < pro, forth, before, + stare, stand: see stable.*] Pertaining to prostitutes; hence, meretricious.

Prostibulose prelates and priests. Bp. Bale, Image, III.

prostitute (pros'ti-tūt), *v. t.*; pret. and pp. *prostituted*, ppr. *prostituting*. [*L. prostitutus*, pp. of *prostituere* (> *It. prostituire* = *Sp. Pg. prostituir* = *F. prostituer*), place before or in front, expose publicly, < *pro*, forth, before, + *statuere*, cause to stand, set up: see *statute*, *statute*. Cf. *constitute*, *institute*, etc.] 1. To offer to a lewd use, or to indiscriminate lewdness, for hire.

Do not prostitute thy daughter, to cause her to be a whore. Lev. xix. 20.

For many went to Corinth, in respect of the multitude of Harlots prostituted or consecrated to Venus.

Purchas, Pilgrimage, p. 821.

2. To surrender to any vile or infamous purpose; devote to anything base; sell or hire to the service of wickedness.

Shall I abuse this consecrated gift
Of strength, . . . and add a greater sin,
By prostituting holy things to idols?
Milton, S. A., l. 1358.

I pity from my soul unhappy men
Compell'd by want to prostitute their pen.
Racine, Translated Verse.

The title [of equire] has, however, become so basely prostituted as to be worthless. *N. and Q.*, 7th ser., V. 478.

prostitute (pros'ti-tūt), *a.* and *n.* [*L. a. < L. prostitutus*, exposed publicly, prostituted, pp. of *prostituere*, expose publicly: see *prostitute*, *v.* II. *n.* = *Sp. Pg. It. prostituta*, < *L. prostituta*, a prostitute, fem. of *prostitutus*, exposed publicly: see *I.* *a.* 1. Openly devoted to lewdness for gain.

Made bold by want, and prostitute for bread.
Prior, Henry and Emma.

2. Sold for base or infamous purposes; infamous; mercenary; base.

I found how the world had been misled by prostitute writers to ascribe the greatest exploits in war to cowards.
Swift, Gulliver's Travels, III. 8.

So shameless and so prostitute an attempt to impose on the citizens of America.

A. Hamilton, The Federalist, No. 1xv.

II. *n.* 1. A woman given to indiscriminate lewdness for gain; a strumpet; a harlot. In criminal law it has been held that the element of gain is not essential or may be presumed.

Dread no dearth of prostitutes at Rome. Dryden.

2. A base hireling; a mercenary; one who engages in infamous employments for hire.

No hireling she, no prostitute to praise.
Pope, Ep. to Harley, l. 88.

prostitution (pros-ti-tū'shon), *n.* [*F. prostitution* = *Sp. prostitución* = *Pg. prostituição* = *It. prostituzione*, < *L. prostitutio(n-)*, prostitution, < *prostituere*, pp. *prostitutus*, expose publicly: see *prostitute*.] 1. The act or practice of prostituting, or offering the body to indiscriminate sexual intercourse for hire.

Till prostitution elbows us aside
In all our crowded streets.
Couper, Task, III. 60.

2. The act of offering or devoting to a base or infamous use: as, the prostitution of talents or abilities.

When a country (one that I could name)
In prostitution sinks the sense of shame,
When infamous Venality, grown bold,
Writes on his bosom "to be let or sold."
Couper, Table-Talk, l. 415.

I hate the prostitution of the name of friendship to signify modish and worldly alliances. Emerson, Friendship.

prostitutor (pros'ti-tū-tor), *n.* [= *F. prostituteur* = *Pg. prostituidor*, < *L. prostitutor*, a prostitute, pander, violator, < *prostituere*, pp. *prostitutus*, expose publicly: see *prostitute*, *v.*] One who prostitutes; one who submits one's self or offers another to vile purposes; one who degrades anything to a base purpose.

This sermon would be as reasonable a reproof of the Methodists as the other was of the prostitutes of the Lord's supper.
Bp. Hurd, To Warburton, Let. cl.

prostomial (prō-stō'mi-āl), *a.* [*< prostomi-um* + *-āl*]. Preoral; situated in advance of the mouth; pertaining to the prostomium.

The Mollusca are sharply divided into two great lines of descent or branches, according as the prostomial region is atrophied on the one hand or largely developed on the other.
E. R. Lankester, Encyc. Brit., XVI. 639.

prostomiate (prō-stō'mi-āt), *a.* [*< prostomium* + *-atē*]. Provided with a prostomium.

prostomium (prō-stō'mi-um), *n.*; pl. *prostomia* (-ā). [*NL.*, < *Gr. πρός*, before, + *στόμα*, mouth.] The region in front of the mouth in the embryos of the *Cœlomata*; the preoral part of the head: said chiefly of invertebrates, as mollusks and worms. This is the essential part of the head, and is connected with the faculty of forward locomotion in a definite direction and the steady carriage of the body, as opposed to rotation of the body on its long axis. As a re-

sult the *Cœlomata* present, in the first instance, the general condition of the body known as bilateral symmetry.

Prostomum (pros'tō-mum), *n.* [*NL.*, < *Gr. πρός*, before, + *στόμα*, mouth.] A genus of apocretous rhabdocœlous *Turbellaria*, having a second or frontal in addition to the usual buccal proboscis. Also *Prostoma*.

prostrate (pros'trāt), *v. t.*; pret. and pp. *prostrated*, ppr. *prostrating*. [*< L. prostratus*, pp. of *prostrare* (> *It. prosternere*, *prosternare* = *Sp. Pg. prosternar* = *F. prosterner*), strew in front of, throw down, overthrow, < *pro*, before, in front of, + *sternere*, spread out, extend, strew: see *stratus*, *strew*.] 1. To lay flat; throw down: as, to prostrate the body.—2. To throw down; overthrow; demolish; ruin: as, to prostrate a government; to prostrate the honor of a nation.

In the streets many they slew, and fired divers places, prostrating two parishes almost entirely. Sir J. Hayward.

3. To throw (one's self) down, in humility or adoration; bow with the face to the ground: used reflexively.

All the spectators prostrated themselves most humbly upon their knees.
Coryat, Crudities, l. 38, sig. D.

I prostrate myself in the humblest and dearest way of genuflection I can imagine. Howell, Letters, l. vi. 32.

4. To present submissively; submit in reverence.

We cannot be
Ambitious of a lady, in your own
Dominion, to whom we shall more willingly
Prostrate our duties.
Shirley, Grateful Servant, l. 1.

5. In *med.*, to make to sink totally; reduce extremely; cause to succumb: as, to prostrate a person's strength.

prostrate (pros'trāt), *a.* [*< ME. prostrat* = *OF. prostré*, < *L. prostratus*, pp. of *prostrare*, strew in front of: see *prostrate*, *v.*] 1. Lying at length, or with the body extended on the ground or other surface.

Well ny so half hour she lay, this sweet wight,
Prostrat to the earth.
Rom. of Partenay (E. E. T. S.), l. 3569.

Mother Jourdain, be you prostrate, and grovel on the earth.
Shak., 2 Hen. VI., l. 4. 13.

Havoc and devastation in the van,
It [Ethna's eruption] marches o'er the prostrate work of man.
Couper, Herosim, l. 22.

2. Lying at mercy, as a suppliant or one who is overcome in fight: as, a prostrate foe.

Look gracious on thy prostrate thrall.
Shak., 1 Hen. VI., l. 2. 117.

3. Lying or bowed low in the posture of humility or adoration.

O'er shields, and helms, and helmeted heads he rode
Of thrones and mighty seraphim prostrate.
Milton, P. L., vi. 841.

See thy bright altars throng'd with prostrate kings.
Pope, Messiah, l. 93.

4. In *bot.*, lying flat and spreading on the ground without taking root; procumbent.—5. In *zool.*, closely appressed to the surface; lying flat: as, prostrate hairs.—*Syn.* 1. *Prostrate*, *Supine*, *Prone*. He who lies prostrate may be either supine (that is, with his face up) or prone (that is, with his face down).

prostration (pros-trā'shon), *n.* [*< F. prostration* = *Sp. prostración* = *Pg. prostração* = *It. prostrazione*, < *LL. prostratio(n-)*, an overthrowing, a subverting, < *L. prosternere*, pp. *prostratus*, overthrow, prostrate: see *prostrate*.] 1. The act of prostrating, throwing down, or laying flat.

Though the loss of power to resist which prostration on the face implies does not reach the utter defenselessness implied by prostration on the back, yet it is great enough to make it a sign of profound homage.

H. Spencer, Prin. of Sociol., § 884.

2. The act of falling down, or the act of bowing, in humility or adoration; primarily, the act of falling on the face, but the word is now used also for kneeling or bowing in reverence and worship.

The comely Prostrations of the Body, with Genuflection, and other Acts of Humility in time of divine Service, are very Exemplary.
Howell, Letters, iv. 36.

How they can change their noble Words and Actions, heretofore so becoming the majesty of a free People, into the base necessity of Court-flatteries and Prostrations, is not only strange and admirable, but lamentable to think on.
Milton, Free Commonwealth.

Lying at the feet of their blessed Lord, with the humblest attention of scholars, and the lowest prostration of subjects.
South, Sermons, IV. i.

3. Great depression; dejection: as, a prostration of spirits.—4. In *med.*, a great loss of strength, which may involve both voluntary and involuntary functions.

A sudden prostration of strength, or weakness, attends this colic.
Arbutnot.

A condition of prostration, whose quickly consummated debility puzzled all who witnessed it.

Charlotte Brontë, Shirley, xxiv.

Nervous prostration. See *nervous*.

prostrator (pros'trā-tor), *n.* [*LL. prostrator*, prostrator, < *L. prosternere*, pp. *prostratus*, overthrow: see *prostrate*.] One who prostrates, overturns, or lays low.

Common people . . . are the great and infallible prostrators of all religion, virtue, honour, order, peace, civility, and humanity, if left to themselves.

Bp. Gauden, Tears of the Church, p. 189. (Davies.)

prostyle (prō'stīl), *a.* [*L. prostylos*, < *Gr. πρόστυλος*, having columns in front, < *πρό*, in front, + *τύλος*, column.] In *arch.*, noting a portico in which the columns stand out entirely in front of the walls of the building to which it is attached; also, noting a temple or other structure having columns in front only, but across the whole front, as distinguished from a portico in *ante*, or a structure characterized by such a portico. See *amphiprostyle*, *antā*, and *portico*.

The next step [in the development of a temple plan] was the removal of these side walls [antes], . . . columns taking their place in the corners, . . . and the prostyle temple was thus obtained.
Reber, Ancient Art (tr. by Clarke), p. 200.

prosy (prō'zi), *a.* [*< prose* + *-y*]. Like prose; prosaic; hence, dull; tedious; tiresome.

Poets are prosy in their common talk,
As the fast trotters, for the most part, walk.
O. W. Holmes, The Banker's Dinner.

They tell us we have fallen on prosy days.
Lowell, Under the Willow.

prosylogism (prō-sil'ō-jizm), *n.* [= *F. prosylogismo* = *Pg. prosillogismo*, < *Gr. προσυλλογισμός*, a syllogism for which the conclusion forms the major premise of another, < *πρό*, before, in front of, + *συλλογισμός*, a conclusion, a consequence: see *syllogism*.] A syllogism of which the conclusion is a premise of another.

A *prosylogism* is then when two syllogisms are so contained in five propositions as that the conclusion of the first becomes the major or minor of the following.

Burgesdicius, tr. by a Gentleman, II. 13.

Epicheirema denotes a syllogism which has a *prosylogism* to establish each of its premises.
Axtator, Logic, p. 157.

Prot. An abbreviation of *Protestant*.

protactic (prō-tak'tik), *a.* [*< Gr. προτακτικός*, placing before, < *προτάσσειν*, place before, < *πρό*, before, in front, + *τάσσειν*, place, arrange: see *tactic*.] Being placed at the beginning; previous.

protagon (prō'ta-gon), *n.* [*NL.*, < *Gr. πρότος*, first, + *γωνία*, ppr. of *γωνεω*, lead, act: see *agent*.] A phosphureted, fatty, crystalline substance, which forms a chief constituent of nervous tissue. Its composition has been represented by the formula $C_{160}H_{308}N_5PO_{35}$.

Now it has recently been discovered that white or fibrous nerve-tissue is chemically distinguished from gray or vesicular nerve-tissue by the presence in large quantity of a substance called *protagon*.

H. Spencer, Prin. of Psychol., § 84, note.

protagonist (prō-tag'ō-nist), *n.* [*< Gr. πρωταγωνιστής*, a chief actor, < *πρότος*, first, + *γωνιστής*, a combatant, pleader, actor: see *agonist*.] In the *Gr. drama*, the leading character or actor in a play; hence, in general, any leading character.

'Tis charged upon me that I make debauched persons (such as they say my Astrologer and Gaster are) my protagonists, or the chief persons of the drama.
Dryden, Mock Astrologer, Pref.

It is impossible to read the books of the older prophets, and especially of their protagonists Amos, without seeing that the new thing which they are compelled to speak is not Jehovah's grace, but His inexorable and righteous wrath.
Encyc. Brit., XIX. 818.

Protalcyonaria (prō-tal'si-ō-nā'ri-ā), *n. pl.* [*NL.*, < *Gr. πρότος*, first, + *NL. Alcyonaria*, q. v.] In some systems, an order of alcyonarian polyps.

protamnion (prō-tam'ni-on), *n.* [*NL.*, < *Gr. πρότος*, first, + *άμνιον*, amnion: see *amnion*.] A hypothetical primitive amniotic animal, the supposed ancestor or common parent-form of the *Amnionata*, or those vertebrates which are provided with an amnion.

In external appearance the *protamnion* was probably an intermediate form between the salamanders and the lizards.
Haeckel, Evol. of Man (trans.), II. 134.

Plan of Prostyle Temple.

Protamæba (prō-tā-mē'bā), *n.* [NL., < Gr. *πρωτός*, first, + NL. *Amæba*.] A genus of *Monera*, or myxopodous *Protozoa*, with lobate, not filamentous, pseudopods. See *Protophages*.

It is open to doubt, however, whether either *Protamæba*, *Protophages*, or *Myxodictyum* is anything but one stage of a cycle of forms which are more completely, though perhaps not yet wholly, represented by some other very interesting *Monera*. Huxley, *Anat. Invert.*, p. 75.

protamæban (prō-tā-mē'ban), *a.* and *n.* I. *a.* Having the characters of *Protamæba*.

II. *n.* A member of the genus *Protamæba*.
protamphirrhine (prō-tam'fir-rin), *n.* [*<* Gr. *πρωτός*, first, + NL. *amphirrhinus*: see *amphirrhine*.] The hypothetical primitive ancestral form of vertebrates having paired nostrils. See *amphirrhine*, *monorhine*.

From this *Protamphirrhine* were developed, in divergent lines, the true Sharks, Rays, and Chimaera; the Ganoids, and the Dipneusta.

Huxley, *Critiques and Addresses*, p. 284.

protandric (prō-tan'drik), *a.* [*As protandry* + *-ic*.] In bot., same as *protandrous*.

protandrous (prō-tan'drus), *a.* [*As protandry* + *-ous*.] In bot., same as *proterandrous*.

protandry (prō-tan'dri), *n.* [*<* Gr. *πρωτός*, first, + *άνδρ* (*ándr*), male (in mod. bot. stamen).] In bot., same as *proterandry*.

The terms *protandry* and *protogyny* used by Hildebrand to express, in the one case the development of the stamens before the pistils, in the other case the development of the pistils before the stamens, are so convenient and expressive that they have been adopted in this paper.

Nature.

pro tanto (prō tan'tō), [*L.*: *pro*, for, so far as; *tanto*, abl. sing. neut. of *tantus*, so much.] For so much; to that extent.

protarch (prō'tärk), *n.* [*<* Gr. *πρωτός*, first, + *ἀρχή*, rule.] A chief ruler.

In the age of the Apostles and the age next succeeding, the highest order in the church under the Apostles were national *protarchs* or patriarchs.

Abp. Bramhall, *Works*, II. 149. (Davies.)

protarsus (prō-tär'sus), *n.*; pl. *protarsi* (-sī). [*NL.*, < Gr. *πρό*, before, + *ταρσός*, > NL. *tarsus*.] In entom., the whole tarsus of the first or fore leg of a six-footed insect, in front of the mesotarsus, which in turn is succeeded by the metatarsus.

protasis (prōt'ā-sis), *n.* [*<* L. *protasis*, < Gr. *πρότασις*, a stretching forward, a proposition, < *πρότειναι*, stretch forward, < *πρό*, forward, + *τείνω*, stretch, extend: see *tend*.] 1. A proposition; a maxim. Johnson. [Rare.]—2. In *gram.* and *rhet.*, the first clause of a conditional sentence, being the condition on which the main term (*apodosis*) depends, or notwithstanding which it takes place: as, if we run (*protasis*), we shall be in time (*apodosis*); although he was incompetent (*protasis*), he was elected (*apodosis*). See *apodosis*.—3. In the ancient drama, the first part of a play, in which the several persons are shown, their characters intimated, and the subject proposed and entered on: opposed to *epitasis*.

I will . . . return to thee, gentle reader, because thou shalt be both the *protasis* and catastrophe of my epistle.

Times Whistle (E. T. S.), p. 111.

Now, gentlemen, what ensure you of our *protasis*, or first act?

B. Jonson, *Magnetick Lady*, I. 1.

4. In *anc. pros.*, the first colon of a dicolic verse or period.

protastacine (prō-tas'ta-sin), *a.* [*<* *Protastacus* + *-ine*.] Having the character of *Protastacus*; primitive or ancestral as regards crawfishes.

The common *protastacine* form is to be sought in the *Trias*.

Huxley, *Crayfish*, vi.

Protastacus (prō-tas'ta-kus), *n.* [*NL.*, < Gr. *πρωτός*, first, + *αστακός*, a lobster.] A hypothetical ancestral marine form from which the existing fluviatile *Potamobidæ* and *Parastacidæ* may have been developed. Huxley, 1878.

protatic (prō-tat'ik), *a.* [*<* L. *protaticus*, < Gr. *πρωτικός*, pertaining to a protasis, < *πρότασις*, a protasis: see *protasis*.] Of or pertaining to a protasis; introductory.

There are indeed some *protatic* persons in the ancients whom they make use of in their plays either to hear or give the relation.

Dryden, *Essay on Dram. Poesy*.

Protaxonia (prō-tak-sō-ni-ä), *n.* pl. [*NL.*, < Gr. *πρωτός*, first, + *ἄξιν*, axis.] In morphology, axonal organic forms all of whose parts are arranged round a main axis: correlated with *Homaxonia*. The *Protaxonia* are divided into *Monaxonia* and *Stauraxonia*.

protaxonal (prō-tak-sō-ni-äl), *a.* [*<* *Protaxon* + *-al*.] Having all parts arranged round a main axis; of or pertaining to *Protaxonia*.

Protea (prō'tē-ä), *n.* [*NL.* (Linnaeus, 1737), so called in allusion to the numerous forms naturally taken by these shrubs, and especially the many new forms and the loss of satiny surfaces when first cultivated; < Gr. *Πρωτεός*, Proteus, a sea-god fabled to change himself into any shape he wished: see *Proteus*.] A genus of apetalous shrubs, the type of the order *Proteaceæ* and tribe *Proteeæ*. It is characterized by a slender two-lipped and prolonged calyx, with the narrow upper segment separate to the base at flowering, and the three others forming an entire or toothed broader lower lip, by the four sessile anthers borne on the calyx and tipped with a prolonged connective, and by the fruit, a hairy nut tipped with the smooth persistent style. There are about 60 species, natives of South Africa, one or two extending north into Abyssinia. They bear alternate or scattered rigid entire leaves, of many shapes in the different species, and flowers in large dense round or cone-like heads, with numerous overlapping scales between, which are sometimes conspicuous and colored, especially red or purple. *P. cynaroides* is known

Branch of *Protea mellifera*, with inflorescence. *a*, a flower; *b*, the hairy nut with the persistent style.

as the Cape artichoke-flower, and *P. mellifera* as the Cape honey-suckle, honey-flower, or sugar-bush. The latter contains in its flower-cup an abundant sweet watery liquor, valued as a remedy for coughs.

Proteeaceæ (prō-tē-ä'sē-ä), *n.* pl. [*NL.* (R. Brown, 1809), < *Protea* + *-aceæ*.] A large and very distinct order of apetalous plants of the series *Daphnales*, characterized by the four valvate calyx-lobes, four opposite stamens, one-celled ovary and one or two ovules, and further distinguished from the nearly related laurel family by its anthers opening, not by a valve, but by a longitudinal line. It includes about 950 species and 52 genera, mainly South African or Australian shrubs or trees, with some in South America, Asia, and the South Pacific. They are classed in two series, *Nucumetaceæ*, with four tribes, bearing a nut or drupe, and *Folliculaceæ*, with three, bearing a follicle or capsule. Nearly all bear alternate or scattered coriaceous leaves, often polymorphous and entire, toothed, or dissected on the same plant. The flowers are usually in a head, spike, or raceme, set with numerous bracts, which often harden into an imbricated cone in fruit. For important genera, see *Protea* (the type), *Petrophila*, *Persoonia*, *Banksia*, *Grevillea*, and *Hakea*.

proteeaceous (prō-tē-ä'shius), *a.* [*<* NL. *Protea* + *-aceous*.] Of or pertaining to the *Proteeaceæ*.

Protean (prō'tē-än), *a.* and *n.* [*<* *Proteus* (see def.) + *-an*.] I. *a.* 1. Pertaining to Proteus, a sea-god of classical mythology, who could change his shape at will; hence, readily assuming different shapes; exceedingly variable.

Your *Protean* turnings cannot change my purpose.

Beau. and Fl., *Thierry and Theodore*, IV. 2.

All the *Protean* transformations of nature, which happen continually. Cudworth, *Intellectual System*, p. 32.

2. [*i. e.*] In *zool.*, changeable in form; executing movements involving shifting of shape, as an animalcule; amœbiform or amœboid; amœban; or of pertaining to a proteus-animalcule. Also *proteiform*.—**Protean animalcules**, *Amæbæ*.—**Protean stone**, a kind of semi-translucent artificial stone prepared from gypsum.

II. *n.* [*i. e.*] 1. An actor who plays a number of parts in one piece. [Theatrical slang.]—2. A salamander of the family *Proteidæ*; a proteid.

Proteana (prō-tē-ä'nä), *n.* pl. [*NL.*: see *Protean*.] Same as *Proteomyza*. E. R. Lankester.

Proteanly (prō'tē-än-li), *adv.* In a *Protean* manner; with assumption of different shapes.

Which matter of the universe is always substantially the same, and neither more nor less, but only *Proteanly* transformed into different shapes.

Cudworth, *Intellectual System*, p. 32.

protect (prō'tekt'), *v. t.* [*<* OF. *protecter*, < L. *protectus*, pp. of *protegere* (> It. *proteggere* = Sp. *Pg. proteger* = F. *protéger*).] *protect*, defend, cover before or over, < *pro*, before, in front of, + *tegere*, cover, roof: see *tegument*.] 1. To cover or shield from danger, harm, damage, trespass, exposure, insult, temptation, or the like; defend; guard; preserve in safety: applied with a wide range, both literally and figuratively, actively and passively.

The gods of Greece *protect* you! Shak., *Pericles*, I. 4. 97.
 Captain, or Colonel, or Knight in arms,
 Whose chance on these defenceless doors may seize, . . .
 Guard them, and him within *protect* from harm.

Milton, *Sonnets*, III.

As the good shepherd tends his fleecy care, . . .

By day o'ersees them, and by night *protects*.

Pope, *Messiah*, I. 52.

It is plain, as a matter of fact, that the great mass of men are *protected* from gross sin by the forms of society.

J. H. Newman, *Parochial Sermons*, I. 151.

Six fresh plants were *protected* (from insects) by separate nets in the year 1870. Two of these proved almost completely self-sterile.

Darwin, *Cross and Self Fertilisation*, p. 333.

2. To act as protector or regent for. Compare *protector*, 2 (*a*).

Car. He will be found a dangerous protector.

Buck. Why should he, then, *protect* our sovereign.

He being of age to govern of himself?

Shak., 2 Hen. VI., I. 1. 165.

3. Specifically, in *polit. econ.*, to guard or strengthen against foreign competition by means of a protective duty.

Whatever increased profits our manufacturers of *protected* articles get, or whatever increased wages they pay their workmen, must come from other classes—the consumers of their products.

The Nation, XLVII. 454.

=Syn. 1. *Defend*, *Shelter*, etc. (see *keep*), screen, secure.

protectee (prō'tek-tē'), *n.* [*<* *protect* + *-ee*.] A person protected; a protégé. [Rare.]

Your *protectee*, White, was clerk to my cousin.

W. Taylor, of Norwich, 1807 (*Memoirs*, II. 196). (Davies.)

protector, *n.* See *protector*.

protectingly (prō'tek'ting-li), *adv.* [*<* *protecting*, pp. of *protect*, *v.*, + *-ly*.] In a protecting manner; by way of protection; so as to protect.

The straw-roofed cottages, . . . all hidden and *protectingly* folded up in the valley folds.

Carlyle, *Sartor Resartus*, II. 2.

protection (prō'tek'shən), *n.* [*<* F. *protection* = Sp. *protección* = Pg. *protecção* = It. *protezione*, < L. *protectio* (*n*), a covering over, < *protegere*, pp. *protectus*, cover over or in front: see *protect*.] 1. The act of protecting, or the state of being protected; defense; shelter or preservation from loss, injury, or any form of harm or evil: as, the *protection* of good laws; divine *protection*.

To your *protection* I commend me, gods!

Shak., *Cymbeline*, II. 2. 2.

O happy islands, if you know your bliss!

Strong by the sea's *protection*, safe by his.

Roscommon, *A Prologue*.

Beauty of that tender and beseeching kind which looks for fondness and *protection*.

Irrving, *Alhambra*, p. 327.

2. That which protects or shields from harm; something that preserves from injury: as, camphor serves as a *protection* against moths.

Let them rise up and help you, and be your *protection*.

Deut. xxxii. 33.

3. A writing that guarantees protection; a passport, safe-conduct, or other writing which secures the bearer from molestation; especially, a certificate of nationality issued by the customs authorities of the United States to seamen who are American citizens.

The party who procured the commission, one George Cleves, brought also a *protection* under the privy signet for searching out the great lake of Iracoyce.

Winthrop, *Hist. New England*, I. 276.

They [boats] generally belong to Greek masters, who have a *protection* from the convent for twelve mariners, and cannot be taken by the Maltese within eighty leagues of the Holy Land.

Pococke, *Description of the East*, II. i. 51.

He had a *protection* during the rebellion.

Johnson

4. In *polit. econ.*, the theory, doctrine, or system of fostering or developing the industries of a country by means of imposts on products of the industries imported into that country; the discouragement of foreign competition with the industries of a country by imposing import duties, granting monopolies of commerce, etc. The system of protection was little known in antiquity, but prevailed extensively in the middle

ages, and has flourished widely since. A strong influence in favor of free trade was exerted in the eighteenth century by the physiocrats and by the writings of Adam Smith. Great Britain adopted a system of practical free trade by the abolition of the corn-laws in 1846 and later years, followed by the removal of duties on nearly all imported articles. On the continent of Europe the general tendency in recent years has been in the direction of increased protection. In the United States the policy of protection has, especially in later history, formed one of the leading national questions. See *tariff* and *revenue*.—**Animals' Protection Acts.** See *animal*.—**Flag of protection.** See *flag*.—**Game protection.** See *game*.—**Writ of protection.** (a) A writ, very rarely granted, whereby the sovereign's protection is guaranteed. (b) A writ issued to a person required to attend court as witness, juror, etc., to secure him from arrest for a certain time.—**Syn.** 2. Guard, refuge, security.

protectional (prō-tek'shōn-əl), *a.* [*< protection + -al.*] Pertaining to protection.

protectionism (prō-tek'shōn-izm), *n.* [= *F. protectionnisme* = *Sp. proteccionismo*; as *protection + -ism*.] The doctrine of the protectionists; the system of protection. See *protection*, 4.

I do not speak . . . of the friendly controversy . . . between the leanings of America to *protectionism* and the more daring reliance of the old country upon free and unrestricted intercourse with all the world.

Gladstone, *N. A. Rev.*, CXXVII. 179.

protectionist (prō-tek'shōn-ist), *n.* and *a.* [= *F. protectionniste* = *Sp. proteccionista*; as *protection + -ist*.] *I. n.* One who favors the protection of some branch of industry, or of native industries generally, from foreign competition, by imposing duties on imports and by other means.

Polk was accused of having gone over, bag and baggage, to the camp of the *protectionists*.

H. von Holdt, John C. Calhoun, p. 217.

II. a. Favoring or supporting the economic doctrine of protection.

Pennsylvania has always been a *Protectionist State*.
Westminster Rev., CXXVIII. 832.

protective (prō-tek'tiv), *a.* and *n.* [= *Fg. protectivo*; *< protect + -ive*.] *I. a.* 1. Affording protection; sheltering; defensive.

The favour of a *protective Providence*.

Feltham, *Resolves*, II. 58.

There is not a single white land-bird or quadruped in Europe, except the few arctic or Alpine species, to which white is a *protective colour*.

A. R. Wallace, *Nat. Select.*, p. 65.

Law is the necessary check upon crime, and gives to the standard of public morality a *protective sanction* which it sorely needs.

H. N. Ozonham, *Short Studies*, p. 87.

2. Adapted or intended to afford protection: as, a *protective measure*; affording protection to commodities of home production: as, a *protective tariff*; *protective taxes*.—**Protective mimicry.** See *mimicry*, 3.—**Protective paper**, paper so made that anything printed or written upon it cannot be tampered with without leaving traces. Water-marks, the incorporation of a special fiber, and a peculiar texture produced in the manufacture are devices employed for this purpose, as well as the printing of the surface with fine lines, and various chemical treatment of the paper.—**Protective person**, in *zool.*, that part of a compound organism which specially functions as a protection to other parts or persons of a corpus, as the hydrophyllum of a hydroid polyp.—**Protective sheath**, in *bot.* See *sheath*.

II. n. 1. That which protects; something adapted to afford protection.

Fur coats are the grand *protectives* on the journey.
Nineteenth Century, XXIV. 60.

2. In *surg.*, carbolized oiled silk applied over wounds for the exclusion of pathogenic bacteria.

protectively (prō-tek'tiv-li), *adv.* In a manner adapted to give protection; so as to protect: as, insects *protectively* colored.

The markings . . . about the muzzle, ears, and throat of antelope, deer, hares, and other mammals, whether *protectively* colored or not.

Amer. Nat., XXII. 203.

protectiveness (prō-tek'tiv-nes), *n.* A disposition to protect or guard; the quality of being protective.

Shelley's affection for his young wife had strengthened with his growing sense of *protectiveness* towards her.

E. Dowden, Shelley, I. 196.

protector (prō-tek'tor), *n.* [Also *protector*; = *F. protecteur* = *Sp. Pg. protector* = *It. protettore*, *< LL. protector*, a protector, *< L. protegere*, pp. *protectus*, cover before or over: see *protect*.] 1. One who or that which protects, defends, or shields from injury or any evil; a defender; a guardian; a patron: as, a child's natural *protectors*.

As for me, tell them I will henceforth be their God, *protector*, and patron, and they shall call me Quirinus.

North, tr. of Plutarch, p. 29.

I hither fled,
Under the covering of a careful night,
Who seem'd my good *protector*.

Shak., *Pericles*, I. 2. 82.

What farther relates to Charles I. as *protector* of the arts will be found in the subsequent pages, under the articles of the different professors whom he countenanced.

Walpole, *Anecdotes of Painting*, II. II.

But Vivien . . . clung to him and hugged him close;
And call'd him dear *protector* in her fight.

Tennyson, *Merlin and Vivien*.

2. In *Eng. hist.*: (a) One who had the care of the kingdom during the king's minority or incapacity; a regent: as, the Duke of Somerset was *protector* in the reign of Edward VI.

Go in peace, Humphrey, no less beloved
Than when thou wert *protector* to thy king.

Shak., 2 Hen. VI., II. 8. 27.

The council . . . would have preferred to adopt the system which had been adopted in the early days of Henry VI., and to have governed the kingdom in the King's name, with Gloucester as president or *protector*.

Stubbs, *Const. Hist.*, § 360.

(b) [*cap.*] The title (in full *Lord Protector*) of the head of the executive during part of the period of the Commonwealth: it was held by Oliver Cromwell 1653-8, and by Richard Cromwell 1658-9.—3. In *weaving*, a stop-motion attached to a power-loom, which immediately stops the loom when the shuttle fails to enter the box.—**Cardinal protector**, a cardinal who represents at Rome the interests of a nation or of several nations; also, a cardinal who represents the interests of a religious order, etc.—**Lord Protector**. Same as *protector*, 2 (b).—**Protector of the settlement**, in *law*, the person whose consent is necessary under a settlement to enable the tenant in tail to cut off the entail. He is usually the tenant for life in possession, but the settler of the lands may appoint in his place any number of persons, not exceeding three, to be together *protector* during the continuance of the estate preceding the estate tail. *Digby*.

protectorial (prō-tek'tor-əl), *a.* [*< protector + -al*.] Relating to a protector; protectorial.

The contention of the representative system and the *protectoral power*.
Godwin, *Mandeville*, I. 225. (*Davies*.)

protectorate (prō-tek'tor-āt), *n.* [= *F. protectorat* = *Sp. Pg. protectorado* = *It. protettorato*, *< NL. "protectoratus"*, the office of a protector, *< LL. protector*, protector: see *protector*.] 1. Government by a protector; also, the rank or position of a protector, or the period of his rule: specifically [*cap.*] used with reference to the period in English history during which Oliver and Richard Cromwell held the title of Lord Protector.

Richard Cromwell . . . being designed to be his Father's Successor in the *Protectorate*, was about the time that this honour was done to him, sworn a Privy Counsellor.

Wood, *Fasti Oxon.*, II. 119.

His well-known loyalty [was] evinced by secret services to the Royal cause during the *Protectorate*.

Barham, *Ingoldsby Legends*, I. 208.

The arrival of a governor of course put an end to the *protectorate* of Oloffe the Dreamer.

Irving, *Knickerbocker*, p. 147.

2. A relation assumed by a strong nation toward a weak one, whereby the former protects the latter from hostile invasion or dictation, and interferes more or less in its domestic concerns.

The seven Ionian islands—their consent being given through their parliament, and Great Britain's abandonment of her *protectorate* having been accepted—are to form a part of the Greek monarchy.

Woolsey, *Introd. to Inter. Law*, App. II., p. 422.

In summing up what we have discovered with regard to our new *protectorates* and our recent annexations, we have then to note that until about 1884 we had for some time almost consistently refused offers of territory which had been pressed upon us.

Sir C. W. Dilke, *Probs. of Greater Britain*, v. I.

protectorial (prō-tek'tor-ri-əl), *a.* [*< LL. protectorius*, pertaining to a protector (see *protector*), + *-al*.] Relating to a protector; protectorial.

protectorian (prō-tek'tor-ri-ən), *a.* [*< LL. protectorius*, pertaining to a protector, + *-an*.] Same as *protectorial*; specifically [*cap.*], relating to the Protectorate in English history.

This Lord . . . during the tyranny of the *Protectorian* times kept his secret Loyalty to his Sovereign.

Fuller, *Worthies, Herefordshire*, II. 96.

protectorless (prō-tek'tor-less), *a.* [*< protector + -less*.] Having no protector.

protectorship (prō-tek'tor-ship), *n.* [*< protector + -ship*.] The office of a protector or regent; a protectorate; the period during which a protector governs.

And did he not, in his *protectorship*,
Lend great sums of money through the realm?

Shak., 2 Hen. VI., III. 1. 60.

The duke of York, when he accepted the *protectorship* in 1455, insisted on the payment of the council.

Stubbs, *Const. Hist.*, § 367.

protectory (prō-tek'tō-ri), *n.*; pl. *protectories* (-riz). [= *Sp. protectorio*, *a.*, *< LL. protectorius*, pertaining to a protector (ML. *protectorium*, *n.*, a safe-conduct), *< protector*, protector: see

protector.] An institution for the protection and training of destitute, vagrant, truant, or vicious children: the specific name of a Roman Catholic institution in New York city.

protectress (prō-tek'tres), *n.* [*< F. protectrice* = *Sp. protectriz* = *It. protettrice*, *< LL. protectrix*, fem. of *protector*, a protector: see *protector*.] A woman who protects.

All things should be guided by her direction, as the sovereign patroness and *protectress* of the enterprise.

Bacon.

protectrix (prō-tek'triks), *n.* [*< LL. protectrix*, fem. of *protector*, protector: see *protectress*.] Same as *protectress*.

Proteaceæ (prō-tē'ē-ē), *n. pl.* [NL. (A. de Candel, 1856), *< Protea + -acæ*.] A tribe of plants of the order *Proteaceæ* and series *Nucumtaceæ*. It is characterized by its dry nut, single ovule, and anthers seated on the base of the calyx-lobes at the summit of the tube, and usually all perfect. It includes 14 genera, of which *Protea* is the type.

protégé (prō-tā-zhā'), *n.* [F., pp. of *protéger*, protect, *< L. protegere*, protect: see *protect*.] One who is under the care and protection of another.

protégée (prō-tā-zhā'), *n.* [F., fem. of *protéger*, q. v.] A girl or woman who is under the care and protection of another person.

proteid¹ (prō-tē'id), *n.* [*< prote(in) + -id*.] A substance formerly supposed to contain protein as an essential ingredient. The term is now applied to a considerable number of nitrogenous bodies which make up the substance of the soft tissues of the body and of the blood, and are also widely distributed in the vegetable kingdom. They are amorphous solids, having certain general features in common, but differing widely in solubility and in their decomposition products. The gluten of flour, egg, albumin, the fibrin of the blood, syntonin, and casein are examples of proteids. Gelatin and chondrin Huxley calls outlying members of the same group. Also called *albuminoid*.

Food-stuffs have been divided into heat-producers and tissue-formers—the amyloids and fats constituting the former division, the *proteids* the latter. But this is a very misleading classification, inasmuch as it implies on the one hand that the oxidation of the *proteids* does not develop heat, and on the other that the amyloids and fats, as they oxidize, subserve only the production of heat. *Proteids* are tissue-formers, inasmuch as no tissue can be produced without them; but they are also heat-producers, not only directly, but because, as we have seen, . . . they are competent to give rise to amyloids by chemical metamorphosis within the body.

Huxley and Youmans, *Physiol.* (1875), § 176.

proteid² (prō-tē'id), *n.* [*< Proteid-æ*.] In *zool.*, an amphibian of the family *Proteidae*.

Proteida (prō-tē'id-ē), *n. pl.* [NL., *< Proteus + -ida*.] In *zool.*, an order or suborder of tailed amphibians, continuous with the family *Proteidae*.

Proteidæ (prō-tē'id-ē), *n. pl.* [NL., *< Proteus + -idæ*.] A family of gradient or tailed amphibians, typified by the genus *Proteus*, with external gills persistent throughout life, maxillaries absent, intermaxillaries and mandible toothed, palatine and pterygoid bones developed, and orbitosphenoid elongate and not entering into the palate. The American representative of this family is the menobranch. See *cut* under *Menobranchus*. *Menobranchidæ* is a synonym.

Proteidea (prō-tē'id-ē-ē), *n. pl.* [NL.: see *Proteidæ*.] A division of saurobatrachian or urodele *Amphibia*, having the external branchiæ or gill-clefts persistent, or disappearing only in old age, no eyelids, amphiocelous vertebrae, and cartilaginous carpus and tarsus: synonymous with *Proteida*, and contrasted with the *Salamandridæ*.

proteidean (prō-tē'id-ē-ēn), *a.* [*< Proteidæ + -an*.] Of or pertaining to the *Proteidea*.

proteiform (prō-tē'id-ē-ēn), *a.* [*< NL. Proteus* (see *Proteus*, 2) + *L. forma*, form.] Same as *protean*, 2. *Encyc. Brit.*, IX. 376.

protein (prō-tē-in), *n.* [*< Gr. πρῶτος*, first, + *-e-in*.] 1. A hypothetical substance formerly believed to be the essential nitrogenous constituent of food, and to exist in animal and vegetable albumin, fibrin, casein, and other bodies. This view has been abandoned, and at present the word is chiefly used as the first element in compounds.

2. The nitrogenous material in an animal or vegetable substance. [Recent.]—**Protein-bodies**. Same as *proteids*. See *proteid*.—**Protein-granules**. Same as *aleurone*.

Proteina (prō-tē-i-nā), *n. pl.* [NL. (Wallich), *< Proteus + -ina*.] A group of protean or amebiform rhizopods, having a nucleus and contractile vacuole: divided into *Actinophryna* and *Amœbina*, respectively characterized by their monomorphous and polymorphous pseudopods. Sun-animalcules and ordinary proteus-animal-

cules illustrate the two divisions. See cut under *amæba*.

proteinaceous (prō'tē-i-nā'shius), *a.* [*< protein + -aceous.*] Resembling, containing, or consisting of protein. Also *proteinous*.

Digestion—that is, solution of the *proteinaceous* and other nutritive matters contained in food.

Huxley and Martin, Elem. Biology, xl.

Proteininae (prō'tē-i-nī'nē), *n. pl.* [NL., *< Proteinus + -inae.*] A subfamily of *Staphylinidae* or rove-beetles, typified by the genus *Proteinus*. Also *Proteinina*, *Proteinini*.

proteinous (prō'tē-i-nus), *a.* [*< protein + -ous.*] Same as *proteinaceous*.

Proteinus (prō'tē-i-nus), *n.* [NL. (Latreille, 1796).] The typical genus of the subfamily *Proteininae*, having the elytra mostly covering the abdomen, and somewhat perfoliate antennae inserted before the eyes.

Proteles (prot'e-lēz), *n.* [NL. (Geoffroy,), irreg. so called as having five toes on the fore feet, lit. 'complete in front,' *< Gr. πρό*, before, in front, + *τέλος*, end. Cf. *Ateles*, *Brachyteles*, words of like formation.] The only genus of the family *Proteidae*, containing one species, the aardwolf or earthwolf of South Africa, *P. lalandi*. See cut under *aardwolf*.

Proteidæ (prō'tel'i-dē), *n. pl.* [NL., *< Proteles + -idæ.*] A family of hyeniform seluid carnivorous quadrupeds, of the order *Feræ*, typified by the genus *Proteles*, having 32 teeth, very small and distant molars, no functionalized sectorial molars, the feet digitigrade, and the fore feet five-toed.

pro tem. An abbreviation of *pro tempore*.

protembryo (prō'tem'bri-ō), *n.* [NL., *< Gr. πρότερος*, first, + *ἐμβρυον*, embryo.] A stage of the ova of metazoic animals which is parallel with the adult colonies of certain protozoans: the *monoplast* of Lankester, or *amphimorula* of Haeckel, including the *monoplacula* and *diploplacula* of Hyatt. Hyatt, Proc. Bost. Soc. Nat. Hist., Nov. 16, 1887.

protembryonic (prō'tem'bri-on'ik), *a.* [*< protembryo(-n) + -ic.*] Of or pertaining to a protembryo.

Protemnodon (prō'tem'nō-don), *n.* [NL. (Owen, 1874), *< Gr. προτέμνω*, cut short, + *δόντις* (δόντ-) = *E. tooth*.] A genus of fossil diprotodont marsupials from the late Tertiary of Australia.

pro tempore (prō tem'pō-rē), [*L.: pro*, for; *tempore*, abl. sing. of *tempus*, time: see *temporal*.] For the time being; temporary: as, a secretary *pro tempore*. Abbreviated *pro tem.*

protencephalon (prō'ten-sēf'ə-lon), *n.*; *pl. protencephala* (-lā). [NL., *< Gr. πρότερος*, first, + *ἐγκεφαλος*, the brain.] The fore-brain: divided into *protencephalon primum*, the fore-brain proper, or prosencephalon, and *protencephalon secundarium*, the thalamencephalon or dien-cephalon. Rahl-Ruckard, 1884. See cuts under *encephalon* and *Petromyzontidae*.

protenchyma (prō'teng'ki-mā), *n.* [NL., *< Gr. πρότερος*, first, + *ἐχ्यूμα*, an infusion (see *parenchyma*).] In bot., a term used by Nägeli for all tissues except the fibrovascular (*epenchyma*)—including, therefore, the primary meristem, epidermal tissue, and fundamental tissue of Sachs. See *fundamental cells*, under *fundamental*.

The *protenchyma* of Nägeli therefore splits up, according to me, into three kinds of equal value with his *epenchyma*. Sachs, Botany (trans.), p. 108.

protend (prō'tend'), *v. t.* [= *It. protendere*, *< L. protendere*, stretch forth or out, *< pro*, forth, forward, + *tendere*, stretch, extend: see *tend*. Cf. *portend*.] To hold out; stretch forth; extend forward: used especially of a spear.

He spoke no more, but hasten'd, void of fear,
And threaten'd with his long protended spear.

Dryden, Æneid, x.

Thy fate was next, O Phaestus! doom'd to feel
The great Idomeneus' protended steel.

Pope, Iliad, v. 55.

From hill to hill he hies,
His staff protending like a hunter's spear,
Or by its aid leaping from crag to crag.

Wordsworth, Prelude, viii.

protenset (prō'tens'), *n.* [Irreg. for *proten-sion*, *q. v.*] Extension; drawing out. [Rare.]

Begin, O Clio! and recount from hence
My glorious Sovereigns' goodly ancestry,
Till that by dew degrees, and long procreancy,
Thou have it lastly brought unto her Excellence.

Spenser, F. Q., III. iii. 4.

proten-sion (prō'ten'shōn), *n.* [*< L. protensio(-n)*, a stretching out, *< protendere*, pp. *pro-tensus*, stretch forth or out: see *protend*.] Temporal extension; duration.

Time, *proten-sion*, or protensive quantity, called likewise duration, is a necessary condition of thought.

Str W. Hamilton, Discussions, Appendix I. (A).

protensity (prō'ten'si-ti), *n.* [*< L. protensus*, pp. of *protendere*, stretch forth or out (see *protend*), + *-ity*.] The character of being protensive or of taking up time.

protensive (prō'ten'siv), *a.* [*< L. protensus*, pp. of *protendere*, stretch forth or out (see *protend*), + *-ive*.] Drawn out in one dimension; extended; stretching forward.

Examples of this sudden effort, and of this instantaneous desisting from the attempt, are manifested in the extensive sublime of space, and in the *protensive* sublime of time.

Str W. Hamilton, Metaph., xlv.

Protensive quantity. See *quantity*.

Proteolepadidæ (prō'tē-ō-le-pad'i-dē), *n. pl.* [NL., *< Proteolepas (-ad-) + -idæ.*] A family of apodal cirripeds, represented by the genus *Proteolepas*.

Proteolepas (prō'tē-ō-le-pas), *n.* [NL., *< Proteus* (see *Proteus*, 3) + *Gr. λεπάς*, a limpet: see *Lepas*.] The single known genus of the cirriped group *Apoda*. *P. bistricta* is about one fifth of an inch long, and resembles the larva of an insect. It is a parasite of another cirriped, *Alepas cornuta*.

proteolysis (prō'tē-ō-l'i-sis), *n.* [NL., *< prote(id)*, *< Gr. λύσις*, dissolving.] The change effected in proteins during their digestion.

proteolytic (prō'tē-ō-lit'ik), *a.* [*< proteolysis (-lyt-) + -ic.*] Pertaining to proteolysis, or the digestion of proteids.

Proteomyxa (prō'tē-ō-mik'-sā), *n. pl.* [NL., *< Gr. Πρωτεΐς*, *Proteus*, + *μύξα*, slime, mucus: see *mucus*.] Lankester's name of a so-called class of gymnomyxine *Protozoa*, containing a great many of the lowest protozoans, of negative characters, insufficiently known, or not satisfactorily referred to any definable group. The name is a formal expression of ignorance upon the subject. Many of the so-called *Proteomyxa* are usually referred to other and more definite groups, especially the *Mycetozoa*. The *Monera* of Haeckel, in so far as they are proper persons at all, come under this head. The group is also called *Proteana*.

proter (prō'tēr), *n.* [Appar. a var. of *proker*, by confusion with *poter*, *< pote*, poke.] A poker.

proterandrous (prō'ter-an'drus), *a.* [*< proterandry + -ous.*] In bot. and zool., exhibiting or characterized by proterandry. Also *protan-drous*.

Certain individuals mature their pollen before the female flowers on the same plant are ready for fertilization, and are called *proterandrous*; whilst conversely other individuals, called *proterogynous*, have their stigmas mature before their pollen is ready.

Darwin, Different Forms of Flowers, p. 10.

proterandry (prō'ter-an'dri), *n.* [*< Gr. πρότερος*, being before, *fore*, former, + *άνδρ* (άνδρ-), male (in mod. bot. stamen).] 1. In bot., the maturation of the anthers and the discharge of the pollen in a hermaphrodite flower before the stigmas of that flower are receptive of pollen: an adaptation for cross-fertilization. Compare *proterogyny*, and see *dichogamy* and *heteracmy*.—2. In zool., development of male parts or maturation of male products in hermaphrodite animals before the development or maturation of those of the opposite sex.

If the polytides are unisexual, then the *proterandry* refers only to the colony as a whole.

W. A. Herdman, Nature, XXXVII. 218.

Also *protan-dry*.

proteranthous (prō'ter-an'thus), *a.* [*< Gr. πρότερος*, *fore*, + *άνθος*, flower.] In bot., noting a plant whose flowers appear before the leaves.

Asa Gray.

proterobase (prō'ter-ō-bās), *n.* [*< Gr. πρότερος*, *fore*, + *βάσις*, base.] The name given by Gumbel to a Paleozoic eruptive rock resembling diabase in composition, but being in a somewhat more advanced stage of alteration than are the varieties of the rock ordinarily designated by that name. The term *proterobase* has also been used by other lithologists, generally with reference to rocks of the diabasic type, but in a highly altered condition.

Proteroglossa (prō'ter-ō-glos'sā), *n. pl.* [NL., *< Gr. πρότερος*, *fore*, + *γλῶσσα*, tongue: see *glossa*.] In Günther's classification, one of three primary divisions of salient batrachians, having the tongue free in front, represented by the family

Rhinophrynidae: correlated with *Aglossa* and *Opisthoglossa*.

proteroglossate (prō'ter-ō-glos'sāt), *a.* [*< Proteroglossa + -ate*.] Having the tongue free in front, as a batrachian; pertaining to the *Proteroglossa*, or having their characters.

proteroglyph (prō'ter-ō-glif), *n.* A venomous serpent of the group *Proteroglyphæ*.

Proteroglyphæ (prō'ter-ō-glif'i-fā), *n. pl.* [NL. (F. Proteroglyphes, Duméril and Bibron), *< Gr. πρότερος*, *fore*, + *γλίφειν*, carve.] A suborder or other division of *Ophidia*, containing venomous cobraform serpents whose anterior maxillary teeth are grooved or perforate and succeeded by smooth solid teeth, and whose maxillary bones are horizontal and do not reach the premaxillaries: thus contrasted with the crotaliform venomous snakes, or *Solenoglyphæ*. Though the general aspect of these snakes is colubrine, or like that of harmless serpents, they are all poisonous, and some of them are among the most deadly of all thanatophidians. The families *Elapidae*, *Najidae*, *Dendroaspidae*, and *Hydrophiidae* compose the *Proteroglyphæ*. Also *Proteroglyphia*.

proteroglyphic (prō'ter-ō-glif'ik), *a.* [*< Proteroglyphæ + -ic.*] Of or pertaining to the *Proteroglyphæ*.

proterogynous (prō'ter-ō-jō'i-nus), *a.* [*< proterogyny + -ous.*] In bot., exhibiting or characterized by proterogyny. See extract under *proterandrous*.

proterogyny (prō'ter-ō-jō'i-ni), *n.* [*< Gr. πρότερος*, *fore*, + *γυνή*, female (in mod. bot. pistil).] In bot., the maturation of the stigmas in a hermaphrodite flower before the anthers in that flower have matured their pollen. It is an adaptation for cross-fertilization. Compare *proterandry*, and see *dichogamy*.

proterosaur (prō'ter-ō-sār), *n.* A reptile of the family *Proterosauridae*.

Proterosauria (prō'ter-ō-sār'i-ā), *n. pl.* [NL., see *Proterosaurus*.] One of the major divisions of the *Lucertilia*, a fossil group consisting of some of the oldest known reptiles, whose remains occur in rocks of the Permian formation in Thuringia and in those of corresponding age in England: no later representatives of the group are known. It is typified by the genus *Proterosaurus*, based upon the Thuringian lizard, which attained a length of 6 or 7 feet.

proterosaurian (prō'ter-ō-sār'i-an), *a.* and *n.* 1. *a.* Of or pertaining to the *Proterosauria*.

II. *n.* A member of the *Proterosauria*; a proterosaur.

Proterosauridæ (prō'ter-ō-sār'i-dē), *n. pl.* [NL., *< Proterosaurus + -idæ.*] A family of fossil saurians, based on the genus *Proterosaurus*.

Proterosaurus (prō'ter-ō-sār'us), *n.* [NL., *< Gr. πρότερος*, *fore*, + *σαῦρος*, lizard.] The genus represented by the fossil monitor of Thuringia, which also occurs in the Durham Permian rocks. It was long the earliest known fossil reptile.

Proterospongia (prō'ter-ō-spon'ji-ā), *n.* [NL., *< Gr. πρότερος*, *fore*, + *σπογγία*, a sponge.] A genus of choanoflagellate animalcules, founded by Saville Kent on the form *Proterospongia*, placed by him in a family *Phalansteriidae*, and regarded as furnishing a stock-form from which, by the process of evolution, all sponges might have been derived. A species is named *P. haeckeli*.

protervity (prō'tēr'vi-ti), *n.*; *pl. protervities* (-tiz). [*< OF. protervite* = Sp. *protervidad* = *It. protervità*, *< L. protervita(t)-is*, boldness, impudence, *< protervus* (> *It. Sp. Pg. protervo* = *OF. proterve*), violent, wanton, prob. *< proterere*, trample down, overthrow, *< pro*, forth, + *terere*, rub, bruise: see *trite*.] Peevishness; petulance; wantonness.

Companion to T. Becket in his exile, but no partner in his protervity against his Prince.

Fuller, Worthies, Wilts, II. 442. (Davies.)

In his [Victor Hugo's] poems and plays there are the same unaccountable protervities that have already astonished us in the romances.

R. L. Stevenson, Victor Hugo's Romances.

protest (prō'test'), *v.* [*< F. protester* = Sp. *Pg. protestar* = *It. protestare*, *< L. protestari*, *pro-testare*, declare in public, bear witness, *< pro*, before, forth, + *testari*, bear witness, *< testis*, a witness, one who attests: see *test*.] I. *trans.* 1. To make a solemn declaration or affirmation of; bear witness or testimony to; assert; asseverate; declare: as, to *protest* one's innocence.

Verily he [D. Barnes] protested openly at St. Mary's spital, the Tuesday in Easter week, that he was never of that mind.

Coverdale, Remains (Parker Soc.), p. 341.

To think upon her woes I do protest

That I have wept a hundred several times.

Shak., T. G. of V., iv. 4. 149.

Proteolepas bistricta.
m, mouth; g, antenna; h, peduncle; a, vesicula seminalis and penis.

Their own guilty carriage *protests* they doo feare.
Milton, Church-Government, l. 5.
"I *protest*, Charles," cried my wife, "this is the way you
always damp my girls and me when we are in spirits."
Goldsmith, Vicar, v.

2. To call as a witness in affirming or denying,
or to prove an affirmation; appeal to. [Rare.]

Fiercely opposed
My journey strange, with clamorous uproar
Protesting fate supreme. Milton, P. L., x. 480.
3†. To declare publicly; publish; make known.
I will make it good how you dare, with what you dare,
and when you dare.—Do me right, or I will *protest* your
cowardice. Shak., Much Ado, v. l. 149.

Thou wouldst not willingly
Live a *protested* coward, or be call'd one?
Beau. and Fl., Little French Lawyer, l. 1.
4†. To promise solemnly; vow.

On Diana's altar to *protest*
For aye austerity and single life.
Shak., M. N. D., l. 1. 89.

5. To declare formally to be insufficiently provided
for by deposit or payment: said of a note
or bill of exchange, and also, figuratively, of
personal credit, statements, etc. See *protest*,
n., 3.

Turn country bankrupt
In mine own town, upon the market day,
And be *protested* for my butter and eggs,
To the last hodge of oats and bottle of hay.
B. Jonson, New Inn, l. 1.

The bill lies for payment at Dollar's and Co., in Birch-
lane, and if not taken up this afternoon will be *protested*.
Colman, The Spleen, l. (Davies.)

"I said—I did nothing," cried Lady Cecilia. . . . An
appealing look to Helen was, however, *protested*. "To the
best of my recollection at least," Lady Cecilia immediately
added.
Miss Edgeworth, Helen, vi. (Davies.)

The moral market had the usual chills
Of Virtue suffering from *protested* bills.
O. W. Holmes, The Banker's Dinner.

=Syn. 1. *Protest* differs from the words compared under
assert (*aver*, *asavere*, etc.) in being more solemn and
earnest, and in implying more of previous contradiction
or expectation of contradiction (see the quotations above);
like them, it is used to make the statement seem certainly
true.

II. *intrans.* 1. To bear testimony; affirm
with solemnity; make a solemn declaration
of a fact or an opinion; asseverate.

The man did solemnly *protest* unto us, saying, Ye shall
not see my face, except your brother be with you.
Gen. xliii. 8.

The lady doth *protest* too much, methinks.
Shak., Hamlet, iii. 2. 240.

2. To make a solemn or formal declaration
(often in writing) in condemnation of an act or
measure proposed or accomplished: often with
against.

Now therefore hearken unto their voice: howbeit yet
protest solemnly unto them, and shew them the manner
of the king that shall reign over them. 1 Sam. viii. 9.

When they say the Bishops had antiently *protested*, it was
only dissenting, and that in the case of the Pope.
Selden, Table-Talk, p. 68.

Warham, as an old lawyer, *protested* in a formal docu-
ment *against* all legislation which might be enacted *against*
ecclesiastical or papal power.

Subbe, Medieval and Modern Hist., p. 279.

protest (prō'test, formerly also prō'test'), *n.* [*ME. protest* (= *D. G. Sw. Dan. protest*), < *OF. protest* (*F. protêt*), *m.*, *proteste*, *f.*, = *Sp. protesto*, *m.*, *protesta*, *f.*, = *Pg. It. protesto*, *m.* (*ML. protestum*, neut.), a protest (mostly in the com-
mercial sense); from the verb.] 1. The act of
protesting, or that which is protested; an affir-
mation; asseveration; protestation: now re-
stricted for the most part to a solemn or formal
declaration against some act or course of ac-
tion, by which a person declares (and some-
times has his declaration recorded) that he re-
fuses, or only conditionally yields, his con-
sent to some act to which he might otherwise
be assumed to have yielded an unconditional
assent: as, to submit under *protest*; a *protest*
against the action of a committee.

Swear me, Kate, like a lady as thou art,
A good mouth-filling oath, and leave "in sooth,"
And such *protest* of pepper-gingerbread,
To velvet-guards. Shak., 1 Hen. IV., iii. 1. 290.

He [Spenser] is a standing *protest* against the tyranny of
Commonplace. Lowell, Among my Books, 2d ser., p. 199.

He took away the reproach of silent consent that would
otherwise have lain against the indignant minority, by
uttering, in the hour and place wherein these outrages
were done, the stern *protest*. Emerson, Theodore Parker.

Two *protests* of peers against the proceedings of the min-
isters were expunged from the records of the House of
Lords. Lecky, Eng. in 18th Cent., l.

2. In *law*: (a) In a popular sense, all the steps
taken to fix the liability of a drawer or indorser
of commercial paper when the paper is dishon-
ored. (b) Technically, the solemn declaration
on the part of the holder of a bill or note against

any loss to be sustained by him by reason of the
non-acceptance or non-payment, as the case may
be, of the bill or note in question, and the calling
of a notary to witness that due steps have been
taken to prevent such loss. (c) The document
authenticating this act. (d) A written declara-
tion, usually by the master of a ship, attested
by a justice of the peace or a consul, stating the
circumstances under which any injury has hap-
pened to the ship or cargo, or other circum-
stances calculated to affect the liability of the
owners, officers, crew, etc.—**Acceptance supra
protest.** See *acceptance*, l.—**Acceptor supra protest.**
See *acceptor*.—**Protest of Spire (Speyer)**, a protest
of Lutherans against the decision of the Diet of Spire in
1529, which had denounced the Reformation. The es-
sential principles involved in the protest against this de-
cree were—(a) that the Roman Catholic Church could
not judge the Reformed churches, because they were no
longer in communion with her; (b) that the authority
of the Bible is supreme, and above that of councils and
bishops; and (c) that the Bible is not to be interpreted
according to tradition, but is to be interpreted by means
of itself.

Protestancy (prot'es-tan-si), *n.* [*Protestan(t)*
+ *-cy*.] Protestantism.

Protestancy is called to the bar, and though not sen-
tenced by you to death without mercy, yet arraigned of
so much natural malignity (if not corrected by ignorance
or contrition) as to be in itself destructive of salvation.
Chillingworth, Religion of Protestants, l. 1.

protestando (prō'tes-tan-dō), *n.* [*L., abl. sing.*
gerund. of protestari, declare in public, bear
witness: see *protest*.] In *law*, a protestation.
See *protestation*, 3.

protestant (prot'es-tant), *a. and n.* [*F. protes-
tant* = *Sp. Pg. It. protestante* = *D. G. Dan. Sw. protestant* = *Russ. protestantii*, < *L. protes-
tan(t)-is*, ppr. of *protestari*, declare in public, bear
witness: see *protest*.] I. *a.* 1. *Protesting*;
making a protest. [In this use also pronounced
distinctively prō'tes'tant.]

A private *protestant* tribunal [conscience], where person-
al moral convictions preside, and which alone enables men
to adapt themselves to new ethical situations or environ-
ments. G. S. Hall, Amer. Jour. Psychol., III. 61.

2. [*cap.*] Of or pertaining to Protestants or
their doctrines or forms of religion.

All sound *Protestant* writers. Milton, Civil Power.

Protestant Friends. Same as *Free Congregations* (which
see, under *congregation*).

II. *n.* 1. One who protests; one who makes
protestation. [In this use also pronounced dis-
tinctively prō'tes'tant.]

Bid me to live, and I will live
Thy *protestant* to be;
Or bid me love, and I will give
A loving heart to thee. Herriek, To Anthea.

If consistency were a matter of great concern to parti-
sans, it might also be pertinent to suggest that no great
moral value can be attached to a protest against evil-doing
at which the *protestant* has connived.

The Century, XXX. 328.

2. [*cap.*] A member or an adherent of one of
those Christian bodies which are descended
from the Reformation of the sixteenth century:
in general language, opposed to *Roman Catho-
lic and Greek*. The name, first applied to the Luthera-
ns who protested at the Diet of Spire in 1529, came to
be applied to Lutherans generally, and afterward was ex-
tended to Calvinists and other opponents of the papacy in
countries where the papacy had formerly been in power.
(See *protest of Spire*, under *protest*.) The Protestants
gained a strong foothold in some countries, as France,
in which they are now numerically weak. They are in
the majority in Great Britain and many of its possessions,
in Germany, the Netherlands, Switzerland, the Scandina-
vian countries, and the United States.

What Gerson and Panormitanus write, which were an-
cient fathers, and not new Protestants.

Bp. Pilkington, Works (ed. Parker Soc., 1562), p. 532.

One of these tracts [printed about 1570] has the follow-
ing title: Ane prettie Mirrour, or Conference betwix the
Faithfull Protestant and the Dissembling false Hypocrite.

Lauder, Dewtie of Kingis (R. E. T. S.), Pref., p. ix.

Queen Elizabeth, finding how fickle the French *Protes-
tants* had carried themselves towards her, intended to
make a Peace. Baker, Chronicles, p. 333.

Papist or *Protestant*, or both between,
Like good Erasmus, in an honest mean.
Pope, Imit. of Horace, II. l. 65.

Protestantical (prot'es-tan-ti-kal), *a.* [*Protes-
tant* + *-ic-al*.] Protestant. [Rare.]

The *protestantical* Church of England.

Bacon, Obs. on a Libel.

Protestantism (prot'es-tan-tizm), *n.* [= *F. protestantisme* = *Sp. Pg. protestantismo*; as
Protestant + *-ism*.] The state of being a *Protes-
tant*; the religious principles of Protestants;
the religious and other tendencies fostered by
the Protestant movement. See *protest of Spire*,
under *protest*.

The liberal genius of *Protestantism* had perfected its
work. T. Warton, Hist. Eng. Poetry, II. 461. (Latham.)

The *Protestantism* of a great number of the Anglican
clergy is supposed to be but languid.

M. Arnold, A Persian Passion Play.

Protestantize (prot'es-tan-tiz), *v. t.*; pret. and
pp. *Protestantized*, ppr. *Protestantizing*. [*Protes-
tant* + *-ize*.] To render Protestant; con-
vert to Protestantism.

To *Protestantize* Ireland. Disraeli.

Protestantly (prot'es-tan-tli), *adv.* [*Protes-
tant* + *-ly*.] In conformity to Protestantism
or the Protestants.

To protestants . . . nothing can with more conscience,
more equitie, nothing more *protestantly* can be permitted
then a free and lawful debate at all times . . . of what
opinion soever, disputable by scripture.

Milton, Civil Power.

protestation (prot'es-tā'shon), *n.* [*ME. protes-
tacioun*, < *OF. protestation*, *F. protestation* =
Sp. protestacion = *Pg. protestaço* = *It. protes-
tazione*, *protestagione*, < *LL. protestatio* (*n.*), a
declaration, < *L. protestari*, pp. *protestatus*, de-
clare in public, bear witness: see *protest*.] 1.
A solemn or formal declaration of a fact, opin-
ion, or resolution; an asseveration: as, *protes-
tations* of friendship or of amendment.

But first I make a *protestacioun*
That I am dronke, I knowe it by my soun.
Chaucer, Prolog. to Miller's Tale, l. 29.

Whereas ye write the day and year of D. Barnes' death,
it increaseth your own confusion, and shall be a clear tes-
timony against yourself for resisting those good words of
his *protestation*, if ye forsake not your heresy in time.
Coverdale, Remains (Parker Soc.), p. 328.

You are welcome too, sir;
Tis spoken from the heart, and therefore needs not
Much *protestation*.
Beau. and Fl., Custom of the Country, III. 5.

Hear but some vows I make to you;
Hear but the *protestations* of a true love.
Fletcher and Rowley, Maid in the Mill, l. 8.

2. A solemn or formal declaration of dissent;
a protest.

Which *protestation*, made by the first public reformers
of our religion against the imperial edicts of Charles the
fifth imposing church-traditions without Scripture, gave
first beginning to the name of Protestant.

Milton, Civil Power.

I hear at once

Hubbub of *protestation*!

Browning, Ring and Book, II. 215.

3. In *law*, a declaration in pleading, by which
the party interposed an oblique allegation or
denial of some fact, by protesting that it did
or did not exist, and at the same time avoid-
ing a direct affirmation or denial, the object
being to admit it for the purpose of the present
action only, and reserve the right to deny it in
a future action—"an exclusion of a conclu-
sion." Coke. In *Scots law*, a proceeding taken by a
defender, where the pursuer neglects to proceed, to com-
pel him either to proceed or to suffer the action to fall.
=Syn. 1. Affirmation, averment. See *protest*, v. t.

protestator (prot'es-tā-tor), *n.* [= *Pg. protes-
tador* = *It. protestatore*, < *NL. protestator*, < *L. protes-
tari*, pp. *protestatus*, declare in public,
bear witness: see *protest*.] One who protests;
a protestor.

protested (prō'tes'ted), *p. a.* Having made a
protest. [Rare.]

In this age, Britons, God hath reformed his church after
many hundred years of popish corruption: . . . in this
age he hath renewed our protestation against all those yet
remaining dregs of superstition. Let us all go, every true
protested Briton, throughout the three kingdoms, and
render thanks to God. Milton, Animadversions.

protester (prō'tes'tér), *n.* [*protest* + *-er*.] 1.

One who protests; one who utters a solemn
or formal declaration.

Were I a common laugher, or did use
To stale with ordinary oaths my love
To every new *protester*. Shak., J. C., l. 2. 74.

A *Protestant*, a *protester*, belonging nearly always to
an extreme minority, is inevitably disliked—sometimes
feared, but always disliked. Sharp, D. G. Rossetti, II.

2. One who protests a bill of exchange, etc.—

3. [*cap.*] Specifically, in *Scottish hist.*, a mem-
ber of a party which protested against the union
of the Royalists with the Presbyterians in 1650.
Also spelled *Protestor*.

After having been long comrades, they had parted in
some unkindness, at the time when the Kingdom of Scot-
land was divided into Resolutioners and *Protesters*: the
former of whom adhered to Charles II. after his father's
death upon the scaffold, while the *Protesters* inclined
rather to a union with the triumphant republicans.

Scott, Old Mortality, v.

protestingly (prō'tes'ting-li), *adv.* [*protest-
ing*, ppr. of *protest*, v., + *-ly*.] In a protesting
manner; by way of protesting.

Protestor (prō'tes'tor), *n.* Same as *Protester*, 3.

Proteus (prō'tūs or -tēs-us), *n.* [*L., < Gr. Πρω-
τεῖς*, the name of a sea-god: see def.] 1. In
classical myth., a sea-god, the son of Oceanus

and Tethys, who had the power of assuming different shapes.—2. [NL.] A genus of tailed amphibians, typical of the family *Proteidae*,

Proteus anguinus.

established by Laurenti in 1768.—3†. [NL.] In *Protozoa*, a genus of animalcules, based as such by O. F. Müller in 1786 upon the proteus or protean animalcule of earlier writers, as Rösel, 1755. The genus is the same as *Amœba*, a common species of which is named *Amœba proteus*. This generic name is untenable, because antedated in the binomial system by the amphibian genus *Proteus* of Laurenti, for, although the name *proteus* was first applied to these animalcules, it was given at a time when genera, in the modern sense of the term, had not been established in zoology. See cut under *Amœba*.

4†. [l. c.] An animalcule of the genus *Proteus* (or *Amœba*); an amœba.

proteus-animalcule (prō'tūs-an-i-mal'kūl), *n.* Same as *proteus*, 4.

protevangeliūm (prō-tē-van-jel'ūm), *n.* [Gr. *πρότερος*, first, + *εὐαγγέλιον*, gospel: see *evangel*.] The earliest announcement of the gospel: referring to Gen. iii. 15. Also called *protogospel*.

The Messianic promises and hopes which run like a golden thread from the *protevangeliūm* in paradise lost to the voice of John the Baptist.

Schaff, Hist. Christ. Church, I. § 17.

protext (prō'tekt), *n.* [L. *pro*, before, + *textus*, text. Cf. *context*.] That part of a discourse or writing which precedes some other part referred to or quoted.

See Baring-Gould's "Curious Myths of the Middle Ages," p. 600 (ed. London, 1881), and the *protext*.

N. and Q., 7th ser., II. 279.

prothalamium, prothalamion (prō-tha-lā'mi-um, -on), *n.* [Gr. *πρό*, before, + *θάλαμος*, a bride-chamber: see *thalamus*. Cf. *epithalamium*.] A piece written to celebrate a marriage; an epithalamium.

Prothalamion, or a Spousal Verse, made by Edmund Spenser. *Prothalamion* (Title).

When *prothalamions* prais'd that happy day
Wherein great Dudley match'd with noble Gray.
Drayton, Lady Jane Gray to Lord Dudley.

prothalli, *n.* Plural of *prothallus*.

prothallia, *n.* Plural of *prothallium*.

prothallial (prō-thal'ik), *a.* [Cf. *prothalli-um* + *-ic*.] In bot., of or relating to the prothallium.

prothalline (prō-thal'in), *a.* [Cf. *prothalli-um* + *-ine*.] In bot., similar to, characteristic of, or belonging to a prothallium.

Their [spermatia's] fecundating influence is . . . exercised on the *prothalline* elements of the growing thallus. *Encyc. Brit.*, XIV. 555.

prothallium (prō-thal'ūm), *n.*; pl. *prothallia* (-ia). [NL., < L. *pro*, before, + NL. *thallus*.] In bot., a thalloid oöphyte or its homologue; a little thalloid structure resembling a lichen or *Marchantia*, which is produced by the germination of

1. Prothallium and young plantlet of *Pteris Cretica*: *Rh*, the rhizoids; *R*, the roots. 2. *Adiantum cuneatum*. 3. Vertical section of the same, but the plantlet very young (magnified). *Rh*, the rhizoids; *a*, archegonia. 4. The antheridium of the same: *S*, the escaping antherozoids (highly magnified).

the spore in the higher cryptogams, and which bears the sexual organs (antheridia and archegonia). It is rarely more than one tenth of an inch in length, is composed of cellular tissue, and bears the antheridia and archegonia on its under surface. After fertilization the oöphyte remains for a time within the archegonium, and proceeds to grow by the ordinary processes of cell-multiplication, until finally it breaks through the walls of the archegonium differentiated into its first root and leaf. The young plant continues to draw its nourishment for a time from the prothallium, but it soon develops root-hairs which extend into the soil and render it independent of the prothallium, which, having accomplished its purpose, withers away. See *fern*, *Musci*, *Ophioglossaceæ*. Also *prothallus, prothallus*.

prothalloid (prō-thal'oid), *a.* [Cf. *prothalli-um* + *-oid*.] In bot., resembling a prothallium.—**Prothalloid branch**. Same as *proembryonic branch* (which see, under *proembryonic*).

prothallus (prō-thal'us), *n.*; pl. *prothalli* (-i). [NL., < L. *pro*, before, + NL. *thallus*.] Same as *prothallium*.

prothelminth (prō-thel'minth), *n.* [Cf. Gr. *πρότερος*, first, + *ἐλμινς* (*ἐλμινθ*), a worm: see *helminth*.] A ciliate or flagellate infusorian; any member of the *Prothelmintha*, regarded as representing an ancestral type of worms.

Prothelmintha (prō-thel-min'thā), *n. pl.* [NL.: see *prothelminth*.] An order of protozoan animalcules named by K. M. Diesing (1865) as foreshadowing or pretypifying the lowest worms of the metazoic series, as the turbellarians. The term regarded more especially the holotrichous ciliate infusorians, but included all the ciliate and flagellate forms, excepting *Vorticellidae* and *Stentoridae*, and is thus nearly synonymous with *Infusoria*. See cut under *Paramoecium*.

prothelminthic (prō-thel-min'thik), *a.* [Cf. *prothelminth* + *-ic*.] Having the character of an archetypal worm; of or pertaining to the *Prothelmintha*.

prothelmis (prō-thel'mis), *n.* [NL., < Gr. *πρότερος*, first, + *ἐλμινς*, a worm.] A hypothetical primitive worm, the entire body of which is supposed to have permanently consisted of four layers corresponding to those of the four-layered germ of most animals. *Haeckel*.

prothesis (proth'e-sis), *n.* [Cf. LL. *prothesis*, < Gr. *πρόθεσις*, a putting before, proposition, purpose, preposition, < *προτίθειν*, put before, < *πρό*, before, + *τίθειν*, put, place: see *thesis*. Cf. *prosthesis*.] 1. In the Gr. Ch.: (a) The preparation and preliminary oblation of the eucharistic elements before the liturgy: more fully called the *office of prothesis*. This office is said responsively by priest and deacon. The priest signs an oblate with the holy lance, thrusts the lance into the right, left, upper, and lower sides of the holy lamb, lifts this off, cuts it crosswise, and stabs it. He then blesses the chalice which the deacon has prepared (mixed). Appropriate prayers and verses of Scripture accompany these rites. He then takes from the remainder of this and other oblates pyramidal pieces called *portions* of the Virgin Mary, apostles, martyrs, etc., the living and the dead, commemorating these classes, and arranging the portions in a prescribed manner on the disk (paten). Incense is then offered, the asterisk and vells placed over the elements, and the prayer of prothesis said. The elements are left in the chapel of prothesis till taken to the altar at the Great Entrance. (b) The table on which this preparation is made (the table or altar of prothesis). It answers to the Western credence-table. (c) The apartment or the part of the bema or sanctuary in which this table is situated and the office used (the chapel of prothesis). See *bema* and the cut there given.—2. In *gram.*, addition of one or more sounds or letters at the beginning of a word. Some Latin writers use this form for the Greek *πρόθεσις* (see *prothesis*) apparently through misapprehension, and some modern writers prefer it as more specific.

3. In *surg.*, prosthesis.

prothetic (prō-thet'ik), *a.* [Cf. *prothesis* (-thet-) + *-ic*.] Pertaining to or exhibiting prothesis.

prothetically (prō-thet'i-kal-i), *adv.* By prothesis.

Letters added *prothetically*.

Trans. Amer. Philol. Ass., XVI. App. p. xxxiii.

prothonotarial (prō-thon-ō-tā'ri-al), *a.* [Cf. *prothony* + *-al*.] Pertaining to or belonging to a prothonotary.

prothonotariat (prō-thon-ō-tā'ri-at), *n.* [Also prop. *protonotariat*, < OF. **prothonotariat*, < ML. *protonotarius*, prothonotary: see *prothony*.] The college constituted by the twelve apostolical prothonotaries in Rome.

prothonotary, protonotary (prō-thon-ō-tā-ri, prō-ton'ō-tā-ri), *n.*; pl. *prothonotaries, protonotaries* (-riz). [Prop. *protonotary*, formerly *protonotarie*; < OF. *protonotaire*, F. *protonotaire* = Sp. Pg. It. *protonotario*, < ML. *protonotarius*, a chief notary or scribe, < Gr. *πρότερος*, first, + *Λύτταριος*, notary: see *notary*.] A chief notary or clerk.

Can I not sin but thou wilt be
My private *protonotarie*!

Herrick, To his Conscience.

Specifically—(a) Originally, the chief of the notaries; now, in the *Rom. Cath. Ch.*, one of a college of twelve (formerly seven) ecclesiastics charged with the registry of acts, proceedings relating to canonization, etc. (b) In the *Gr. Ch.*, the chief secretary of the patriarch of Constantinople, who superintends the secular work of the province. (c) In *law*, a chief clerk of court; formerly, a chief clerk in the Court of Common Pleas and in the King's Bench.—**Prothonotary warbler**, *Protonotaria citrea*, a small migratory insectivorous bird of North America belonging to the family *Sylviolidae* or *Mniotiltidae*. It is a beautiful warbler, of a rich yellow color, passing by degrees through olivaceous to bluish tints on the rump, wings, and tail,

Prothonotary Warbler (*Protonotaria citrea*).

the last blotched with white; the bill is comparatively large, half an inch long, and black; the length is 5½ inches, the extent 9½. It inhabits swamps, thickets, and tangle, nests on or near the ground in holes or other sheltered cavities in trees, stumps, or logs, and lays four or five creamy-white profusely speckled eggs.

prothonotaryship (prō-thon'ō-tā-ri-ship), *n.* [Cf. *prothony* + *-ship*.] The office of a prothonotary.

prothoracic (prō-thō-ras'ik), *a.* [Cf. *prothorax* (-thorac-) + *-ic*.] In *entom.*, of or pertaining to the prothorax.—**Prothoracic case**, that part of the integument of a pupa which covers the prothorax.—**Prothoracic epipleura**. See *epipleura*, 3.—**Prothoracic legs**, the first or anterior pair of legs, sometimes aborted, as in certain butterflies.—**Prothoracic shoulder-lobe**, lobes of the prothorax which cover the anterior corners of the mesothorax, as in certain *Diptera*: when they show no apparent separation from the mesothorax they are called *shoulder-callosities*.

prothoracotheca (prō-thō'ra-kō-thē'kē), *n.*; pl. *prothoracothecæ* (-sē). [NL., < Gr. *πρό*, before, + *θήσα* (*θησα*), breast, + *θήκη*, a case, box.] In *entom.*, the prothoracic case, or that part of the integument of a pupa covering the prothorax.

prothorax (prō-thō'raks), *n.* [NL., < Gr. *πρό*, before, + *θήσα*, breast: see *thorax*.] In *Insecta*, the first one of the three thoracic somites, which succeeds the head, is succeeded by the mesothorax, and bears the first pair of legs. In descriptions of *Coleoptera* and *Hemiptera* the term is often restricted to the broad shield, or pronotum, forming the part of the thorax seen from above. In the *Hymenoptera*, *Diptera*, and *Lepidoptera* the prothorax is generally so small as to be hardly distinguishable. See cuts under *Coleoptera*, *Insecta*, *mesothorax*, and *metathorax*.—**Cruciate, emarginate, lobed, etc., prothorax**. See the adjectives.

prothyalosoma (prō-thī'a-lō-sō'mā), *n.*; pl. *prothyalosomata* (-mā-tā). [NL., < Gr. *πῶρος*, first, + *θαλός*, glass, + *σῶμα*, body.] Van Beneden's name (1883) of an investing portion or spherical envelop of the nucleolus of the nucleus of an ovum.

prothyalosomal (prō-thī'a-lō-sō'mal), *a.* [Cf. *prothyalosoma* + *-al*.] Of or pertaining to the prothyalosoma.

prothysterion (prō-this'te-ron), *n.* [Cf. Gr. *πρωτύτερον*, < *πῶρος*, first, + *υστερον*, last. Cf. *hysterion-proteron*.] In *rhet.*, same as *hysterion-proteron*, 1.

protichnite (prō-tik'nit), *n.* [Cf. Gr. *πῶρος*, first, + *τύπος*, a track, trace, footprint, + *-ite*.] A fossil track or trace occurring in the Potsdam sandstone of Canada, supposed to have been made by trilobites, or some related animals, as eurypterids.

protist (prō'tist), *a.* and *n.* [Cf. *Protista*.] I. *a.* Pertaining to the *Protista*, or having their characters.

II. *n.* Any member of the *Protista*.

Protista (prō-tis'tā), *n. pl.* [Cf. Gr. *πρώτιστα*, neut. pl. of *πρώτος*, the very first, superl. of *πῶρος*, first, < *πρό*, before, first. Cf. *former* and *first*.] One of the kingdoms of animated nature, which Haeckel proposed (1868) to include the *Protozoa* and the *Protophyta*, or the lowest animals and plants as collectively distinguished from other organisms. The proposition to recognize this alleged "third kingdom" had been several times made before, and the unicellular plants and

animals had been grouped together under various names, as *Protista* of Hogg (1880), and *Primatia* of Wilson and Casin (1883).

protistan (prō-tis'tan), *a.* and *n.* [*< Protista + -an.*] *I.* *a.* Of or pertaining to the *Protista*.

II. *n.* A member of the *Protista*; any unicellular organism not definitely regarded as a plant or an animal.

protistic (prō-tis'tik), *a.* [*< Protista + -ic.*] Of or pertaining to the *Protista*.

Protium (prō'shi-um), *n.* [NL. (Wight and Arnott, 1834); perhaps from a native name in Java.] A genus of polypetalous trees of the order *Burseraceae* and tribe *Burserae*. It is characterized by a free cup-shaped four- to six-cleft calyx, a cup-like disk bearing the four to six long narrow petals, and the eight to twelve unequal erect stamens on its margin, and a globose drupe, the fleshy outside splitting into four valves and the stone consisting of from one to four bony one-seeded nutlets, at first united together but finally free. There are about 50 species, natives of the tropics of both hemispheres. They are small trees, exuding a balsamic resin, and bearing pinnate leaves toward the end of the branchlets, composed of three or more large stalked leaflets. The small slender pedicelled flowers form branching panicles borne on long stalks. *P. Guianense* is the hyawa or incense-tree of British Guiana, and *P. altissimum* is there known as white cedar. Some of the species have formerly been classed under *Ischa* (Aubl., 1775). They produce many valuable gum-resins, for which see *elemis*, *acouchi-resin*, *carauina*, *conima*, and *hyawa gum* (under *gum*).

proto- [*< Gr. πρῶτος*, first, superl., *< πρό*, before, first, in advance of.] An element in compound words of Greek origin, meaning 'first,' and denoting precedence in time, rank, or degree. Besides its frequent use in scientific names, it is common in compounds having a historical reference, as *proto-Arabic*, *proto-Medic*, etc. Compare *proto-compound*.

proto-abbat (prō-tō-ab'g-ti), *n.* [*< Gr. πρῶτος*, first, + *ML. abbatia*, abbacy: see *abbacy*.] A first or principal abbacy.

Dunstan . . . was the first abbot of England, not in time, but in honour, Glastonbury being the *proto-abbat* then and many years after.

Fuller, Worthies, Somersetshire, III. 92.

proto-apostate (prō-tō-a-pos'tāt), *n.* [*< Gr. πρῶτος*, first, + *ἀποστάτης*, apostate: see *apostate*.] A first or original apostate.

Sir James Montgomery, the false and fickle *proto-apostate* of whiggism. Hallam, Const. Hist., III. 127, note.

protoblastic (prō-tō-blas'tik), *a.* [*< Gr. πρῶτος*, first, + *βλαστικός*, germ.] Same as *holoblastic*.

The eggs of mammals are, as embryologists would say, regularly *protoblastic*. Amer. Nat., XVIII. 1276.

protocanonical (prō-tō-kā-non'i-kal), *a.* [*< ML. protocanonicus*, *< Gr. πρῶτος*, first, + *κανονικός*, canonical: see *canonic*.] Of the first or original canon. See *deuterocanonical*.

From the perpetual and universal tradition and practice of the whole church from the apostles' time to ours, we may have a human persuasion, and that certain and infallible, of the divine and canonical authority of those books which were still undoubted, or which some call the *protocanonical*. Baxter, Saints Rest, II. Pref.

Protocaulidæ (prō-tō-kā-li-dē), *n. pl.* [NL., *< Protocaulon + -idæ*.] A family of spicaceous pennatuloid polyps, typified by the genus *Protocaulon*. They are of small size, without cells or radial pinnules, and with sessile polypites on both sides of the rachis in a single series or in indistinct rows.

Protocaulon (prō-tō-kā-lon), *n.* [NL., *< Gr. πρῶτος*, first, + *καυλός*, the stalk of a plant.] The typical genus of *Protocaulidæ*.

protocercal (prō-tō-sēr'kal), *a.* [*< Gr. πρῶτος*, first, + *κέρκος*, tail: see *cercal*.] Having a primitive tail-fin: noting the embryonic stage of the vertical fins and tail of a fish, when these consist of a continuous skinfold along both upper and under sides of the body and around its tail-end. Jeffries Wyman.

protocere (prō-tō-sēr), *n.* [*< Gr. πρῶτος*, first, + *κέρας*, horn.] The rudiment of the antler of a deer, or that process of the antler which is best developed in the second year.

protocerebral (prō-tō-sēr'ē-bral), *a.* [*< protocerebrum + -al*.] Of or pertaining to the *protocerebrum*.

protocerebrum (prō-tō-sēr'ē-brum), *n.* [NL., *< Gr. πρῶτος*, first, + *L. cerebrum*, the brain: see *cerebrum*.] The primitive anterior cerebral vesicle or rudiment of the cerebrum proper. N. Y. Med. Jour., March 28, 1885, p. 354.

prochlorid, **prochloride** (prō-tō-klor'id), *n.* [*< Gr. πρῶτος*, first, + *E. chlorid*, *chloride*.] A chlorid whose molecule contains a single chlorine atom, or one in which the ratio of chlorine atoms to basic atoms is the smallest. — *Prochlorid of mercury*. Same as *calomel*.

Protococcaceæ (prō-tō-kō-kā-sē-ē), *n. pl.* [NL., *< Protococcus + -aceæ*.] An order of unicellular algae of the class *Protococcoidæ*, typified

by the genus *Protococcus*. It includes a number of organisms of very simple structure, many of which occur both in a free-swimming and in a resting condition.

protococcoid (prō-tō-kōk'oid), *a.* [*< Protococcus + -oid*.] In bot., resembling *Protococcus*.

Protococcoidæ (prō-tō-kō-koi'dē-ē), *n. pl.* [NL., *< Protococcus + -oidæ*.] A class of minute plants belonging to the group *Schizophyceæ*, taking its name from the genus *Protococcus*. It includes those simplest forms of vegetable life in which the endochrome consists of pure chlorophyll of its natural green color, sometimes replaced, to a greater or less extent, by a red pigment, but never possessing in the cell-sap a soluble blue coloring matter. They are of microscopic size, and may occur in both the resting and the motile condition. They multiply very rapidly by bipartition and also by means of swarm-spores. This class is a purely provisional one, and probably includes many forms that are nothing more than stages in the development of algae of greater complexity and belonging to widely separated families. The *Protococcoidæ* embrace two orders, the *Eremobiezæ* and *Protococcaceæ*. See *Schizophyceæ*.

Protococcus (prō-tō-kōk'us), *n.* [NL. (Agardh), *< Gr. πρῶτος*, first, + *κόκκος*, a berry: see *coccus*.] A genus of algae, typical of the order *Protococcaceæ* and class *Protococcoidæ*. They are in the strictest sense unicellular plants, being spherical, unbranched, and single, or gathered into irregular groups or clusters. They are primarily always filled with chlorophyll-green cytoplasm, which often changes to red by exposure or other circumstances. They multiply rapidly by repeated bipartition of the cell-contents. *P. viridis* is exceedingly abundant everywhere, forming broadly expanded strata of yellowish- or darker-green color on trunks of trees, moist rocks, walls, timbers of shaded buildings, old fences, etc. *P. nivalis* is the well-known "red snow" which frequently covers large tracts of snow in arctic or alpine regions in a very short time.

Red Snow (*Protococcus nivalis*), highly magnified.

Protocœlomata (prō-tō-sē-lō-mā-tā), *n. pl.* [NL., *< Gr. πρῶτος*, first, + *κοιλίωμα* (τ-), a hollow, cavity: see *cœloma*.] Animals which have a primitive archenteron with simple cœlomic sacs or branching diverticula, as most sponges: more fully called *Metazoa protocœlomata*. A. Hyatt, Proc. Bost. Soc. Nat. Hist., 1884, p. 113.

protocœlomatæ (prō-tō-sē-lō-māt), *n.* One of the *Protocœlomata*.

protocœlomatic (prō-tō-sē-lō-mat'ik), *a.* [*< Protocœlomata + -ic*.] Of or pertaining to the *Protocœlomata*.

protocol (prō-tō-kol), *n.* [*< OF. protocolle, prothocolle, prothole, F. protocole = Fr. protholle = Sp. protocolo = Pg. It. protocollo = D. protokol = G. protokoll, protokoll = Sw. protokoll = Dan. protokol, < ML. protocollum, corruptly prothocollum, a draft of a document, a minute, a public register, a paper confirmed by a seal, < MGr. πρωτοκόλλων, a protocol, orig. a leaf or sheet glued in front of a manuscript, on which to enter particulars as to the administration under which the manuscript was written, the writer's name, etc., < Gr. πρῶτος, first, + κολλάω, glue, < κόλλα, glue: see collodion, etc.*] 1. The original of any writing.

An original is styled the *protocol*, or scriptural matrix; and if the *protocol*, which is the root and foundation of the instrument, does not appear, the instrument is not valid. Ayliffe, Parergon.

2. In *diplomacy*, the minutes or rough draft of an instrument or a transaction; hence, the original copy of any despatch, treaty, or other document; a document serving as a preliminary to or opening of any diplomatic transaction; also, a diplomatic document or minute of proceedings signed by friendly powers in order to secure certain diplomatic ends by peaceful means.

The next day the Doctor (Dale), by agreement, brought a most able *protocol* of demands in the name of all the commissioners of her Majesty (Elizabeth).

Molloy, Hist. Netherlands, II. 406.

3. A record or registry; in *law*, a notary's record of copies of his acts.

The *protocol* here is admirable, taken on the spot by Mr. B. — and printed in full, and Mr. G. — is very positive in stating that there were a large number of complete successes [in experiments]. Amer. Jour. Psychol., I. 186.

4. In the parts of the United States acquired from Mexico, the original record of the transfer of land. Under Spanish laws the parties to a deed, or other instrument affecting land, appeared before a *regidor*, a sort of notary or alderman, accompanied by their neighbors as "instrumental witnesses," and stated the terms of their agreement. That officer made a minute of the terms and entered the formal agreement in a book.

This entry was called the *protocol* or *matriz*, and remained with the officer, the parties receiving from him a similar document called a *testimonio*.

protocol (prō-tō-kol), *v.*; *pret.* and *pp.* *protocolled*, *ppr.* *protocolling*. [*< protocol, n.*] *I.* *intrans.* To form protocols or first drafts; issue protocols.

Serene Highnesses who sit there *protocolling*, and manifesting, and consoling mankind.

Carlyle, French Rev., II. vi. 8. (Davies.)

Nevertheless, both in Holland and England, there had been other work than *protocolling*.

Molloy, Hist. Netherlands, II. 445.

II. trans. To make a protocol of.

protocol-book (prō-tō-kol-buk), *n.* A book for the purpose of entering records; a register.

A second person sitting at the other side of the table reads off and records in the *protocol-book* the distance of each excursion. Mind, IX. 108.

protocolist (prō-tō-kol-ist), *n.* [= *G. protocolist* = *Sw. Dan. protokollist* = *Russ. protokolist*; as *protocol* + *-ist*.] A register or clerk.

The *protocolists*, or secretaries.

Harper's Monthly, LXIV. 275.

protocolize (prō-tō-kol-iz), *v. i.*; *pret.* and *pp.* *protocolized*, *ppr.* *protocollizing*. [*< protocol + -ize*.] To write or draw up protocols.

Kept *protocolling* with soft promises and delusive delays. Mahony, Father Prout, p. 85, note. (Encyc. Dict.)

proto-compound (prō-tō-kom'pound), *n.* In chem., originally, the first of a series of binary compounds arranged according to the number of atoms of the electronegative element. At present the term is most commonly used, in contradistinction to *per-compounds*, to designate those compounds of an element which contain relatively less of the electronegative radical. Thus, two chlorides of iron are known, $FeCl_2$ and $FeCl_3$; the former is called *protochlorid*, the latter *perchlorid*. [The name is less usual now than it was some years ago.]

protoconch (prō-tō-kongk), *n.* [*< Gr. πρῶτος*, first, + *κόγχη*, a mussel, shell: see *conch*.] The embryonal or primitive shell of an ammonoid cephalopod. Owen. Also called *embryo-sac*, *ovicell*, and *ovisac*.

The position was taken that the scar of the Nautiloides showed that a *protoconch* had existed in the embryo of Nautilus, but had disappeared during the growth of the shell, the scar being uncovered by its removal.

A. Hyatt, Proc. Amer. Assoc. A. v. Sci., 1884, p. 325.

protoconchal (prō-tō-kong-kal), *a.* [*< protoconch + -al*.] Pertaining to the *protoconch*.

Protodermiaceæ (prō-tō-dēr-mi-ā-sē-ē), *n. pl.* [NL. (Rostafinski), *< Protodermium + -aceæ*.] A family of *Myxomycetes* of the order *Protodermiezæ*, containing the monotypic genus *Protodermium*. It has the characters of the order.

Protodermiezæ (prō-tō-dēr-mi-ē-ē), *n. pl.* [NL., *< Protodermium + -ezæ*.] An order of *Myxomycetes*, embracing the single family *Protodermiaceæ*. The peridium is simple, of regular shape, and destitute of capitulum; the spores are violet.

Protodermium (prō-tō-dēr-mi-um), *n.* [NL. (Rostafinski, 1875), *< Gr. πρῶτος*, first, + *δέρμα*, skin.] A monotypic genus of myxomycetous fungi, typical of the family *Protodermiaceæ* and order *Protodermiezæ*. *P. presillum*, the only species, is found on decaying wood.

protodipnoan (prō-tō-dip'nō-an), *n.* [*< Gr. πρῶτος*, first, + *E. dipnoan*.] A primitive dipnoan; a supposititious representative of the stock from which the dipnoans sprang.

Protodonata (prō-tō-dō-nā-tā), *n. pl.* [NL., *< Gr. πρῶτος*, first, + *NL. Odonata*, *q. v.*] A group of fossil pseudoneuropterous insects of the coal period, containing forms resembling the *Odonata* or dragon-flies of the present day.

Proto-Doric (prō-tō-dor'ik), *a.* and *n.* [*< Gr. πρῶτος*, first, + *Δωρικός*, Doric.] *I.* *a.* In arch., primitively Doric; noting any style, member, etc., as a column or capital, which exhibits the rudiments of the later-developed Grecian Doric, or is considered as having contributed to the evolution of the Grecian Doric.

II. *n.* In arch., primitive or rudimentary Doric. See cut under *hypogeum*.

protogaster (prō-tō-gas'tēr), *n.* [*< Gr. πρῶτος*, first, + *γαστήρ*, stomach.] In *embryol.*, the central cavity of a gastrula; the primitive intestinal cavity of a two-layered germ; the hollow of the archenteron of a germ-cup, inclosed by the hypoblastic blastodermic membrane or endoderm, and communicating with the exterior by the protostoma or archæostoma, which is the orifice of invagination of the antecedent blastula.

protogastric (prō-tō-gas'trik), *a.* [*< protogaster + -ic.*] 1. Of or pertaining to the protogaster.—2. In brachyurous *Crustacea*, noting an anterolateral subdivision of the gastric lobe of the carapace. See cut under *Brachyura*.

protogen (prō-toj'e-nal), *a.* [*< Gr. πρῶτος, first, + -γενής, produced (see -gen), + -al.*] First-born; primitive or original, as organized matter.

Sarcodæ or the *protogen* jelly-speck.

Owen, *Comp. Anat.* (1868), III. 817.

Protogenes (prō-toj'e-nēs), *n.* [*< Gr. πρῶτος, first, + -γενής, produced: see -gen.*] A genus of amœbiform mastigopodous protozoans, referred by Haeckel to the *Lobosa*, by Lankester to the *Proteomyza*, having filamentous, ramified, and anastomosing pseudopodia.

In the *Protogenes* of Professor Haeckel, there has been reached a type distinguishable from a fragment of albumen only by its finely-granular character.

H. Spencer, *Prin. of Psychol.*, § 55.

protogenesis (prō-tō-jen'e-sis), *n.* [*< Gr. πρῶτος, first, + γένεσις, generation.*] The origination of living from not-living matter; abiogenesis. It is a logical inference that protogenesis has occurred at some time, but we have no knowledge of the fact.

protogenetic (prō-tō-jē-net'ik), *a.* [*< As protogenic, with term, as in genetic.*] Same as *protogenic*.

protogenic (prō-tō-jen'ik), *a.* [*< Gr. πρῶτος, first, + -γενής, produced (see -gen), + -ic.*] 1. In *geol.*, noting crystalline or fire-formed rocks, in contradistinction to *deutero-genic*, which notes those formed from them by mechanical action.—2. In *bot.*, noting those intercellular spaces of plants which are formed when the tissues begin to differentiate. Compare *hystero-genic*, *lysigenous*, *schizogenetic*.

protogine (prō-tō-jēn), *n.* [*Irreg. < Gr. πρῶτος, first, + γίνεσθαι, γιγνέσθαι, become, be.*] A variety of granite occurring in the Alps. This was formerly considered a peculiar rock, the light-colored mica which it contains having been mistaken for talc. Some varieties of the Alpine granite do contain talc or chlorite, but these minerals do not appear to be essential to its constitution. Formerly written sometimes by French geologists *protogine*. Also called *Alpine granite* and *protogine granule*.

protogospel (prō-tō-gos'pel), *n.* [*< Gr. πρῶτος, first, + E. gospel.*] Same as *protevangeliūm*. Schaff.

protograph (prō-tō-graf), *n.* [*< Gr. πρῶτος, first, + γραφειν, write.*] A preliminary draft or proposed statement.

protogynous (prō-toj'i-nus), *a.* [*< protogyn-y + -ous.*] 1. Of or pertaining to protogyny; characterized or affected by protogyny.—2. In *bot.*, same as *protogynous*.

In *protogynous* flowers the stigma is receptive before the anthers in the same flower are mature.

Sachs, *Botany* (trans.), p. 813.

protogyny (prō-toj'i-ni), *n.* [*< Gr. πρῶτος, first, + γυνή, female (in mod. bot. a pistil).*] In *bot.*, same as *protogyny*. See the quotation under *protandry*.

Protohippus (prō-tō-hip'us), *n.* [*< Gr. πρῶτος, first, + ἵππος, horse.*] A genus of fossil horses of the family *Equidae*, founded by Leidy in 1858 upon remains from the early Pliocene of North America.

proto-historic (prō-tō-his-tor'ik), *a.* [*< Gr. πρῶτος, first, + ἱστορικὸς, historic.*] Belonging or relating to the dawn or very beginnings of recorded history.

The discourse of Signor Vilanova is on pre-historic or proto-historic Spain. *The Academy*, No. 897, p. 28.

Protohydra (prō-tō-hi'drā), *n.* [*< Gr. πρῶτος, first, + NL. Hydra: see Hydra, 4.*] A genus of elutheroblastic hydroids resembling *Hydra*, but of still simpler form, as they lack tentacles.

Proto-Ionic (prō-tō-i-on'ik), *a.* [*< Gr. πρῶτος, first, + Ἴωνικός, Ionic.*] In *arch.*, primitively

Proto-Ionic Capital, discovered in the Troad by the Archaeological Institute of America.

Ionic; exhibiting or containing the germs of Ionic.

protomala (prō-tō-mā'lā), *n.*; pl. *protomalæ* (-lā). [*< Gr. πρῶτος, first,*

+ L. mala, mandible.] The mandible of a myriapod, the morphological equivalent of that of a hexapodous insect, but not structurally homologous therewith, rather resembling the lacinia of the maxilla of the hexapods. See the quotation, and cut under *epilabrum*.

The *protomala* consists of two portions, the cardo and stipes, while the hexapodous mandible is invariably composed of but one piece, to which the muscles are directly attached, and which corresponds to the stipes of the myriapodous *protomala*.

A. S. Packard, *Proc. Amer. Philos. Soc.*, June, 1888, p. 198.

protomalal (prō-tō-mā'lal), *a.* [*< protomala + -al.*] Of or pertaining to the protomala of a myriapod. Packard.

protomalar (prō-tō-mā'lār), *a.* [*< protomala + -ar.*] In *Myriapoda*, same as *protomalal*.

protomartyr (prō-tō-mār'tēr), *n.* [*Formerly also prothomartyr; = F. protomartyr = Sp. protomártir = Pg. protomartyr = It. protomartire, < ML. protomartyr, < MGr. πρωτομάρτυρ, first martyr, < Gr. πρῶτος, first, + μάρτυρ, martyr: see martyr.*] The first martyr; the first of any series of martyrs; the first who suffers or is sacrificed in any cause; specifically, Stephen, the earliest Christian martyr.

In the honour of that holy *protomartyr*, seynt Albon. *Fabyan, Chron.*, I. cxviii.

That *Proto-Martyr*, the yong faithfull Steven, Whom th' hatefull Iews with hellish rage did stone. *Sylvester, tr. of Du Bartas's Triumph of Faith*, III. 28.

Myself were like enough, O girls, To unfurl the maiden banner of our rights, And clad in iron burst the ranks of war, Or, falling, *protomartyr* of our cause, Die. *Tennyson, Princess*, IV.

protomeristem (prō-tō-mer'is-tem), *n.* [*< Gr. πρῶτος, first, + E. meristem.*] In *bot.*, primary meristem—that is, young and imperfectly developed meristem which forms the first foundation or beginning of an organ or a tissue. See *meristem*.

protomerite (prō-tōm'e-rit), *n.* [*< Gr. πρῶτος, first, + μέρος, a part, + -ite.*] The smaller anterior one of the two cells of a diactinid or septate gregarine. It may bear the epimerite, or proboscis serving for the attachment of the parasite to its host, in which case the gregarine is called a *cephalont*. The protomerite is distinguished from the larger posterior *deutomerite*.

protomeritic (prō-tō-me-rit'ik), *a.* [*< protomerite + -ic.*] Pertaining to the protomerite of a gregarine.

Protomeryx (prō-tō-mē'rika), *n.* [*< Gr. πρῶτος, first, + μῆρυξ, a ruminating mammal.*] A genus of fossil camels of the family *Camelidae*, named by Leidy in 1856 from remains of Miocene age of North America.

protomesal (prō-tō-mes'al), *a.* [*< Gr. πρῶτος, first, + μέσος, middle: see mesal.*] In *entom.*, noting a series of wing-cells or areolet in hymenopterous insects, between the pterostigma or the costal cells and the apical margin. Kirby. There may be as many as three of these cells, distinguished as upper, middle, and lower. They correspond to the second, third, and fourth submarginal or cubital cells of modern entomologists.

Protomonas (prō-tōm'ō-nas), *n.* [*< Gr. πρῶτος, first, + μόνος, single: see monad.*] A genus of *Monera*, or myxopodous *Protozoa*, characterized by the production, after becoming encysted and rupturing, of free mastigopodous germs, which swim by means of a long vibratile flagellum, like flagellate infusorians. In this free state the germs are mastigopods, but they afterward withdraw their filamentous pseudopodia, and become myxopods, which creep about by means of lobate pseudopodia. See cut under *Proteomyza*.

protomorphic (prō-tō-mōr'fik), *a.* [*< Gr. πρῶτος, first, + μορφή, form.*] Being in the first, most primitive, or simplest form or shape; having a primitive character or structure; not metamorphic: as, "a *protomorphic* layer" [of tissue], H. Spencer, *Prin. of Biol.*, § 290.

Protomyces (prō-tōm'i-sēs), *n.* [*< Gr. πρῶτος, first, + μυκή, a mushroom.*] A small genus of zygomycetous fungi, type of the order *Protomycetaceæ*. They are mostly parasitic upon the *Umbelliferae*, inhabiting the intercellular spaces of the leaf-stem, petiole, flower-stalk, and pericarp. They have a branching septate mycelium, upon which are formed at irregular intervals large oval resting gametangia. When the mycelium dies they persist and hibernates, and are liberated when the tissues of the host decay.

Protomycetaceæ (prō-tō-mi-sē-tā'sē-dē), *n. pl.* [*< Protomyces (-et-) + -aceæ.*] An order of zygomycetous fungi, typified by the genus *Protomyces*.

Proteomyza (prō-tō-mik'sā), *n.* [*< Gr. πρῶτος, first, + μύξα, mucus.*] A genus of *Monera*, represented by an organism which consists of a number of myxopods run

together into an active plasmodium, which, becoming quiescent and encysted, undergoes fis-

Proteomyza aurantiaca.

a., quiescent, encysted; *b.*, dividing in the cyst; *c.*, cyst burst, giving exit to mastigopods resembling monads or flagellate infusorians (*d.*), which after a while become amœbiform myxopods (*e.*), a number of which then unite into a single active plasmodium (*f.*), which grows and feeds, as upon the infusorians and the diatoms figured in its substance (these are a pericidium above, next two isthmies, below three dictyocystæ).

sive multiplication within the cyst, and gives rise to a number of germs which alternate between the myxopod and the mastigopod state.

There is no means of knowing whether the cycle of forms represented by *Proteomonas* and *Proteomyza* is complete, or whether some term of the series is still wanting. *Huxley, Anat. Invert.*, p. 77.

proteomyxoid (prō-tō-mik'soid), *a.* [*< Proteomyza + -oid.*] Resembling, relating to, or belonging to the genus *Proteomyza*.

The writer has attempted to explain the forms of free and united cells as specializations of a (*proteomyxoid*) cycle in which variations of functional activity are accompanied by the assumption of corresponding forms, the whole series of changes depending upon the properties of protoplasm under the variations in the supply of energy from the environment. *Encyc. Brit.*, XVI. 846.

protonema (prō-tō-nē'mā), *n.* [*< Gr. πρῶτος, first, + νῆμα, a thread.*] In *Muscinæ*, a pluricellular, confervoid or filamentous, usually chlorophyllose, structure upon which the leafy plant which bears the sexual organs arises as a lateral or terminal shoot. Also *protoneme*.

protonemal (prō-tō-nē'mal), *a.* [*< protonema + -al.*] In *bot.*, belonging to a protonema.

protonematoid (prō-tō-nem'ā-toid), *a.* [*< protonema (-t-) + -oid.*] In *bot.*, resembling or having the character of a protonema.

protoneme (prō-tō-nēm), *n.* [*< NL. protonema, q. v.*] In *bot.*, same as *protonema*.

protonephric (prō-tō-nef'rik), *a.* [*< protonephron + -ic.*] Pertaining to the protonephron, or having its character.

protonephron (prō-tō-nef'ron), *n.*; pl. *protonephra* (-rā). [*< Gr. πρῶτος, first, + νεφρός, a kidney.*] A primitive kidney or segmental organ; the original renal organ of an embryo; a Wolffian body, later absorbed or modified into some other part of the urogenital system, and thus giving place to the permanent functional kidney. In some of the lower vertebrates the renal organ is regarded as a persistent Wolffian body, and therefore as a definitive protonephron. A protonephron is divisible into three recognizable structures, called *pro-nephron*, *mesonephron*, and *metanephron*. See these words.

protonic (prō-ton'ik), *a.* [*< Gr. πρῶ, before, + τόνος, accent: see tonic.*] Preceding the tone or accent.

Protonopsidæ (prō-tō-nop'si-dē), *n. pl.* [*< Gr. πρῶτος, first, + ὄψις, -idæ.*] A family of gradient or tailed amphibians, typified by the genus *Protonopsis*, without eyelids, with teeth on the anterior margin of the palatine bones, no denticulous plates on the parasphenoid, vertebræ amphicoelian, no anterior axial cranial bone, the parietals and prefrontals prolonged, meeting and embracing the frontals, the wall of the vestibule membranous internally, premaxillaries separated, the occipital condyles sessile,

and well-developed limbs. Also called *Menopomidae*.

Protonopsis (prō-tō-nop'sis), *n.* [NL., irreg. < Gr. *Πρωτης* (see *Protean*) + *οψις*, view.] A genus of tailed amphibians, typical of the family *Protonopsidae*: synonymous with *Menopoma*. See cut under *hellbender*.

protonotariat, protonotary (prō-ton-ō-tā'ri-at, prō-ton-ō-tā-ri), *n.* See *prothomotariat, prothomotary*.

Protonucleata (prō-tō-nū-klē-ā'tā), *n. pl.* [NL.: see *protonucleate*.] A hypothetical ancestral stock of protonucleate protozoans, derived from homogeneous protoplasm, and giving rise to all other animals.

protonucleate (prō-tō-nū-klē-āt), *a.* [*<* Gr. *πρωτο-*, first, + *Λ. nucleatus*, having a kernel: see *nucleate*.] Exhibiting the first signs of nucleation; having a primitive or primordial nucleus; of or pertaining to the *Protonucleata*.

proto-organism (prō-tō-ōr-gan-izm), *n.* [*<* Gr. *πρωτος*, first, + *E. organism*.] A micro-organism, whether animal or vegetal; a protozoan or protophyte; a protist.

protopapas (prō-tō-pap'as), *n.* [= ML. *protopapa*, *protopapus*, < MGr. *πρωτοπαπας*, a chief priest, < Gr. *πρωτος*, first, + *ΛGr. παπας*, a bishop, priest: see *papa*.] In the *Gr. Ch.*, a chief priest; a priest of superior rank, corresponding nearly to a dean or an archdeacon.

protoparent (prō-tō-pār'ent), *n.* [*<* Gr. *πρωτος*, first, + *L. parens* (t-s), parent.] A first parent. *Davies, Microcosmos*, p. 23.

protopathia (prō-tō-path'i-ā), *n.* [NL., < Gr. *πρωτος*, first, + *πάθος*, disease.] Primary disease.

protopathic (prō-tō-path'ik), *a.* [*<* *protopathia* + *-ic*.] Pertaining to the original lesion of a disease; primary.

protopepsia (prō-tō-pep'si-ā), *n.* [NL., < Gr. *πρωτος*, first, + *πέψις*, digestion: see *pepsin*.] Primary digestion; digestion proper as it occurs in the cavity of the alimentary tract, and as distinguished from any further elaboration of the products effected in the walls of the intestine, the liver, or elsewhere.

protophloem (prō-tō-flō'em), *n.* [*<* Gr. *πρωτος*, first, + *E. phloem*.] In bot., the first formed elements of phloem in a vascular bundle.

Protophyta (prō-tō-fī'tā), *n. pl.* [NL., pl. of *protophytum*: see *protophyte*.] One of the primary groups or divisions of the vegetable kingdom, containing the lowest and simplest plants, and corresponding to the *Protozoa* of the animal kingdom. They are usually exceedingly minute plants, requiring the highest powers of the microscope for their study. The cells are in general poorly developed; the nucleus is wanting in many cases, and frequently there is either no cell-wall or an imperfectly developed one. They multiply most commonly by fission, the sexual organs being unknown or only very slightly differentiated. According to the classification of Bennett and Murray, the *Protophyta* embrace two groups—the chlorophyllous group, or *Schizophyceae*, and the non-chlorophyllous group, or *Schizomycetes*. The first group includes the classes *Proteococcoides*, *Diatomaceae*, and *Cyanophyceae*; the second includes the *Bacteria*. See *Schizophyceae* and *Schizomycetes*.

protophyte (prō-tō-fīt), *n.* [*<* NL. *protophytum*, < Gr. *πρωτοφυτον*, first-produced, < *πρωτος*, first, + *φυτον*, a plant.] A plant of the group *Protophyta*.

protophytic (prō-tō-fīt'ik), *a.* [*<* *Protophyta* + *-ic*.] Of or pertaining to the *Protophyta*, or having their characters.

protoplasm (prō-tō-plazm), *n.* [*<* NL. *protoplasma*, *protoplasma*, < ML. *protoplasma*, the first creation, the first creature or thing made (*protoplasma*, the first man made), < MGr. *πρωτοπλασμα*, < Gr. *πρωτος*, first, + *πλάσμα*, anything formed or molded: see *plasm*.] An albuminoid substance, ordinarily resembling the white of an egg, consisting of carbon, oxygen, nitrogen, and hydrogen in extremely complex and unstable molecular combination, and capable, under proper conditions, of manifesting certain vital phenomena, as spontaneous motion, sensation, assimilation, and reproduction, thus constituting the physical basis of life of all plants and animals; sarcodae. It is essential to the nature of protoplasm that this substance consist chemically of the four elements named (with or without a trace of some other elements); but the molecule is so highly compounded that these elements may be present in somewhat different proportions in different cases, so that the chemical formula is not always the same. The name has also been somewhat loosely applied to albuminous substances widely different in some physical properties, as density or fluidity. Thus the hard material of so-called vegetable ivory and the soft body of an amoeba are both protoplasmic. The physiological activities of protoplasm are manifested in its irritability, or ready response to external stimuli, as well as its inherent capacity of spontaneous movement

and other indications of life; so that the least particle of this substance may be observed to go through the whole cycle of vital functions. Protoplasm builds up every vegetable and animal fabric, yet is itself devoid of discernible histological structure. It is ordinarily colorless and transparent, or nearly so, and of glairy or viscid semifluid consistency, as is well seen in the bodies of foraminifera, amoebae, and other of the lowest forms of animal life. Such protoplasm (originally named *sarcodae*), when not confined by an investing membrane, has the power of extension in any direction in the form of temporary processes (see *pseudopodium*) capable of being withdrawn again; and it has also the characteristic property of streaming in minute masses through closed membranes without the loss of the identity of such masses. An individuated mass of protoplasm, generally of microscopic size, and with or without a nucleus and a wall, constitutes a *cell*, which may be the whole body of an organism, or the structural unit of aggregation of a multicellular animal or plant. The ovum of any creature consists of protoplasm, and all the tissues of the most complex living organisms result from the multiplication, differentiation, and specialization of such protoplasmic cell-units. The life of the organism as a whole consists in the continuous waste and repair of the protoplasmic material of its cells. No animal, however, can elaborate protoplasm directly from the chemical elements of that substance. The manufacture of protoplasm is a function of the vegetable kingdom. Plants make it directly from mineral compounds and from the atmosphere under the influence of the sun's light and heat, thus becoming the storehouse of food-stuff for the animal kingdom. Protoplasm appears to have been first recognizably described by Bössel, in or about 1758, in his account of the proteus-animalcule. It was observed, not named, seventeen years later by Corti, in the cells of *Chara*. Like motions of protoplasm were noticed by Meyen in 1827 in *Vallisneria*, and by R. Brown in 1831 in his discovery of the cyclosis in the filaments of *Tradescantia*. In 1835 DuRoi called attention to a "primary animal substance" in the cells of foraminifera, described as "a sort of slime" endowed with the property of spontaneous motion and contractility, and called it *sarcodae*. The word *protoplasm* was first used (in the form *protoplasma*) by Hugo von Mohl, in 1846, with reference to the slimy granular semi-fluid contents of vegetable cells. The identity of this vegetable "protoplasm" with animal "sarcodae," suggested in 1850 by Cohn, who regarded this common substance as "the prime seat of almost all vital activity," was confirmed by Schultze in 1861; Virchow had in 1858 abandoned the idea that a cell-wall is necessary to the integrity of a cell, holding that a nucleus surrounded by a molecular blastema (that is, protoplasm) constitutes a cell, and Schultze defined the cell as protoplasm surrounding a nucleus, which since that time the term has come into universal use. Also called *bioplasm*, *cytoplasm* or *cytoplast*, and *plasmogen*. See these words, and cuts under *amoeba* and *cell*.

Hence this substance, known in Vegetable Physiology as *protoplasm*, but often referred to by zoölogists as *sarcodae*, has been appropriately designated by Prof. Huxley "the Physical Basis of Life." *W. B. Carpenter, Microsc.*, § 219.

For the whole living world, then, it results that the morphological unit—the primary and fundamental form of life—is merely an individual mass of *protoplasm*, in which no further structure is discernible.

Huxley, Anat. Invert., p. 18.

protoplasma (prō-tō-plas'mā), *n.* [NL.: see *protoplasm*.] Protoplasm. *Hugo von Mohl, 1846.*

protoplasma (prō-tō-plaz'mā), *a.* [*<* *protoplasm* + *-al*.] Protoplasmic.

protoplasma (prō-tō-plaz-mat'ik), *a.* [*<* *protoplasm* + *-atic*.] Same as *protoplasmic*.

Part of its *protoplasma* matter has undergone resorption and served nutritory purposes. *Quart. Jour. of Microsc. Sci.*, N. S., XXX, 345.

protoplastic (prō-tō-plaz'mat'ik), *a.* [*<* *protoplasm* + *-ic*.] 1. First-formed, as a constituent of organized beings; primitive or primordial, as a cause or result of organization; of or pertaining in any way to protoplasm: as, a *protoplastic* substance; a *protoplastic* process; a *protoplastic* theory.

In the young state of the cell, the whole cavity is occupied by the *protoplastic* substance. *W. B. Carpenter, Microsc.*, § 224.

2. Consisting of, formed or derived from, or containing protoplasm; bioplasmic; sarcodous. — 3. Resembling protoplasm in chemical composition or in vital activities; protoplasmic; plastic; germinative or formative. — **Protoplastic processes** of Deiters, the thickly branched processes of the large central ganglion-cells: distinguished from the *axio-cylinder process* of Deiters.

protoplast (prō-tō-plast), *n.* [*<* ML. *protoplastus*, the first man made, the first creation, < Gr. *πρωτοπλαστος*, formed or created first, < *πρωτος*, first, + *πλαστος*, formed, molded: see *plastic*. Cf. *protoplasm*.] 1. That which or one who is first formed; the original, type, or model of some organic being; especially, the hypothetical first individual or one of the supposed first pair of the human race; a protoparent.

The consumption was the primitive disease which put a period to our *protoplasts*, Adam and Eve. *Harvey.* Adam was set up as our great *protoplast* and representative. *Glennville, Pre-existence of Souls, Pref.*

Fresh from the *Protoplast*,
Furnished for ages to come, when a kindlier wind should blow,
Lured now to begin and live. *Browning, Abt Vogler*, st. 5.

2. A protozoan; a simple unicellular organism; specifically, a member of the *Protoplasta*.

Protoplasta (prō-tō-plas'tā), *n. pl.* [NL.: see *protoplast*.] An order of rhizopods; unicellular organisms in general; those *Protozoa*, *Protista*, or *Plastidzoa* the organization of which has the morphological valence of a simple cell.

protoplastic (prō-tō-plas'tik), *a.* [*<* *protoplast* + *-ic*.] 1. Protoplasmic; pertaining to or having the character of a protoplast.

Our *protoplastic* sire

Lost paradise.

Hovell, Lexicon Tetraglotton (1660).

A return to the condition of Lord Monboddo's *protoplastic* baboon even the Carylites . . . might find it irksome to realize with equanimity. *F. Hall, Mod. Eng.*, p. 30.

2. Specifically, belonging to the *Protoplasta*.

Protopoda (prō-top'ō-dā), *n. pl.* [NL., < Gr. *πρωτος*, first, + *ποδος* (pod-) = *E. foot*.] A group of tænioglossate gastropods, with the foot rudimentary, including the *Fermetidae*.

protopodia, *n.* Plural of *protopodium*.

protopodial (prō-tō-pō'di-al), *a.* [*<* *protopodium* + *-al*.] Of or pertaining to the *protopodium*, or having its character.

protopodite (prō-top'ō-dit), *n.* [*<* Gr. *πρωτος*, first, + *ποδος* (pod-) = *E. foot*, + *-ite*.] In *Crustacea*, the first or basal division of an appendage of a segment, by which such appendage articulates with its somite; the root or first joint of a limb, which may bear an endopodite or an exopodite, or both of these. See *endopodite*, and cut under *chela*.

Each appendage consists of three divisions . . . supported on a *protopodite*, or basal division.

Huxley, Anat. Invert., p. 244.

Probably the coxo- and basipodite [of the ambulatory leg of a crawfish] together answer to the *protopodite* of the abdominal appendages, the remaining joints representing the endopodite. *Huxley, Anat. Invert.*, p. 239, note.

protopoditic (prō-tō-pō-dit'ik), *a.* [*<* *protopodite* + *-ic*.] Of or pertaining to a *protopodite*.

protopodium (prō-tō-pō'di-um), *n.*; *pl. protopodia* (-ā). [NL., < Gr. *πρωτος*, first, + NL. *podium*, q. v.] In *Mollusca*, the primitive or typical podium; the foot proper, irrespective of its various modifications.

The valve of the siphon [in cephalopods] is a true foot, or *protopodium*, and the two lateral folds are *pteropodia*.

Gill, Smithsonian Report, 1880, p. 361.

protopope (prō-tō-pōp), *n.* [*<* Russ. *протопопъ*, < MGr. *πρωτοπαπας*, a chief priest: see *protopapas*, and cf. *pope*.] Same as *protopapas*.

protopresbyter (prō-tō-pres'bi-ter), *n.* [*<* Gr. *πρωτος*, first, + *πρεσβυτερος*, presbyter: see *presbyter*.] Same as *protopope*.

protoprism (prō-tō-prizm), *n.* [*<* Gr. *πρωτος*, first, + *πρισμα*, prism: see *prism*.] See *prism*, 3.

protopsyche (prō-tō-sī-kē), *n.* [*<* Gr. *πρωτος*, first, + *ψυχη*, soul: see *Psyche*.] See *psyche*, 4 (c). *Haackel*.

protopteran (prō-top'te-ran), *a.* and *n.* I. *a.* Same as *protopterous*.

II. *n.* A member of the *Protopteri*.

protoptere (prō-top'ter), *n.* A fish of the order *Protopteri*. *Sir J. Richardson*.

Protopteri (prō-top'te-ri), *n. pl.* [NL., pl. of *Protopterus*.] In Owen's classification, an order of cold-blooded vertebrates transitional between the fishes and the amphibians: same as *Sirenoidei* and *Dipnoi*.

Protopteridae (prō-top'ter'i-dē), *n. pl.* [NL., < *Protopterus* + *-idae*.] A family of dipnoans, typified by the genus *Protopterus*: same as *Lepidosirenidae*.

protopterous (prō-top'te-rus), *a.* [*<* NL. *protopterus*, < Gr. *πρωτος*, first, + *πτερον*, wing, = *E. feather*.] Having a simple or primitive type of limb, as a *protopterus*; of or pertaining to the *Protopteri*.

Protopterus (prō-top'te-rus), *n.* [NL. (Owen, 1837): see *protopterous*.] 1. The typical genus of *Protopteridae*, containing the African mud-fish, *P. annectens*. In this dipnoous fish the pectorals and ventrals are reduced to long filaments with fringes containing rudimentary rays. See *Lepidosiren*, and cut under *mudfish*.

2. [*l. c.*] A member of this genus.

protopyramid (prō-tō-pir'ā-mid), *n.* In *crystal*. See *pyramid*, 3.

Protornis (prō-tōr'nis), *n.* [NL., < Gr. *πρωτος*, first, + *ορνις*, bird.] A genus of birds, founded by Von Meyer upon remains from the Lower Eocene of Glaris. *P. glariensis* is regarded as the oldest known passerine bird.

protosalt (prō-tō-salt), *n.* [*<* Gr. *πρωτος*, first, + *E. salt*.] In *chem.*, that one of two or more compounds of the same metal with the same acid which contains relatively the least quantity of metal.

protosiphon (prō-tō-sī'fōn), *n.* [*Gr. πρῶτος*, first, + *E. siphon*.] The representative or origin of the siphuncle in the protoconch of ammonitoid cephalopods.

protosomite (prō-tō-sō'mīt), *n.* [*Gr. πρῶτος*, first, + *E. somite*.] One of the primitive or rudimentary somites or segments of an embryonic worm or arthropod.

Generally, the development of the *protosomites*, as these segments might be called, does not occur [in annelids] until some time after the embryo has been hatched.

Huxley, Anat. Invert., p. 248.

protosomic (prō'tō-sō-mīt'ik), *a.* [*Gr. πρῶτος*, first, + *E. somite*.] Primarily segmented; of or pertaining to a protosomite.

protospasm (prō'tō-spazm), *n.* [*Gr. πρῶτος*, first, + *σπασμός*, spasm; see *spasm*.] See *Jacksonian epilepsy*, under *Jacksonian*.

protospermatoblast (prō-tō-spēr'mā-tō-blāst), *n.* [*Gr. πρῶτος*, first, + *E. spermatoblast*.] A cellular blastema in which spermatozoa originate. See *spermatoblast*.

The spermatozoa of the decapods studied by him [Sabatier] arise in large cells, the *protospermatoblasts*, and are homologous with the epithelial cells of the Graafian follicle.

Micros. Sci., N. S., No. cxix, XXX, ill. 251.

Protospongia (prō-tō-spon'ji-ā), *n.* [*NL.* (*Salter*), *Gr. πρῶτος*, first, + *σπῆγγω*, a sponge.] A genus of lyssacine hexactinellid sponges, including the oldest known forms of fossil sponge, from the Menevian beds of the Lower Cambrian of Wales, as *P. fenestrata*.

protospongian (prō-tō-spon'ji-ān), *a.* Primitive, as a stage in the evolution of sponges or in the development of a sponge. *Haeckel*.

We have not been able to separate the *Protospongian* stage of Haeckel from the acula, and think it should be merged in the latter.

Hyatt, Proc. Bost. Soc. Nat. Hist., XXIII, 86.

protospore (prō'tō-spōr), *n.* [*Gr. πρῶτος*, first, + *σπῆρος*, seed.] In *bot.*, one of the primary or apparent spores of certain fungi, corresponding to the prothallus of the higher cryptogams.

Protostapedifera (prō-tō-stap-e-dif'e-rā), *n. pl.* [*NL.*, *Gr. πρῶτος*, first, + *NL. Stapedifera*, q. v.] A hypothetical form from which the *Stapedifera* are supposed to have originated. See *Stapedifera*. *Thacher*, 1877.

Protostigma (prō-tō-stig'mā), *n. pl.* [*NL.* (*Lesquereux*, 1877), *Gr. πρῶτος*, first, + *στίγμα*, a spot, mark.] A name provisionally given to certain doubtful plant remains, consisting of fragments of stems found in rocks of the Hudson River (Cincinnati) group, near Cincinnati, and considered by the author of the name to be related to *Sigillaria* and other types of vegetation of the Devonian and Carboniferous. The specimens found are very obscure, and are referred by some paleobotanists to the sponges or other low forms of marine life.

protostoma (prō-tōs'tō-mā), *n.*; *pl. protostomata* (prō-tōs'tō-mā-tā). [*NL.*, *Gr. πρῶτος*, first, + *στόμα*, mouth.] The archæostoma or primitive mouth-opening of a gastrula, by which the protogaster or cavity of the archenteron communicates with the exterior. It is the original orifice of that invagination whereby a blastula is converted into a gastrula, and is mouth and anus in one. In some kinds of gastrulae the protostoma is also called *anus of Ruesconi*; in others, a *blastulapore*. *Haeckel*, *Evol. of Man* (trans.), I, 184.

Protosymphyla (prō'tō-sim-fi'lā), *n. pl.* [*NL.*, *Gr. πρῶτος*, first, + *NL. Symphyla*, q. v.] A term applied by Erich Haase to a hypothetical group, from which he supposed the orders *Symphyla*, *Thysanura*, and *Chilopoda* to have been derived by evolution: its existence in nature is disputed or denied.

protosymphylar (prō'tō-sim-fi'lār), *a.* [*Gr. Protosymphyla* + *-ar*.] Of or pertaining to the *Protosymphyla*.

Protosyngnatha (prō-tō-sing'nā-thā), *n. pl.* [*NL.*, *Gr. πρῶτος*, first, + *σιν*, along with, + *γνάθος*, jaw.] A group of fossil myriapods of Carboniferous age, represented by the genus *Paleocampa*, resembling the extant chilopods in having but one pair of legs to each segment of the body. Also called *Protosyngnatha*.

protosyngnathous (prō-tō-sing'nā-thus), *a.* [*Gr. Protosyngnatha* + *-ous*.] Of or pertaining to the *Protosyngnatha*, or having their characters.

prototergite (prō-tō-tēr'jit), *n.* [*Gr. πρῶτος*, first, + *L. tergum*, back.] In *entom.*, the first dorsal segment of the abdomen.

prototallus (prō-tō-thal'us), *n.*; *pl. prototallus* (i). [*NL.*, *Gr. πρῶτος*, first, + *θαλλός*, a young shoot.] In *bot.*: (a) Same as *prothallium*. (b) Same as *hypothallus*.

protothere (prō'tō-thēr), *n.* A mammal of the group *Prototheria*; any prototherian.

Prototheria (prō-tō-thē'ri-ā), *n. pl.* [*NL.*, *Gr. πρῶτος*, first, + *θηρ*, a wild beast.] 1. A name proposed by Gill in 1872 for one of the major groups of the *Mammalia*, consisting of the *Monotremata* alone, as distinguished from the *Eutheria*: coextensive with *Ornithodelphia*. — 2. Those unknown primitive mammals which are the hypothetical ancestors of the monotremes: synonymous with *Promammalia*.

It will be convenient to have a distinct name, *Prototheria*, for the group which includes the at present hypothetical embodiments of that lowest stage of mammalian type of which the existing monotremes are the only known representatives. *Huxley, Proc. Zool. Soc.*, 1880, p. 653.

prototherian (prō-tō-thē'ri-ān), *a. and n.* [*Gr. Prototheria* + *-an*.] 1. *a.* Primarily mammalian; primeval or ancestral, as a mammal; of or pertaining to the *Prototheria* in either sense.

2. *n.* A member of the *Prototheria*, hypothetical or actual.

prototrachea (prō-tō-thō'rāks), *n.* [*Gr. πρῶτος*, first, + *θρᾶξ*, thorax.] Same as *prothorax*.

Prototracheata (prō-tō-trā-kē-ā'tā), *n. pl.* [*NL.*, *Gr. πρῶτος*, first, + *τράχεια*, trachea, + *-ata*.] Same as *Protracheata*.

prototypal (prō'tō-tī-pāl), *a.* [*Gr. πρωτοτύπος*, a first or primitive form, *πρῶτος*, first, + *τύπος*, impression, model, type; see *type*.] A primitive form; an original or model after which anything is formed; the pattern of anything to be engraved, cast, etc.; an exemplar; an archetype; especially, in *metrology*, an original standard, to which others must conform, and which, though it may be imitated from something else, is not required to conform to anything else, but itself serves as the ultimate definition of a unit. Thus, the *mètre des archives* is a prototype, and so is the new international meter at Breteuil, although the latter is imitated from the former. But the *mètre du conservatoire* and the meters distributed by the International Bureau are not prototypes, since they have no authority except from the evidence that they conform to other measures.

Survivors of that *prototypal* flora to which I have already referred. *Dawson, Geol. Hist. of Plants*, p. 24.

prototype (prō'tō-tīp), *n.* [*F. prototype* = *Sp. It. prototipo* = *Pg. prototipo*, a prototype; *LL. prototypus*, original, primitive; *Gr. πρότυπος*, in the first form, original, neut. *πρωτότυπος*, a first or primitive form, *πρῶτος*, first, + *τύπος*, impression, model, type; see *type*.] A primitive form; an original or model after which anything is formed; the pattern of anything to be engraved, cast, etc.; an exemplar; an archetype; especially, in *metrology*, an original standard, to which others must conform, and which, though it may be imitated from something else, is not required to conform to anything else, but itself serves as the ultimate definition of a unit. Thus, the *mètre des archives* is a prototype, and so is the new international meter at Breteuil, although the latter is imitated from the former. But the *mètre du conservatoire* and the meters distributed by the International Bureau are not prototypes, since they have no authority except from the evidence that they conform to other measures.

In many respects [he] deserves to be enriched, as a prototype for all writers, of voluminous works at least.

Sterne, Tristram Shandy, ill. 38.

The square or circular altar, or place of worship, or easily be considered as the prototype of the Sikra surrounded by cells of the Jains.

J. Fergusson, Hist. Indian Arch., p. 208.

prototypembryo (prō'tō-tīp-em'bri-ō), *n.* [*Gr. πρωτοτύπος* + *embryo*.] A later stage of the embryo, which exhibits the essential characters of the division of animals to which it belongs. Thus, the veliger of a mollusk, the nauplius of a crustacean, and the notochordal stage of a vertebrate are respectively *prototypembryos* of the *Mollusca*, *Crustacea*, and *Vertebrata*. *Hyatt*. [Rare.]

prototypembryonic (prō'tō-tīp-em'bri-on'ik), *a.* [*Gr. πρωτοτύπος* + *embryo* + *-ic*.] Having the character of a prototypembryo. [Rare.]

prototypical (prō-tō-tīp'ikāl), *a.* [*Gr. πρωτοτύπος* + *-ic*.] Same as *prototypal*.

Their [the Maruts'] coming to the fight must be taken as prototypical of the coming of the Greek heroes to the great fields of battle.

Keary, Prim. Belief, p. 152.

protova, *n.* Plural of *protovum*.

protovertebra (prō-tō-vēr'tē-brā), *n.*; *pl. protovertebrae* (-brē). [*NL.*, *Gr. πρῶτος*, first, + *L. vertebra*, vertebra.] 1. In *Carus's* nomenclature (1828), a rib regarded as a vertebral element developed to contain and protect the viscera, or organs of vegetative life: correlated with *deutovertebra* and *tritovvertebra*. — 2. A primitive, temporary vertebra; one of the series of segments which appear in pairs in the early embryo along the course of the notochord, and from or about which the permanent ver-

tebrae are developed. They soon disappear, being replaced by definitive vertebrae.

protovertebral (prō-tō-vēr'tē-brāl), *a.* [*Gr. πρωτοvertebra* + *-al*.] Having the character of a protovertebra; pertaining to protovertebrae: as, a *protovertebral* segment; a *protovertebral* portion of the notochord.

Protovertebrata (prō-tō-vēr'tē-brā'tā), *n. pl.* [*NL.*: see *protovertebrate*.] A hypothetical group of animals, assumed to have been the ancestral forms of the *Vertebrata*.

protovertebrate (prō-tō-vēr'tē-brāt), *a.* [*NL.* *protovertebratus*, *Gr. πρωτοvertebra*, q. v.] 1. Provided with or characterized by the presence of protovertebrae: as, the *protovertebrate* stage of a vertebrate embryo. — 2. Of or pertaining to the *Protovertebrata*.

protovestiar (prō-tō-ves'ti-ā-ri), *n.* [*ML. protovestiarus*, *Gr. πρῶτος*, first, + *ML. vestiarius*, the keeper of a wardrobe: see *testiary*.] The head keeper of a wardrobe.

Protovestiar, or wardrobe keeper of the palace of Antiochus at Constantinople.

T. Warton, Hist. Eng. Poetry, I, 132.

protovum (prō-tō-vūm), *n.*; *pl. protova* (-vā). [*NL.*, *Gr. πρῶτος*, first, + *L. ovum*, egg; see *ovum*.] An original or primitive egg; an ovum or ovule in its first state, as when still in its Graafian follicle, or, in general, before its impregnation, when it becomes a cytula or parent-cell by fecundation with sperm; or, in the case of meroblastic eggs, an undifferentiated female egg-cell before it acquires the mass of non-formative food-yolk which converts it into a metovum.

protoxid, protoxide (prō-tok'sid), *n.* [*Gr. πρῶτος*, first, + *E. oxid*.] That member of a series of oxids which contains a single oxygen atom combined with a single bivalent atom or with two univalent atoms: applied only to oxids which are not strongly basic or acid.

protoxylem (prō-tō-zī'lem), *n.* [*Gr. πρῶτος*, first, + *E. xylem*.] In *bot.*, the first-formed elements of the xylem of a vascular bundle.

Protozoa (prō-tō-zō'ā), *n. pl.* [*NL.*, *pl. of Protozoon*.] Primordial or first-formed animals, or cell-animals; protozoans: a subkingdom of *Animalia* or prime division of animals, contrasted with *Metazoa*, or all other animals collectively. The *Protozoa* are animal organisms consisting of a single cell, or of several cells not differentiated into tissues. This is the essential distinction between protozoan and metazoan animals, though no hard and fast line can be drawn around *Protozoa* to distinguish them on the one hand from *Protophyta*, and on the other from *Metazoa*. The name *Protozoa* was first used by Goldfuss (1809) to include microscopic animals and also the polyps and medusae. Siebold and Stannius first used it in its modern significance as comprising and limited to the infusorians and rhizopoda. Owen (1859) used the term *Protozoa* for a kingdom including diatoms, etc., and therefore synonymous with *Protista*. The sponges, in the view (as held by W. Saville Kent, for example) that they consist essentially of an aggregate of choanoflagellate infusorians, are often brought under *Protozoa*, though they have not only an ectoderm and an endoderm, but also a mesoderm, and are therefore tissue-animals as distinguished from cell-animals. Excluding sponges, *Protozoa* may be characterized as animals composed of a simple nearly structureless jelly-like substance called *sarcode*, a kind of protoplasm, devoid of permanent distinction or separation of parts resulting from tissue-formation or histogenesis (though they may have very evident organs as parts of a single cell), without a permanent definitive body-cavity or any trace of a nervous system, no permanent differentiated alimentary system except in a most rudimentary state, and no multicellular membranes or tissues. Nevertheless, there is really a wide range of variation or gradation of structure in these seemingly structureless animalcules. Some of the lowest forms are mere microscopic specks of homogeneous sarcode, of any or no definite shape. Such are monera, or representatives of a division *Monera* or *Proteomyxa*; but it is not certain that all such objects are either individuals or species in a usual sense of these words. Among the lowest protozoans of which species and genera can be definitely predicated are the amebiform organisms, which have a nucleus, and locomotory organs in the form of pseudopods, temporarily protruded from any part of the body, and which ingest and egest foreign substance from any part of the body. Vast numbers of protozoans are of this grade of complexity, and with the simpler forms constitute a class, *Rhizopoda*, including the normal ameboids and the foraminifera and radiolarians. For, though both these latter may have very complicated shells, tests, or skeletons, their sarcodeous substance remains of a low and simple type. It is an advance in organization when a protozoan becomes *corticate* — that is, assumes a form in which an outer harder ectoplasm and an inner softer endoplasm are distinguishable — since this confines the sarcodeous mass and gives it definite shape or form. This advance in organization is often marked by the appearance of a nucleolus or endoplastule, besides the nucleus or endoplast which most protozoans possess, by the presence of definite and permanent locomotory organs in the form of cilia or flagella, and finally by the fixation of a specialized oral or ingestive area or mouth, in place of the one or several temporary vacuoles which serve as stomachs in lower forms. Protozoans of this higher grade occur

Vertebrate Embryo (chick, second day of incubation). a, cephalic end; b, caudal end; c, primitive groove, over which d, the dorsal laminae, have closed for the greater part of its length; e, numerous protovertebrae; f, rudiment of an omphalomesaraic vein.

under various forms. The class *Gregarinida* represents parasitic forms, one- or two-celled, essentially like the ova of *Metazoa*. The class *Infusoria* comprehends an enormous number of minute, nearly always microscopic, animalcules, found in infusions, inhabiting both fresh and salt water, sometimes parasitic, but mostly leading an independent fixed or free life. There are many groups of these, as the ciliate, flagellate, choanoflagellate, and suctorian infusorians, among them the most complex organisms which are commonly included under *Protozoa*, as the *Noctiluca*, for example. With or without some of the lowest disputed forms, and with or without the sponges, *Protozoa* have been very variously subdivided, almost every author having his own arrangement. A so-called moner, an amoeba, a foraminifer, a radiolarian, a gregarine, and an infusorian respectively exemplify as many leading types of *Protozoa*. One division is into *Automata* and *Stomatoda*, according to the absence or presence of a mouth. Another is into *Monera* and *Endoplastia*, according to the absence or presence of a nucleus, the latter being again distinguished as *Myxopoda* and *Mastigopoda*, according to whether the locomotory organs are temporary pseudopods or permanent cilia or flagella. A third is into *Gymnamyza* and *Corticata*, according to the absence or presence of a distinguishable ectoplasm. (1) The *Gymnamyza* are separated into 7 classes: *Proteomyza* (indistinguishable), *Myxozoa* (often regarded as plants), *Lobozoa* (ordinary amebiforms), *Labyrinthulidae*, *Heliozoa* (sun-animalcules), *Reticularia* (the foraminifers), and *Radiolaria*. (2) The *Corticata* are divided into 6 classes: *Sporozoa* (gregarines and many others), *Flagellata*, *Dinoflagellata*, *Rhynchoflagellata*, *Ciliata*, and *Actinotaria*, the last five being as many classes of infusorians. This is the classification presented in the latest edition of the *Encyclopædia Britannica*. By Saville Kent the *Protozoa* (including sponges) are divided into 4 prime "evolutionary series," not exactly coincident, however, with any recognized zoological groups, called *Panotomata*, *Discolomata*, *Eustomata*, and *Polystomata*. (See these words.) Also called *Hypozoa*, *Oozoa*, *Plasmodia*. Compare *Primaria*, *Protista*, *Protophyta*. See cuts under *Actinopherrum*, *amoeba*, *Euglena*, *Foraminifera*, *Globigerinidae*, *Gregarinidae*, *Infusoria*, *Noctiluca*, *Paramoecium*, *radiolarian*, and *sun-animalcule*.

protozoal (prō-tō-zō'āl), *a.* [*protozoön* + *-al*.] Same as *protozoan*.

Bütschli's classification of these *protozoal* forms. *Lancet*, No. 3467, p. 308.

protozoan (prō-tō-zō'an), *a.* and *n.* [*protozoön* + *-an*.] 1. *a.* First, lowest, simplest, or most primitive, as an animal; of or pertaining to the *Protozoa*.

II. *n.* A member of the *Protozoa*; a *protozoön*.

protozoanal (prō-tō-zō'an-āl), *a.* [Irreg. < *protozoan* + *-al*.] Of or pertaining to a *protozoan*. [An improper form.]

The individualized *protozoanal* stage has become confined to the earliest periods of existence. *Stand. Nat. Hist.*, I. 60.

protozoary (prō-tō-zō'a-ri), *n.*; pl. *protozoaries* (-riz). [*F. protozoaire*, < Gr. *πρωτος*, first, + *ζωον*, dim. of *ζωον*, an animal.] A *protozoan*.

protzoic (prō-tō-zō'ik), *a.* [*protozoön* + *-ic*.] 1. In *zool.*, same as *protozoan*.

They exhibit the rhythmically contracting vacuoles which are specially characteristic of *protzoic* organisms. *W. B. Carpenter*, *Micros.*, § 225.

2. In *geol.*, containing the earliest traces of life. —*Protzoic schists*, the name given by Barrande to the lowest division of the fossiliferous rocks of Bohemia. See *primordial*.

protozoön, **protozoöm** (prō-tō-zō'on, -um), *n.*; pl. *protozoa* (-ä). [NL., < Gr. *πρωτος*, first, + *ζωον*, animal.] An individual or a species of *Protozoa*; a *protozoan*.

protozoönal (prō-tō-zō'on-āl), *a.* [*protozoön* + *-al*.] Pertaining to a *protozoön*: as, *protozoönal* collars and flagella. *Hyatt*.

protozoöm, *n.* See *protozoön*.

Protracheata (prō-trā-kē-ä'tä), *n.* pl. [NL., < L. *pro*, before, + *Tracheata*, *q. v.*] In Gegenbaur's system, one of three prime series into which all arthropods are divided (the others being *Branchiata*, or *Crustacea* in a wide sense, and *Tracheata*, or insects in the widest sense), established for the reception of the single genus *Peripatus*: thus continuous with *Malaco-poda*, *Onychophora*, and *Peripatidea*.

More exact investigations into the organization of *Peripatus* show that this animal, which as yet has been generally placed with the *Vermes*, is the representative of a special class of Arthropoda which must be placed before the *Tracheata* (that is, *Protracheata*). *Gegenbaur*, *Comp. Anat.* (trans.), p. 280.

protracheate (prō-trā-kē-ät), *a.* Of or pertaining to the *Protracheata*; malacopodous; onychophorous; peripatidean.

protract (prō-trakt'), *v. t.* [*L. protractus*, pp. of *protrahere* (> *It. protrahere*, *protrarre* = *OF. pourtraire*), draw forth, lengthen out, < *pro*, forth, + *trahere*, draw: see *tract*. Cf. *portray*, *portrait*, from the same source.] 1. To draw out or lengthen in time; prolong: now chiefly in the past participle.

The Galles were now weary with long *protracting* of the *Golding*, tr. of *Cæsar*, fol. 82.

Doubtless he shrives this woman to her smock, Else ne'er could he so long *protract* his speech.

Shak., 1 Hen. VI., i. 2. 120.

You shall *protract* no time, only I give you a bowl of rich wine to the health of your general.

B. Jonson, *Case is Altered*, ill. 1.

Her spirit seemed hastening to live within a very brief span as much as many live during a *protracted* existence.

Charlotte Brontë, *Jane Eyre*, viii.

2. To lengthen out in space; extend in general. [Rare.]

Their shaded walks And long *protracted* bowers.

Cowper, *Task*, l. 257.

Many a ramble, far And wide *protracted*, through the tamer ground Of these our unimaginative days.

Wordsworth.

3. To delay; defer; put off to a distant time.

Let us bury him, And not *protract* with admiration what Is now due debt. To the grave!

Shak., *Cymbeline*, iv. 2. 282.

4. In *surv.*, to draw to a scale; lay down, by means of a scale and protractor, the lines and angles of, as a piece of land; plot.—5. In *anat.*, to draw forward (a part or an organ); extend (a part) anteriorly; have the action or effect of a protractor upon.—*Protracted meeting*, a revival meeting continued or protracted; a series of meetings of unusual importance, often lasting for several days and attended by large numbers: chiefly used by Congregationalists, Methodists, and Baptists. [New Eng.]

protract (prō-trakt'), *n.* [*L. protractus*, a prolonging, < L. *protrahere*, pp. *protractus*, prolong: see *protract*.] A lengthening out; delay; putting off.

And wisdom willed me without *protract*, In speedie wise, to put the same in ure.

Norton and Sackville, *Ferrex and Porrex*, iv. 2.

Many long weary dayes I have outworne; And many nights, that slowly seemd to move They sad *protract* from evening untill morne.

Spenser, *Sonnets*, lxxxvi.

protractedly (prō-trak'ted-li), *adv.* [*protracted*, pp. of *protract*, *v.*, + *-ly*.] In a protracted or prolonged manner; tediously.

protractor (prō-trak'ter), *n.* [*protract* + *-er*.] One who protracts, or lengthens in time. Also *protracter*.

protractile (prō-trak'til), *a.* [*protract* + *-ile*.] Susceptible of being drawn forward or thrust out, as the tongue of a woodpecker; protrusile: correlated with *retractile*, that which is one being also the other.

protracting-bevel (prō-trak'ting-bev'el), *n.* A combined sector, rule, straight-edge, and bevel used in plotting plans and other drawings.

protraction (prō-trak'shon), *n.* [*F. protraction* = *It. protrazione*, < L. *protractio(n)*], a drawing out or lengthening, < L. *protrahere*, pp. *protractus*, draw forth, drag out: see *protract*.] 1. The act of drawing out or prolonging; the act of delaying: as, the *protraction* of a debate.

If this grand Business of State, the Match, suffer such *Protractions* and *Puttings off*, you need not wonder that private Negotiations, as mine is, should be subject to the same Inconveniencies. *Howell*, *Letters*, l. iii. 24.

2. In *surv.*: (a) The act of plotting or laying down on paper the dimensions of a field, etc. (b) That which is protracted or plotted on paper.—3. The action of a protractor in sense (b).—4. In *anc. pros.*, the treatment as metrically long of a syllable usually measured as a short: opposed to *correction*.

protractive (prō-trak'tiv), *a.* [*protract* + *-ive*.] Drawing out or lengthening in time; prolonging; continuing; delaying.

The *protractive* trials of great Jove To find persisitive constancy in men.

Shak., *T. and C.*, i. 3. 20.

He saw, but suffered their *protractive* arts.

Dryden, *Hind and Panther*, ill. 1108.

protractor (prō-trak'tor), *n.* [*NL. protractor* (cf. *ML. protractor*, one who calls or drags another into court), < L. *protrahere*, pp. *protractus*, draw or drag forth: see *protract*.] One who or that which protracts. As applied to persons, also *protracter*. Specifically—(a) In *surv.*,

Protractor.

an instrument for laying down and measuring angles on paper. It is of various forms—semicircular, rectangular, or circular. See also cut under *bevel-protractor*.

This parallelogram is not, as Mr. Sheres would the other day have persuaded me, the same as a *protractor*, which do so much the more make me value it, but of itself it is a most useful instrument. *Pepys*, *Diary*, Feb. 4, 1668.

(b) In *anat.*, a muscle which protracts, or extends or draws a part forward: the opposite of *retractor*. See diagram under *Echinoides*.

The *psaos minor* . . . is a *protractor* of the pelvis. *Huxley*, *Anat. Vert.*, p. 47.

(c) An adjustable pattern, agreeing in proportion with particular measurements, used by tailors in cutting out garments.

protreptical (prō-trēp'ti-kāl), *a.* [*Gr. προτρειν*, fitted for urging on, exhorting, < *προτρέμειν*, turn toward, < *πρό*, forth, forward, + *τρέμειν*, turn: see *trope*.] Intended or adapted to persuade; persuasive; hortatory.

The means used are partly didactical and *protreptical*. *Ep. Ward*, *Infidelity*.

protriene (prō-tri'ēn), *n.* [*Gr. πρό*, before, + *τριπύρα*, a trident: see *triene*.] In the nomenclature of sponge-spicules, a triene with porrect cladi. It is a simple spicule of the rhabdus type, bearing at one end a cladome of three cladi or rays which project forward. *Sollas*.

protrite (prō'trit), *a.* [*L. protritus*, pp. of *proterere*, drive forth, wear away, < *pro*, forth, + *terere*, pp. *tritrus*, rub: see *trite*.] Common; trite.

They are but old and rotten errors, *protrite* and putrid opinions of the ancient Gnosticks.

Ep. Gauden, *Tears of the Church*, p. 195. (*Davies*.)

Whereupon grew that *protrite* distinction of a triple appetite, natural, sensitive, and reasonable.

T. Wright, *Passions of the Mind* (1801), l. 7.

protrudable (prō-trūd'ā-bl), *a.* [*protrude* + *-able*.] Protrusible or protrusile; protractile.

The *protrudable* trunk or proboscis of other annelids. *Darwin*, *Vegetable Mould*, l.

protrude (prō-trūd'), *v.*; pret. and pp. *protruded*, ppr. *protruding*. [*L. protrudere*, thrust forth, protrude, < *pro*, forth, forward, + *trudere*, thrust, push: see *threat*. Cf. *extrude*, *intrude*, etc.] I. *trans.* 1. To thrust forward or onward; drive or force along.

The sea's being *protruded* forwards . . . by the mud or earth discharged into it by rivers. *Woodward*.

2. To shoot or thrust forth; project; cause to project; thrust out as from confinement; cause to come forth: as, a snail *protrudes* its horns.

Spring *protrudes* the bursting gems. *Thomson*, *Autumn*.

II. *intrans.* To shoot forward; be thrust forward; project beyond something.

The parts *protrude* beyond the skin. *Bacon*.

With that lean head-stalk, that *protruding* chin, Wear standing collars, were they made of tin!

O. W. Holmes, *A Rhymed Lesson*.

=*Syn.* To project, jut (out), bulge (out).

protrusible (prō-trō'si-bl), *a.* [*L. protrusus*, pp. of *protrudere*, thrust forth (see *protrude*), + *-ible*.] Capable of being protruded; protrusile.

In many the oral aperture is surrounded by a flexible muscular lip, which sometimes takes on the form of a *protrusible* proboscis. *Huxley*, *Anat. Invert.*, p. 157.

protrusile (prō-trō'sil), *a.* [*L. protrusus*, pp. of *protrudere*, thrust forth (see *protrude*), + *-ile*.] Capable of being protruded; protrudable; protrusile; protractile.

protrusion (prō-trō'shon), *n.* [*L. as if *protrusio(n)*, < L. *protrudere*, pp. *protrusus*, thrust forth: see *protrude*.] 1. The act of protruding or thrusting forth, or the state of being protruded.

Some sudden *protrusion* to good; . . . a mere actual, momentary, transient conduction.

Ep. Hall, *Sermon on Rom. viii. 14*.

Without either resistance or *protrusion*. *Locke*.

We see adaptation to the wind in the incoherence of the pollen, . . . in the *protrusion* of the stigmas at the period of fertilisation.

Darwin, *Different Forms of Flowers*, p. 94.

2. That which stands out beyond something adjacent; that which protrudes or projects.

The only features of the enormous structure are the blank, sombre stretches and *protrusions* of wall, the effect of which, on so large a scale, is strange and striking.

H. James, Jr., *Little Tour*, p. 98.

protrusive (prō-trō'siv), *a.* [*L. protrusus*, pp. of *protrudere*, thrust forth (see *protrude*), + *-ive*.] Thrusting or impelling forward; obtrusive; protruding: as, *protrusive* motion.

The chin *protrusive*, and the cervical vertebrae a trifle more curved.

George Eliot, *Daniel Deronda*, vii.

protrusively (prō-trō'siv-li), *adv.* [*protrusive* + *-ly*.] In a protrusive manner; obtrusively.

protrusiveness (prō-trō'siv-nes), *n.* Tending to protrude or to be protrusive; obtrusiveness.

prott-goose (prot'gōs), *n.* [*< prott* (said to be imitative) + *goose*.] The Brent- or brant-goose, *Bernicla brenta*.

protuberance (prō-tū'be-rans), *n.* [*< F. protuberance* = *Sp. Pg. protuberancia* = *It. protuberanza*, *< NL. *protuberantia*, *< LL. protuberant* (t-s), *protuberant*: see *protuberant*.] A swelling or tumor on the body; a prominence; a bunch or knob; anything swelled or pushed beyond the surrounding or adjacent surface; on the surface of the earth, a hill, knoll, or other elevation; specifically, in *anat.* and *zool.*, a protuberant part; a projection or prominence; a tuberosity; as, a bony *protuberance*. See cut under *conjugation*.

Mountains, that seem but so many wens and unnatural protuberances upon the face of the earth.

Dr. H. More, Antidote against Atheism, I. ii. 3.

He had a little round abdominal protuberance, which an inch and a half added to the heels of his boots hardly enabled him to carry off as well as he could have wished.

Trolope, Doctor Thorne, xii.

Annular protuberance of the brain. See *annular*.—*Occipital, parietal*, etc., *protuberance*. See the adjective.

protuberancy (prō-tū'be-ran-si), *n.* [As *protuberance* (see -cy).] Same as *protuberance*.

protuberant (prō-tū'be-rant), *a.* [*< F. protuberant*, *< LL. protuberant* (t-s), *ppr. of protuberare*, swell, grow forth: see *protuberare*.] Swelling; prominent beyond the surrounding surface.

Though the eye seems round, in reality the iris is protuberant above the white.

Those large brown protuberant eyes in Silas Marner's pale face.

George Eliot, Silas Marner, I.

protuberantly (prō-tū'be-rant-li), *adv.* [*< protuberant* + -ly².] In a protuberant manner; in the way of protuberance.

protuberate (prō-tū'be-rāt), *v. t. & i.*; pret. and pp. *protuberated*, *ppr. protuberating*. [*< LL. protuberatus*, *pp. of protuberare*, swell out, grow forth, *< L. pro*, forth, forward, + *tuberare*, swell, *< tuber*, a bump, swelling, tumor: see *tuber*.] To swell beyond the adjacent surface; be prominent; bulge out.

If the navel protuberates, make a small puncture with a lancet through the skin.

Sharpe, Surgery.

protuberation (prō-tū'be-rā-shon), *n.* [*< protuberate* + -ion.] The act of swelling beyond the surrounding surface.

protuberous (prō-tū'be-rus), *a.* [*< LL. protuberare*, swell out, grow forth (see *protuberare*), + -ous. Cf. *tuberous*.] Protuberant. [Rare.]

The one being protuberous, rough, crusty, and hard; the other round, smooth, spongy, and soft. *J. Smith*, Portrait of (Old Age, p. 188).

Protula (prō-tū'lā), *n.* [*< NL. (Risso)*, prob. *< Gr. πρό*, before, + *τύλος*, a knot or knob.] A genus of cephalobranchiate tubicolous worms of the family *Serpulidae*. *P. dysleri* is an example. Also called *Apomatus*.

Protungulata (prō-tung-gū-lā'tā), *n. pl.* [*< NL.*, *< Gr. πρῶτος*, first, + *NL. Ungulata*, q. v.] A group of Cretaceous hoofed mammals regarded as the probable ancestral stock of all subsequent ungulates.

protureter (prō-tū-rē'tēr), *n.* [*< NL.*, *< Gr. πρῶτος*, first, + *NL. ureter*.] A primitive ureter, or excretory duct of a protonephron.

protutor (prō-tū'tor), *n.* [= *F. protuteur* = *Sp. protutor*, *< ML. protutor*, *< L. pro*, for, + *tutor*, guardian: see *tutor*.] In *Scots law*, one who acts as tutor to a minor without having a regular title to the office.

protyle (prō-ti'lē), *n.* [*< NL.*, *< Gr. πρῶτος*, first, + *τύλος*, matter: see *Hyla*.] An imagined super-sensible, imponderable, indifferent, or primal substance, from which all forms of living matter are supposed to be derived by modification, differentiation, or specialization. *W. Crookes*. Also called variously *biad*, *biogen*, *zoëther*, *psychoplasm*, etc.

proud (prōud), *a.* [*< ME. proud*, *prōud*, *prūd*, earlier *prout*, *prut*, *< AS. prūt*, proud (very rare); cf. deriv. *prūting* (verbal *n.*), pride, *prýte*, pride (*> E. pride*¹); root unknown. The Icel. *prúðr*,

proud, Dan. *prúð*, stately, magnificent, are appar. from the AS.]. 1. Having or cherishing a high opinion of one's own merits; showing great or lofty self-esteem; expecting great deference or consideration; haughty; full of pride. Specifically—(a) Having undue or inordinate pride; arrogant; haughty; supercilious; presumptuous.

Better is it to beate a proude man
Then for to rebuke him;
For he thinks in his own conceyte
He is wyse and very trim.

3. In *Scrip.*, an enigmatical utterance; a mysterious or oracular saying that requires interpretation.

To understand a *proverb*, and the interpretation; the words of the wise, and their dark sayings. *Prov. i. 6.*

4. *pl. [cap.]* One of the books of the Old Testament, following the Book of Psalms. The full title is *Proverbs of Solomon* (I. 1). It is a collection of the sayings of the sages of Israel, taking its full title from the chief among them, though it is by no means certain that he is the author of a majority of them. The original meaning of *maschal*, the Hebrew word translated 'proverb,' seems to be 'a comparison.' The term is sometimes translated 'parable' in our English Bible; but, as such comparisons were commonly made in the East by short and pithy sayings, the word came to be applied to these chiefly, though not exclusively. They formed one of the most characteristic features of Eastern literature.

5. A dramatic composition in which some proverb or popular saying is taken as the foundation of the plot. Good examples are—"A Door must be either Open or Shut," *Alfred de Musset*; "Still Water Runs Deep," *Dion Boucouault*. When such dramas are extemporized, as in private theatricals, the proverb employed is often withheld, to be guessed by the audience after the representation.—*To cap proverbs.* See *capl.* = *Syn. I. Axiom, Maxim, etc. See aphorism.*

proverb (prov'erb), *v.* [*< ME. proverben; < proverb, n.*] I. *trans.* 1. To utter in the form of a proverb; speak of proverbially; make a byword of.

Pg. providencia = It. provvidenza, < L. providentia, < providentia, ppr. of providere, foresee, provide: see provident. Cf. prudence and purveyance.*] 1. Foresight; timely care or preparation.

These Zemes, they beleue to . . . haue the cure and *providence* of the sea, wooddes, and sprynges and fountaynes, assigninge to euery thyng thei peculier goddes.

Peter Martyr (tr. in Eden's First Books on America, ed. [Arber, p. 101].)

Alas, how shall this bloody deed be answer'd?

It will be laid to us, whose *providence*

Should have . . . restrain'd . . .

This mad young man. *Shak., Hamlet, iv. 1. 17.*

2. Frugality; prudence in the management of one's concerns; economy.

My heart shall be my own; my vast expense

Reduced to bounds by timely *providence*.

Dryden, Theodore and Honoria, I. 242.

3. The care and guardianship of God over his creatures; divine supervision. The doctrine of divine providence is the doctrine that God both possesses and exercises absolute power over all the works of his hands; it thus differs from the doctrine of omnipotence, which only attributes to him the power, but does not necessarily imply that he uses it; and it is opposed to the doctrine of naturalism, or that nature is governed wholly by natural laws with which God never interferes.

It is a part of the Divine *Providence* of the World that the Strong shall influence the Weak.

Ascham, The Scholemaster, p. 3.

God, in his ordinary *providence*, maketh use of means, yet is free to work without, above, and against them, at his pleasure.

Westminster Confession of Faith, v.

That to the hight of this great argument

I may assert eternal *Providence*,

And justify the ways of God to men.

Milton, P. L., I. 25.

Hence—4. [*cap.*] God, regarded as exercising forecast, care, and direction for and over his creatures; the divine power and direction.

The world was all before them, where to choose
Their place of rest, and Providence their guide.

Milton, P. L., xii. 647.

Who finds not Providence all good and wise,
Alike in what it gives, and what denies?

Pope, Essay on Man, l. 87.

5. Something due to an act of providential intervention; an act or event in which the care of God is directly exhibited.

A remarkable providence appeared in a case which was tried at the last court of assistants.

Winthrop, Hist. New England, l. 330.

Special providence, the special intervention in or administration of the laws of nature and life by God, for special ends; specifically, a particular act of divine interposition in favor of one or more individuals.

There's a special providence in the fall of a sparrow.

Shak., Hamlet, v. 2. 231.

The little Maid again, *provident* of her domestic destiny, takes with preference to Dolla. Carlyle, Sartor Resartus.

Suppose your savings had to be made, not as now, out of surplus income, but out of wages already insufficient for necessities; and then consider whether to be *provident* would be as easy as you at present find it.

H. Spencer, Social Statics, p. 252.

2. Frugal; economical.—**Provident societies.** Same as *friendly societies*.

While the Briton does not make as a rule those sacrifices for the benefit of all those about him which are made by the poorly-paid Hindoo, who, in a country of low wages in which a poor law is unknown, invariably provides for his old people and keeps them in greater comfort than he keeps himself, Englishmen and colonists alike are remarkable for the extent to which they have carried the system of *provident societies*.

Sir C. W. Dilke, Probs. of Greater Britain, vi. 2.

providential (prov'i-den'shal), *a.* [*< F. providentiel = Sp. Pg. providencial, < L. providentia, foresight; see providence.*] Effected by the providence of God; proceeding from divine direction; referable to divine providence.

This thin, this soft countenance of the air,
Shows the wise author's *providential* care.

Sir R. Blackmore.

I claim for ancient Greece a marked, appropriated, distinctive place in the *providential* order of the world.

Gladstone, Might of Right, p. 107.

prunell (prō-nel'), *n.* [*<F. prunelle, prunella: see prunella⁴.*] A milled cashmere. Compare *prunella⁴.*

prunella¹ (prō-nel'ā), *n.* [*<ML. prunella* (Kilian), a disorder of the throat, *<MHG. briune, G. bräune, sore throat, quinsy, lit. brownness, < brun (> ML. brunus, brown: see brown.*] In *pathol.*: (a) Sore throat. (b) Thrush. (c) Angina pectoris.

prunella² (prō-nel'ā), *n.* [*Also prunello, formerly prunel, prunello (= G. prunelle, formerly braunelle = Dan. prunel); <F. prunelle, brunelle = Sp. brunela, self-heal, = It. prunella, wall-wort, < ML. prunella, the plant self-heal, said to have been named from the disease prunella, which it was reputed to cure: see prunella¹.*] 1. A plant of the genus *Prunella*. Also *brunel*. —2. [*cap.*] [*NL. (Linnaeus, 1737; earlier Brunella, Tournefort, 1700).*] A genus of plants, now known as *Brunella*, belonging to the order *Labiata*, tribe *Stachydeæ*, and subtribe *Scutellariæ*, characterized by a two-lipped calyx with three lobes in the upper and two in the lower lip, anthers with two divaricate cells, and both style and filaments two-toothed at the apex. There are two or three species, widely dispersed throughout temperate regions and on mountains in the tropics. They are perennial herbs, partially erect from a decumbent base, with opposite and entire toothed or pinnatifid leaves, a flattened and truncate ten-nerved calyx, and purplish, blue, red, or white flowers, six in a verticillaster, and crowded in a dense terminal spike with broad rounded bracts between. *P. (Brunella) grandiflora* and other species are cultivated for the beauty of their flowers. *P. (Brunella) vulgaris*, the self-heal, widely distributed over the world (except Africa) and remarkable for the intense violet of its flower-buds, has also the old or provincial names *allheal, brunel, carpenter-grass, herb-carpenter, heart-of-the-earth, hookhead, hookweed, sicklehead, and sicklewort.* (See *heal-all* and *carpenter's-herb*, and cut under *self-heal*.) The decoction of its leaves and stem is still in domestic use for healing wounds, for which it was once in the highest esteem.

prunella³ (prō-nel'ā), *n.* [*NL. prunella, <F. prunelle, the ball of the eye, lit. a plum, < ML. prunellum, a plum (prunellus, plum-tree), dim. of L. prunum, a plum: see prune¹.*] A preparation of purified niter or potassium nitrate molded into cakes or balls. Also called *prunella salt* and *sal prunella*.

prunella⁴ (prō-nel'ā), *n.* [*Also prunello; = G. prunell = Dan. prunel, <F. prunelle, a stuff so called, supposed to be so named from its color, < prunelle, plum: see prunella³.*] A kind of lasting of which clergymen's gowns were once made, now rarely used except for the uppers of women's shoes. Also called *everlasting*.

Worth makes the man, and want of it the fellow;
The rest is all but leather or prunella.

Pope, Essay on Man, iv. 204.

The finest lawn makes common cause with any linen bands—the silken apron shrinks not from poor prunella.
D. Jerrold, Men of Character, John Applejohn, vill.

You know the sort of man—a linen duster for a coat,
prunella shoes, always smiling and hopeful—a great deal about "Brethren."
Harper's Mag., LXXVII. 845.

Prunella⁵ (prō-nel'ā), *n.* [*NL.*] In *ornith.*, a genus of birds: same as *Accentor*. Vieillot, 1816.

prunello¹ (prō-nel'ō), *n.* Same as *prunella¹.*

prunello² (prō-nel'ō), *n.* Same as *prunella².*

prunello³ (prō-nel'ō), *n.* [*<F. prunelle, a plum, = It. prunello, blackthorn: see prunella³.*] A prune of the finest grade, prepared from the green gage and the St. Catherine varieties of plum. The skin and stone are removed.

prune-purple (prōn'pér'pl), *n.* A maroon or dark and rather reddish purple color, like the stain of prunes. A color-disk mixture of artificial ultramarine 7 parts, intense red 8 parts, and black 35 parts gives a prune-purple.

pruner (prō'nér), *n.* [Formerly also *proiner*; *<prune² + -er¹.*] One who prunes, or removes what is superfluous.

His father was
An honest pruner of our country vines.
Machin, Dumb Knight, iii.

prune-tree (prōn'trē), *n.* 1. A plum-tree. Specifically—2. *Prunus occidentalis*, an excellent timber-tree of the West Indies. See *Prunus*.

pruniferous (prō-nif'ér-us), *a.* [*<L. prunum, a plum, + ferre = F. bear¹.*] Bearing plums. E. Phillips, 1706.

pruniform (prō-ni-fōrm), *a.* [*<L. prunum, a plum, + forma, form.*] Having the appearance of a plum; plum-shaped. Thomas, Med. Diet.

pruning (prō'ning), *n.* [Verbal *n.* of *prune², v.*] 1. The act of trimming or lopping off what is superfluous; specifically, the act of cutting off

branches or parts of trees and shrubs with a view to the strengthening of those that remain, or to the bringing of the tree or plant into a desired shape. Root-pruning is also practised with a spade or otherwise in order to control size, promote fruitfulness, or secure a growth of fibrous roots near the stem prior to transplanting. Compare *topping*, 1, and *pollard*, 1. 2. In *falconry*, what is cast off by a bird when it prunes itself; hence, refuse. Beau. and Fl.

pruning-chisel (prō'ning-chiz'el), *n.* A chisel used for pruning trees. It is often made with a concave cutting edge, as a safeguard against slipping.

pruning-hook (prō'ning-hūk), *n.* A knife with a hooked blade, used for pruning trees, vines, etc.

They shall beat their swords into plowshares, and their spears into pruninghooks. Isa. ii. 4.

pruning-knife (prō'ning-nif), *n.* A knife used for pruning; a cutting-tool with a curved blade for pruning; a pruning-hook.

pruning-saw (prō'ning-sā), *n.* A saw similar to a table- or compass-saw, but with larger, thicker, and keener teeth. Some pruning-saws are made with double teeth and the back and cutting edge of the blade nearly parallel, but with the back only half as thick as the tooth-edge.

pruning-shears (prō'ning-shérz), *n. pl.* Shears for pruning shrubs. One form has one of the blades moving on a pivot, which works in an oblong opening instead of a circular one, by which means a draw-cut is produced similar to that of a knife, instead of the crushing cut produced by common shears.

Prunus (prō'nus), *n.* [*NL. (Tournefort, 1700), <L. prunus, plum-tree: see prune¹.*] A genus of rosaceous trees, the type of the tribe *Prunæ*. It is characterized by a five-lobed calyx, five petals, commonly broad, large, and showy, numerous stamens, and a single ovary, becoming in fruit a fleshy drupe with a hard, smooth, or roughened bony stone, containing a single pendulous seed with two thick seed-leaves. There are about 96 species, mainly natives of north temperate regions, also numerous in tropical America, rare in tropical Asia, and elsewhere entirely lacking. They are usually

Wild Yellow or Red Plum (*Prunus Americana*).
1. Branch with flowers. 2. Branch with leaves and fruit.

small trees, sometimes shrubs, bearing alternate undivided leaves, usually finely toothed and folded lengthwise by the midrib (conduplicate) in the bud. The white, pink, or rose-colored flowers are in umbel-like clusters or racemes, or sometimes solitary. Many of the most valuable fruit-trees belong to this genus, including the peach, apricot, cherry, and plum. Many are used as febrifuges or for other medicinal properties. A gum exudes from their bark, especially in the cherry. Nearly all parts contain the elements of prussic acid, rendering the kernels and bark of some species poisonous if eaten freely, particularly the wilted leaves and young branches of some cherries. One fourth of the known species are American, of which 14 are found east and 6 west of the Rocky Mountains. Mexico is the home of a remarkable group of 6 species (section *Empectocladus*, Torrey), extending to Utah and California, with velvety fruit, smooth stone, and solitary or twin flowers appearing with the leaves, somewhat akin to the almond. The section or former genus *Amygdalus* has a downy fruit, rough and wrinkled stone, conduplicate veneration, and flowers preceding the leaves, and includes about 10 species, natives of warmer Europe and Asia, of which the type is *P. Amygdalus (A. communis)*, the almond. (See *almond*, *almond-tree*, *Amygdalus*, and *amygdalin*.) Its variety *amara*, the bitter almond, is the source of a well-known essence. *P. Persica*, the peach, is now placed in this section also. (See *peach*, *nectarine*, *cling-stone*, and *Persica*.) The apricot section, *Armeniaca* (Tournefort, 1700), is similar in its downy drupe and flowers preceding the leaves, but differs in its smooth stone and convolute veneration. It includes *P. Armeniaca*, the apricot; *P. Sibirica*, the Siberian apricot, valued for its earlier and ornamental flowers; *P. dasycarpa*, the black apricot, also Siberian; and *P. Brigiatica* from Briançon in France, known as the *marmottes-oil tree*, from the oil expressed from its kernels and used like olive-oil. The section *Prunus* proper, including the plums of the Old World, has a short calyx, smooth fruit, usually with a bloom, a

flattened stone, and solitary or twin flowers preceding or accompanying the leaves, which are convolute in the bud, as in *P. domestica*, the cultivated plum, and its probable original, *P. spinosa*, the alse or blackthorn. (See *plum*.) The related *P. coccinea* of Calabria is valued in Italy as a remedy for fever. The plums of the New World differ in their conduplicate veneration, fruit with little or no bloom, and in some species very turgid stones, approaching those of the cherry, as in *P. Americana*, the red or yellow plum of the Atlantic States (also called *Canada plum* and *home-plum*); *P. maritima*, the beach-plum; *P. subcordata*, the wild plum of California; and *P. angustifolia (P. Chicasa)*, the Chickasaw plum, or hog-plum. The cherry section, *Cerasus*, known by its smooth fruit without a bloom, conduplicate veneration, and solitary clustered or umbel flowers preceding or accompanying the leaves, includes about 20 species, of which *P. Cerasus* is the parent of the red and many other garden cherries. (See *cherry*.) *Cerasus bigarona*, and *morella*. For *P. avium*, also called *mazzard* and *merry*, see *gean* and *hedgeberry*; also *kirsh-raser*, *marasca*, *maraschino*, and *rafata*. For *P. Mahaleb*, see *Mahaleb*, and cut under *corymb*. For *P. Chamaecerasus*, see *ground-cherry*. Two related species belong to the eastern United States, the dwarf *P. pumila*, or sand-cherry, and *P. Pennsylvanica*, the wild red cherry, pin-cherry, or pigeon-cherry. (See *pin-cherry*.) The section *Padus* contains cherries with racemed flowers following the leaves, and smaller, less edible fruit, as *P. Padus* of Europe, known as *bird-cherry*, and 4 American species, *P. Capuli* and *P. demissa*, the wild cherries, respectively, of Texas and the Rocky Mountains; *P. serotina*, the black cherry, rum-cherry, or cabinet-cherry (see *rum-cherry*); and *P. Virginiana*, the choke-cherry. Another section, *Laurocerasus*, suggests the true laurel in its evergreen leaves, and has racemed flowers with a short obconical calyx, a conduplicate veneration, and a small, smooth, inedible berry-like fruit. It includes about 30 species, both temperate and tropical, mainly American, as *P. occidentalis*, the West Indian laurel or prune-tree; the Californian *P. ticifolia*, the islay, also called *holly-laurel*; and *P. Carolina*, the Carolina cherry-laurel, also known as *wild orange* and *wild peach*. (See *orange* and *peach-brain*.) For the long-cultivated *P. Laurocerasus*, type of this section, also known as *cherry-bay*, *laurel-cherry*, and *dale of Trebizond*, see *cherry-laurel*, also *laurel-water*. The Versailles laurel of gardens is a variety of this. *P. Lusitanica* is the Portugal laurel. A species similarly valued for the beauty of both its leaves and flowers is *P. Pseudocerasus*, the sakura of Japan, also called *Chinese cherry*, used in Japanese wood-engraving.

prurience (prō'ri-ens), *n.* [*<prurien(t) + -ce.*] Same as *pruriency*.

There is a prurience in the speech of some,
Wrath stays him, or else God would strike them dumb.
Couper, Conversation, l. 31

pruriency (prō'ri-en-si), *n.* [*As prurience (see -cy).*] The character or state of being prurient. (a) An itching or longing after something; an eager desire or appetite.

This selfsame vile pruriency for fresh adventure in all things has got . . . strongly into our habits and humours.
Sterne, Tristram Shandy, l. 20.

The bustling insignificance of Maximilian, cursed with an impotent pruriency for renown. Macaulay, Machiavelli. (b) A tendency toward, or a habit of, lascivious thought; sensuality.

Between prudery and pruriency in such matters there is a wide debatable ground, and it is not always easy to draw the line which separates what is permissible from what is not.
The American, XVII. 110.

prurient (prō'ri-ent), *a.* [= *Pg. pruriente, <L. prurient(t)s, ppr. of prurire, itch.*] 1. Itching; having an eager desire or longing for something.

There was always in the generality of mankind a prurient desire and hankering after the knowledge of future events.
Cubertwell, Light of Nature. (Ord MS.)

Love
Should have some rest and pleasure in itself,
Not ever be too curious for a boon,
Too prurient for a proof against the grain
Of him ye say ye love. Tennyson, Merlin and Vivien.

2. Inclined to lascivious thought; of an unclean habit of mind; sensual.

The eye of the vain and prurient is darting from object to object of illicit attraction.
Isaac Taylor.

pruriently (prō'ri-ent-li), *adv.* In a prurient manner; with a longing or lascivious desire.

pruriginous (prō'rij'i-nus), *a.* [= *F. pruriginosus = Sp. Pg. It. pruriginoso, <L. pruriginosus, having the itch, scabby, <prurigo (-gin-), an itching, <prurire, itch: see prurient.*] Affected by prurigo; caused by or of the nature of prurigo.

Their blood becoming pruriginous, and exalted by the salt and corrupt diet, as it often does, produces mange, scabs, and leprosy.

Greenhill, Art of Embalming (1705), p. 164.

prurigo (prō'rij'gō), *n.* [*L., an itching, <prurire, itch: see prurient.*] An itching; specifically, a papular eruption of the skin in which the papules vary in size from a millet-seed to a small pea, are discrete, often in great numbers and close set, irregular in distribution, nearly of the color of the cuticle, and usually intolerably itchy.

pruritus (prō'ri-tus), *n.* [*L., an itching, <prurire, itch: see prurient.*] An itching; more specifically, a functional affection of the skin

characterized by simple itching without structural change.

If there be a *pruritus*, or itch of talking, let it be in matters of religion. *Jer. Taylor, Works* (ed. 1835), I. 740.

Pruritus hiemalis, a form of *pruritus* in which the skin is dry and harsh, with smarting and burning sensations. It occurs chiefly in winter, and affects especially the inner sides of the thighs, the popliteal spaces, and the calves.

prussian (prō-si-ā'no), *n.* [*Sp.*: see *Prussian*.] The western nonpareil, *Passerina versicolor*, a beautiful finch of southwestern parts of the United States and Mexico, related to the nonpareil, lazuli-finch, and indigo-bird, of a Prussian-blue color varied with purplish tints.

Prussian (prush'an), *a.* and *n.* [*< F. Prussien = Sp. Prusiano = Pg. It. Prussiano, < ML. *Prussianus, < ML. Prussia, Prusia, Prucia, Prutia, Borussia, Brussia, etc., G. Preussen, etc., Prussia. Cf. pruce, spruce.*] *I. a.* Of or pertaining to Prussia—(a) a former duchy near the southeastern angle of the Baltic, which, after its union with the Mark of Brandenburg, formed the nucleus of the Prussian monarchy; or, (b) a kingdom of northern Germany, now the chief state in the reconstituted German empire.—*Native Prussian blue.* Same as *blue ocher* (which see, under *ocher*).—*Prussian asparagus.* See *asparagus*.—*Prussian binding,* a kind of twilled binding having a silk face and a cotton back.—*Prussian blue, brown, carp, green, etc.* See the nouns.

II. n. 1. A native or inhabitant of Prussia.—2. A language belonging to the Lettish division of the Slavo-Lettic branch of the Aryan family, and usually called *Old Prussian*. It was spoken in the region between the lower Vistula and the Niemen; it became extinct in the sixteenth or seventeenth century, being replaced largely by German.

Prussianize (prush'an-iz), *v. t.*; pret. and pp. *Prussianized*, ppr. *Prussianizing*. [*< Prussian + -ize.*] To render Prussian in character, institutions, laws, etc.

The first step taken by the Emperor Paul after his accession to the throne was to march his little *Prussianized* army from Gatchina to St. Petersburg.

Westminster Rev., CXXVIII. 580.

prussiate (prus'i-āt), *n.* [*< prussic + -iate.*] A common name for the ferrocyanides and ferricyanides: thus, potassium ferrocyanide is commonly called yellow prussiate of potash, potassium ferricyanide red prussiate of potash, etc.—*Prussiate cake,* in the manufacture of Prussian blue, the solid cake produced by calcining potassium carbonate, iron-borings, filings, or clippings, and animal matter, such as dried blood, horn, leather-clippings, etc. This cake, when broken up, is leached, and the liquor concentrated to crystallization. The crystals are purified by re-crystallization.

prussic (prus'ik), *a.* [*< Prussian* (with ref. to *Prussian blue*) + *-ic.*] In *chem.*, related to Prussian blue, which was the first cyanogen compound isolated.—*Prussic acid,* the common name of *hydrocyanic acid*. See *hydrocyanic*.

prussine (prus'in), *n.* [*< prussic + -ine.*] Cyanogen.

prut, *a.* A Middle English form of *proud*.
prut (prut), *interj.* [*ME. prut, ptrot, ptrupt*, also *trut*, < *OF. trut*, an exclamation of contempt or indignation. *Cf. trut, tut.*] An exclamation of contempt or indignation.

And setteth hym ryzt at the leftte,
And seyth *prut* for thy cursyng prest.
MS. Hart. 1701, f. 20. (*Halliw.*)

Prutenic (prō-ten'ik), *a.* [*< ML. Prutenus, Prutinus, Pruzenus, etc., a Prussian: see Prussian.*] Prussian: noting certain planetary tables by Erasmus Reinhold in 1551, and so called by the author in allusion to the liberality of his patron, Albert, Duke of Prussia. They were the first application of the Copernican system.

I trust anon, by the help of an infallible guide, to perfect such *Prutenic* tables as shall mend the astronomy of our wide expositors.
Milton, Divorce, l. 1. (*Davies.*)

prutent, *v. i.* [*< prut*, obs. form of *proud*.] To be proud; hold up the head in pride or disdain.
Halliw. [*Prov. Eng.*]

pry (pri), *v.*; pret. and pp. *pried*, ppr. *prying*. [*< ME. pryen, prien, peep, peer; supposed to be a transposed form of piren, peer: see peer.*] Transposition of this kind (of *r* in second syllable before a vowel to the first syllable before the first vowel) is peculiar; transposition as in *bird* is in the other direction.] *I. intrans.* To look closely or with scrutinizing curiosity; hence, to search curiously or impertinently into any matter; peer; peep.

So ferde another clerk with astronomy;
He walked in the feedles, for to pry
Upon the sterres, what ther sholde bifalle,
Til he was in a marle put yfalle;
He saugh nat that. *Chaucer, Miller's Tale*, l. 272.

O eye of eyes,
Why pry'st thou through my window? leave thy peeping.
Shak., Lucrece, l. 1089.

Woe to the vassal who durst pry
Into Lord Marmion's privacy!
Scott, Marmion, III. 15.

II. trans. To observe; note.

Pandarus, that gan ful faste pry
That al was wel. *Chaucer, Troilus*, II. 1710.

pry (pri), *n.*; pl. *pries* (priz). [*< pry¹, v.*] 1. A peeping glance; peering; curious or narrow inspection. [*Rare.*]

From the sun and from the show'r
Haste we to yon boxen bow'r,
Secluded from the teasing pry
Of Argus' curiosity. *C. Smart, A Noon-piece.*

They seldom meet the eye
Of the little loves that fly
Round about with eager pry.
Keats, To —

2. One who pries; a prier; an inquisitive, intrusive person (with allusion to Paul Pry, a fictitious name which, in its turn, was evidently suggested by this sense of the word).

We in our silence could hear and smile at the busy
cackle of the "Prys" outside the door.
Harper's Mag., LXXVIII. 82.

pry (pri), *n.*; pl. *pries* (priz). [*Appar. for prize³, taken erroneously as a plural: see prize³.*] A large lever employed to raise or move heavy substances; a prize.

A dosen strong wooden poles served us as *pries* over
many a lake and river bar of sand, gravel, and mud.
Science, III. 226.

pry (pri), *v. t.*; pret. and pp. *pried*, ppr. *prying*. [*< pry², n.*] To raise or move by means of a pry; prize; bring into a desired position or condition by means of a pry: as, to pry a box open.

prytaneum (prit-a-nē'um), *n.*; pl. *prytanea* (-ā). [*L., < Gr. πρυτανειον, the meeting-place or official house of the prytanes, < πρύτανις, a presiding magistrate: see prytanis.*] A public hall in ancient Greek states and cities, housing and typifying the common ritual or official hearth of the community. That of Athens is especially famous. In it the city extended hospitality both to her honored citizens and to strangers. The prytanes, or presidents of the senate, were entertained in it at the public charge, together with those who, on account of personal or ancestral services, were entitled to this honor.

prytanis (prit'a-nis), *n.*; pl. *prytanes* (-nēz). [*L., < Gr. πρύτανις, dial. πρύτανις, a chief lord, prince, ruler, a presiding magistrate, president (see def.); prob. < πρύ, before.*] In ancient Greece: (a) A chief magistrate or priest in several states, as Rhodes, Lycia, and Miletus. (b) A member, during the term of presidency of his section, of one of the ten sections of fifty each into which the Senate of Five Hundred was divided at Athens. These sections constituted standing committees, every one of which, in rotation, represented the full senate in minor matters, and had charge of routine business. See the quotations.

The *prytanes* were by turns presidents, had the custody of the seal, and the keys of the treasury and citadel, for one day.
J. Adams, Works, IV. 480.

The principal functions of the state itself grew out of the care which was bestowed on the tribal fire. The men who attended it in Hellas were called the *Prytanes*.
Encyc. Brit., IX. 229.

prytanize (prit'a-niz), *v. t.*; pret. and pp. *prytanized*, ppr. *prytanizing*. [*< prytan-y + -ize.*]

In *Gr. antiq.*, to exercise the prytany: said of a state or tribe, or of an individual legislator.

The order of the ten tribes in line of battle, beginning from the right wing, was conformable to their order in prytanizing, as drawn by lot for the year.

Grote, Hist. Greece, IV. 800.

prytany (prit'a-ni), *n.* [*< Gr. πρυτανεία, a presidency, the term of office or authority of a prytanis, < πρύτανις, a presiding magistrate: see prytanis.*] In ancient Greece, a presidency or direction; the office or dignity of a prytanis; especially, in ancient Athens, the period during which the presidency of the senate belonged to the prytanes of one section.

If Schömann's older view is correct, the presiding officer in the Senate and the Assembly must always belong to the tribe which holds the prytany at the time.

Trans. Amer. Philol. Ass., XVI. 169.

prythet. An obsolete spelling of *prithet*.

P. S. An abbreviation (a) of *postscript*; (b) (*theat.*) of *prompt-side*.

psallenda (sa-len'dā), *n.*; pl. *psallendæ* (-dē). [*L., fem. sing. gerund. of psallere, play on a stringed instrument, LL. sing the Psalms: see psalm.*] In the Ambrosian office, one of two proper antiphons sung at lauds and vespers on Sundays and certain saints' days.

psaloid (sal'oid), *a.* [*< NL. psalloides, irreg. < Gr. ψάλλειν, play on a stringed instrument, + εἶδος, form.*] Lyric form; like the lyra, or corpus psalloides, of the brain.

psalm (sām), *n.* [*< ME. psalme, psalme, salm; partly (a) < AS. sealm = D. psalm = MLG. salme = OHG. psalmo, salmo, salm, MHG. psalme, psalm, salme, salm, G. psalm = Sw. psalm = Dan. psalm; partly (b) < OF. psalme, F. psalme = Fr. psalm, psalme, salme = Sp. It. salmo = Pg. salmo, psalmo; < LL. psalmus = Goth. psalma, psalmō, < Gr. ψάλλω, a song sung to the harp, a song, psalm, the sound of the cithara or harp, a pulling or twitching with the fingers (cf. ψάλλα, a tune played on a cithara or harp, > LL. psalma, a psalm), < ψάλλειν, touch, twitch, play on a stringed instrument (> L. psallere, play on a stringed instrument, LL. sing the Psalms). Cf. psalter, psalttery.] 1. A sacred poem or song, especially one in which expressions of praise and thanksgiving are prominent: usually restricted either to those contained in the Book of Psalms, or to the versifications of these composed for the use of churches, as the *Psalms of Tate and Brady*, of Watts, etc.*

"This Dragon of Dissalt, that thou derfth hath fourmet:"
So sethe in the sauter the *Salme* to the end.

Destruction of Troy (E. E. T. S.), I. 4496.

Euen the name *Psalmes* will speake for mee, which, being interpreted, is nothing but songes.

Sir P. Sidney, Apol. for Poetrie.

They do no more adhere and keep place together than the Hundredth *Psalm* to the tune of "Green Sleeves."

Shak., M. W. of W., II. 1. 63.

The great organ . . . rolling thro' the court
A long melodious thunder to the sound
Of solemn *psalms*, and silver litanies.

Tennyson, Princess, II.

2. *pl. [cap.]* A book of the Old Testament which follows Job and precedes Proverbs, and contains 150 psalms and hymns; more fully, the Book of Psalms. The authorship of a large number of the psalms is ascribed traditionally to David. Many of them, however, are supposed to date from the time of the exile or later.

3. *pl.* Among the ancient Jews, the Hagiographa: so called because the Psalms constitute the first book in it. Luke xxiv. 44.—*Abecedarian, gradual, penitential, etc., psalms.* See the adjectives.—*Psalms of commendation.* See *commendation*, 5.—*Psalms of degrees.* Same as *gradual psalms* (see *gradual*).

psalm (sām), *v.* [*ME. *psalmen, salmen; < psalm, n.*] *I. t. intrans.* To sing psalms.

II. trans. To celebrate in psalms; hymn.

That we her Subjects, whom He blesteth by her,
Psalming His praise, may sound the same the higher.
Sylvester, tr. of Du Bartas's Weeks, II. The Handy-Crafts.

psalm-book (sām'būk), *n.* [*< ME. *salmbook, salmboc, < AS. sealmbōc (= D. psalmboek = MLG. salmbōk = G. psalmbuch = Sw. psalmbok = Dan. psalmebog), < sealm, psalm, + boc, book: see psalm and book.*] 1. A collection of metrical translations of the Psalms prepared for liturgical use; a Psalter.—2. Any collection of sacred poems or songs for liturgical use, with or without music.

psalmist (sā'm'ist or sal'm'ist), *n.* [= *F. psalmiste = Pr. psalmista, salmista = Sp. It. salmista, < LL. psalmista, < LGr. ψαλμίστης, a composer or singer of psalms, < Gr. ψάλλω, a psalm: see psalm.*] 1. A writer or composer of psalms; especially, one of the authors of the psalms in the Bible; specifically, David.

David, . . . the anointed of the God of Jacob, and the sweet psalmist of Israel. 2 Sam. xxiii. 1.

She tun'd to pious notes the psalmist's lyre.
J. Hughes, Divine Poetry.

psalmistry (sǎ'mis-tri or sǎ'mis-tri), *n.* [*< psalmist + -ry.*] The art, act, or practice of singing psalms; psalmody.

He who, from such a kind of psalmistry, or any other verbal devotion, . . . can be persuaded of a zeal and true righteousness in the person, hath much yet to learn.
Milton, Works, I. 408. (Jodrell.)

psalm-melodicon (sǎ'm-me-lod'i-kon), *n.* A musical instrument of the wood wind group, having several finger-holes and keys and a compass of four octaves, and so constructed that from four to six tones could be produced at once. It was invented by S. Weinrich in 1828, and improved by L. Schmidt in 1832. Also called *apollolyra*.

psalmodic (sǎl-mōd'ik), *a.* [*< psalmod-y + -ic.*] Belonging or relating to psalmody.

That glorious body of psalmodic literature or hymnology which constitutes the Book of Psalms.
J. A. Alexander, On the Psalms, II. 294.

psalmodical (sǎl-mōd'ik-al), *a.* [*< psalmodic + -al.*] Same as *psalmodic*.

If Queen Elizabeth patronized cathedral musick exclusively, she did not interdict psalmodical.
W. Mason, Church Music, p. 170.

psalmody (sǎl'mō-dist or sǎ'mō-dist), *n.* [*< psalmod-y + -ist.*] One who composes or sings psalms or sacred songs.

It will be thought as fit for our lips and hearts as for our ears to turn psalmodies.
Hammond, On the Psalms, Pref. (Latham.)

Prophet in some parts of the Scripture seems to imply little more than a mere poet, or psalmist, who sung extempore verses to the sound of an instrument.
Dr. Burney, Hist. Music, I. 230.

psalmodize (sǎl'mō-diz or sǎ'mō-diz), *v. i.*; pret. and pp. *psalmodized*, ppr. *psalmodizing*. [*< psalmod-y + -ize.*] To practise psalmody.

In short, the bird perform'd his part
In all the psalmodizing art.
J. G. Cooper, Ver-Vert, II.

psalmody (sǎl'mō-di or sǎ'mō-di), *n.* [*< ME. psalmody, < OF. (and F.) psalmodie = Pr. psalmodia = Sp. psalmodia = It. psalmodia = Pg. psalmodia, < ML. psalmodia, < Gr. ψαλμωδία, a singing to the harp, < (MGr.) ψαλμωδῆν, sing to the harp, < ψαλμός, a song (see psalm), + αἰδεῖν, ᾄδειν, sing: see ode.*] 1. The art, act, or practice of singing psalms or hymns as a part of worship.

As touching that is laide to our charge in psalmodies and songs, wherewith our slaunderers do fray the simple, I haue thus to say.
Foxe, Martyrs, p. 1921, an. 1588.

Calvin, who had certainly less music in his soul than the other (Luther), rejected both vocal and instrumental harmony, and admitted only unisonous psalmody.
W. Mason, Church Music, III.

He was also an expert in psalmody, having in his youth been the pride of the village singing-school.
H. B. Stowe, Oldtown, p. 34.

2. Psalms collectively, especially in the form of metrical versions prepared for liturgical use.

psalmody (sǎl'mō-di or sǎ'mō-di), *v. t.*; pret. and pp. *psalmodied*, ppr. *psalmodying*. [*< psalmody, n.*] To hymn; celebrate in psalms.

It is an event which can be looked on; which may still be execrated, still be celebrated and psalmodied; but which it were better now to begin understanding.
Carlyle, Misc., iv. 119. (Davies.)

psalmograph (sǎl'mō-gráf), *n.* [*< LL. psalmographus, < Gr. ψαλμογράφος, a psalm-writer, < ψαλμός, a psalm, + γράφειν, write.*] Same as *psalmographer*.

That great King-Prophet, Poet, Conqueror,
Sweet Psalmographer.
Sylvester, tr. of Du Bartas's Triumph of Faith, III. 10.

This, the most sweet and sacred psalmograph.
Middleton, World Tost at Tennis.

psalmographer (sǎl-mog'ra-fēr), *n.* [*< psalmograph + -er.*] A writer of psalms or sacred songs.

Therefore our Psalmographer, ver. 15 [Ps. cxviii.], having shewed that "the voice of rejoicing and salvation is in the tabernacles of the righteous," he adds, "The right hand of the Lord hath done valiantly."

Rev. T. Adams, Works, I. 119.

psalmographist (sǎl-mog'ra-fist), *n.* [*< psalmograph + -ist.*] Same as *psalmographer*.

psalmography (sǎl-mog'ra-fī), *n.* [*< Gr. ψαλμός, song, + γραφία, < γράφειν, write.*] Cf. *psalmograph*. The art or practice of writing psalms or sacred songs.

psalm-singer (sǎm'sing'ēr), *n.* One who sings psalms; especially, one who holds that the congregational singing of psalms is a necessary part of all church worship.

psalm-singing (sǎm'sing'ing), *n.* The act or practice of singing psalms or similar sacred poems as a part of church worship.

psalm-tone (sǎm'tōn), *n.* In medieval music, a melody or tone to which a portion of the Psalter was habitually sung.

psaloid (sǎ'lōid), *a.* [*< Gr. ψαλῖς, an arch, vault, + εἶδος, form.*] Resembling an arch. Thomas, Med. Dict.

psalter (sǎl'tēr), *n.* [*< ME. psauter, psautere, psauter, psautre, < OF. psautier, psautier, F. psautier = Pr. psalteri, salteri, psauteri = Sp. salterio = Pg. psalterio = It. salterio, salterio, < L. psalterium, a song sung to the psalter, LL. the psalms of David, < Gr. ψαλτήριον, a psalter, LGr. the Psalter, Book of Psalms: see psaltery.*] 1. [cap.] The Book of Psalms, considered as a separate book of the Old Testament: usually restricted to those versions of or compends from it which are arranged especially for the services of the church, such as the version of the Psalms in the Book of Common Prayer. The translation of the Psalter in the Book of Common Prayer is not that of the authorized version, but that of the earlier version of Cranmer's Bible.

The prophete his payn eet in penance and wepyng;
As the psauter vs seith, so dude moni othere.
Piers Plowman (A), viii. 107.

As David seythe in the Psautere, Quoniam persequebatur unus mille, & duo fugarent decem milia.
Mandeville, Travels, p. 261.

2. In liturgies, that portion of the Psalms appointed for a given day or service.
And [let] each brother of common condition [sing] two psalters of psalms, one for the living and one for the dead.
Quoted in English Guilds (E. E. T. S.), Int., p. xviii.
3. In the Rom. Cath. Ch.: (a) A series of devout utterances or aspirations, 150 in number, in honor of certain mysteries, as the sufferings of Christ.
Every brother and sister shal payen, of ye common catel, a peny to a psauter for ye dedes soule.
English Guilds (E. E. T. S.), p. 26.
(b) A large chaplet or rosary, consisting of 150 beads, corresponding to the number of the Psalms.

psalterial (sǎl-tēr'i-al), *a.* [*< psalterium + -al.*] In zool., of or pertaining to the psalterium: as, the psalterial aperture of the reticulum; the psalterial laminae.

psalterian (sǎl-tēr'i-an), *a.* [*< psalter + -an.*] Pertaining to a psalter; resembling the music of a psalter; musical.

Then once again the charmed God began
An oath, and through the serpent's ears it ran
Warm, tremulous, devout, psalterian.
Keats, Lamia, I.

psalterion (sǎl-tēr'i-on), *n.*; pl. *psalteria* (-i). [*< Gr. ψαλτήριον: see psalterium.*] Same as *psaltery*, 1.

He was driven, for revenge and his own defence, to answer with great and stout words, saying that indeed he had no skill to tune a harp, nor a viol, nor to play on a psalterion.
North, tr. of Plutarch, p. 96.

psalterium (sǎl-tēr'i-um), *n.*; pl. *psalteria* (-i). [*< see psalter, psaltery.*] 1. Same as *psalter*.—2. Same as *psaltery*, 1.

The psalterium was a kind of lyre of an oblong square shape; . . . it was played with a rather large plectrum.
South Kensington Art Handbook, No. v., p. 35.

3. In zool., the third division of the stomach of a typical ruminant, between the reticulum or honeycomb and the abomasum; the omasum: also called *manyplies*, from the numerous folds of mucous membrane which nearly fill the interior. It is reduced to a mere tube, without folds, in the less typical ruminants, as the *Traguidæ*. See cut under *ruminant*.

When this portion of the stomach is slit open longitudinally, the lamellæ fall apart like the leaves of a book, whence it has received the fanciful name of the *Psalterium* from anatomists, while butchers give it that of *Manyplies*.
Huxley, Anat. Vert., p. 323.

4. In anat.: (a) The lyra of the fornix. (b) The pectunculus.

psaltery (sǎl'tēr-i), *n.*; pl. *psalteries* (-iz). [*< ME. psalterie, psautrie, < OF. psalterie, < L. psalterium, psaltery, also a psalter, < Gr. ψαλτήριον, a stringed instrument, a psaltery,*

also the Psalms of David, the Psalter, < ψάλλειν, touch, twitch, play on a stringed instrument: see psalm.] 1. A musical instrument of the zither group, having several or many strings variously tuned, which are sounded by the finger with or without the aid of a plectrum. Its use has been extensive, beginning in Biblical times, and continuing to the seventeenth century. It is similar to the dulcimer, except that its tone is produced by twirling or picking instead of by striking. It differs from the harp proper in having a sound-board behind and parallel with the strings. In some cases two or three strings tuned in unison were provided for a single tone.

And all above ther lay a gay sautrie,
On which he made a nyghts melodye,
So swetely that all the chambre rong.
Chaucer, Miller's Tale, I. 27.

Praise the Lord with harp; sing to him with the psaltery, and an instrument of ten strings. Ps. xxxiii. 2.

Deep rob'd in white, he made the Levites stand
With cymbals, harps, and psalteries in their hand.
Parnell, Gift of Poetry.

2. Same as *psalter*.
She knew all the Psalter by heart, ay, and a great part of the Testament besides.
Lamb, Dream-Children. (Davies.)

psaltress (sǎl'tres), *n.* [*< Gr. *ψαλτρίς, equiv. to ψάλτης, a harper (< ψάλλειν, play on a stringed instrument), + -ess.*] A woman who plays upon the psaltery.

Earth is a wintry clod;
But spring-wind, like a dancing psaltress, passes
Over its breast to waken it.
Browning, Paracelsus.

Psaltia (sǎl'tri-ā), *n.* [NL. (Temminck, 1832), < L. psaltia, < Gr. ψάλτριά, fem. of ψάλτης, a harper: see psaltress, Psaltiriparus.] A genus of *Paridæ*, the type of which is *P. exilis*, a very small Javan titmouse: extended to various American species. See *Psaltiriparus*.

Psaltiriparus (sǎl'trip'ā-rus), *n.* [NL. (Bonaparte, 1851), < Gr. ψάλτριά, fem. of *ψάλτις, a harper, + L. parus, a titmouse.] An American genus of *Paridæ*, containing several species of diminutive tits, with long tails, building very large pensile nests and laying pure-white eggs: the bush-tits. *P. melanotis*, *P. minimus*, and *P. plumbeus* are three species found in western parts of the United States, respectively known as the black-eared, least, and plumbeous bush-tit. See cut under *bush-tit*.

Psammæ (sam'ā), *n.* [NL. (P. de Beauvois, 1812), < Gr. ψάμμος, sand.] A former genus of grasses: same as *Ammophila*, 1.

Psamminae (sa-mi'nē), *n. pl.* [NL., < Gr. ψάμμος, sand, + -inae.] A subfamily of *Spongillidæ*, without flesh-spicules, the skeleton consisting of foreign bodies cemented by indistinct spongin.

psammismus (sa-mis'mus), *n.* [NL., < Gr. ψάμμος, sand. Cf. Gr. ψαμμισμός, a burying in the sand.] In *pathol.*, the passage of gravel in the urine.

psammite (sam'it), *n.* [*< F. psammite, < Gr. ψαμμίτης, of sand, sandy, < ψάμμος, sand.*] Sandstone; gritstone. [Little used by American geologists.]

psammitic (sa-mit'ik), *a.* [*< psammite + -ic.*] In *geol.*, having a structure like that of sandstone made up of rounded grains of sand. If the grains are sharp, the structure is called *gritty*, and the rock a *grit* or *gritstone*.

psammocarcinoma (sam-ō-kār-si-nō'mā), *n.* [NL., < Gr. ψάμμος, sand, + NL. carcinoma.] A carcinoma with a calcareous deposit.

psammoma (sa-mō'mā), *n.* [NL., < Gr. ψάμμος, sand, + -oma.] A tumor containing abundant calcareous deposit, usually growing from the membranes of the brain, and most frequently a myxoma or fibroma.

Psammomemata (sam-ō-nē'mā-tā), *n. pl.* [NL., < Gr. ψάμμος, sand, + μέμα (vnuar-), thread.] A group of horny or fibrous sponges, having sand or other foreign substance in the axis of the spongiar. The common bath-sponge is an example.

Psammophidæ (sa-mof'i-dē), *n. pl.* [NL., < *Psammophis* + -idæ.] A family of harmless colubrine *Ophidia*, typified by the genus *Psammophis*, now reduced to a subfamily of *Colubridæ*; the sand-snakes. In Günther's classification it contained four genera, represented chiefly by African and Indian species. Also *Psammophidæ*.

Psammophinæ (sam-ō-fi'nē), *n. pl.* [NL., < *Psammophis* + -inæ.] A subfamily of *Colubridæ*, represented by three genera, *Psammophis*, *Psammodynastes*, and *Mimophis*; the sand-snakes or desert-snakes. They have the head distinct, the body moderately slender, not compressed, the middle teeth elongated, and the posterior ones grooved. The species are all tropical. Also *Psammophidæ*. E. D. Cope.

Psammophis (sam'ō-fis), *n.* [NL. (Wagler), < Gr. ψάμμος, sand, + ὄφης, a serpent.] The typi-

Psaltery of the 12th century.

cal genus of *Psammophidae*, having a loreal plate and divided anal gastrostegae. There are numerous African and Asiatic species, as *P. condanarus*, frequenting sandy places.

Psaris (sā'ris), *n.* [NL. (Cuvier, 1817), < Gr. ψάρ, a starling.] A genus of tityrine birds, now called *Tityra*.

Psarocolius (sar-ō-kō'li-us), *n.* [NL., < Gr. ψάρ, speckled, + κόλιος, a woodpecker.] A very extensive genus of *Icteridae*, under which Wagler in 1829 included a number of dissimilar generic types: inexactly synonymous with *Cacicus* and *Icterus* in a broad sense.

Psaronius (sā-rō-ni-us), *n.* [NL., < L. psaronius, < Gr. ψάρονος, an unidentified precious stone, < ψάρ, speckled, < ψάρ, a starling.] In fossil bot., a genus of petrified tree-ferns. They have been found chiefly in the Permian, but also in the coal-measures. Portions of these petrified trunks have been cut and polished for ornamental purposes, and called by the name of *marstein* in German, and *star-* or *starry-stone* in English.

psauteri, *n.* A Middle English form of *psalter*.

psautriet, *n.* A Middle English form of *psalter*.

pschem, *n.* Same as *pschem*.

pschent (pschént), *n.* [Egypt.] In *archæol.*, the sovereign crown of all Egypt, composed of the tall pointed miter, or white crown, of southern

Pschent.—From reliefs of the temple-court of Edfu, Egypt.

Egypt, combined with the red crown, square in front and rising to a point behind, of northern Egypt. The two kingdoms were united by Menes, who founded the greatness of the Egyptian monarchy and restrained the power of the priests, at the dawn of recorded history.

Pselaphi (sel'a-fī), *n. pl.* [NL., pl. of *Pselaphus*, *q. v.*] In Latreille's classification, the third family of trimerous *Coleoptera*, containing *Pselaphus* and *Claviger* as leading genera. It corresponds to the modern family *Pselaphidae*, but was differently located in the system.

pseudelaphid (sel'a-fid), *a. and n.* I. *a.* Of or pertaining to the *Pselaphidae*.

II. *n.* Any beetle of this family.

Pselaphidæ (sē-laf'i-dē), *n. pl.* [NL. (Leach, 1817), < *Pselaphus* + *-idæ*.] An anomalous family of *Coleoptera*, typified by the genus *Pselaphus*. They have been variously located in the *Palpicornia* or *Clavigerina*, and are now classed with the latter suborder. The tarsi are trimerous, the dorsal abdominal segments are entirely corneous, and the abdomen is fixed, unappendaged, and of five or six segments. They are very small brownish beetles, more or less pubescent, found in most countries in moss and ants' nests and under stones. The family is rich in genera and species; of the former, 29 are represented in the United States.

pseudelaphotheca (sel'a-fō-thē'kē), *n.; pl. pseudelaphothecæ* (-sē). [NL., < Gr. ψηλαφάν, feel about, + θήκη, a box, chest.] In *entom.*, one of the two conical processes on the anterior extremity of many butterfly pupæ, in which the palpi are developed.

Pselaphus (sel'a-fus), *n.* [NL. (Herbst, 1792), < Gr. ψηλαφάν, feel or grope about.] The typical genus of *Pselaphidae*, having the tarsi single-clawed, and the maxillary palpi extremely long, the last joint club-shaped. It is wide-spread, but the species are not numerous, less than 30 being described. Only two, *P. erichsoni* and *P. lonniclavus*, are found in North America north of Mexico.

Pselaphus erichsoni. (Cross shows natural size.)

psellism (sel'izm), *n.* [NL. *psellismus*, < Gr. ψελλισμός, a stammering, < ψελλισ, stammer, pronounce indistinctly, < ψελλός, faltering in speech, stammering.] A defect in enunciation; misenunciation. Psellism may consist in lisping, stammering, burring, hesitation, etc. It also designates defective enunciation due to a hare-lip or defect of lip.

psellismus (se-lis'mus), *n.* [NL.] Same as *psellism*.

Psephenidæ (sē-fen'i-dē), *n. pl.* [NL., < *Psephenus* + *-idæ*.] A family of coleopterous insects, named by Le Conte in 1861 from the genus *Psephenus*: now merged in *Parnidæ*.

Psephenus (sē-fē'nus), *n.* [NL. (Haldeman, 1853), < Gr. ψεφνός, dark, obscure.] The typical genus of *Psephenidæ*. Two species only are known, both of the United States.

psophism (sē'fiz'm), *n.* [NL. *psophisma*, < Gr. ψόφισμα, an ordinance of a deliberative assembly, < ψόφειν, count, reckon with pebbles or counters, < ψήφος, also ψήφ, a pebble, a smooth stone, < ψάειν, rub.] In *Gr. antiq.*, a public vote of an assembly, specifically of the Athenian people; a decree or statute enacted by such a vote.

psophomancy (sē'fō-man-si), *n.* [NL. *ψόφος*, a pebble, + *μαντεία*, divination.] Divination by means of pebbles drawn from a heap. *Roget*.

Psephurus (sē-fū'rus), *n.* [NL. (Günther, 1873), < Gr. ψήφος, pebble, + οὐρά, tail.] A genus of polyodont fishes, having six upper

Psephenus lecontei. (Cross shows natural size.)

Psephurus gladius.

caudal fulcra enormously developed. *P. gladius* is a Chinese fresh-water species, with a long snout extending far beyond the mouth. It attains a length of 18 feet.

Psetta (set'ā), *n.* [NL. (Swainson, 1839), < L. *psetta*, < Gr. ψήττα, a flatfish.] A genus of *Pleuronectidæ*, characterized by the broad and nearly scaleless tuberculated body, whose colored side is brown with dark blotches. *P. maxima* is the famous turbot, next in size to the halibut among the flatfishes.

Psettidae (set'i-dē), *n. pl.* [NL., < *Psetta* + *-idæ*.] A family of acanthopterygian fishes, typified by the genus *Psetta* (or *Monodactylus*). The body is much compressed and elevated, the vertical fins are covered with scales, the dorsal has seven or eight spines and the anal three, and the ventrals are rudimentary. The few species are inhabitants of the Pacific and African coasts. See cut under *Psetta*.

Psettinae (se-ti'nē), *n. pl.* [NL., < *Psetta* + *-inæ*.] A subfamily of *Pleuronectidæ*, typified by the genus *Psetta*. They have a nearly symmetrical and generally large mouth, and the ventral fins unsymmetrical, that of the eyed side having an extended base on the ridge of the abdomen, while the other is narrower and lateral. The eyes are on the left side. It includes the turbot, brill, whiff, topknot, scaldfish, and many other flatfishes.

psettine (set'in), *a. and n.* I. *a.* Of or pertaining to the *Psettinae*.

II. *n.* Any member of the group *Psettinae*.

Psettus (set'us), *n.* [NL. (Cuvier and Valenciennes, 1831), < Gr. ψήττα, a flatfish, a plaice, sole, or turbot.] A genus of carangoid fishes, typical of the family *Psettidae*. *P. argenteus* is an Indo-Pacific species, about 10 inches long. *P. sebae* is West African.

pseud-. See *pseudo-*.

pseudaconitine (sū-da-kon'i-tin), *n.* Same as *pseudaconitine*.

pseudacusis (sū-dā-kū'sis), *n.* [NL., < Gr. ψευδής, false, + ακούσις, a hearing.] False hearing.

pseudæsthesia (sū-des-thē'si-ā), *n.* [NL., < Gr. ψευδής, false, + αἴσθησις, feeling; see *æsthesia*.] Imaginary or false feeling; imaginary sense of touch in organs that have been removed, as when pain is felt as if in the fingers or toes of an amputated limb. Also spelled *pseudæsthesia*.

Pseudalopex (sū-da-lō'peks), *n.* [NL. (Burmeister, 1856), < Gr. ψευδής, false, + ἄλπη, a fox.] A genus or subgenus of South American *Canidae*, related to *Lycalopex*, but further resembling foxes in having the pupil of the eye elliptical when contracted, as in *P. azaræ*, *P. magellanicus*, etc.

pseudambulacral (sū-dam-bū-lā'krāl), *a.* Simulating ambulacra or ambulacral areas, as certain spaces observed in blastoid crinoids.

pseudaphia (sū-dā'fi-ā), *n.* [NL., < Gr. ψευδής, false, + ἀφή, a touch; see *paraphia*.] Paraphia.

pseudapostle (sū-dā-pos'tl), *n.* [NL. *pseudapostolus*, < LGr. ψευδαπόστολος, a false apostle, < ψευδής, false, + ἀπόστολος, apostle; see *apostle*.] A false or pretended apostle. Also *pseudopostle*.

For these Philipian *pseudapostles*, two ways were they enemies to the cross of Christ: in their doctrines, in their practice. *Ep. Hall*, Sermon on Phil. iii. 18, 19.

Pseudarachnæ (sū-dā-rak'nē), *n. pl.* [NL., < Gr. ψευδής, false, + ἀράχνη, a spider; see *Arachnida*.] A group of arthropod animals composed by Haeckel to contain the sea-spiders, or *Pycnogonida*, and the water-bears, or *Arctiscia*. In Gegenbaur's system the *Pseudarachnæ* are one of two prime divisions of *Arachnida*, the other being *Autarachnæ*. Also called *Pseudarachna*. See cuts under *Arctiscia* and *Pycnogonida*.

pseudarthrosis (sū-dār-thrō'sis), *n.* A condition in which, after fracture, there is failure of bony union, and there remains an actual joint or a fibrous union with slight movement.

Pseudastacus (sū-das'tā-kus), *n.* [NL., < Gr. ψευδής, false, + αστακός, a lobster, crawfish; see *Astacus*.] A genus of fossil decapod crustaceans, from the Solenhofen slates of Bavaria, containing such species as *P. pustulosus*. Also *Pseudoastacus*.

Pseudecheneis (sū-dek-e-nē'is), *n.* [NL. (Blyth, 1860), < Gr. ψευδής, false, + NL. *Echeneis*.] A genus of Asiatic catfishes of the family *Siluridae*: so called from the adhesive apparatus or sucking-disk formed by plaits of skin between the pectorals, enabling the fish to cling to stones in the mountain streams which it inhabits.

pseudelephant (sū-del'ē-fant), *n.* A mastodon. *Coues*.

pseudelmint (sū-del'minth), *n.* [NL. *ψευδής*, false, + ἔλμινθ (ἐλμινθ), a worm; see *helminth*.] A supposed entoparasitic worm which proves to be something else. Also *pseudhelminth*.

Sometimes the *pseudelmint* are really so worm-like that a mere naked-eye examination is insufficient to determine their nature.

T. S. Cobbold, Tapeworms (1866), p. 9.

pseudelytrum, **pseudelytron** (sū-del'i-trum, -tron), *n.; pl. pseudelytra* (-trā). A false elytrum; a spurious or degenerate wing-cover or fore wing, as the small twisted process of a styllops. See *Strepsiptera* and *Stylopidae*.

pseudembryo (sū-dem'bri-ō), *n.* [NL. *ψευδής*, false, + ἔμβρυον, embryo.] A false embryo: applied to various larval forms after the egg stage. (a) The echinopodium of a sea-urchin. *Wyville Thomson*. (b) The bipinnaria or brachiolaria of a starfish. (c) The swarm-gemmule of a sponge, or so-called sponge-embryo. *W. S. Kent*.

pseudembryonic (sū-dem'bri-on'ik), *a.* [NL. *pseudembryo* + *-ic*.] Pertaining to a pseudembryo, or having its character; echinopædic.

Pseudemydæ (sū-dem'i-dē), *n. pl.* [NL., < *Pseudemys* (-emyd-) + *-æ*.] A family of cryptodirous tortoises, named from the genus *Pseudemys*, now merged in the family *Clemmydidae* or *Testudinidae*. *J. E. Gray*.

Pseudemys (sū-de-mis), *n.* [NL. (J. E. Gray, 1856), < Gr. ψευδής, false, + NL. *Emys*.] A genus of tortoises of the family *Emydidæ*, sometimes giving name to the *Pseudemydæ*. It contains chiefly North American turtles, among them *P. rugosa* or *rubricincta* (the potted, slider, or red-bellied terrapin), *P. concinna*, *P. mobiliensis*, etc.

pseudencephalus (sū-dē-nēf'ā-lus), *n.; pl. pseudencephali* (-li). [NL., < Gr. ψευδής, false, + ἐγκέφαλος, the brain.] In *teratol.*, a monster in which the brain is replaced by a vascular tumor derived from the pia mater.

pseudepigrapha (sū-de-pig'ra-fā), *n. pl.* [NL., < Gr. ψευδεπίγραφα, neut. pl. of ψευδεπίγραφος, falsely inscribed, or ascribed; see *pseudepigraphous*.]

Spurious writings; specifically, those writings which profess to be Biblical in character and inspired in authorship, but are not adjudged genuine by the general consent of scholars; those professedly Biblical books which are regarded as neither canonical nor inspired, and from their character are not worthy of use in religious worship. Biblical literature is divided into three classes: (a) The canonical and inspired; (b) the non-canonical and uninspired, but on account of their character worthy of use in the services of the church; (c) those which, though Biblical in form, so vary from the Biblical writings in spirit that they are not deemed worthy of any place in religious use. The second constitute the apocrypha, the third the pseudepigrapha. Thus, what is sometimes known as the New Testament Apocrypha, being not considered worthy of regard by any branch of the Christian church, properly consists of pseudepigrapha.

pseudepigraphic (sū-dēp-i-graf'ik), *a.* [*< pseudepigraph-ous + -ic.*] Incribed with a false name: specifically, pertaining to the Jewish pseudepigrapha.

Of these *pseudepigraphic* Hermetic writings some have come down to us in the original Greek.

Encyc. Brit., XI. 751.

pseudepigraphical (sū-dēp-i-graf'ik-al), *a.* [*< pseudepigraphic + -al.*] Same as *pseudepigraphic*.

Pseudepigraphical writings, which ought not only to be rejected but condemned. *Encyc. Brit.*, V. 12.

pseudepigraphous (sū-dēp-i-graf'us), *a.* [*< Gr. ψευδεπίγραφος*, falsely inscribed or ascribed, not genuine, *< ψεύδω*, false, + *ἐπιγράφειν*, inscribe: see *epigraph*.] Same as *pseudepigraphic*.

Herodotus . . . seemed . . . to conclude the Orphic poems to have been *pseudepigraphous*.

Cudworth, Intellectual System, p. 293.

pseudepigraphy (sū-dēp-i-graf'ī), *n.* [*< pseudepigraph-ous + -y.* Cf. *epigraphy*.] The false ascription of a particular authorship to works.

pseudepiloic (sū-dēp-i-plō'ik), *a.* [*< pseudopiloön + -ic.*] Of or pertaining to the pseudopiloön.

pseudepiloön (sū-dēp-i-plō-on), *n.* A kind of omentum found in birds.

The *pseudepiloön* [of the flamingo] was also shown to differ from that of *Lamellirostris*, and to agree with that of storks, in extending back to the cloaca.

Athenæum, No. 2931, p. 870.

pseudepiscopacy (sū-dēp-i-sōp'ā-si), *n.* False or pretended episcopacy. Also *pseudepiscopos*, *pseudo-episcopacy*. [Rare.]

A long usurpation and convicted *pseudepiscopacy* of prelates.

Milton, On Def. of Humb. Remonst., Pref.

pseudesthesia, *n.* See *pseudesthesia*.

pseudhæmal (sūd-hē-mal), *a.* Same as *pseudohæmal*.

pseudhelminth, *n.* Same as *pseudelminth*.

pseudimaginal (sū-di-maj'i-nal), *a.* Pertaining to or having the character of a pseudimago; subimaginal.

pseudimago (sū-di-mā'gō), *n.*; pl. *pseudimagines* (sū-di-maj'i-nēz). A false imago: same as *subimago*.

Pseudis (sū'dis), *n.* [NL. (Wagler, about 1830), *< Gr. ψεύδω*, var. of *ψεύδω*, false: see *pseudo*.] A genus of arciferous batrachians of the family *Cystignathidae*, containing frogs the webs of whose hind toes extend up between the metatarsals, and whose tadpoles acquire legs and reach the size of the adults before losing their tails. The jakie, *P. paradoxa*, is an example, inhabiting South America.

pseudisodomon (sū-di-sod'ō-mon), *n.* [*< Gr. ψευδοισόμομος*, built of stones of unequal size, *< ψεύδω*, false, + *ισόμομος*, built alike, i. e. in equal courses: see *isodomon*.] In arch., a type of masonry in which the courses differ as to the height, length, or thickness of their stones, the stones of any one course, however, being alike: opposed to *isodomon*. In the form characteristic of Greek masonry, in which, however, the pseudisodomon is usually earlier or (especially) later than the best time, the courses are alternately thick and thin, all the thick courses being of the same thickness and so with all the thin courses. Masonry of this kind is frequent in Roman work.

Pseudisodomon.

pseudo- [Before a vowel sometimes *pseud-*; *< Gr. ψευδο-*, combining form of *ψεύδω*, false, sham, deceitful, *ψεύδος*, a falsehood—or rather of the orig. verb, *ψεύδω*, lie, cheat, deceive.] An element, a quasi-prefix, in compounds of Greek origin, meaning 'false', 'counterfeit', 'spurious', 'sham.' It is freely used as an English

prefix, with words of any origin, and by no means all the compounds made with it are given below. In scientific compounds it implies something deceptive in appearance, function, or relation. Thus, in crystallography, it is used in such compounds as *pseudo-isometric*, *pseudo-tetragonal*, etc., to describe crystals which appear to belong to the isometric, tetragonal, etc., systems, but in fact belong to a system of lower grade of symmetry. (See *pseudosymmetry*.) In biology it is much used (like *quasi-*) to indicate deceptive likeness of things really quite unlike; but it frequently implies a real resemblance so close as to obscure or hide actual difference.

pseudo-aconitine (sū'dō-a-kon'i-tin), *n.* A crystalline alkaloid (C₃₆H₄₉NO₁₂) derived from *Aconitum ferrox*. Also *pseudaconitine*.

pseudo-angle (sū'dō-ang'gl), *n.* An angle in non-Euclidean geometry.

pseudo-annulus (sū'dō-an'ū-lus), *n.* In *Musci*, an apparent annulus or ring of non-vesicular cells.

pseudo-apostle (sū'dō-ā-pos'l), *n.* Same as *pseudapostle*.

pseudo-aquatic (sū'dō-ā-kwat'ik), *a.* Growing in very moist places, yet not strictly aquatic.

pseudo-archaic (sū'dō-ār-kā'ik), *a.* Same as *archaistic*: used especially in the fine arts.

It is possibly a *pseudo-archaic* work of the fifteenth century.

C. C. Perkins, Italian Sculpture, p. 344, note.

pseudo-articulation (sū'dō-ār-tik-ū-lā'shon), *n.* In *entom.*: (a) A deep impressed line or constriction surrounding a part, and resembling a true joint. (b) A pseudo-joint, or part resembling a true joint, but not really jointed.

pseudo-ascetic (sū'dō-a-set'ik), *n.* A pretended ascetic.

These may be termed a set of *pseudo-ascetics*, who can have no real converse either with themselves or with heaven.

Shaftesbury, Advice to an Author, l. 1.

pseudo-axis (sū'dō-ak'sis), *n.* In *bot.*, same as *sympodium*.

pseudobacterium (sū'dō-bak-tē-ri-um), *n.*; pl. *pseudobacteria* (-jē). A corpuscle resembling or mistaken for a bacterium.

It was simply *pseudo-bacteria*, or broken blood corpuscles.

Science, III. 739.

pseudobasidia (sū'dō-bā-sid'i-ā), *n.* pl. In *bot.*, false basidia: bodies with the form and appearance of basidia and produced with them. See *basidium*.

pseudo-Bible (sū-dō-bī-bl), *n.* A false or pretended Bible.

The work which the reader has now the privilege of perusing is as justly entitled to the name of the Koran as the so-called *pseudo-bible* itself, because the word signifies "that which ought to be read."

Southey, The Doctor, Interchapter ix. (*Davies*.)

pseudoblepsia (sū'dō-blep'si-ā), *n.* [NL.: see *pseudoblepsis*.] Same as *pseudoblepsis*.

pseudoblepsis (sū'dō-blep'sis), *n.* [*< Gr. ψευδής*, false, + *βλέψω*, vision, *< βλέπω*, look, see.] Parablepsia; visual illusion or hallucination.

Pseudobombus (sū'dō-bom'bus), *n.* [NL.: *< Gr. ψεύδω*, false, + NL. *Bombus*: see *Bombus*, 2.] In *entom.*: (a) An alternative generic name of bees of the genus *Apathus*, which closely resemble the species of *Bombus* proper and live parasitically in their nests. (b) [*i. c.*] A bee of this genus.

Pseudobombyces (sū'dō-bom-bi'sēz), *n.* pl. [NL.: *< Gr. ψεύδω*, false, + *βόμβυξ*, a silkworm: see *Bombyx*.] In Latreille's classification, a division of nocturnal *Lepidoptera*, approximately corresponding to the modern families *Arctiidae*, *Lithosiidae*, and *Psychidae*. Also *Pseudobombycini*.

pseudobombycine (sū'dō-bom-bi-sin), *a.* Pertaining to the *Pseudobombyces*.

Pseudobombycini (sū'dō-bom-bi-si-ni), *n.* pl. [NL.: as *Pseudobombyces* + *-ini*.] Same as *Pseudobombyces*. *Boisduval*.

pseudobranchial (sū'dō-brā'ki-āl), *a.* Pertaining to the pseudobranchium.

pseudobranchium (sū'dō-brā'ki-um), *n.*; pl. *pseudobranchia* (-jē). A kind of false arm formed by the actinotons of the pectoral fin of pediculate fishes. *Gill*.

pseudobranch (sū'dō-brang'k), *n.* A false or spiracular gill. *Stand. Nat. Hist.*, III. 43.

pseudobranchia¹ (sū'dō-brang'ki-ā), *n.*; pl. *pseudobranchiæ* (-ē). [*< Gr. ψεύδω*, false, + *βράγχια*, gills.] A false gill. See the quotation.

The anterior branchial vein [in fishes] gives off the hyoidian artery, which ascends along the hyoidian arch, and very generally terminates by one branch in the cephalic circle, and by another enters a rete mirabile which lies in the inner side of the hyomandibular bone, and sometimes has the form of a gill. This is the *pseudobranchia*.

Huxley, Anat. Vert., p. 140.

Pseudobranchia² (sū'dō-brang'ki-ā), *n.* pl. [NL.: see *pseudobranchia*¹.] A suborder of

scutibranchiate gastropods, with the gills developed as a branching vessel on the inner surface of the mantle, the body and shell spiral, the lateral central teeth of the odontophore large and irregular, and no operculum. The group was instituted by J. E. Gray for terrestrial forms belonging to the family *Proserpinidae*.

pseudobranchial (sū'dō-brang'ki-āl), *a.* [*< pseudobranchia*¹ + *-al*.] Of or pertaining to a pseudobranch or to pseudobranchiae.

pseudobranchiate (sū'dō-brang'ki-āt), *a.* [*< pseudobranchia*¹ + *-ate*¹.] Provided with pseudobranchiae.

pseudobrookite (sū'dō-brūk'it), *n.* A mineral occurring in minute rectangular tables in cavities in some volcanic rocks, as andesite. It resembles brookite, and is related to it in composition, consisting of the oxides of titanium and iron.

pseudobulb (sū'dō-bulb), *n.* A fleshy enlargement of the base of the stem in many epiphytic orchids, having the appearance of a bulb, but solid in structure: nearly allied to the corm, but not subterranean.

pseudobulbar (sū'dō-bul'bār), *a.* Noting a kind of paralysis. See *pseudobulbar paralysis*, under *paralysis*.

pseudobulbil (sū'dō-bul'bil), *n.* In *bot.*, an epiphytic outgrowth sometimes replacing ordinary sporangia in ferns, and producing antheridia and archegonia.

pseudobulbous (sū'dō-bul'bus), *a.* Having the character of, or marked by the presence of, a pseudobulb.

pseudocarcinoid (sū'dō-kār'si-noid), *a.* and *n.* I. *a.* Being macrurous and simulating a brachyurous crustacean; looking like a crab without being one.

II. *n.* A pseudocarcinoid crustacean, as a member of the genus *Thenus* or *Ibacus*. *Huxley*. **pseudocarp** (sū'dō-kārp), *n.* [*< NL. pseudocarpus*, *< Gr. ψεύδω*, false, + *καρπός*, fruit.] That part of an anthocarpous fruit which does not belong to the pericarp. Also called *anthocarp* or *anthocarpium*. See *anthocarpus*.

pseudocarpous (sū'dō-kār'pus), *a.* [*< NL. pseudocarpus*: see *pseudocarp*.] In *bot.*, same as *anthocarpous*.

pseudo-Christ (sū'dō-krist), *n.* [*< LL. pseudo-christus*, *< Gr. ψευδοχριστός*, a false Christ, *< ψεύδω*, false, + *Χριστός*, Christ.] One who falsely claims to be the Christ.

Be on your guard against the seductions of the *pseudo-Christ*.

Lange, Com. on Mark xiii. 5-13 (trans.).

pseudo-Christianity (sū'dō-kris-ti-an'j-ti), *n.* The religion or doctrines of a false or pretended Christ; counterfeit Christianity.

Pseudo-Christa, *pseudo-Christianities*, false prophets.

Lange, Com. on Mark xiii. 5-13 (trans.).

pseudo-Christology (sū'dō-kris-tol'ō-jī), *n.* An erroneous doctrine or system of doctrines regarding the nature of Christ.

The latter [modern evangelical theology] has vindicated . . . the true divinity and historicity of Christ against the mythical, legendary, and humanitarian *pseudo-Christologies* of the nineteenth century.

P. Schaaf, Christ and Christianity, p. 172.

pseudochromia (sū'dō-kro'ni-ā), *n.* [NL.: *< Gr. ψεύδω*, false, + *χρῶμα*, color.] False perception of color.

Pseudochromidae (sū'dō-krom'i-dē), *n.* pl. [NL.] Same as *Pseudochromididae*. *J. Richardson*, 1856.

Pseudochromides (sū'dō-krom'i-dēz), *n.* pl. [NL., pl. of *Pseudochromis*, q. v.] A group of acanthopterygian trachinoid fishes, having the dorsal fin continuous and the lateral line interrupted, typified by the genus *Pseudochromis*, and corresponding to the family *Pseudochromididae*. In Günther's classification it was the fourth group of *Trachinidae*. *Müller and Troschel*, 1849.

Pseudochromididae (sū'dō-kro-mid'i-dē), *n.* pl. [NL.: *< Pseudochromis* (mid-) + *-idae*.] A family of acanthopterygian fishes, typified by the genus *Pseudochromis*. The body is oblong, the lateral line interrupted, the head convex forward, and the pharyngeal lines distinct. The species are mostly inhabitants of the Indo-Pacific ocean. They have a superficial resemblance to pomacentrids, but the distinct lower pharyngeals distinguish them. Also *Pseudochromidae*, *Pseudochromides*, and *Pseudochromididae*. See *Plenionidae*, and cut under *Plestops*.

pseudochromidoid (sū'dō-krom'i-doid), *a.* and *n.* I. *a.* Of or pertaining to the *Pseudochromididae*.

II. *n.* A member of the *Pseudochromididae*.

Pseudochromidoidei (sū-dō-krom-i-doi'dē-i), *n. pl.* [NL.] Same as *Pseudochromididae*. *Bleeker*, 1859.

Pseudochromis (sū-dōk-rō-mis), *n.* [NL. (Rüppell, 1837), < Gr. *ψευδής*, false, + *χρῶμα*, a kind of sea-fish.] The typical genus of the family *Pseudochromidae*.

pseudochrysalis (sū-dō-kris'ā-lis), *n.* Same as *pseudopupa*.

pseudo-citizen (sū-dō-sit'i-zn), *n.* One who falsely lays claim to the right of citizenship.

Some indeed hold that he who is unjustly a citizen is a *pseudocitizen*, a mere counterfeit.

Gillies, tr. of Aristotle, II. 195. (*Jodrell*.)

pseudo-classicism (sū-dō-klas'i-sizm), *n.* A false or affected classicism.

An increasing number of persons were perverse enough to feel [a difficulty in reading] . . . the productions of a *pseudo-classicism*, the classicism of red heels and periwigs. *Lowell*, Study Windows, p. 391.

pseudocæle (sū-dō-sēl), *n.* [*< Gr. ψευδής*, false, + *καὶ*, hollow.] In *zool.*, a certain cavity of some invertebrates: better called *pseudocœlom*.

The adult body cavity comes entirely from *pseudocœla*. *Adam Sedgwick*, Micros. Science, XXVII. 491.

pseudocœlic (sū-dō-sē'lik), *a.* Of or pertaining to the pseudocœle.

This statement applies also to the heart and pericardium. These are both *pseudocœlia*.

Adam Sedgwick, Micros. Science, XXVII. 491.

pseudocœlom (sū-dō-sē'lom), *n.* [*< Gr. ψευδής*, false, + *κοίλωμα*, a hollow, cavity: see *cœloma*.] Same as *pseudocœle*.

pseudocolumella (sū-dō-kol-ū-mel'g), *n.*; pl. *pseudocolumellæ* (-ē). In corals, a kind of false columella formed by the twisting together of the inner ends of septa; a parietal or septal columella.

The more prominent septa extend to the centre of the corallite, and then either unite evenly by their free inner margins or curve round each other to a slight extent, thus forming a structure to which the name of *pseudocolumella* has been given.

Quart. Jour. Geol. Soc., XLIV. 210.

pseudocolumellar (sū-dō-kol-ū-mel'ār), *a.* Pertaining to a pseudocolumella.

pseudocommissura (sū-dō-kom-i-gū'rā), *n.*; pl. *pseudocommissuræ* (-rē). Same as *pseudocommissure*. *Wilder and Gage*, Anat. Tech., p. 420.

pseudocommissural (sū-dō-kō-mis'ū-rā), *a.* Of or pertaining to a pseudocommissure: as, *pseudocommissural* fibers.

pseudocommissure (sū-dō-kom'i-gūr), *n.* A sort of commissure, formed of connective tissue, between the olfactory lobes of some batrachians, as the frog. Also *pseudocommissura*.

pseudoconcha (sū-dō-kōng'kā), *n.*; pl. *pseudoconchæ* (-kē). [NL., < Gr. *ψευδής*, false, + *κόγχη*, a shell: see *conch*.] An alinalas turbinated structure in the nose of birds, in front of and below the turbinal proper, connected with the internal nasal septum, and separating the vestibule of the nose from the internal nasal cavity. *Gegenbaur*, Comp. Anat. (trans.), p. 547.

pseudocorneous (sū-dō-kōr'nē-us), *a.* Partly or somewhat horny, as the mass of agglutinated hairs of the deciduous horns of the American antelope, which form the base of the horn-sheath and gradually change into true horn toward the tip of those organs.

pseudocortex (sū-dō-kōr'teks), *n.* [NL., < Gr. *ψευδής*, false, + *L. cortex*, bark.] In *bot.*, an agglomeration of secondary branches in the *Flo-ridæ*, originating at the nodes, and closely adpressed to the main or axial branch of a frond, forming a false cortex.

pseudocosta (sū-dō-kos'tā), *n.*; pl. *pseudocostæ* (-tē). [*< Gr. ψευδής*, false, + *L. costa*, rib.] One of the flattened or rounded interspaces which stand out in slight relief between the septa of some corals. *Quart. Jour. Geol. Soc.*, XLIV. 213.

pseudocostate (sū-dō-kos'tāt), *a.* [*< Gr. ψευδής*, false, + *L. costa*, rib: see *costa*, *costate*.] 1. In *bot.*, false-ribbed: said of leaves in which the true veins are confluent into a marginal or intramarginal rib or vein, as in many *Myrtaceæ*. — 2. In *zool.*, having pseudocostæ, as a coral.

pseudocotyledon (sū-dō-kot-i-lē'don), *n.* In *bot.*, one of the germinating threads of the spores of cryptogams. The name was formerly so employed on the supposition that these threads were in a measure analogous to the cotyledons of phanerogams, but is not now in use.

pseudocrisis (sū-dō-kri'sis), *n.*; pl. *pseudocrises* (-ēs). In *pathol.*, a sudden remission of temperature, resembling a crisis, but followed immediately by a return to the previous fever, as may occur in croupous pneumonia.

pseudo-critic (sū-dō-krit'ik), *n.* A pretended or would-be critic.

The greatest hurt those poetsasters and *pseudo-criticks* did him was pretending to fix things on him of which he was not author. *Ayre*, Pope (ed. 1754), I. 247. (*Jodrell*.)

pseudo-croup (sū-dō-krōp), *n.* False croup; laryngismus stridulus.

pseudocyclosis (sū-dō-si-klō'sis), *n.* The apparent circulation of food in an amœba, superficially resembling cyclosis. *Wallich*.

pseudocyesis (sū-dō-si-ē'sis), *n.* Spurious pregnancy.

pseudocyst (sū-dō-sist), *n.* [*< Gr. ψευδής*, false, + *κύστις*, a bladder: see *cyst*.] In *bot.*, one of many more or less imperfectly spherical bodies produced by the breaking up of the protoplasm of the filaments in certain of the *Protophyta*.

pseudodeltidium (sū-dō-del-tid'i-um), *n.*; pl. *pseudodeltidia* (-ā). In *Brachiopoda*, a false deltidium, such as occurs in a spirifer.

pseudodipteral (sū-dō-dip'tē-rā), *a.* [*< L. pseudodipteros*, < Gr. *ψευδοδιπτερος*, < *ψευδής*, false, + *διπτερος*, two-winged: see *dipteral*.] In *classical arch.*, noting a disposition in the plan of a columnar structure resembling that of a dipteral building in the wide space left between the peristyle and the cella, but with the inner row of columns omitted, or a disposition of plan like that of the Parthenon, in which there is an inner portico of six columns within the peristyle before both pronaos and opisthodomos, but no such secondary range on the flanks.

pseudodipterally (sū-dō-dip'tē-rā-lī), *adv.* In a pseudodipteral manner or style. *Encyc. Brit.*, II. 471.

pseudodistance (sū-dō-dis'tans), *n.* The distance in non-Euclidean geometry.

pseudodont (sū-dō-dont), *a.* [*< Gr. ψευδής*, false, + *ὀδὸν* (odont) = *E. tooth*.] Having false teeth, as a monotreme.

pseudodox (sū-dō-doks), *a.* and *n.* [*< Gr. ψευδός*, holding a false opinion, < *ψευδής*, false, + *δόξα*, a notion, an opinion, < *δοκεῖν*, think. Cf. *orthodox*.] I. *a.* False; not true in opinion. [Rare.]

II. *n.* A false but common opinion.

Mad. He's a rare fellow, without question! but He holds some paradoxes.

Alm. Ay, and *pseudodoxes*.

B. Jonson, Staple of News, III. 1. The Romists stick not, as once the Valentinian heretics veritatis ignorantiam cognitionem vocare, by a paradox, *pseudodox*, to call the ignorance of the truth the true knowledge thereof. *Rev. T. Adams*, Works, I. 412.

The counterpart of false and absurd paradox is what is called the vulgar error, the *pseudodox*.

De Morgan, Budget of Paradoxes, p. 23.

pseudodoxal (sū-dō-dok-sāl), *a.* [*< pseudodox* + *-al*.] Of the nature of a pseudodox or false opinion; falsely believed; untrue or mistaken in opinion. [Rare.]

Orosia is much degenerated from what she was by the Gheronian sectaries, who have infected the inhabitants with so many *pseudodoxal* and glingling opinions.

Howell, Fable of Beasts, p. 122. (*Davies*.)

pseudo-episcopacy (sū-dō-ē-pis'kō-pā-si), *n.* Same as *pseudepiscopacy*.

pseudofilaria (sū-dō-fī-lā-ri-ā), *n.*; pl. *pseudofilariæ* (-ē). [NL., < Gr. *ψευδής*, false, + *L. filum*, thread: see *filar*.] A stage in the development of a gregarina, supervening upon the finishing of the early embryonic condition of a pseudonavicella, and passing into the condition of the adult. See *pseudonavicella*. *E. Van Beneden*.

pseudofilarian (sū-dō-fī-lā-ri-ān), *a.* and *n.* [*< pseudofilaria* + *-an*.] I. *a.* Pertaining to a pseudofilaria, or having its character. II. *n.* A pseudofilaria.

pseudofoliaceous (sū-dō-fō-li-ā'shius), *a.* [*< Gr. ψευδής*, false, + *L. foliaceus*, leafy: see *foliaceus*.] In *bot.*, provided with lobes or expansions resembling leaves: said of a thallus or stem.

Pseudo-foliaceous forms, in which the thallus is lobed, the lobes assuming leaf-like forms.

Underwood, Bull. of Ill. State Laboratory, II. 6.

pseudogalena (sū-dō-gā-lē-nā), *n.* False galena. See *black-jack*, 3, and *blende*.

pseudogastrula (sū-dō-gas'trō-lā), *n.* A false gastrula; that embryonic stage or state in which an organism resembles a gastrula without having undergone a proper gastrulation. *Jour. Micros. Sci.*, XXVIII. 348.

pseudogeneral (sū-dō-jen'ē-rāl), *a.* Noting a kind of paralysis. See *pseudogeneral paralysis*, under *paralysis*. The *pseudo*-here really qualifies not *general*, but *general paralysis*.

pseudogeneric (sū-dō-jē-ner'ik), *a.* Spurious or merely nominal as a genus; of the character of a pseudogenus: as, a *pseudogeneric* form; *pseudogeneric* names.

pseudogenus (sū-dō-jē'nus), *n.*; pl. *pseudogenera* (-jen'ē-rā). [NL., < Gr. *ψευδής*, false, + *L. genus*, birth: see *genus*.] 1. In *bot.*, a form-genus; a genus based upon apparent species which are really only stages in the life-cycle of species of other genera. Many of the so-called genera of fungi, bacteria, etc., are *pseudo*- or *form*-genera. See *form-genus*, and compare *form-species*. — 2. In *zool.*, a spurious genus. Pseudogenera, or pseudogeneric names, may be due to (a) the imagination, as when hypothetical or supposititious ancestral forms, of which nothing is actually known, are named as genera (see several cases among words beginning in *Pro*, *Proto*); (b) defect or error of observation, particularly of microscopic objects liable to look different when differently manipulated; (c) defective or mutilated specimens accurately described but mistaken for normal examples of their kind; (d) natural monstrosities not recognized as such; (e) normal stages of growth or development of any organism mistaken for a different organism. Many pseudogenera of class (e) have been named among animals which undergo marked or peculiar transformations from the embryo to the adult, not understood by the observer at the time, as many coelenterates, echinoderms, crustaceans, etc., and even some vertebrates, as fishes and batrachians. Pseudogenera in the above senses are all foreign to the question of what degree of difference shall be accounted generic, and also of any question of priority or other nomenclatural rule. Those of class (a) have such standing as one may choose to allow them. Those of class (b) can have no standing. In classes (c) and (d) pseudogeneric names may hold if they can be identified and properly recharacterized (and are not obnoxious to any rule of nomenclature). The large class (e) of cases based upon literally "larval" or masked forms of organisms whose adults are already named generically has no claim to recognition among New Latin genera properly so called. But many such pseudogeneric words are conveniently retained in a modified sense as English names of the objects which they designate. See, for examples, *Bipinnaria*, *Brachiolaria*, *Cysticercus*, *Leptocephalus*, *Megalops*, *Nauplius*, *Phyllosoma*, *Zoea*.

pseudogenusia (sū-dō-gū-si-ā), *n.* [NL., < Gr. *ψευδής*, false, + *γεῖναι*, sense of taste, < *γεῖσθαι*, taste: see *gust*.] False taste-perception.

pseudogenusia (sū-dō-gū-si-ā), *n.* [NL., < Gr. *ψευδής*, false, + *γεῖσθαι*, verbal adj. of *γεῖσθαι*, taste.] Same as *pseudogenusia*.

pseudograph (sū-dō-grāf), *n.* A false writing. See *pseudography*.

pseudographeme (sū-dō-grā-fēm), *n.* [*< Gr. ψευδογράφημα*, that which is untrue drawn, < *ψευδής*, false, + *γράφειν*, write.] A fallacy imitating an apodictic syllogism.

pseudographize (sū-dō-grā-fiz), *v. i.*; pret. and pp. *pseudographized*, ppr. *pseudographizing*. [*< pseudograph-y* + *-ize*.] To write wrongly; present a word, etc., in an incorrect form by writing, printing, or any other method of graphic representation. [Rare.]

If we account this error typographical, there must have been a widespread conspiracy among old printers to *pseudographize*.

F. Hall, Mod. Eng., p. 159.

pseudography (sū-dō-grā-fī), *n.* [*< Gr. ψευδογραφία*, a false drawing of a line, < *ψευδογράφειν*, draw falsely, < *ψευδής*, false, + *γράφειν*, write.] An incorrect system or method of graphic representation; bad spelling.

"Gh" is only a piece of ill writing with us, . . . for the g sounds just nothing in "trough," "cough," "might," "night," &c. Only the writer was at leisure to add a superfluous Letter, as there are too many in our *pseudography*.

I do not intend to pursue the many *pseudographies* in use, . . . but to shew of how great concern the emphasis were, if rightly used. *Holder*, Elements of Speech, p. 104.

Pseudogryphus (sū-dō-grī-fus), *n.* [NL. (Ridgway, 1874), < Gr. *ψευδής*, false, + *L. gryphus*, a griffin: see *Gryphæa*.] A genus of *Cathartidæ*, or American vultures, of which the California condor, *P. californianus*, is the only species, having no caruncles on the head, and the plumage of the under parts of peculiar texture. See cut under *condor*.

pseudogyne (sū-dō-jīn), *n.* [*< Gr. ψευδής*, false, + *γυνή*, female.] One of the agamic or asexual females of plant-lice and some other insects which reproduce without union with the male. With the *Aphididæ*, cotton of males and true females results in the winter egg, from which hatches a pseudogyne, which gives birth to a number of generations of pseudogynes. Lichtenstein and others use the term especially for a member of the first-winged or migrant generation of plant-lice, as distinguished from one of the pupiferous or return migrant generation.

A gall-making aphid, the foundress *pseudogyne*. *Nature*, XXX. 69.

pseudogynous (sū-dō-jī-nus), *a.* [*< pseudogyne* + *-ous*.] Pertaining to a pseudogyne, or having its character.

pseudogyrate (sū-dō-jī-rāt), *a.* [*< Gr. ψευδής*, false, + *L. gyratus*, pp., turned round: see *gy-*

rate.] In bot., falsely ringed, as when an elastic ring is confined to the vertex of the spore-cases of ferns. *Treasury of Botany*.

pseudo-heart (sū-dō-hārt'), *n.* In brachiopods, one of several tubular infundibuliform organs by which the perivisceral cavity communicates with the pallial chamber, and which were described by Owen as hearts. See cut under *Waldheimia*.

It is probable that these pseudo-hearts subserve the function both of renal organs and of genital ducts; and that they are the homologues of the organs of Bojanus of other mollusks, and of the segmental organs of worms.

Huxley, *Anat. Invert.*, p. 400.

pseudohemal (sū-dō-hē'mal), *a.* [*Gr. ψευδής, false, + αἷμα, blood; see hemal.*] Like or analogous to blood without being blood; noting various fluids which circulate in the bodies of some invertebrates, especially annelids, and the structures which provide for the circulation of such fluids; water-vascular; chylaqueous; aquiferous. Also *pseudohæmal*.

In the Arthropoda no segmental organs or *pseudohæmal* vessels are known. Huxley, *Anat. Invert.*, p. 57.

pseudohermaphrodite (sū-dō-hēr-maf'rō-dit'), *a.* Apparently hermaphrodite, though sexed; affected by pseudohermaphroditism.

pseudohermaphroditism (sū-dō-hēr-maf'rō-dit-tizm), *n.* False hermaphroditism; an appearance of hermaphroditism resulting from a monstrous conformation of the external genitals in sexed individuals. The usual conditions are extensive hypospadias of the male organs, or hypertrophy of the clitoris of the female.

pseudohexagonal (sū-dō-hek-sag'ō-nal), *a.* In crystal., falsely hexagonal; appearing to be hexagonal, though not really so. Twins of orthorhombic aragonite resembling hexagonal crystals are said to be *pseudohexagonal*; some of the micas are *pseudohexagonal*, because they approximate to the hexagonal system closely in angle.

pseudohypertrophic (sū-dō-hi-pēr-trof'ik), *a.* Pertaining to or of the nature of pseudohypertrophy.—**Pseudohypertrophic paralysis.** See *paralysis*.

pseudohypertrophy (sū-dō-hi-pēr-trō'fī), *n.* The enlargement of an organ without increase of its proper tissue, as when in muscular pseudohypertrophy there is increase of fat and connective tissue while the muscle-fibers are atrophied.—**Muscular pseudohypertrophy.** Same as *pseudohypertrophic paralysis*.

pseudo-Isidorian Decretals. See *False Decretals*, under *decretal*.

pseudolabial (sū-dō-lā'bi-al), *a.* [*Gr. ψευδής, false, + labium, lip.*] Of or pertaining to the pseudolabium of a myriapod.

pseudolabium (sū-dō-lā'bi-um), *n.* [*Gr. ψευδής, false, + labium, lip.*] In chilopodous *Myriapoda*, the sternite of the subbasilar plate, being the part called *labium* by Newport; usually a large plate, with a median indentation in front and teeth on each side.

It may for convenience in descriptive zoölogy be termed the *pseudolabium*. A. S. Packard, *Proc. Amer. Philos. Soc.*, June, 1883, p. 201.

Pseudolarix (sū-dol'ā-riks), *n.* [*NL. (Gordon, 1858), < Gr. ψευδής, false, + λάρυξ, larch; see Larix.*] A genus of coniferous trees of the tribe *Abietineæ*. By some it is included in the genus *Larix*, the larch, from which it differs in its cones, pointed scales falling away with the seeds, and in its leaves, which resemble those of *Cedrus*, the cedar, but are deciduous like those of the larch. The only species, *P. Kämpferi*, is a native of China, and is known as *golden larch*, from the color to which the light-green leaves turn in autumn. It bears pendulous cones about 3 inches long, broad and conical, falling asunder when ripe, except as long woody threads, passing out of the base of the scales, bind them in masses. See *larch*.

pseudolateral (sū-dō-lat'e-ral), *a.* In bot., having a tendency to become lateral when it is normally terminal, as the fruit of certain *Hepaticæ*.

pseudoleucemia (sū-dō-lū-sē'mi-ā), *n.* [*NL. pseudoleucemia, < Gr. ψευδής, false, + λευκός, white, + αἷμα, blood. Cf. leucemia.*] A disease characterized by progressive hyperplasia of the lymph-glands, sometimes of the spleen, with anemia and the development of secondary lymphatic growth in various parts of the body, but without leucocytosis. Also called *Hodgkin's disease*, *lymphadenoma*, *malignant lymphoma*, *lymphosarcoma*, *anemia lymphatica*, etc.

pseudoleucocythemia (sū-dō-lū'kō-si-thē'mi-ā), *n.* [*NL. pseudoleucocythemia, < Gr. ψευδής, false, + λευκός, white, + κύτος, cell, + αἷμα, blood. Cf. leucemia.*] Same as *pseudoleucemia*.

pseudolichen (sū-dō-lī'ken), *n.* A so-called lichen which does not possess the one mark of a

true lichen—that is, the presence of algae in the thallus. These plants are simply ascomycetous fungi parasitic upon a true lichen-thallus or other plant. See *lichen*.

Pseudoliva (sū-dol'i-vā), *n.* [*NL., < Gr. ψευδής, false, + NL. Oliva, q. v.*] In conch., the typical genus of *Pseudolivineæ*. Swainson. Also *Gastroidium*.

Pseudolivineæ (sū-dol-i-vī'nē), *n. pl.* [*NL., < Pseudoliva + -inæ.*] A subfamily of *Buccinidæ*, typified by the genus *Pseudoliva*. The shell is bucciniform, and the operculum has a lateral nucleus. The typical species is the existing *Pseudoliva plumbea* of the Atlantic coast of Africa, but most of the species are extinct.

Pseudolimedia (sū-dol-mē'di-ā), *n.* [*NL. (Trécul, 1847), < Gr. ψευδής, false, + NL. Olmedia, a related genus of plants.*] A genus of apetalous trees and shrubs of the order *Urticaceæ*, tribe *Artocarpææ*, and subtribe *Olmediæ*, characterized by receptacles containing numerous staminate flowers mixed with scales and without distinct perianths, and by pistillate flowers solitary in their receptacles. There are 5 species, natives of tropical America and the West Indies. They bear shining entire alternate short-stalked leaves, which are feather-veined and thin but coriaceous. The ovoid fruit is inclosed in a persistent and enlarged fleshy perianth, and the whole forms in *P. spuria* of Jamaica an edible red drupe-like fruit. See *bastard bread-nut* (under *bread-nut*), and *milkwood*.

pseudologist (sū-dol'ō-jist), *n.* [*Gr. ψευδολόγος, one who speaks falsely, a liar, < ψευδός, speaking falsely; see pseudology.*] A retailer of falsehoods; a liar.

pseudology (sū-dol'ō-jī), *n.* [*Gr. ψευδολογία, falsehood, < ψευδολόγος, speaking falsely, < ψευδής, false, + λέγειν, speak; see -ology.*] The science of lying; falsehood of speech; mendacity; lying.

Not according to the sound rules of *pseudology*.

pseudomalachite (sū-dō-mal'ā-kit), *n.* A hydrous phosphate of copper occurring ordinarily in massive forms of a bright-green color, much resembling malachite. It is closely related to dihydrite and ehrlite.

Pseudomelania (sū-dō-mē-lā'ni-ā), *n.* [*NL., < Gr. ψευδής, false, + NL. Melania, q. v.*] An extinct genus of shells superficially resembling a melanian, typical of the family *Pseudomelanidæ*.

Pseudomelanidæ (sū-dō-mel-ā-ni'ī-dē), *n. pl.* [*NL., < Pseudomelania + -idæ.*] A family of tanioglossate gastropods, typified by the genus *Pseudomelania*. They had elongated turreted shells with the aperture oral and the columella simple or plicated forward. The species inhabited the seas of the Paleozoic to the Tertiary epochs, and are entirely extinct.

pseudomembrane (sū-dō-mem'brān), *n.* A false membrane. See *membrane*.

pseudomembranous (sū-dō-mem'brā-nus), *a.* Of, pertaining to, or of the nature of a pseudomembrane.—**Pseudomembranous bronchitis**, bronchitis with the formation of a false membrane lining the bronchial tubes. It may be due to diphtheria, to the inhalation of hot steam, or to other causes.—**Pseudomembranous enteritis**, a non-febrile affection of the intestinal mucous membrane, characterized by the periodical formation of viscous, shreddy, or tubular exudates composed mainly of mucus.—**Pseudomembranous laryngitis**, a laryngitis characterized by the formation on and in the mucous membrane of a croupous pseudomembrane; true croup.—**Pseudomembranous tracheitis**, an inflammation of the mucous membrane of the trachea accompanied by the formation of a pseudomembrane.

pseudometallic (sū-dō-me-tal'ik), *a.* Falsely or imperfectly metallic; specifically applied to a kind of luster closely resembling that of metals.

pseudomonocotyledonous (sū-dō-mon-ō-kot-i-lē'dō-nus), *a.* In bot., having two or more cotyledons consolidated into a single mass, as in the horse-chestnut.

pseudomorph (sū-dō-mōrf), *n.* [*Gr. ψευδής, false, + μορφή, form.*] A deceptive, irregular, or false form; specifically, in mineral., a mineral having a definite form belonging, not to the substance of which it consists, but to some other substance which has wholly or partially disappeared. Sometimes quartz is found in the form of fluor-spar crystals, the fluor-spar having been changed by a process of substitution into quartz. Such crystals are pseudomorphs by substitution; another illustration is that of tin-stone, cassiterite, after orthoclase feldspar. A more common and important class of pseudomorphs includes those formed by the chemical alteration of the original mineral: these are illustrated by pseudomorphs of native copper after the oxid cuprite, where there has been a simple loss of one ingredient, in this case oxygen;

also, of gypsum after anhydrite, where the anhydrous calcium sulphate has been changed by assumption of water to the hydrous sulphate; or, still more important, where there has been a more or less complete exchange of constituents, as of the lead carbonate cerussite after the lead sulphid galena, or of serpentine after chrysotile, or of kaolin after feldspar, etc. Pseudomorphs are also formed by molecular change without change of chemical substance, as of calcite after aragonite, or rutile after brookite; these last are also called *paramorphs*. (See *paramorphism*.) Pseudomorphs very commonly have a non-crystalline waxy structure, but this is not necessarily the case.

pseudomorphia (sū-dō-mōr'fī-ā), *n.* [*NL., < Gr. ψευδής, false, + NL. morphia.*] One of the alkaloids of opium, C₁₇H₁₉NO₄. Also called *phormia*, *orymorphia*.

pseudomorphic (sū-dō-mōr'fik), *a.* [*Gr. ψευδής, false, + NL. morphia.*] Same as *pseudomorphous*.

pseudomorphine (sū-dō-mōr'fin), *n.* [*Gr. ψευδής, false, + NL. morphina, morphine.*] Same as *pseudomorphia*.

pseudomorphism (sū-dō-mōr'fizm), *n.* [*Gr. ψευδής, false, + -ισμός, -ism.*] The state of having a form, usually crystalline, different from that proper to the mineral; the process by which this state is brought about. See *pseudomorph*.

pseudomorphosis (sū-dō-mōr'fō'sis), *n.* [*NL., < Gr. ψευδής, false, + μορφή, a shaping, < μορφοῦν, form, shape, < μορφή, form.*] Same as *pseudomorphism*.

pseudomorphous (sū-dō-mōr'fus), *a.* [*Gr. ψευδής, false, + -ους, -ous.*] Not having the true form; characterized by or exhibiting pseudomorphism; in mineral., noting substances having an external form, usually crystalline, which does not properly belong to themselves. See *pseudomorph*.

pseudomorula (sū-dō-mor'ō-lā), *n.* [*Gr. ψευδός, false, + NL. morula, q. v.*] A false morula: applied by W. S. Kent to a collection or aggregate of cells or spores of distinctly unicellular animals, resembling a morula, but of a different morphological character. See *morula*.

pseudomorular (sū-dō-mor'ō-lār), *a.* [*Gr. ψευδός, false, + -αρός, -arous.*] Having the character of a pseudomorula.

pseudonavicella (sū-dō-nav-i-sel'ā), *n.* [*NL., < Gr. ψευδής, false, + LL. navicella, a small boat, dim. of navis, a ship; see nave².*] The embryonic form of a gregarine; one of a number of minute bodies into which the substance of an adult encysted gregarine breaks up in reproduction. Pseudonavicellæ are so called from their resemblance to the navicellæ or naviculae of diatoms. On the rupture of the cyst of the adult gregarine these bodies escape; and on rupture of the pseudonavicellæ themselves the embryo proper is similarly set free. See *pseudogastaria*, and cut under *Gregarinidæ*. Also *pseudonavicula*.

pseudonavicellar (sū-dō-nav-i-sel'ār), *a.* [*Gr. ψευδής, false, + NL. navicella, a small boat, dim. of navis, a ship; see nave².*] Pertaining to a pseudonavicella, or having its character, as the spores of *Sporozoa*. Also *pseudonavicular*.

pseudonavicula (sū-dō-nā-vik'ū-lā), *n.* [*NL., < Gr. ψευδής, false, + L. navicula, a small boat, dim. of navis, a ship.*] Same as *pseudonavicella*.

pseudonavicular (sū-dō-nā-vik'ū-lār), *a.* [*Gr. ψευδής, false, + NL. navicula, a small boat, dim. of navis, a ship.*] Same as *pseudonavicellar*.

pseudoneuropter (sū-dō-nū-rop'tēr), *n.* [*Gr. ψευδής, false, + NL. neuroptera, q. v.*] A pseudoneuropterous insect.

Pseudoneuroptera (sū-dō-nū-rop'te-rā), *n. pl.* [*NL., < Gr. ψευδής, false, + NL. Neuroptera, q. v.*] An order of *Insecta*, proposed by Erichson in 1840 to contain those neuropterous insects which have the metamorphosis incomplete, four membranous wings usually many-veined, and mandibulate mouth-parts (except in one family, *Ephemeridæ*). The order thus defined has been divided into three suborders: (1) *Platypetridæ*, including the *Pertidæ*, *Pocidæ*, *Embiidæ*, and *Termitidæ*; (2) *Odonata* or dragon-flies; and (3) *Ephemerina* or May-flies. Brauer, however, dismembers the *Pseudoneuroptera*, and distributes its components in his second, third, fourth, and sixth orders—*Ephemerida*, *Odonata*, *Plecoptera*, and *Corrodentia*—his *Plecoptera* including the *perlidæ*, and his *Corrodentia* the *termitidæ* and *Pocidæ*.

pseudoneuropterous (sū-dō-nū-rop'te-rūs), *a.* [*Gr. ψευδής, false, + NL. neuroptera, q. v.*] Pertaining to the *Pseudoneuroptera*, or having their characters.

pseudo-nipple (sū-dō-nip'pl), *n.* A false nipple of the mammary gland, produced by the elevation of the non-glandular part around a depression at the bottom of which the ducts open.

Pseudoniscidae (sū-dō-nis'ī-dē), *n. pl.* [*NL., < Pseudoniscus + -idæ.*] A family of synziphosurous merostomatous crustaceans of Carboniferous age, typified by the genus *Pseudoniscus*. They had an oval body, short head, large compound eyes, and abdomen with seven segments besides the telson.

Pseudoliva plumbea.

Pseudoniscus (sū-dō-nis'kus), *n.* [NL., < Gr. *ψεύδης*, false, + NL. *Oniscus*, q. v.] The typical genus of *Pseudoniscidae*.

pseudonomania (sū-dō-nō-mā-ni-ā), *n.* [Irreg. < Gr. *ψεύδω* (ppr. *ψεύδων*), belie, mid. *ψεύδεται*, lie (see *pseudo*), + *μανία*, madness.] A morbid propensity to lie.

pseudonucleolus (sū-dō-nū-klē-ō-lus), *n.*; pl. *pseudonucleoli* (-li). [NL., < Gr. *ψεύδης*, false, + L. *nucleolus*, dim. of *nucleus*, a little nut; see *nucleolus*.] An accessory or supplementary nucleus of some ova.

pseudonychium (sū-dō-nik'ī-um), *n.*; pl. *pseudonychia* (-ā). [NL., < Gr. *ψεύδης*, false, + NL. *onychium*, q. v.] In *entom.*, the onychium or spurious claw between the true tarsal claws. See *empodium* and *onychium*, and compare *paronychium*.

pseudonym (sū-dō-nim), *n.* [Also *pseudonyme*; < F. *pseudonyme*, < Gr. *ψεύδω*, having a false name, < *ψεύδης*, false, + *ὄνομα*, *ὄνομα*, name.] 1. A false name; especially, a fictitious name assumed by an author in order to conceal or veil his identity.

The [Brontë] sisters adopted the *pseudonyms* Currer, Ellis, and Acton Bell, corresponding to their initials. L. Stephen, *Dict. National Biog.*, VI. 410.

2. In *nat. hist.*, the vernacular name of a species or other group of animals or plants, as distinguished from its tenable technical name: thus, *robin* is the *pseudonym* of *Turdus migratorius*. Coues, *The Auk*, I. 321 (1884).

pseudonymal (sū-dō-nim'al), *a.* [*< pseudonym* + *-al*.] In *zool.*, vernacular; not technical nor tenable, as the name of an animal; not having the character of an onym. Coues.

pseudonymity (sū-dō-nim'ī-ti), *n.* [*< pseudonym* + *-ity*.] The state of being pseudonymous, or of bearing a false name or signature; the act or practice of writing under an assumed name. *Contemporary Rev.* (Imp. Dict.).

pseudonymous (sū-dō-ni-mus), *a.* [*< Gr. ψεύδω*, having a false name; see *pseudonym*.] Bearing a pseudonym, or false name; applied to an author who publishes a work under a false or feigned name, or to a work thus published.

In the primitive age of publication, before there existed "a reading public," literary productions were often anonymous; or . . . they wore the mask of a fictitious name, and were *pseudonymous*. I. D'Irassé, *Amen. of Lit.*, II. 346.

pseudonymously (sū-dō-ni-mus-li), *adv.* In a pseudonymous manner; under a pseudonym, or fictitious or false name.

That vile concoction of camomile which you so *pseudonymously* dignify with the title of "Bitter Ale." Barham, *Ingoldby Legends*, II., Pref.

pseudoparalysis (sū-dō-pa-ral'ī-sis), *n.* An affection resembling paralysis, but regarded as distinct from ordinary forms.—*Spastic pseudoparalysis*. Same as *spastic spinal paralysis* (which see, under *paralysis*).

pseudoparaplegia (sū-dō-par-a-plē'ji-ā), *n.* An affection like paraplegia, but regarded as essentially distinct.—*Tetanic pseudoparaplegia*. Same as *spastic spinal paralysis* (which see, under *paralysis*).

pseudo-parasite (sū-dō-par'a-sit), *n.* An apparent parasite; a commensal or inquiline; also, a plant which attacks vegetable tissues, but only when they are dead.

pseudoparasitic (sū-dō-par-a-sit'ik), *a.* Parasitic apparently but not really; commensal; inquiline.

pseudoparenchyma (sū-dō-pa-reng'ki-mā), *n.* In *mycol.*, a tissue resembling parenchyma, but of far different origin, being produced from united and transformed hyphae.

pseudoparenchymatous (sū-dō-par-eng-kim'-a-tus), *a.* In *bot.*, belonging to or resembling pseudoparenchyma.

pseudoparenchyme (sū-dō-pa-reng'kim), *n.* Same as *pseudoparenchyma*.

pseudoparesis (sū-dō-par'e-sis), *n.* An affection resembling paresis, but regarded as distinct from ordinary forms.—*Spastic pseudoparesis*. Same as *spastic spinal paralysis* (which see, under *paralysis*).

pseudoparthenogenesis (sū-dō-pār'the-nō-jen'e-sis), *n.* That mode of reproduction which is intermediate between metagenesis and parthenogenesis proper. Spencer, *Prin. of Biol.*, I. 214.

pseudo-patron (sū-dō-pā'tron), *n.* A pretended or would-be patron. [Rare.]

Disturbers of a right of advowson may therefore be these three persons—the *pseudo-patron*, his clerk, and the ordinary. Blackstone, *Comm.*, VII. xvi.

pseudopediform (sū-dō-ped'ī-fōrm), *a.* [*< Gr. ψεύδης*, false, + L. *pes* (ped-), = E. *foot*, + *forma*, form.] Having the character of a pseudopod; pseudopodial.

Body ciliated, . . . without *pseudopediform* prolongations. Arthur Adams, *Man. Nat. Hist.*, p. 870.

pseudopercular (sū-dō-pēr-kū-lār), *a.* [*< pseudopercul-um* + *-ar*.] False or secondary, as an operculum; pertaining to a pseudoperculum.

pseudoperculate (sū-dō-pēr-kū-lāt), *a.* [*< pseudopercul-um* + *-ate*.] Provided with a pseudoperculum; having the aperture closed by a pseudoperculum.

pseudoperculum (sū-dō-pēr-kū-lum), *n.*; pl. *pseudopercula* (-lā). [NL., < Gr. *ψεύδης*, false, + L. *operculum*, a lid, cover: see *opercle*.] A false opercle; a kind of secondary lid closing the aperture of the shell of some pulmonate gastropods. See *clausilium*. Also called *hibernaculum*.

pseudoperidium (sū-dō-pe-rid'ī-um), *n.* In *mycol.*, a false peridium: a name given to the membranous cup inclosing the spores in *Æcidium*. See *peridium* and *Æcidium*.

pseudoperiodic (sū-dō-pē-ri-od'ik), *a.* Quasi-periodic.

pseudoperipteral (sū-dō-pe-rip'te-ral), *a.* In *arch.*, falsely peripteral: noting a temple with a portico in front, or porticos in front and rear,

Plan of Pseudoperipteral Temple of Fortuna Virilis, Rome.

but with the columns on its flanks engaged in the walls, instead of standing free. Compare plan under *opisthodomos*.

There are but two known examples of Greek antiquity of a *pseudo-peripteral* structure—the gigantic fane of Jupiter Olympius at Agrigentum, and the nine-columned edifice at Paestum. *Encyc. Brit.*, II. 410.

pseudoperipteros (sū-dō-pe-rip'te-ros), *n.* [L., < Gr. *ψευδοπεριπτερος*, with a false peristyle, < *ψεύδης*, false, + *περιπτερος*, with a single row of columns all around: see *peripteros*.] A pseudoperipteral structure.

It would be difficult to decide whether this peculiar *pseudo-peripteros* [temple of Zeus at Agrigentum] owed its conformation to the building-stone at disposal, . . . or whether other considerations led to this abnormal negation of the fundamental principles of columnar architecture. Reber, *Ancient Art* (tr. by Clarke), p. 219.

Pseudophallia (sū-dō-fal'ī-ā), *n. pl.* [NL., < Gr. *ψεύδης*, false, + *φάλλος*, phallus.] In Möhre's system, a class of gastropods characterized by the supposed absence of an intromittent male organ, comprising the orders *Rhipidoglossa* and *Docoglossa*. Also called *Exocephala*.

Pseudophidia (sū-dō-fid'ī-ā), *n. pl.* [NL., < Gr. *ψεύδης*, false, + *ὄφις*, dim. of *ὄφις*, a serpent: see *Ophidia*.] In De Blainville's system of classification, an order of *Amphibia*, characterized by the limbless serpentiform body (whence the name); the caecilians, or *Ophiomorpha*. See *Cæciliidae*.

pseudophidian (sū-dō-fid'ī-an), *a. and n.* [*< Pseudophidia* + *-an*.] 1. *a.* Having the appearance of an ophidian, as an amphibian; belonging to the *Pseudophidia*.

II. *n.* A member of the *Pseudophidia*. **pseudophone** (sū-dō-fōn), *n.* [*< Gr. ψεύδης*, false, + *φωνή*, voice.] An instrument for the study of the perception of direction of sounds by the human ear. By it sound may be made to appear as coming from any direction other than the true one. Earpieces fastened to the head by straps, and carrying adjustable tin-plate mirrors—the latter producing the effects—constitute the instrument.

Pseudophyllidea (sū-dō-fil'li-ā-ē-ā), *n. pl.* [NL., < Gr. *ψεύδης*, false, + *φύλλον*, leaf, + *-idea*.] A group of the *Cestoides*, or cestoid worms, including those tapeworms which, when mature, have neither suckers nor lobes on the head, but a deep groove on each side. The group includes tapes found in various fishes, amphibians, and water-birds, as well as *Bothriocephalus iatus*, the broad tapeworm, occasionally infesting the human body.

Pseudopneumona (sū-dō-nū'mō-nā), *n. pl.* [NL., < Gr. *ψεύδης*, false, + *πνεῦμα*, lung.] A group of rostriferous gastropods, with the gills in very numerous cross-rows on the inner surface of the mantle, eyes in front of the bases of the tentacles, and operculum spiral. It in-

cluded the families *Littorinidae*, *Lacunidae*, and *Truncatellidae*. J. E. Gray.

pseudopod (sū-dō-pod), *n.* [*< Gr. ψεύδης*, false, + *ποῦς* (pod-) = E. *foot*.] 1. A member of the *Pseudopoda*, as an amoeba; any protozoan which is provided with pseudopodia, or has the power of protruding diversiform parts of its sarcode in the form of pseudopodia, serving as temporary organs of locomotion; a rhizopod; a myxopod.—2. A pseudopodium.

Pseudopoda (sū-dō-pō-dā), *n. pl.* [NL.: see *pseudopod*.] In Ehrenberg's system of classification (1836), a division of anenterous infusorians, containing those called *root-footed*, or the *Amabea*, *Arcellina*, and *Bacillaria*. The term is disused, but is the origin of the very common words *pseudopod* and *pseudopodium*.

pseudopodial (sū-dō-pō-dal), *a.* [*< pseudopod* + *-al*.] 1. Provided with pseudopods; furnished with false feet; of or pertaining to the *Pseudopoda*; rhizopod; myxopod.—2. Pertaining to pseudopodia; pseudopodial.

pseudopode (sū-dō-pōd), *n.* [*< pseudopodium*.] Same as *pseudopodium*.

pseudopodia, *n.* Plural of *pseudopodium*. **pseudopodial** (sū-dō-pō-dī-al), *a.* [*< pseudopodium* + *-al*.] Pertaining to pseudopodia; forming or formed by pseudopodia: as, a *pseudopodial* process; *pseudopodial* movement; the *pseudopodial* aperture for the protrusion of pseudopodia in the test of a foraminifer.

pseudopodian (sū-dō-pō-dī-an), *a.* [*< pseudopodium* + *-an*.] Same as *pseudopodial*.

pseudopodic (sū-dō-pōd'ik), *a.* [*< pseudopod* + *-ic*.] Same as *pseudopodial*. W. S. Kent.

pseudopodium (sū-dō-pō-dī-um), *n.*; pl. *pseudopodia* (-ā). [NL., < Gr. *ψεύδης*, false, + *ποῦς* (pod-) = E. *foot*.] 1. In *Protozoa*, as pseudopods, rhizopods, or myxopods, a temporary diversiform prolongation or protrusion of the sarcode or body-substance of the animalcule, to any extent or in any shape, capable of being withdrawn or reabsorbed into the general mass of the body, and serving as an organ of locomotion, prehension, or ingestion; a pseudopod, or false foot: generally in the plural. The term is very comprehensive in its application to foot-like, finger-like, or ray-like processes of the body of protozoans; but it is the essential character of a pseudopodium to be soft, diversiform, or variable in shape, and temporary, or subject to reabsorption—in which respects the organ differs from the fixed or constant processes of many protozoans, as cilia or flagella. Pseudopodia are highly characteristic of the lower or non-corticate protozoans, the myxopods or rhizopods proper, as all the amoebiforms, the heliozoans, the foraminifers, etc. They may be broad and lobate processes of sarcode, or slender filamentous rays. When lobate the pseudopodia remain distinct from one another, their margins are clear and transparent, and the granules which they may contain plainly flow into their interior from the more fluid central part of the body; or the whole body of the animalcule may flow into such a pseudopod, thus effecting a peculiar kind of locomotion. But when they are filiform they are very apt to run into one another, and give rise to networks, the constituent filaments of which, however, readily separate and regain their previous form; and, whether they do this or not, the surfaces of these pseudopodia are beset by minute granules, which are in incessant motion. See cuts under *Actinopherrum*, *Amoeba*, and *Rotaria*.

2. In *Rotifera*, the aboral region, caudal extremity, or tail-end of a wheel-animalcule. It varies much in size, form, and function, and may be absent. When best developed, it is a considerable muscular organ, serving as a sucker-like means of attachment or as a fin-like organ for swimming. It is sometimes a pair of tails, like styles or flaps.

3. In *bot.*: (a) In *Musci*, a false pedicel, or elongation of the extremity of a branch of the oöphyte, in the form of a stalk, supporting a sporogonium or capsule.

In Sphagnum, the sporogonium is fully developed within the epigynous leaves, and when complete the axis beneath it elongates, forming the *pseudopodium*. *Encyc. Brit.*, IV. 116.

(b) In *Mycetozoa*, a protrusion of the protoplasm of an amoeboid body, which may be drawn in, or into which the whole body may move.

pseudoproct (sū-dō-prokt), *n.* [*< Gr. ψεύδης*, false, + *πρωκτός*, anus.] 1. The anus or anal opening of the pseudembryo or echinopædium of an echinoderm.—2. The false oscule, or pseudostome, of a sponge. W. J. Sollas.

The faulty use of the term oscule for what is neither functionally nor morphologically a mouth is here obvious, for in one sense the oscule is always a pseudostome; it would be better if the term *pseudoproct* could be substituted. *Encyc. Brit.*, XXII. 416.

pseudoproctous (sū-dō-prok'tus), *a.* [*< pseudoproct* + *-ous*.] Provided with a pseudoproct.

pseudoprostyle (sū-dō-prō-stīl), *a.* [*< Gr. ψεύδης*, false, + *πρόστυλος*, prostyle.] Noting a portico the projection of which from the wall is less

than the width of its intercolumniation. *Hosking*.

pseudopsia (sū-dōp'si-ā), *n.* [NL., < Gr. *ψεύδης*, false, + *opsis*, sight.] False sight-perception.

pseudopupa (sū-dō-pū'pā), *n.*; pl. *pseudopupae* (-pē). [NL., < Gr. *ψεύδης*, false, + NL. *pupa*, q. v.] A false pupa: applied to the fifth stage, or coarctate pupa, of those insects which undergo hypermetamorphosis. Also called *scmi-pupa*. See *coarctate*, and cut under *Sitaris*.

pseudopupal (sū-dō-pū'pāl), *a.* [*< pseudopupa* + *-al.*] Pertaining to a pseudopupa, or having its characters.

Pseudopus (sū'dō-pus), *n.* [NL. (Merrem, 1820), < Gr. *ψεύδης*, false, + *πούς* (pod-) = E. foot.] A genus of lizards of the family *Zonuridae*, having rudimentary hind limbs and traces of shoulder-girdles. *P. pallasi* is an example.

pseudoramose (sū-dō-rā'mōs), *n.* [*< Gr. ψεύδης*, false, + L. *ramus*, a branch: see *ramus*, *ramose*.] In bot., forming false branches. See *pseudoramulus*.

pseudoramulus (sū-dō-rā'm'ū-lus), *n.*; pl. *pseudoramuli* (-lī). [NL., < Gr. *ψεύδης*, false, + L. *ramulus*, dim. of *ramus*, a branch.] In bot., a false branch: applied to the filaments of the *Riculiaceae* and other algae, in which the terminal part of the filament detaches itself and applies itself laterally to an enlarged part of the filament called the heterocyst. See *heterocyst*.

pseudo-ray (sū'dō-rā), *n.* A straight line or ray in non-Euclidean geometry.

Pseudorca (sū-dōr'kā), *n.* [NL., < Gr. *ψεύδης*, false, + L. *orca*, a kind of whale: see *Orca*.] A genus of cetaceans, established for the reception of the *Phocæna crassidens* of Owen, discovered subfossil in England, and afterward found living, related to *Orca*, but having only about 40 teeth and 50 vertebrae, the cervicals mostly ankylosed, the lumbar half as long again as they are broad. The animal is black, and attains a length of 14 feet.

Pseudoscines (sū-dōs'i-nēz), *n. pl.* [NL., < Gr. *ψεύδης*, false, + L. *oscine* (oscine-), a singing bird: see *Oscines*.] In ornith., in Selater's arrangement of 1880, a suborder of *Passeres*, including the *Acromyodi abnormales* of Forster and Forbes, or the genera *Menura* and *Atrichia* of Australia, as together distinguished from *Oscines*, or normal acromyodian *Passeres*.

pseudosclerine (sū-dōs'i-nin), *a.* Anomalous oscine, as the lyre-birds and scrub-birds of Australia; belonging to the *Pseudoscines*.

pseudosclerosis (sū'dō-sklē-rō'sis), *a.* A case resembling clinically multiple sclerosis, but not presenting the characteristic lesions post mortem.

pseudoscope (sū'dō-skōp), *n.* [*< Gr. ψεύδης*, false, + *σκοπεῖν*, view.] A kind of stereoscope that makes concave parts appear convex, and convex parts concave. Wheatstone's pseudoscope produces these effects by the use of two flint-glass rectangular prisms, which reflect the light coming from the object viewed from their inner surfaces, the latter being, with reference to the eye of the observer, at the angle of total reflection.

Hence, too, the obstinacy with which human faces and forms, and other extremely familiar convex objects, refuse to appear hollow when viewed through Wheatstone's pseudoscope. *W. James*, *Mind*, XII. 528.

pseudoscopic (sū'dō-skōp'ik), *a.* [*< pseudoscope* + *-ic.*] Pertaining to the pseudoscope, or to the class of optical phenomena which it presents, in which false impressions of visual objects are conveyed to the mind.

By pseudoscopic vision we mean that "conversion of relief" which is produced by the combination of two reversed perspective projections. *W. B. Carpenter*, *Micros.*, § 31.

The second [group of illusions] relates to the instability of our judgments of relative distance and size by the eye, and includes especially what are known as pseudoscopic illusions. *W. James*, *Mind*, XII. 524.

pseudoscopically (sū'dō-skōp'ik-ā-lī), *adv.* In a pseudoscopic manner; as in a pseudoscope.

When mounted pseudoscopically, at first it [a photograph] is very unsatisfactory. *Jour. Franklin Inst.*, CXXIII. 428.

pseudoscopy (sū'dō-skō-pi), *n.* [*< pseudoscope* + *-y*.] The use of the pseudoscope, or the production of effects similar to those exhibited by it.

pseudoscorpion (sū-dō-skōr'pi-on), *n.* [*< NL. pseudoscorpion* (n-), < Gr. *ψεύδης*, false, + *σκορπιος*, L. scorpion (n-), a scorpion.] A false scorpion; a member of the *Pseudoscorpiones* or *Cheliferidae*. See cut in next column.

Pseudoscorpiones (sū'dō-skōr-pi'ō-nēz), *n. pl.* [NL., pl. of *pseudoscorpion* (n-): see *pseudoscorpion*.]

on.] An order of tracheate arachnids, with segmented abdomen not distinctly separated from the cephalothorax, didactyl or chelate maxillary palps, two or four eyes, and no postabdomen nor poison-glands; the false scorpions, of the families *Cheliferidae* and *Obisidæ*. Also called *Cheliferidae*. Also *Pseudoscorpionina*, and as a family *Pseudoscorpionidae*.

pseudoseptate (sū-dō-sep'tāt), *a.* 1. In bot., having the appearance of being septate, as many spores.—2. In zool., having pseudosepta, as corals.

pseudoseptum (sū-dō-sep'tum), *n.*; pl. *pseudosepta* (-tā). In corals, a false septum; a septum not homologous with the regular septa of corals—that is, not identified as a calcified mesentery. Thus, in *Heliopora*, with eight mesenteries only, there are twelve pseudosepta.

pseudosiphon (sū-dō-si'fon), *n.* [NL., < Gr. *ψεύδης*, false, + *σίφων*, siphon: see *siphon*.] A false siphon; the vertical trace in the external solid plug of the truncated shell of certain cephalopods, as orthoceratites, continuous with the true siphon. *A. Hyatt*, *Proc. Bost. Soc. Nat. Hist.*, XXII. 258.

pseudosiphonal (sū-dō-si'fō-nāl), *a.* [*< pseudosiphon* + *-al.*] Of, pertaining to, or resembling the pseudosiphon of cephalopods.

pseudosiphuncle (sū-dō-si'fūng-kl), *n.* [*< Gr. ψεύδης*, false, + E. *siphuncle*.] A pseudosiphon. *A. Hyatt*.

pseudosmia (sū-dōs-mi-ā), *n.* [NL., < Gr. *ψεύδης*, false, + *σμήν*, odor.] False smell-perception.

Pseudosolanææ (sū-dō-sō-lā'nē-ā), *n. pl.* [NL. (Bentham and Hooker, 1876), < Gr. *ψεύδης*, false, + NL. *Solanææ*.] A series or suborder of gamopetalous plants of the order *Scrophularineæ*, having some relationship with the order *Solanaceæ*, and characterized by alternate leaves, uniformly centripetal inflorescence, a five-lobed corolla with the two upper lobes exterior, and four, sometimes five, perfect stamens. It includes 9 genera and 3 tribes, of which the *Verbasceæ*, or the mullein tribe, is the chief. They are herbs or shrubs, the flowers with a broad corolla-tube bearing rather flat and spreading lobes.

pseudospermic (sū-dō-spēr'mik), *a.* [*< pseudospermium* + *-ic.*] In bot., forming or pertaining to a pseudospermium.

pseudospermium (sū-dō-spēr'mi-um), *n.* [NL., < Gr. *ψεύδης*, false, + *σπέρμα*, seed.] In bot., any one-seeded indehiscent fruit in which the pericarp so closely invests the seed that the whole appears as merely a seed—for example, an achenium.

pseudospermous (sū-dō-spēr'mus), *a.* [As *pseudospermic* + *-ous*.] Same as *pseudospermic*.

pseudosphere (sū'dō-sfēr), *n.* 1. A surface of constant negative curvature.—2. A sphere in non-Euclidean geometry.

pseudospherical (sū'dō-sfēr'ikāl), *a.* Having a constant negative curvature.

Were space really pseudospherical, then stars would exhibit a real parallax even if they were infinitely distant. *Encyc. Brit.*, XV. 664.

Pseudospherical surface, a surface like that generated by the rotation on its axis of the curve

$$x + \sqrt{r^2 - y^2} = r \log \frac{r - \sqrt{r^2 - y^2}}{y}.$$

Pseudospora (sū-dōs-pō-rā), *n.* [NL., < Gr. *ψεύδης*, false, + *σπόρος*, seed.] A genus of myxomycetous fungi, typical of the family *Pseudosporozæ*, with plasmodium wanting, or at least unknown.

pseudospore (sū'dō-spōr), *n.* [*< Gr. ψεύδης*, false, + *σπόρος*, seed.] In mycol., same as *teleutospore*.

Pseudosporææ (sū-dō-spō'rē-ā), *n. pl.* [NL. (Zopf), < *Pseudospora* + *-ææ*.] A family of myxomycetous fungi of the class *Monadineæ*, typified by the genus *Pseudospora*.

pseudostella (sū-dō-stel'ā), *n.* [NL., < Gr. *ψεύδης*, false, + L. *stella*, star.] A meteor or phenomenon of any kind resembling a star in the heavens.

pseudostigma (sū-dō-stig'mā), *n.*; pl. *pseudostigmata* (-mā-tā). A kind of false stigma with

Pseudoscorpion (*Chelifer oblongus*). (Hair-line shows natural size.)

which some tracheate acarines, as the *Oribatidæ* or beetle-mites, are provided. In these mites the pseudostigmata are conspicuous, dorsal, tubular, and each has a filament projecting from the interior of the tube.

pseudostoma (sū-dōs'tō-mā), *n.*; pl. *pseudostomata* (sū-dōs'tō-mā-tā). [NL.: see *pseudostome*.] 1. In anat., a supposed opening on the surface of a serous membrane, regarded as the mouth of one of the absorbents or lymphatic vessels which begin in such membranes.—2. In zool.: (a) Same as *pseudostome*. (b) [cap.] The name-giving genus of *Pseudostomidæ*: synonymous with *Geomys*. Thomas Say, 1823. Also called *Diplostoma*, *Saccophorus*, and *Ascomys*.

pseudostomatous (sū-dō-stom'a-tus), *a.* [*< pseudostoma* (n-) + *-ous*.] Provided with pseudostomata, as a serous surface; of or pertaining to a pseudostoma.

pseudostome (sū'dō-stōm), *n.* [*< NL. pseudostoma* (cf. Gr. *ψεύδοστρομα*, the false or blind mouth of a river), < Gr. *ψεύδης*, false, + *στρομα*, mouth.] 1. The mouth or oral orifice of the pseudembryo or echinopodium of an echinoderm; a pseudostoma: correlated with *pseudoproct*.—2. The false osculum or secondary opening replacing an original oscule of a sponge. Also called *pseudoproct*.

Secondary canals or cavities, which may be incurant (vestibular) or excurrent (cloacal), the opening of the latter to the exterior being termed a false oscule or *pseudostoma*. *W. J. Sollas*, *Encyc. Brit.*, XXII. 416.

3. A pouched rat, or pocket-gopher, of North America, as *Geomys bursarius*. See *Pseudostoma*, 2 (b).

Pseudostomidæ (sū'dō-stom'i-dē), *n. pl.* [NL. (Gervais, 1848), < *Pseudostoma* + *-idæ*.] A family of American rodents, with external cheek-pouches, named from the genus *Pseudostoma*; the pocket-rats and pocket-mice, now dissociated in the two families *Geomyidæ* and *Sacomyidæ*; the pseudostomes.

pseudostomine (sū'dō-stō'min), *a.* [*< pseudostome* + *-inæ*.] Having external cheek-pouches, as a pocket-rat or pocket-mouse; saccomyine.

pseudostomosis (sū'dō-stō-mō'sis), *n.* [NL.: < *pseudostome* + *-osis*.] The formation or existence of a pseudostome, or false oscule, as that of a sponge. *W. J. Sollas*, *Encyc. Brit.*, XXII. 416.

pseudostomatic (sū'dō-stō-mot'ik), *a.* [*< pseudostomosis* (-ot-) + *-ic*.] Characterized by exhibiting pseudostomosis; provided with pseudostomes or false oscules, as a sponge.

pseudostomous (sū-dōs'tō-mus), *a.* [*< pseudostome* + *-ous*.] Having pseudostomes, as a sponge; of or pertaining to pseudostomes.

pseudostroma (sū-dō-strō'mā), *n.* In mycol., a false stroma; a cellular body resembling a stroma, as that produced in certain lichens. See *stroma*.

pseudosymmetry (sū-dō-sim'e-tri), *n.* In crystal., false symmetry; the appearance of having a higher degree of symmetry than is actually the case, usually produced through twinning. See *twin*.

Pseudotetramera (sū'dō-te-tram'e-rā), *n. pl.* [NL. (Westwood, 1839): see *pseudotetramera*.] In Westwood's system of classification, one of the four prime divisions of *Coleoptera*, including those beetles in which the tarsi are five-jointed, but the fourth joint is minute and concealed between the lobes of the preceding. It is equivalent to the *Cryptopentamera* of Burmeister and the *Subpentamera* of Latreille. It includes the large and important groups *Rhynchophora*, *Longicornia*, and *Phytophaga*.

pseudotetramous (sū'dō-te-tram'e-rus), *a.* [*< Gr. ψεύδης*, false, + *τέτταρες* (tetra-), four, + *μέρος*, part.] Having apparently four-jointed but actually five-jointed tarsi, as a beetle; of or pertaining to the *Pseudotetramera*.

pseudotinea (sū-dō-tin'ē-ā), *n.* [*< Gr. ψεύδης*, false, + L. *tinea*, a worm.] The larva of certain pyralid moths, as the bee-moth, *Galleria ceræana*, which feeds on wax, and is a terrible enemy to bees. They sometimes infold the cells in their webs to such an extent as to destroy the community. See *Galleria*, and cut under *bee-moth*.

Pseudotrimeria (sū-dō-trim'e-rā), *n. pl.* [NL. (Westwood, 1839): see *pseudotrimerous*.] In Westwood's system of classification, one of the four prime divisions of *Coleoptera*, including those beetles in which the tarsi are four-jointed, the third joint being very diminutive and concealed between the lobes of the preceding. It is equivalent to the *Cryptotetramera* of Burmeister and to the *Subtetramera* and *Trimeria* of Latreille. It includes the three families *Erotylidae*, *Endomychidae*, and *Coccinellidae*.

pseudotrimerous (sū-dō-trim'e-rus), *a.* [*< Gr. ψευδής, false, + τρεῖς (tri-), three, + μέρος, part.*] Having apparently only three, but actually four tarsal joints, as a beetle; of or pertaining to the *Pseudotrimerus*.

Pseudotsuga (sū-dōt-sū'gā), *n.* [NL. (Carrère, 1867), *< Gr. ψευδής, false, + NL. Tauga, q. v.*] A genus of coniferous trees of the tribe *Abietineæ*. By Eichler, Bugler, and others it is united with the related genus *Tsuga*, the hemlock-spruce, from which it has been distinguished by the absence of resin-vesicles in the seeds, by the smooth branchlets, and by cones fringed with conspicuous sharply two-lobed bracts much longer than the scales, with their midribs prolonged into a spine or bristle. There is but one species, *P. Douglasii*, discovered by the Scotch botanist David Douglas, in Oregon, in 1825, the most widely distributed timber-tree of the Pacific States, known as *red or yellow fir, Oregon pine, Douglas fir, Douglas spruce, and Douglas pine*. (See *Oregon pine*, under *pine*.) The wood is unlike that of any related conifer in its abundance of spirally marked wood-cells. The trees are at first pyramidal and spruce-like, afterward more spreading, with very thick and rough brown bark. They bear flat and very narrow linear leaves, spirally inserted, but spreading somewhat in two ranks by a twist at the base, and handsome pendulous cones, which are nearly cylindrical, 2 or 3 inches long, and are matured the first year. In the variety *macrocarpa*, the hemlock of the San Bernardino Mountains, a smaller tree, about 50 feet in height, the cones reach 7 inches long, and the larger seeds contain as many as from nine to twelve seed-leaves.

Pseudoturbiniolidae (sū-dō-tēr-bi-nol'i-dē), *n. pl.* [NL., *< Gr. ψευδής, false, + NL. Turbiniolidae.*] A family of extinct aporose sclerodermatous corals, resembling *Turbiniolidae*, but with septa each composed of three laminae free internally, externally united by a single costa. The genus *Dasmia* is an example. Also called *Dasmidae*. Edwards and Haime, 1850.

pseudova, *n.* Plural of *pseudovum*.

pseudoval (sū-dō'vāl), *a.* [*< pseudovum + -al.*] Of or pertaining to a pseudovum or metovum. Huxley, Anat. Invert., p. 331.

pseudovarian (sū-dō-vā'ri-an), *a.* [*< pseudovary + -ian.*] Of or pertaining to a pseudovary: as, a *pseudovarian* tubule; a *pseudovarian* ovum.

The terminal or anterior chamber of each *pseudovarian* tube is lined by an epithelium, which incloses a number of nucleated cells. Huxley, Anat. Invert., p. 385.

pseudovarium (sū-dō-vā'ri-um), *n.* [NL.: see *pseudovary*.] Same as *pseudovary*.

A portion of the cells . . . becomes converted into a *pseudovarium*, and the development of new pseudova commences before the young leaves the body of its parent. It is obvious that this operation is comparable to a kind of budding. Huxley, Anat. Invert., p. 447.

pseudovary (sū-dō-vā'ri), *n.*; pl. *pseudovaries* (-riz). [*< NL. pseudovarium, < Gr. ψευδής, false, + NL. ovarium, ovary: see ovary.*] 1. The ovary of a viviparous insect, as an aphid, in which are externally developed the kind of ova called pseudova.

The young are developed within organs which resemble the ovarioles of the true females in their disposition, and may be termed *pseudovaries*.

Huxley, Anat. Invert., p. 385.

2. The filmy pellicle or so-called proligerous membrane of infusions of hay, etc., out of which infusorial animalcules were supposed to be produced by the heterogenists, or believers in spontaneous generation.

pseudovelar (sū-dō-vē'lār), *a.* [*< pseudovelum + -ar.*] Vascular, as the velum of a scyphomedusan; having the character or quality of a pseudovelum.

pseudovelum (sū-dō-vē'lum), *n.*; pl. *pseudovela* (-lā). [NL., *< Gr. ψευδής, false, + NL. velum.*] The vascular velum of some hydrozoans, as the *Scyphomedusæ*, containing enteric vessels, and regarded as morphologically distinct from the true velum of the *Hydromedusæ*. See *velum*.

Pseudoviperæ (sū-dō-vī'pē-rē), *n. pl.* [NL. (Oppel, 1811), *< Gr. ψευδής, false, + L. vipera, viper.*] The wart-snakes (genera *Acrochordus* and *Erypeton*).

pseudoviperine (sū-dō-vī'pē-rin), *a.* [As *Pseudoviperæ* + *-inē*.] Having the appearance of a viper or other venomous serpent, but harmless, as a wart-snake; pertaining to the *Pseudoviperæ*.

pseudo-volcanic (sū-dō-vol-kan'ik), *a.* Pertaining to or produced by a pseudo-volcano.

pseudo-volcano (sū-dō-vol-kā'nō), *n.* A volcano that, when in a state of activity, emits smoke and sometimes flame, but no lava; also, a burning mine of coal.

Pseudovomer (sū-dō-vō'mēr), *n.* [NL., *< Gr. ψευδής, false, + L. vomer, plowshare: see vomer.*] A genus of fossil carangoid fishes of Miocene age.

pseudovum (sū-dō'vum), *n.*; pl. *pseudova* (-vā). [NL., *< Gr. ψευδής, false, + L. ovum, egg.*] A pseudovarian ovum; the egg produced in a pseudovary; a false egg, or the germ of an individual, as an aphid, produced agamogenetically and parthenogenetically. The unimpregnated eggs laid by a virgin aphid are pseudova. The delicate investing membrane or cell-wall is ruptured immediately by the active embryos.

One of the hindmost of these cells enlarges and becomes detached from the rest as a *pseudovum*. It then divides and gives rise to a cellular mass, distinguishable into a peripheral layer of clear cells and a central more granular substance, which becomes surrounded by a structureless cuticula. It is this cellular mass which gradually becomes fashioned into the body of a larval aphid.

Huxley, Anat. Invert., p. 386.

The ova which originate in it [pseudovary] and are incapable of fertilization [it will be convenient to call] the *pseudova*. Claus, Zoology (trans.), p. 544.

pseudoxanthin (sū-dok-san'thin), *n.* [*< Gr. ψευδής, false, + ξανθός, yellow, + -inē*.] A leucosamine found in muscular tissue.

psha, pshah (shā or pshā), *interj.* See *pshaw*. **pshaw** (shā or pshā), *interj.* [Also *psha, pshah*; a mere exclamation, of no definite formation, but suggesting *pish* and *sho*, accom. to *ah, aw*.] An exclamation implying contempt, disdain, impatience, or a sense of absurdity.

Pshaw, Pshaw! you fib, you Baggage, you do understand. Congreve, Double-Dealer, iv. 3.

Pshaw! Sure I must know better than you whether he's come or not. Sheridan, School for Scandal, iii. 3.

You will say that the story is not probable. *Psha!* Is not it written in a book? Thackeray, Bluebeard's Ghost.

pshaw (shā or pshā), *v. i.* [*< pshaw, interj.*] To utter the interjection *pshaw*; evince contempt or impatience by such interjections as *pshaw*.

My father travelled homewards . . . in none of the best of moods, *pshaw-ing* and *pish-ing* all the way down. Sterne, Tristram Shandy, I. xvii.

pshem (pshem), *n.* A head-dress for women, derived from the East, probably the Levant, and adopted in Spain in the thirteenth century. It was practically an upright and nearly cylindrical hat.

psi (psē or sī), *n.* A Greek letter, Ψ, ψ. It belongs to the Ionic alphabet, and stands for *ps* or *phs*. The character may be a modification of ϕ, φ.

Psidium (sid'i-um), *n.* [NL. (Linnæus, 1737), said to have been so called in allusion to the succulent fruit; irreg. *< Gr. ψῖζειν, ψειν, feed on pap, + dim. -ιδιον*.] A genus of polypetalous trees and shrubs of the order *Myrtaceæ* and tribe *Myrtæ*. It is characterized by a broad calyx-tube bearing four or five lobes which are closed in the bud and become separated on flowering, four or five spreading petals, an ovary commonly with four or five cells, and numerous many-ranked ovules containing a curved and ring-like embryo. There are over 100 species, all American, except one in Asia, and all tropical or subtropical. They are commonly hairy or woolly, and bear opposite feather-veined leaves, rather large cymose flowers, and roundish or pear-shaped berries, sometimes crowned with the calyx-lobes, often edible, and known as *guava*. See *guava* (with cut).

Psila (sī'lā), *n.* [NL. (Meigen, 1803), *< Gr. ψιλος, bare, naked, smooth, blank, mere*.] A notable genus of dipterous insects, typical of the family *Psilidae*, containing shining-black or rust-colored flies, the larvæ of which feed on the roots of plants. *P. rosæ* of Europe is a pest of the carrot and cabbage. See cut under *Psilidae*.

psilanthropic (sī-lan-thrō'pik), *a.* [*< psilanthropy + -ic*.] Of, pertaining to, or embodying psilanthropism. Coleridge, (Imp. Dict.)

psilanthropism (sī-lan'thrō-piz-m), *n.* [*< psilanthropy + -ism*.] The doctrine or belief of the mere human existence of Christ. [Rare.]

psilanthropist (sī-lan'thrō-pist), *n.* [*< psilanthropy + -ist*.] One who believes that Christ was a mere man; a humanitarian.

The schoolmen would perhaps have called you Unicists: but your proper name is *Psilanthropists*—believers in the mere human nature of Christ. Coleridge, Table-Talk, April 4, 1832.

psilanthropy (sī-lan'thrō-pi), *n.* [*< LGr. ψιλάνθρωπος, merely human, < ψιλος, bare, mere, + άνθρωπος, man.*] Same as *psilanthropism*.

Psilidæ (sil'i-dē), *n. pl.* [NL. (Loew), *< Psila + -idæ*.] A family of acalyptrate *Muscidæ*,

Loxocera cylindrica (much enlarged), one of the *Psilidæ*.

comprising a few small forms distributed in a half-dozen genera, of which *Psila* and *Loxocera* are the most notable.

Psilocephalinæ (sī-lō-sef'a-lī'nē), *n. pl.* [NL., *< Psilocephalus + -inæ*.] In Gill's classification, a subfamily of *Balistidæ*, with the vertebrae increased to 25 or 30, the anterior dorsal represented by a weak spine over the frontal region, and the branchial apertures in advance of the eyes. The only species is from East Indian seas.

Psilocephalus (sī-lō-sef'a-lus), *n.* [NL. (Swainson, 1839), *< Gr. ψίλος, bare, + κεφαλή, head*.] 1. The typical genus of *Psilocephalinæ*, contain-

Psilocephalus barbatus.

ing the fish otherwise known as *Anacanthus barbatus*.—2. In entom.: (a) A genus of dipterous insects. Zetterstedt, 1842. (b) A genus of coleopterous insects of the family *Pselaphidæ*. Raffray, 1877.

Psiloceras (sī-lōs'e-ras), *n.* [NL. (Hyatt, 1868), *< Gr. ψίλος, bare, + κέρας, horn*.] A genus of Jurassic ammonites of the family *Arietidæ*, to which, according to Hyatt, all the forms of true ammonites may be traced. *P. planorbis* is an example.

psiloceratite (sī-lō-ser'a-tit), *n.* [*< Psiloceras (-erat) + -ite*.] A fossil cephalopod of the genus *Psiloceras*.

Psilodermata (sī-lō-dēr'mā-tā), *n. pl.* Same as *Amphibia*, 2 (c).

psilodermatous (sī-lō-dēr'mā-tus), *a.* [*< Gr. ψίλος, bare, + δέρμα, skin*.] Having the skin naked (that is, not scaly), as an amphibian; of or pertaining to the *Psilodermata*.

psilology (sī-lōl'ō-jī), *n.* [*< Gr. ψίλος, bare, mere, + λογία, < λέγειν, speak: see -ology*.] Love of idle talk. Coleridge. [Rare.] Imp. Dict.

psilomelan (sī-lōm'e-lan), *n.* Same as *psilomelane*. Encyc. Brit., XV. 479.

psilomelane (sī-lōm'e-lān), *n.* [*< Gr. ψίλος, bare, + μέλας (melas), black*.] A hydrous oxid of manganese occurring in smooth botryoidal and stalactitic forms and massive, and having a color iron-black to steel-gray.

psilomelanitic (sī-lō-me-lan'ik), *a.* [*< psilomelane + -ic*.] Pertaining to or consisting of psilomelane.

The writer found in one of these (manganese nodules) . . . a total of 21.04 per cent. of the *psilomelanitic* part. Encyc. Brit., XV. 479.

Psilonotidæ (sī-lō-not'i-dē), *n. pl.* [NL., *< Pylonotus + -idæ*.] In Gill's system of classification, a family of gymnodont plectognath fishes, represented by the genus *Pylonotus*. They are among the smallest plectognaths, and inhabit tropical seas. The frontals are separated from the supraoccipital by the intervention of the postfrontals, which are connected together and laterally expanded but short; the ethmoid is prominent above, elongated and narrow forward; the vertebrae are few, about 8 + 9; the head is compressed, with a projecting attenuate snout, and the dorsal and anal fins are short and pauciradiate.

Pylonotus (sī-lō-nō'tus), *n.* [NL., *< Gr. πύλος, bare, + νότος, back*.] The typical genus of *Pylonotidæ*.

Psilopædes (sī-lō-pē-dēz), *n. pl.* [*< Gr. ψίλος, bare, naked, + παῖς (paîs), pl. παῖδες, child*.] In ornith., in Sundevall's system (1872), a primary group of birds, embracing those which are hatched naked and require to be fed in the nest by the parent. The term is nearly continuous

with *Altrices*, but of more exact signification. The antithesis is *Psilopædes* or *Dasyædes*. Also called *Gymnopædes*.

psilopædic (sī-lō-pē'dik), *a.* [*< Psilopædes + -ic.*] Of or pertaining to the *Psilopædes*: opposed to *ptilopædic* and *hæstogenous*. Also *gymnopædic*.

Psilophyton (sī-lof'i-ton), *n.* [NL., *< Gr. ψῖλος, bare, smooth, + φυτόν, a plant: see phytón.*] A genus of fossil plants considered by Dawson as being a connecting-link between the rhizocarps and lycopods, and so named by him in consequence of its partial resemblance to certain parasitic lycopods placed in the modern genus *Psilotum*. This plant is abundant in the Devonian of Gaspé Bay, Canada. Remains of plants referred to this genus by Lesqueroux are also said to have been found in both Ohio and Michigan: in the former case, in rocks of Lower Silurian age; in the latter, of Upper Silurian. The plant has also been found in the Devonian of England and Germany.

Psiloptera (sī-lop'te-rā), *n.* [NL. (Solier, 1833), *< Gr. ψῖλος, bare, naked, + πτερόν, wing, = E. feather.*] An important genus of buprestid beetles, comprising more than a hundred species, extremely variable in form, and found mainly in Africa and South America.

Psilorhinus (sī-lō-rī'nus), *n.* [NL. (Rüppell, 1831), *< Gr. ψῖλος, bare, + ῥίς (ῥιν-), nose.*] An American genus of *Corvidæ*, containing large magpie-like jays, of dark coloration, with very long graduated tail, crestless head, a stout bill, and naked nostrils; the smoky pies. There are several species, as the brown jay, *P. morio*. This bird inhabits Texas and Mexico, is smoky-brown, paler below, with bluish gloss on the wings and tail, the bill black or yellow, the length 16 inches, of which the tail is about one half.

Psilosomata (sī-lō-sō'ma-tā), *n. pl.* [NL., *< Gr. ψῖλος, bare, + σῶμα, body: see Psila.*] In De Blainville's classification (1825), a family of his *Aporobranchiata*, consisting of the genus *Phyllirhoë* alone. It was one of three families of pteropoda, contrasting with *Thecosomata* and *Gymnosomata*. It is now generally called *Phyllirhoëidæ* and referred to the nudibranchiata. See cut under *Phyllirhoë*.

philosopher (sī-lof'ō-fēr), *n.* [*< Gr. φιλόσοφος, mere, + σοφός, wise.*] A would-be or pretended philosopher; a sham sage; an incompetent or mean pretender to philosophy. [Rare.] *Imp. Dict.*

Psittaci (sit'a-sī), *n. pl.* [NL., *pl. of Psittacus.*] An order of birds, having the bill hooked and cerved, and the feet yoke-toed; the parrots, or the parrot tribe. This is one of the most natural and well-marked groups in ornithology, formerly referred to an "order" *Scansoria*. The feet are permanently zygodactyl by reversion of the fourth toe, and covered with rugose or granular scales or plates. The wings have ten primaries, and the tail has ten rectrices. The bill is strongly epignathous, and furnished with a naked or feathered cere. The tongue is thick and fleshy, sometimes peculiarly brushy, and may be used as an organ of tact or prehension; the upper mandible is peculiarly movable, and the beak is habitually employed in progression. The symphysis of the lower jaw is short and obtuse. The bony orbits of the eyes are often completed by union of the lacrymal with the postorbital process. The sternum is entire or simply fenestrated behind, and the clavicles are weak, sometimes defective or wanting. The lower larynx or syrinx is peculiarly constructed, with three pairs of intrinsic muscles. The plumage is shafted; the oil-gland is absent or present and tufted; there are no cæca and no gall-bladder; the carotid arteries are variable; the ambiens muscle is present, variable, or absent; the femorocaudal, semitendinous, and its accessory are present; the accessory femorocaudal is absent. The *Psittaci* are considered to represent only one family, *Psittacidae*; or two families, *Stringopidae* and *Psittacidae* (Sclater); or two families, *Palæornithidae* and *Psittacidae* (Garrod, Coues); or three families, *Psittacidae*, *Cacatuidæ*, and *Strigopidae* (Gray); or nine families, *Stringopidae*, *Phalacroptidae*, *Platyptericidae*, *Microptericidae*, *Trichoglossidae*, *Palæornithidae*, *Psittacidae*, *Coniuridae*, and *Poniidae*. There are upward of 400 species, inhabiting all tropical regions, but poorly represented in the temperate zones. They are chiefly frugivorous, and are sometimes called *frugivorous Raptores*. See the family names, and *coccylo, lory, lorikeet, love-bird, macaw, out-parrot, parakeet, and parrot*. Also called *Psittacinae*, *Psittacini*, and *Psittacomorphæ*.

psittacid (sit'a-sid), *n. and a.* I. *n.* A parrot, as a member of the *Psittacidae* in any sense.

II. *a.* Same as *psittacine*.

Psittacidae (sī-tas'i-dē), *n. pl.* [NL., *< Psittacus + -idæ.*] A family of *Psittaci*; the parrots. (a) The only family, continuous with the order. In this sense the *Psittacidae* are divided by Finch into 5 subfamilies: *Stringopinae*, owl-parrots; *Ptilotopinae*, cockatoos; *Sittacinae*, with numerous genera, both American and Old World; *Psittacinae*; and *Trichoglossinae*, the lorises. See cuts under *out-parrot, parrot, parakeet, Prioniturus*. (b) Restricted by exclusion of the owl-parrots and cockatoos, and divided into *Pezoporinae*, *Arinae*, *Lorinae*, *Trichoglossinae*, *Nedoninae*, and *Psittacinae*. G. R. Gray. (c) Restricted by exclusion of the *Palæornithinae* to *Psittaci* with two carotids, of which the left is normal, and divided into *Arinae*, *Pyrrhulinae*, *Platyptericinae*, and *Chrysomitriae*. Garrod; Coues. (d) Restricted to the gray African parrots of the genera *Psittacus* and *Coracopsis*. Reichenow.

psittacine (sit'a-sin), *a.* [*< LL. psittacinus, of or pertaining to a parrot, < psittacus, a parrot: see Psittacus.*] Parrot-like; resembling or related to parrots; of or pertaining to the *Psittaci* or *Psittacidae* in any sense; psittacomorphic. Also *psittacean*, *psittaceous*, *psittacid*.

Psittacini (sit'a-sī'ni), *n. pl.* [NL., *< Psittacus + -ini.*] Same as *Psittaci*.

psittacinite (sit'a-si-nit), *n.* [*< psittacine + -ite².*] A vanadate of lead and copper from Montana, occurring in thin crusts of a siskin or parrot-green color.

Psittacirostra (sit'a-si-ros'trā), *n.* [NL., *< L. psittacus (< Gr. ψιττακός, a parrot, + rostrum, beak).*] A remarkable genus of Hawaiian birds of the family *Dicæidæ*, having a stout festooned bill. The only species is the parrot-billed grosbeak, *P. psittacea*. Originally *Psittirostra*. Temminck, 1820. Also called *Psittacops*, *Psittacina*.

Psittacomorphæ (sit'a-kō-mōr'fē), *n. pl.* [NL. (Huxley, 1867), *< Gr. ψιττακός, a parrot, + μορφή, form.*] A superfamily of desmognathous carinate birds, established by Huxley in 1867, corresponding to the order *Psittaci*. The technical characters used in defining the group are the arched and hooked rostrum, regularly articulated with the skull; no basipterygoid processes; movable, vertically elongated palatines; spongy maxillopalatines; lacrymal and postorbital processes approximated or united; quadrate bone with a small orbital and single mandibular facet; mandibular ramus deep, with rounded truncate symphysis; sternum unnotched or single fenestrated; clavicles weak and separate, or wanting; tarsometatarsus short, broad, with two articular facets on its outer distal end, for jointing with the reversed fourth digit; syringeal muscles three pairs; contour-feathers aftershafted, and oil-gland with a cirlet of feathers when present.

psittacomorphic (sit'a-kō-mōr'fik), *a.* [*< Psittacomorphæ + -ic.*] Having the structure of a parrot; belonging to the *Psittacomorphæ*; psittacine.

Psittacula (sī-tak'ū-lā), *n.* [NL. (Brisson, 1760), dim. of *Psittacus*, *q. v.*] A genus of *Psittacidae*, sometimes made the type of a subfamily *Psittaculinae*, containing the pygmy parrots of various countries, some of which are commonly known as *love-birds*, and including in its different applications a large number of small species with short tail and mostly green coloration. (a) American parrots, such as *P. passerina* and sundry other small species. Illiger, 1811. (b) African species of small size, as *P. pullaria* or *P. roseicollis*, now placed in *Agapornis*. These are the love-birds proper. (c) Various small Indian, Philippine, Papuan, and Australian parrots, among them species of *Loriculus* and *Nasirina*.

Psittaculinae (sī-tak'ū-lī'nē), *n. pl.* [NL., *< Psittacula + -inæ.*] A subfamily of *Psittacidae*, named from the genus *Psittacula*.

Psittaculus (sī-tak'ū-lus), *n.* [NL., dim. of *Psittacus*, *q. v.*] 1. Same as *Psittacula* (a). Spix, 1824.—2. Same as *Psittacula* (c), or *Loriculus*. Swainson, 1837.

Psittacus (sit'a-kus), *n.* [NL., *< L. psittacus, < Gr. ψιττακός, also ψιττάκη (also βιττακος, ψιττάκη), a parrot; prob. of foreign origin.*] A Linnean genus of *Psittaci*, formerly continuous with the order, subsequently variously restricted, now usually confined to the gray African parrots, or jackos (as *P. erithacus*, in which the plumage is grayish, with a short square red tail), which are among the commonest cage-birds. See cut under *parrot*.

psittaket, *n.* [ME. *psitake*; *< L. psittacus, < Gr. ψιττακός, a parrot: see Psittacus.*] A parrot.

And there ben manye Popegayes, that thei clepen *Psittakes* in hire Langage. Mandeville, Travels, p. 274.

Psittirostra (sit-i-ros'trā), *n.* [NL.] Same as *Psittacirostra*.

psoadic (sō-ad'ik), *a.* [*< psos (assumed stem psosad-) + -ic.*] Of or pertaining to the psos muscles; psosic; as, the psosic plexus. Owen.

psos (sō'as), *n.* [NL., prop. *psos* (the form *psos* being perhaps due to a genitive *psos*), *< Gr. ψῶς, also ψῶς, usually in pl. ψῶες, ψῶα, a muscle of the loins.*] A muscle of the loins and pelvis; the tenderloin.—**Psos abscess**, a burrowing abscess formed by caries of the spine, and confined by the sheath of the psos magnus muscle.—**Psos magnus**, a large fusiform muscle situated within the abdomen at the side of the bodies of the lumbar vertebrae, from which it takes its origin, and inserted with the iliacus into the trochanter minor of the femur. It helps to form the iliopsoas. Also called *psos major lumbaris*, and *magnipsoas*. See cut 3, c, under *muscle*, and *tenderloin*.—**Psos major**. Same as *psos magnus*.—**Psos parvus**, a small muscle, frequently absent in man, lying on the front and inner side of the psos magnus, and inserted into the brim of the pelvis by a long tendon. Also called *parvipsoas*.

psosic (sō-at'ik), *a.* [*< psos (assumed stem psosad-) + -ic.*] Of or pertaining to the psos muscles; psosic.

Psocidæ (sōs'i-dē), *n. pl.* [NL. (Stephens, 1836), *< Psocus + -idæ.*] An important family of pseu-

doneuropterous insects, typified by the genus *Psocus*, having an oval body, a free head, and a small prothorax. The wings when present are of unequal size, the hind pair being smaller. The tarsi are two- or three-jointed. It comprises two subfamilies, the *Atropinae* and *Psocinae*. The former contains wingless species, such as *Atropos divinatoria*, the common book-louse, and *Clothella pulicaria* (formerly *Atropos pulicaria*), the death-watch, while the latter contains a host of small winged forms which feed upon lichens, fungi, and decaying vegetation. Also *Psocina*. See cut under *death-watch*.

psocine (sō'sin), *a.* [*< Psocus + -inæ.*] Of or pertaining to the *Psocidæ* or *Psocina*, especially to the subfamily *Psocinae*.

Psocus (sō'kus), *n.* [NL. (Latreille, 1797), appar. for **Psocus*, *< Gr. ψῶχειν, rub in pieces* (cf. deriv. *ψῶχος, dust, sand*); cf. **ψῶειν, collat. form of ψῶν, rub away, grind.*] A large and wide-spread genus of pseudoneuropterous insects, typical of the family *Psocidæ*. The species have ocelli, and the wings are well developed. *P. venosus* is often found in decaying cotton-bolls in the southern United States.

psosis (sō'i'tis), *n.* [NL., *< psos + -itis.*] Inflammation of the psos muscle.

Psolidæ (sōl'i-dē), *n. pl.* [NL. (Forbes, 1841), *< Psolus + -idæ.*] A family of dendrochiroton dipneumonous holothurians, typified by the genus *Psolus*, having branching tentacles, a pair of water-lungs, polar mouth and anus, uniserial pedicels, separate sexes, and Cuvierian organs.

Psolus (sō'lus), *n.* [NL. (Oken), *< Gr. ψῶς, circumscribed.*] The typical genus of *Psolidæ*, having the dorsal ambulacra atrophied.

Psophia (sō'fi-ā), *n.* [NL., *< Gr. ψόφος, any articulate noise.*] The only genus of *Psophidæ*, containing several species, the best-known of which is *P. crepitans*, the trumpeter, agami, or yakamik. See cut under *agami*.

Psophidæ (sō'fi-i-dē), *n. pl.* [NL., *< Psophia + -idæ.*] A family of gruiform or geranomorphic gallatorial birds, represented by the genus *Psophia*; the trumpeters or agamis. They are confined to South America. The family is isolated, to some extent combining the characters of cranes and rails, and having some relationship with the seriema and kagu. The *Psophidæ* share with tinamous the remarkable character of a chain of suborbital bones. The sternum is entire; the pteryloids are crane-like; the legs are long, and the bill is stout, shaped somewhat as in gallinaceous birds; the plumage of the head and neck is short and velvety, that of the rump long and flowing. Also *Psophidæ*.

psora (sō'rā), *n.* [NL., *< L. psora, < Gr. ψώρα, the itch, mange, < *ψῶειν, ψῶν, rub.*] Same as *scabies*.

Psoralea (sō-rā-lē-ā), *n.* [NL. (Linneus, 1753), so called in allusion to the glands or dots sprinkled over their surface; *< Gr. ψωρίαξ, scurfy, scabby, mangy, < ψῶρα, the itch, mange: see psora.*] A genus of leguminous herbs and shrubs of the tribe *Galegeæ*, the type of the subtribe *Psoralieæ*, characterized by an ovary with one ovule, an indehiscent pod with its seed adherent, and entire calyx-lobes which are unchanged in fruit. There are about 105 species—over 40 in South Africa, 30 in North America, and others in both tropical and temperate regions. They are peculiar in their glandular-dotted herbage, and bear compound leaves usually of three leaflets, and purple, blue, red, or white flowers, in heads or spikes, or variously clustered. Many species have been cultivated on account of their flowers, both for the lawn and for the greenhouse. *P. esculenta*, of the plains from the Saskatchewan to Texas, yields an edible tuberous root, known as *pomme de prairie, pomme blai che, prairie-turnip, prairie-apple, Cree potato, or Missouri bread-root*. Its introduction into Europe as an esculent was unsuccessfully attempted at the time of the potato-rot. It is a rough-hairy plant with palmate leaves and dense oblong spikes of purplish flowers, and once yielded a great part of the food of the Indians. *P. lupinillus* is the small lupine of southern pine-barrens, a slender plant with violet flowers. *P. bituminosa* is the bitumen-trefoil, an evergreen shrub of the south of Europe. *P. glandulosa* is the Jesuit's tea or Mexican tea, known in Chili as *culen*, and there used to form a medicinal drink, also as a purgative and for poultices. For *P. corylifolia*, see *bauchman-seed*.

psoriasis (sō-rī'ā-sis), *n.* [NL., *< Gr. ψωρίασις, the itch, < ψωριῶν, have the itch, < ψῶρα, the itch, mange: see psora.*] A chronic non-contagious skin-disease, characterized by reddish, slightly elevated, dry patches of varying size, shape, and number, covered with whitish or grayish imbricated scales. The upper stratum and papillæ of the corium become infiltrated with leucocytes, the lower part of the epidermis becomes overgrown, cornification of the surface is interfered with, and the cells become loosened. Psoriasis is found chiefly on extensor surfaces—elbows, knees, back, and scalp—not on mucous surfaces.—**Psoriasis annularis** or *circinata*, patches of psoriasis which have healed in the center, but are progressing at the edges.—**Psoriasis diffusa**, patches of psoriasis of very irregular shapes.—**Psoriasis guttata**, psoriasis with drop-like nodules, of the size of peas.—**Psoriasis gyrata**, patches similar to psoriasis circinata, except that the edges take on a wavy, festooned, or figured shape.—**Psoriasis linguae**. Same as *leucophrasia*.—**Psoriasis nummularis**, patches of psoriasis of the size and shape of small coins.—**Psoriasis palmaris**, psoriasis affecting the palms of the hands.—**Psoriasis punctata**, an early stage of psoriasis, with a small pinhead eruption.

psoric (sô'rik), *a.* and *n.* [*Gr.* ψωρίς, itchy, mangy, < ψώρα, the itch, mange; see *psora*.] *I. a.* Pertaining to psora or scabies.

If the *Psoric* theory has led to no proper schism, the reason is to be found in the fact that it is almost without any influence in practice.

Quoted in O. W. Holmes's *Med. Essays*, p. 83.

II. n. A remedy for the itch.

psoroid (sô'roid), *a.* [*Gr.* ψωροειδής, ψωρόδης, like the itch, < ψώρα, the itch, mange, + εἶδος, form; see *psora*.] Similar to, or relating to, psora or scabies.

psorophthalmia (sô-rof-thal'mi-ä), *n.* [*NL.*, < *Gr.* ψώρα, the itch, mange, + ὀφθαλμία, a disease of the eyes; see *ophthalmia*.] Inflammation of the eyelids, especially along the margins.

psorophthalmic (sô-rof-thal'mik), *a.* [*Gr.* ψωροφθαλμια + *-ic*.] Pertaining to or affected with psorophthalmia.

psorosperm (sô-rô-spêrm), *n.* One of the psorospermiæ.

The *psorospermiæ* of J. Müller are the spores of *Myxosporidia*. E. R. Lankester, *Encyc. Brit.*, XIX. 855.

psorospermia (sô-rô-spêr'mi-ä), *n. pl.* [*NL.*, < *Gr.* ψωρός, itchy, mangy (< ψώρα, the itch, mange), + σπέρμα, seed.] Certain vesicular, usually caudate, bodies that occur as parasites in the bodies of various animals. Their nature is questionable; some are probably embryonic *Gregarinidæ*; others may be different organisms.

psorospermial (sô-rô-spêr'mi-äl), *a.* [*Gr.* ψωροσπέρμια + *-al*.] Same as *psorospermic*.

psorospermic (sô-rô-spêr'mik), *a.* [*Gr.* ψωροσπέρμια + *-ic*.] Of the nature of psorospermia; composed of psorospermiæ.

psorous (sô'rus), *a.* [*Gr.* ψωρός, itchy, mangy; see *psora*.] Affected by psora or the itch.

psychal (sî'kal), *a.* [*Gr.* ψυχή, 2, + *-al*.] Pertaining to the soul; spiritual; psychic. [Rare.]

All excitements are, through a *psychal* necessity, transient. Poe, *The Poetic Principle*.

psychalgia (sî-kal'ji-ä), *n.* [*NL.*, < *Gr.* ψυχή, soul, + ἄλγος, pain.] The painful feeling attending mental action observed in melancholia.

Psyche (sî'kô), *n.* [*L.* *Psyche* (in myth.), < *Gr.* ψυχή, breath, spirit, life, the spirit, soul, mind, etc., also a departed spirit, ghost, etc., also a butterfly or moth as the symbol of the soul, < ψύχειν, breathe, blow.] *1.* In *classical myth.*, the personified and deified soul or spirit, the beloved of Eros, by whom she was alternately caressed and tormented. She was considered as a fair young girl, often with the wings of a butterfly, and the butterfly was her symbol.

Cupid (Eros) and Psyche.—Capitoline Museum, Rome.

2. [i. c.] The human soul or spirit or mind.

Psychology is the science of the *psyche* or soul.

New Princeton Rev., v. 272.

3. The 16th planetoid, discovered by De Gasparis at Naples in 1852.—*4.* In *zool.*: (*a.*) In *entom.*, a genus of bombycid moths, erected by Schrank in 1801 (after Linnaeus, 1735), and typical of the family *Psychidæ*. They have wingless females, and males with wings which scarcely reach beyond the tip of the abdomen. About 70 species are known, nearly all of which are European, one belonging to Australia and one to Ceylon. (*b.*) In *conch.*, a genus of gymnosomatous pteropods of the family *Eurydidæ*. Also called *Halopsyche*.—*5.* [*i. c.*] In *anat.*, the cerebrospinal nervous system: in Haeckel's vocabulary applied to the brain and spinal cord as the physiological center of the nervous system, in the activities of which he supposed the soul or spirit to subsist. In this use of the term, the *psyche* is divided into *protopsyche* (forebrain), *deutopsyche* (middle-brain), *mesopsyche* (mid-brain), *metapsyche* (hind-brain), *epipsyche* (after-brain, or medulla oblongata), and *notopsyche* (the spinal cord).

6. [*i. c.*] A large mirror, in which the whole person can be seen, usually hung on pivots at the sides, the whole being supported in a movable frame.

psyche-glass (sî'kô-glâs), *n.* Same as *psyche*, 6.

psychometry (sî-kô-om'e-tri), *n.* [*NL.* *psychometria* (Wolf), irreg. < *Gr.* ψυχή, soul, mind, + μέτρον, measure. Cf. *psychometry*.] The mathematical theory of mental phenomena.

psychiater (sî'ki-ä-têr), *n.* [*Gr.* ψυχή, soul, mind, + ιατρός, a physician, < ἰάσθαι, cure, heal; see *iatric*.] One who treats diseases of the mind; an alienist.

psychiatra (sî'ki-ä'tri-ä), *n.* [*NL.*: see *psychiatry*.] Same as *psychiatry*.

psychiatric (sî'ki-ä'trik), *a.* [*Gr.* ψυχιατρικ + *-ic*.] Of or pertaining to or connected with psychiatry.

psychiatrical (sî'ki-ä'tri-kal), *a.* [*Gr.* ψυχιατρικ + *-al*.] Same as *psychiatric*. *Allen and Neurol.*, IX. 449.

psychiatrist (sî'ki-ä'trist), *n.* [*Gr.* ψυχιατρικ + *-ist*.] One who practises psychiatry; a psychiatrist.

psychiatry (sî'ki-ä'tri), *n.* [*NL.* *psychiatria*, < *Gr.* ψυχή, soul, + ιατρεια, a healing, < ἰατρεῖν, heal, < ἰατρός, a healer, physician.] The treatment of mental diseases.

psychic (sî'kik), *a.* and *n.* [= *F.* *psychique*, < *Gr.* ψυχικός, pertaining to the soul or to life, also (> *LL.* *psychicus*), pertaining to mere animal life, carnal, < ψυχή, soul, life, mind; see *Psyche*.] *I. a.* 1. Of or belonging to the human soul or mind; mental; spiritual; psychological.

A good third of our *psychic* life consists in these rapid premonitory perspective views of schemes of thought not yet articulated. W. James, *Mind*, ix. 15.

2. Pertaining to the science of mind: opposed to *physical*: as, *psychic* force.—*3.* Pertaining to the class of extraordinary and obscure phenomena, such as thought-reading, which are not ordinarily treated by psychologists: as, *psychic* research.—*4.* Pertaining to the lower soul, or animal principle, and not to the spirit, or higher soul.

The *psychic*, or animal, man is the natural man of this present age. *Bibliotheca Sacra*, XLVI. 899.

Psychic force, a supposed power or influence, not physical or mechanical, exhibiting intelligence or volition, and capable of causing certain so-called spiritualistic phenomena: so named by William Crookes in 1871.

II. n. A person specially susceptible of *psychic* impressions, or subject to *psychic* force; a medium; a sensitive. [Recent.]

psychical (sî'ki-kal), *a.* [*Gr.* ψυχικ + *-al*.] Same as *psychic*.

Hence the right discussion of the nature of price is a very high metaphysical and *psychical* problem. *Ruskin*.

Psychical excitation, an idea considered as the cause of another idea by virtue of an association: so called to express the hypothesis that there is some scientific analogy between this phenomenon and the excitation of a peripheral nerve by a physical excitation.—**Psychical research**, experimental and observational research into alleged phenomena apparently implying a connection with another world, or faculties unknown to psychologists.

psychically (sî'ki-kal-i), *adv.* In a *psychical* manner; with reference to the mind; in connection with or by effect upon the mind: opposed to *physically*.

psychics (sî'kiks), *n.* [*Pl.* of *psychic* (see *-ics*).] The science of psychology, or the investigation of mind; especially, the doctrine of those who reject the methods of the psychophysicists and favor those of the advocates of *psychical* research.—**Mathematical psychics**, the application of mathematics to the moral sciences.

Psychidæ (sî'ki-dê), *n. pl.* [*NL.* (Boisduval, 1829), < *Psyche*, 4 (*a.*) + *-idæ*.] A family of bombycid moths, including forms which have case-bearing larvae and wingless females. It is not a well-defined group, and its genera may be divided among several other families. As at present accepted, the family is of wide distribution, and comprises about 20 genera. The common bag-worm of the United States, *Thyridopteryx ephemeraformis*, is a representative form. See *cut* under *bag-worm*.

psychism (sî'kizm), *n.* [*Gr.* ψυχή, soul, + *-ism*.] *1.* The doctrine that there is a fluid diffused throughout all nature, animating equally all living and organized beings, and that the difference which appears in their actions comes of their particular organization. *Fleming*.—*2.* The character of being *psychic* or mental.

There can be no question that the world-object furnishes overwhelming proof of *psychism*. *Contemporary Rev.*, L. 64.

psychist (sî'kist), *n.* [*Gr.* ψυχή (see *psyche*, 2) + *-ist*.] One who engages in *psychical* research; especially, one who holds the doctrines of *psychics* or of *psychic* force in any form.

psychoblast (sî'kô-blást), *n.* [*Gr.* ψυχή, soul, mind, + βλαστός, a germ.] The germ from which a soul is developed.

Instead of the association of mental atoms, we are coming to the idea of segmentation of a *psychoblast*, if we may invent such a term. *Athenæum*, No. 3193, p. 12.

Psychoda (sî-kô-dä), *n.* [*NL.* (Latreille, 1796), < *Gr.* ψυχή, a butterfly (see *Psyche*), + εἶδος, form.] A genus of dipterous insects, typical of the family *Psychodidæ*, comprising small light-colored flies which live as larvae in dung and decaying vegetation, as *P. phalænoides*. Only a few species are known, two of which inhabit North America.

psychodectic (sî-kô-dek'tik), *a.* [*Gr.* ψυχοδακτής, destroying the soul, < ψυχή, soul, + δακτός, < δαίω, cleave, slay.] Soul-destroying.

Psychodidæ (sî-kô-dî-dê), *n. pl.* [*NL.* (Zetterstedt, 1842), < *Psychoda* + *-idæ*.] A small family of nemocorous dipterous insects, allied to the *Tipulidæ*, represented in Europe by ten small genera, and in North America by only two species of the typical genus *Psychoda*.

psychodometer (sî-kô-dom'e-têr), *n.* [*Gr.* ψυχή, soul, mind, + ὄδος, way, process, + μέτρον, measure.] An instrument for measuring the duration of mental processes.

psychodynamic (sî'kô-dî-nam'ik), *a.* [*Gr.* ψυχή, soul, mind, + δύναμις, power; see *dynam-ic*.] Pertaining to psychodynamics.

psychodynamics (sî'kô-dî-nam'iks), *n.* [*Pl.* of *psychodynamic* (see *-ics*).] The science of the laws of mental action.

psycho-ethical (sî-kô-eth'i-kal), *a.* [*Gr.* ψυχή, soul, mind, + ἠθικός, ethical; see *ethic*, *ethical*.] Of or pertaining to inborn moral notions.

psychogenesis (sî-kô-jen'e-sis), *n.* [*NL.*, < *Gr.* ψυχή, soul, mind, + γένεσις, origin.] *1.* The origination and development of the soul, or *psychic* organism.

Psychogenesis . . . teaches that instinct is organized experience, i. e. undiscursive intelligence.

G. H. Lewes, *Proba. of Life and Mind*, I. i. § 21.

It interests the psychologist as an important chapter in the study of mind, its *psychogenesis*. *Science*, VI. 435.

2. Generation or reproduction by means of or due to the activity of the inmost life or vitality of an organism; biogenesis referred to the operation of higher than vital forces.

Specific change must be, above all, due to the action of an organism's innermost life: that is to say, it must be a result of a process of *psychogenesis*.

Mivart, *The Forum*, VII. 102.

psychogenetical (sî'kô-jê-net'i-kal), *a.* [*Gr.* ψυχογενετικός, after *genetical*.] Pertaining to the formation of the mind by development.

psychogenetically (sî'kô-jê-net'i-kal-i), *adv.* In reference to the theory of the origin of the mind.

psychogeny (sî-kô-jê-ni), *n.* [*Gr.* ψυχή, soul, mind, + γένεσις, producing; see *-geny*.] *1.* The development of mind.—*2.* The theory of the development of mind.

Psychogeny will show us that color, heat, etc., are, from one point of view, both in the objects and in us.

G. H. Lewes, *Proba. of Life and Mind*, I. ii. § 82.

psychogonic (sî-kô-gon'ik), *a.* [*Gr.* ψυχογονικός + *-ic*.] Same as *psychogenetical*.

psychogonical (sî-kô-gon'i-kal), *a.* [*Gr.* ψυχογονικός + *-al*.] Same as *psychogenetical*.

The controversy between the *psychogonical* and *introspective* methods of studying mind.

H. Stodwick, *Mind*, XI. 211.

psychogony (sî-kô-gô-ni), *n.* [*Gr.* ψυχογονία, the generation of the soul, < ψυχή, soul, mind, + γονία, < γονος, generation; see *-gony*.] The doctrine of the development of mind.

Psychogony . . . endeavors to interpret the genesis of intellectual faculties and emotional feelings in the race, and their slow modifications throughout countless generations.

J. Fiske, *Cosmic Philos.*, i. 221.

It deals rather with *psychogony*, or how mind came to be what it is, than with psychology, or the description of mind as it is.

Athenæum, No. 3066, p. 235.

psychograph (sî'kô-gráf), *n.* [*Gr.* ψυχή, soul, mind, + γράφειν, write.] An instrument or machine used in psychography. Several kinds are in use. A common one consists of a light, freely movable bar or pointer pivoted on a board upon which the letters of the alphabet are printed in a circle, the movement of the pointer spelling out words. The planchette is a kind of psychograph.

psychographic (sî-kô-graf'ik), *a.* [*Gr.* ψυχογραφικός + *-ic*.] Of or pertaining to psychography.

psychography (sî-kô-gra-fi), *n.* [*Gr.* ψυχή, soul, mind, + γράφειν, write.] *1.* The natural history of mind; the description of the phenomena of mind: a branch of psychology.—*2.* Supposed "spirit-writing" by the hand of a medium; the supposed transmission of a spirit's thought in writing by the hand of a medium, either directly or by means of an instrument.

psychol. An abbreviation of *psychology*.
psychologic (si-kō-loj'ik), *a.* [= F. *psychologique* = Sp. *psicológico*; as *psychology* + *-ic*.] Same as *psychological*.

psychological (si-kō-loj'i-kal), *a.* [*< psychologic* + *-al*.] Of or pertaining to psychology; of the nature of psychology; of or pertaining to the mind as the subject of psychology.

Shakespeare was pursuing two Methods at once; and, besides the *Psychological Method*, he had also to attend to the Poetical. . . . We beg pardon for the use of this insolens verbum; but it is one of which our Language stands in great need. We have no single term to express the Philosophy of the Human Mind, and, what is worse, the Principles of that Philosophy are commonly called *Metaphysical*, a word of very different meaning.

Coleridge, *Method*, § 2.

Doubt of it [personal identity] in a sane person is a *psychological impossibility*.

H. B. Smith, *Christian Theology*, p. 171.

Psychological materialism, the doctrine that intelligence is a consequent of matter.

psychologically (si-kō-loj'i-kal-i), *adv.* [*< psychological* + *-ly*.] In a psychological manner; from a psychological point of view; by psychological methods.

psychologies (si-kō-loj'iks), *n.* [Pl. of *psychologic* (see *-ics*).] Psychology; metaphysics.

Five thousand crammed octavo pages

Of German *psychologies*.

Shelley, *Peter Bell the Third*, vi. 14.

psychologist (si-kol'ō-jist), *n.* [= F. *psychologue*; as *psychology* + *-ist*.] One who studies, writes on, or is versed in psychology.

psychologize (si-kol'ō-jiz), *v.*; pret. and pp. *psychologized*, ppr. *psychologizing*. [*< psychology* + *-ize*.] I. *intrans.* To make psychological speculations; investigate or reason psychologically.

Why, since the feeling has no proper subjective name of its own, should we hesitate to *psychologize* about it as "the feeling of that relation"? W. James, *Mind*, ix. 5.

II. *trans.* To hypnotize or mesmerize. [Recent.]

Is the non-concurrence of the obstinate jurymen in a righteous verdict owing to an honest conviction, or has he been unconsciously *psychologized* by the lawyer who has the biggest fee in his pocket?

Atlantic Monthly, LVIII. 592.

psychologue (si-kō-loj), *n.* [*< F. psychologue* = Sp. *psicólogo*, *< Gr. ψυχή*, soul, mind, + *-λογία*, *< λέγειν*, speak: see *-ology*.] A psychologist.

psychology (si-kol'ō-jī), *n.* [= F. *psychologie* = Sp. *psicología*, *sicología* = Pg. *psicologia* = It. *psicologia* = G. *psychologie*, *< NL. psychologia* (Melanchthon), *< Gr. ψυχή*, soul, mind, + *-λογία*, *< λέγειν*, say, speak: see *-ology*.] The science of the phenomena of mind; mental science. It is said to have originated with Pythagoras. Aristotle greatly improved it, and stated its most important principle, that of the association of ideas. It has, however, only recently taken the position of a universally acknowledged science; and its methods are still in dispute. Some psychologists hold that we know the mind by direct intuition in consciousness; others, distinguishing between consciousness and self-consciousness, hold that the former involves no recognition of the mind, while the latter is not an original power, but only acquired knowledge. But, though such inward vision be denied, most psychologists still consider the observation of what passes within us as the main foundation for psychology. Others regard introspection as too deceptive to be of much use, and some deny its possibility. A few psychologists only, since Descartes, have held that the distinctions we naturally draw about mental functions—as, for example, between thinking and willing—have, in good part at least, a real significance. The great majority have denied this, explaining that the faculties are nothing in the soul (which itself has no parts), but are mere conveniences of description. Nevertheless, these writers are accused by many modern psychologists of practically assuming that our natural ideas of mind are in some approximate harmony with the facts of mind, just as physicists assume that among the conceptions which appear simple and natural to man are likely to be found those that are embodied in laws of nature. The prevalent school of modern psychologists attributes great importance to systematic experimentation by one person upon another, especially to quantitative determinations, as of the time occupied in different mental processes, the force required to produce sensations of given intensity, and the like; yet some of the older generation predict that the utility of this method will be found to have narrow limits. Psychology has also been pursued by means of extensive observations upon persons in abnormal mental states, upon persons having some mental peculiarity, upon the development of the minds of children, upon the languages, institutions, mythology, and arts of different races, and by means of the comparative study of biography. Psychology has often been divided into psychography, psychonomy, and psychoscopy. See the somewhat deceptive quotation from Coleridge, 1817, under *psychological*, and the first quotation below.

Under the general term [psychology] I also comprehend natural theology and *psychology*, which in my opinion have been most unaturally disjoined by philosophers. G. Campbell, *Philos. of Rhet.* (1776), I. v. 2.

Psychology, or the Philosophy of the Human Mind, strictly so denominated, is the science conversant about

the phenomena, or modifications, or states of the Mind, or Conscious-Subject, or Soul, or Spirit, or Self, or Ego.

Sir W. Hamilton, *Metaphysics*, vii.

Abstract psychology, the account of the general phenomena of the human mind, their classification, and laws. — **Comparative psychology**, the study of mental phenomena in different kinds of animals, including man. — **Criminal psychology**, the study of psychology in relation to crime. — **Empirical psychology**, psychology studied by means of observation. — **Evolutional psychology**, the account of the development of mind. — **Experimental psychology**, psychology studied largely by the method of experiment. — **Infant psychology**, the study of the development of mind in children. — **Introspective psychology**, psychology resting mainly on self-observation. — **Mathematical, nomological psychology**. See the adjectives. — **Objective psychology**, psychology resting mainly upon observations of minds other than that of the observer. — **Physiological psychology**, the physiology of psychical functions. — **Rational psychology**, the deduction of certain characters of the mind from certain others assumed as axiomatic. — **Scientific psychology**, psychology based on well-considered methods in harmony with those of the physical sciences.

psychomachy (si-kom'a-ki), *n.* [*< Gr. ψυχομαχία*, desperate fighting, *< ψυχομαχεῖν*, fight to the death, *< ψυχή*, soul, life, + *μάχεσθαι*, fight.] A conflict of the soul with the body.

psychomancy (si'kō-man-si), *n.* [*< Gr. ψυχή*, soul, mind, + *μαντεία*, divination. Cf. *ψυχομαντεῖον*, a place where the souls of the dead were conjured up.] 1. Divination by consulting the souls of the dead; necromancy. — 2. A mysterious influence of one soul upon another.

psychomantic (si-kō-man'tik), *a.* [*< psychomancy* (see *-mancy*) + *-ic*.] Of or pertaining to psychomancy.

psychometric (si-kō-met'rik), *a.* [*< psychometr-y* + *-ic*.] Pertaining to psychometry.

psychometrical (si-kō-met'ri-kal), *a.* Same as *psychometric*.

psychometrize (si-kō-met'ri-z), *v. t.*; pret. and pp. *psychometrized*, ppr. *psychometrizing*. [*< psychometr-y* + *-ize*.] To practise psychometry on, as a letter or photograph.

psychometry (si-kō-met'ri), *n.* [*< Gr. ψυχή*, soul, mind, + *-μετρία*, *< μέτρον*, measure.] 1. The power, fancied to be possessed by some sensitive persons, of catching impressions from contact which enable them to describe the properties of medicines, the vital forces of any part of the human constitution, the character, physiological condition, etc., of persons whose autographs or photographs are touched, and the scenes associated with any substance investigated. J. R. Buchanan, 1842. — 2. The measurement of the duration of psychic processes.

Psychomorpha (si-kō-mōr'fā), *n.* [NL. (Harris, 1839), *< Gr. ψυχή*, butterfly (see *Psyche*), + *μορφή*, form.] A genus of bombycid moths of the family *Lithosiidae*, having the body slender, and pilose at the apex, palpi porrect, antennae simple in the female, shortly pectinate in the male. The sole species is *P. epimenis*, of North America, commonly called the *grape-vine epimenis*, of considerable economic importance from the damage its larva does in

Grape-vine Epimenis (*Psychomorpha epimenis*), natural size.

drawing together and destroying the terminal shoots of the vine in early summer. The moth is velvety-black, with a white patch on the front wings, and an orange or brick-red blotch on the hind wings.

psychomotor (si'kō-mō-tor), *a.* [*< Gr. ψυχή*, soul, mind, + *L. motor*, mover.] Pertaining to such mental action as induces muscular contraction. — **Psychomotor centers**, the areas of the cortex about the central fissure immediately related to muscular action. — **Psychomotor nerve-fibers**, the fibers passing downward from the psychomotor centers to the points of origin of the motor nerves.

psychoneurology (si'kō-nū-rōl'ō-jī), *n.* [*< Gr. ψυχή*, soul, mind, + *νεῦρον*, nerve, + *-λογία*, *< λέγειν*, speak: see *-ology*.] That part of neurology which deals with mental action.

psychoneurosis (si'kō-nū-rō'sis), *n.* [NL., *< Gr. ψυχή*, soul, + NL. *neurosis*, q. v.] Mental disease without recognizable anatomical lesion, and without evidence and history of preceding chronic mental degeneration. Under this head come melancholia, mania, primary acute dementia,

and mania hallucinatoria. These cases issue in recovery, or in secondary dementia or imbecility of various grades.

psychonomy (si-kon'ō-mī), *n.* [*< Gr. ψυχή*, soul, mind, + *νομία*, name.] The science of the laws of mental action: one of the branches of psychology in many of the older systems.

psychonosology (si'kō-nō-sol'ō-jī), *n.* [*< Gr. ψυχή*, soul, mind, + *νόσος*, disease, + *-λογία*, *< λέγειν*, speak: see *-ology*.] That branch of medical science which treats of the nature and classification of mental disease.

psychopannychism (si-kō-pan'i-kizm), *n.* [*< Gr. ψυχή*, soul, mind, + *πᾶννυχος*, all night long (*< πᾶς*, *πᾶν*, all, + *νύξ* (*νυκτ*), night), + *-ισμός*.] The theological doctrine that at death the soul falls asleep, and does not awake till the resurrection of the body.

psychopannychist (si-kō-pan'i-kist), *n.* [*< psychopannychism* + *-ist*.] One who holds to the doctrine of psychopannychism.

The Sadducees might deny and overthrow the resurrection against Christ, or the *Psychopannychists* the soul's immortality.

Ep. Gauden, *Tears of the Church*, p. 288. (Davies.)

psychoparesis (si-kō-par'e-sis), *n.* [NL., *< Gr. ψυχή*, soul, mind, + *πάρεσις*, paralysis: see *pare-sis*.] Mental weakness.

psychopath (si'kō-path), *n.* [*< psychopath-ic*.] A morally irresponsible person.

psychopathic (si-kō-path'ik), *a.* and *n.* [*< psychopath-y* + *-ic*.] I. *a.* 1. Pertaining to or of the nature of psychopathy. — 2. Pertaining to the cure of the sick by psychic means.

II. *n.* An insane or nearly insane patient.

psychopathist (si-kō-p'a-thist), *n.* [*< psychopath-y* + *-ist*.] A physician for psychopathy; an alienist.

psychopathy (si-kō-p'a-thi), *n.* [*< Gr. ψυχή*, soul, mind, + *πάθος*, disease.] 1. Derangement of the mental functions. This is a slightly more extensive word than *insanity*, as the latter is not usually applied to idiocy, and is often reserved for disorder of a certain considerable grade of intensity.

2. The cure of the sick by psychical influence.

psychophysical (si-kō-fiz'ik), *a.* [*< Gr. ψυχή*, soul, mind, + *φυσικός*, physical: see *physic*.] Same as *psychophysical*.

psychophysical (si-kō-fiz'ik), *a.* [*< psychophysical* + *-al*.] Of or pertaining to psychophysics. — **Fechner's psychophysical law**. See *law*. — **Psychophysical time**, that part of the reaction-time which is occupied with brain-action. See *reaction-time*.

psychophysicist (si-kō-fiz'ik-sist), *n.* and *a.* [*< psychophysical* + *-ist*.] I. *n.* A student of psychology who relies mainly or extensively upon quantitative experiments made by one person upon another.

II. *a.* Pertaining to or composed of psychophysicists.

psychophysics (si-kō-fiz'iks), *n.* [Pl. of *psychophysical* (see *-ics*).] The science of the relations between stimuli and the sensations which they evoke.

psychophysiological (si-kō-fiz'ik'ō-loj'i-kal), *a.* [*< psychophysiology* + *-ic*.] Of or pertaining to psychophysiology.

psychophysiology (si-kō-fiz'ik'ō-lō-jī), *n.* [*< Gr. ψυχή*, soul, mind, + *φυσιολογία*, physiology.] Physiological psychology. See *psychology*.

psychoplasm (si'kō-plazm), *n.* [*< Gr. ψυχή*, soul, mind, + *πλάσμα*, anything formed: see *plasm*.] The material medium or physical basis of consciousness: same as *protyle*. See the quotation.

The vital organism is evolved from the bioplasm, and we can now see how the psychical organism is evolved from what may be analogically called the *psychoplasm*.

We may represent the molecular movements of the bioplasm by the neural tremors of the *psychoplasm*; these tremors are what I call neural units—the raw material of Consciousness. The movements of the bioplasm constitute vitality: the movements of the *psychoplasm* constitute sensibility. We may say that the sentient material out of which all the forms of consciousness are evolved is the *psychoplasm*, incessantly fluctuating, incessantly renewed.

G. H. Lewes, *Proba. of Life and Mind*, I. 100.

psychoplastic (si-kō-plaz'mik), *a.* [*< psychoplasm* + *-ic*.] Of or pertaining to psychoplasma; composed of or subsisting in psychoplasma.

psychopomp (si'kō-pomp), *n.* [*< Gr. ψυχοπομπός*, conductor of souls, *< ψυχή*, soul, + *πομπή*, conductor, *< πέμπειν*, send, conduct: see *pomp*.] A guide or conductor of spirits or souls to the other world: a special title of Hermes.

A kind of *psychopomp* or leader of departed souls.

J. Fiske, *Myths and Mythmakers*, p. 102.

psychoscope (si'kō-skōp), *n.* [*< Gr. ψυχή*, soul, mind, + *σκοπεῖν*, view.] A means of observing the mind.

Somnambulism, double-consciousness, epilepsy, insanity itself, are all of them natural psychoscopes.

Proc. Soc. Psych. Research, III. 61.

psychosensorial (sī'kō-sen-sō'ri-āl), *a.* [*< psychosensor-y + -al.*] Of the nature of perceptions, but not produced by any real action on the senses at the time. Thus, a person who sees an object which is not really present, and does not merely have an ordinary imagination of it, though he may be able to distinguish it from real perception, has a *psychosensorial* hallucination.

psychosensory (sī-kō-sen-sō'ri), *a.* [*< Gr. ψυχή, soul, mind, + E. sensory.*] Same as *psychosensorial*. *Amer. Jour. Psychol.*, 1887.

psychosis (sī-kō'sis), *n.*; pl. *psychoses* (-sēz). [*< Gr. ψυχή, a giving of life or soul to, animate, + ψυχή, soul, life, mind: see Psyche.*] 1. Mental constitution or condition.

It is, in fact, attended with some peculiar difficulty, because not only are we unable to make brute *psychosis* a part of our own consciousness, but we are also debarred from learning it by a process similar to that which enables us to enter into the minds of our fellow-men—namely, rational speech. *Mivart.*

2. A change in the field of consciousness.

This conception of the relation of states of consciousness with molecular changes in the brain—of *psychoses* with neuroses—does not prevent us from ascribing freewill to brutes. *Huxley, Animal Automatism.*

3. In *pathol.*, any mental disorder; any form of insanity.

psychosomatic (sī'kō-sō-mat'ik), *a.* [*< Gr. ψυχή, soul, mind, + σῶμα, body: see somatic.*] Relating to both soul and body.

psychosophy (sī-kōs'ō-fī), *n.* [*< Gr. ψυχή, soul, mind, + σοφία, skill, knowledge.*] The metaphysics of mind: one of the branches of psychology in the older systems.

psychostasia (sī-kō-stā'si-ā), *n.* [NL., *< Gr. ψυχοστασία, weighing of souls, + ψυχή, soul, + στάσις, weighing.*] The weighing of souls: an ancient belief that during a combat the souls of the combatants were weighed against one another, and that he whose soul was overbalanced was slain.

psychostasy (sī'kō-stā-si), *n.* [*< NL. psychostasia, q. v.*] Same as *psychostasia*.

psychostatic (sī-kō-stat'ik), *a.* [*< Gr. ψυχή, soul, mind, + στατικός, causing to stand: see static.*] Pertaining to psychostatics.

psychostatical (sī-kō-stat'i-kal), *a.* [*< psychostatic + -al.*] Same as *psychostatic*.

But the feelings registered are *psychostatical* elements. *G. H. Lewes, Probs. of Life and Mind, I. 195.*

psychostatically (sī-kō-stat'i-kal-i), *adv.* In a psychostatic manner.

psychostatics (sī-kō-stat'iks), *n.* [Pl. of *psychostatic* (see -ics).] The theory of the conditions of the phenomena of mind.

To those who . . . have adopted the view that mind is only one of the forms of life, and that life is not an entity but an abstraction expressing the generalities of organic phenomena, it is obvious that psychology must endeavour to ascertain the conditions of these phenomena, both general and special. These may be classed (by a serviceable extension of the term *statics*) under the heads of *biostatics* and *psychostatics*.

G. H. Lewes, Probs. of Life and Mind, I. 11. § 2.

psychotheism (sī'kō-thē-izm), *n.* [*< Gr. ψυχή, soul, spirit, + θεός, God: see theism.*] The doctrine that God is pure spirit.

psychotherapeutic (sī-kō-ther-a-pū'tik), *a.* [*< Gr. ψυχή, soul, + θεραπευτικός, pertaining to medical treatment: see therapeutic.*] Pertaining to psychotherapeutics.

psychotherapeutics (sī-kō-ther-a-pū'tiks), *n.* [Pl. of *psychotherapeutic* (see -ics).] The art of curing mental disease.

psychotherapy (sī-kō-ther-a-pi), *n.* [*< Gr. ψυχή, soul, mind, + θεραπεία, medical treatment: see therapy.*] Same as *psychotherapeutics*.

Psychotria (sī-kō'tri-ā), *n.* [NL. (Linnæus, 1767), said to refer to the medicinal qualities of some of the species; *< Gr. ψυχώτρια, vivifying, animating, + ψυχή, give life to, animate: see psychosis.*] A genus of gamopetalous plants of the order *Rubiaceæ*, type of the tribe *Psychotrieæ*. It is characterized by corymbose or panicle flowers with a five-lobed valvate corolla, a short calyx-tube having a small five-toothed border, linear or oblong-ovate anthers fixed by their base near the base, entire and membranaceous stipules, and a drupaceous fruit with two plano-convex nutlets. It is a vast and polymorphous genus, one of the largest among plants, containing about 425 species, all tropical and especially American. They are shrubs or small trees, rarely perennial herbs, either erect, climbing, or twining. They bear opposite entire and sometimes whorled leaves, and stipules within the petioles, often twin and united into a sheath. The small flowers are white, green, red, or yellow. Most of the species have handsome leaves, but are inconspicuous in flower. *P. parasitica*, a red-berried, fleshy-leaved species of the

West Indies, is there known as *climbing-vine*. *P. daphnoides*, a small evergreen, is the *brushland sage-tree* of Australia. *P. enetica* yields the drug *atristated ipecacuanha* (see *ipecacuanha*), and some other species furnish a dyestuff.

Psychotrieæ (sī-kō-trī'ē-ē), *n. pl.* [NL. (Benth and Hooker, 1873), *< Psychotria + -æ.*] A large tribe of plants of the order *Rubiaceæ*, the madder family. It is characterized by an ovary with two or many cells, each with a single basilar erect anatropous ovule and inferior radicle; a valvate corolla bearing the stamens on its throat; a stigma entire or nearly so; and an indehiscent fruit, commonly with two nutlets, corneous albumen, and curved embryo. It includes about 1,084 species of 32 genera, mostly tropical trees or shrubs. *Psychotria* (the type) with 425 species, *Paikourea* with 135, *Rudgea* with 92, and *Uragoga* (*Cephaelis*) with 120, are large genera mainly of America, and *Lasianthus* with 80 species is principally Asiatic.

psychovital (sī-kō-vī'tal), *a.* [*< Gr. ψυχή, soul, mind, + L. vita, life, + -al: see vital.*] Psychical and vital; pertaining at once to mind and to life.

psychozoic (sī-kō-zō'ik), *a.* [*< Gr. ψυχή, soul, mind, + ζωή, life, + -ic.*] Same as *psychovital*.

psychrometer (sī-krom'e-tēr), *n.* [*< Gr. ψυχρός, cold, chill (< ψέχειν, blow, make cool or cold), + μέτρον, a measure.*] An instrument for determining the tension of the aqueous vapor in the air or the relative humidity. It consists of two thermometers, commonly called the *dry-bulb* and the *wet-bulb*. The dry-bulb thermometer gives the temperature of the air. The wet-bulb thermometer, whose bulb is covered with muslin wetted at the time of observation, cools below the air-temperature, and indicates what is known as the temperature of evaporation. From the combined readings of the two thermometers, along with that of the barometer at the time, the pressure of the vapor in the air is obtained by means of an empirical formula, or more conveniently from specially constructed tables.

psychrometric (sī-krom'e'trik), *a.* [*< psychrometer + -ic.*] Of or pertaining to a psychrometer; hygrometrical.

psychrometrical (sī-krom'e'tri-kal), *a.* [*< psychrometric + -al.*] Same as *psychrometric*.

psychrometry (sī-krom'e't-ri), *n.* [*< Gr. ψυχρός, cold, + -μετρία, < μέτρον, measure.*] The theory and art of determining by means of a psychrometer the tension of the aqueous vapor in the atmosphere.

psychrophobia (sī-kō-fō'bi-ā), *n.* [*< Gr. ψυχροφόβος, dreading cold or cold water, + ψυχρός, cold, + φοβέσθαι, fear, < φόβος, fear.*] A dread of anything cold, especially cold water; impressibility to cold. *Dunglison.*

psychrophore (sī'krō-fōr), *n.* [*< Gr. ψυχροφόρος, carrying cold water, + ψυχρός, cold, + φέρω = E. bear.*] In *urg.*, a sound with double bore through which a current of cold water is made to flow for applying cold to the urethra.

psydrium (sī-drā'si-um), *n.*; pl. *psydria* (-ē). [NL., *< Gr. ψυδάριον, dim. of ψυδάξ (ψυ-*

Psychrometer.

δρακ-), a white blister on the tip of the tongue, feigned to be caused by one's telling a lie, *< ψυδρός, lying, < ψεύδω, lie: see pseudo-*.] A small pustule without inflammatory base.

psykter (sī'k'tēr), *n.* [*< Gr. ψυκτήρ, a vase for cooling wine (see def.), < ψύχειν, blow, make cool.*] In *Gr. antiq.* and *archæol.*, a type of vase used for cooling wine. The body is of conoid form, with short cylindrical neck and a somewhat tall cylindrical foot, adapted in form for insertion in the crater, and for standing on the table. It was sometimes supported on a tripod. See cut in preceding column.

Psylla (sil'ā), *n.* [NL. (Geoffroy, 1764), *< Gr. ψύλλα, a flea; cf. L. pulex, a flea.*] A genus of homopterous insects, typical of the family *Psyllidæ*, having a pointed, bent front, highly arched

Pear-tree Flea-louse (*Psylla pyri*). (Cross shows natural size.)

scutellum, and strongly developed scutellum, the body smooth, naked, or finely pilose, and the extreme tip of the wing falling between the radius and the fourth vein. It is a large group, represented in all parts of the world. *P. pyri* is a common pest of the pear in Europe and North America, producing two or more summer generations of naked young. From the damage it does to young blossoms in the spring, it is sometimes called the *bud-blight insect*, though more commonly known as the *flea-louse of the pear*.

Psyllidæ (sil'i-dē), *n. pl.* [NL. (Latreille, 1807), *< Psylla + -idæ.*] A notable family of hemipterous insects, typified by the genus *Psylla*, comprising the flea-lice or jumping plant-lice. They are small insects, resembling plant-lice, having stout legs, the hinder pair fitted for jumping, antennæ nine- or ten-jointed and armed at the tip with one or two bristles. They live on the juices of plants, and many of them form galls. The principal subfamilies are *Liliidæ*, *Aphalarinæ*, *Psyllinæ*, and *Triozinæ*. See cuts under *flea-louse* and *Psylla*.

psylli (sil'i), *n.* [*< Gr. ψύλλα, a flea: see Psylla.*] The fleawort, *Plantago Psyllium*. See quotation under *fleawort*.

pt. An abbreviation (*a*) of *part*; (*b*) of *pint*.

Pt. The chemical symbol of *platinum*.

Pteroxylon (tē-rok'si-lon), *n.* [NL. (Ecklon and Zeyher, 1834), so called in allusion to the effect on those working with its wood; *< Gr. πταίνειν, sneeze, + ξύλον, wood.*] A genus of polypetalous trees of the order *Sapindaceæ*, characterized by four small erect and finally recurved petals, and by the fleshy annular disk, four-parted coriaceous two-celled capsule, and the two long compressed, broadly winged seeds. The only species, *P. utile*, the sneezewood of South Africa, is a tree with bitter bark, opposite pinnate leaves, and flowers in small panicles shorter than the leaves. See *sneezewood*.

Ptah (ptā), *n.* [Egyptian.] An Egyptian divinity of high rank, worshiped especially at Memphis, and revered as the creative force.

ptarmic (tār'mik), *n.* [*< Gr. πταρμικός, causing to sneeze, < πταρμός, a sneezing, < πταίρειν, Attic πτάρνυσθαι (< πταρ), sneeze, akin to L. sternuere, sneeze: see sternutation.*] A medicine which excites sneezing; a sternutatory.

Ptarmica (tār'mi-kā), *n.* [NL. (Necker, 1791), *< Gr. πταρμική, a plant, yarrow or milfoil; prop. fem. of πταρμικός, causing to sneeze: see ptarmic.*] A former genus of plants, now united with *Achillea*.

ptarmigan (tār'mi-gan), *n.* [With unorig. initial *p* (appar. first in *F. ptarmigan*, so spelled

Rock Ptarmigan (*Lagopus rupestris*), in winter plumage.

prob. because assumed to be of Gr. origin), for **tarmigan*, formerly *termigant*, *termagant*, < Gael. *tarmachan* = Ir. *tarmochan*, also *tarmonach*, the ptarmigan.] A bird of the family *Tetraonidae* and genus *Lagopus*, having feathered feet. The name was originally applied, in Scotland, to *L. mutus* or *alpinus*, a bird which formerly inhabited England and Wales as well as Scotland, and is also found in Russia, Scandinavia, the Alps, Pyrenees, etc., and is represented in Iceland, Greenland, Siberia, and North America by a closely allied species, *L. rupestris*. This bird turns white in winter, like all of the genus *Lagopus*, excepting *L. scoticus*, the red grouse, moor-fowl, or moor-game of Great Britain. The willow-grouse, *L. albus* or *saliceti*, of subarctic distribution in Europe, Asia, and America, *L. hemileucurus* of Spitzbergen, and *L. leucurus* of alpine regions in western North America are other ptarmigans. See *Lagopus*, and cut under *grouse*.

Ptelea (tē'lē-ā), n. [NL. (Linnaeus, 1737), so called from the similarity of the fruit to that of the elm; < Gr. *πτελέα*, the elm.] A genus of polypetalous shrubs and trees of the order *Rutaceae* and tribe *Toddalideae*. It is characterized by having four or five imbricated petals, as many stamens, and for fruit a broadly winged orbicular samara with two or three cells, each one-seeded. The 8 species are all natives of North America. They are shrubs or small trees, with bitter bark, bearing alternate compound leaves of two or rarely five leaflets, which are broad and punctate with pellucid dots. The yellowish-green flowers are followed by rather large clusters of dry and flat disk-like fruit, with velvety wings. *P. trifoliolata* is the hop-tree, known also as *winged* (from the fruit), *teafer-ash*, and *shrubby trefoil*. See *hop tree*.

Ptenoglossa (tē-nō-glos'gā), n. pl. [NL., < Gr. *πτενός*, feathered, + *γλῶσσα*, the tongue.] A division or suborder of pectinibranchiate gastropods, whose odontophore has numerous similar acuminate admedian teeth in each transverse row. It comprises the families *Ianthinidae*, *Scalariidae*, *Eulimidae*, and *Pyramidellidae*.

ptenoglossate (tē-nō-glos'āt), a. [< Gr. *πτενός*, feathered, + *γλῶσσα*, tongue; see *glossate*.] In *Mollusca*, having on the radula or lingual ribbon, in any one cross-row, no median tooth, but an indefinitely large number of lateral teeth. The term is correlated with *rachiglossate*, *rhypidoglossate*, etc.

Ptenopleura (tē-nō-plō'rā), n. pl. [NL., < Gr. *πτενός*, feathered, + *πλευρά*, the side.] One of the divisions of the *Prosimia* or lemurine animals, represented by the so-called flying-lemurs: now classed with the *Insectivora*. See *Galeopithecus*.

ptenopleural (tē-nō-plō'ral), a. [< Gr. *πτενός*, feathered, + *πλευρά*, the side, + *-al*.] Having the sides of the body winged or alate; having a parachute or flying-membrane; belonging to the *Ptenopleura*.

Pteranodon (te-ran'ō-don), n. [NL., < *Pterodactylus* + Gr. *ἀνόδων* (*anodon*), toothless; see *Anodon*.] The typical genus of *Pteranodontidae*.

pteranodont (te-ran'ō-dont), a. Of or pertaining to the *Pteranodontidae*.

Pteranodontia (te-ran'ō-don'shi-ā), n. pl. [NL., < *Pterodactylus* + Gr. *ἀνόδων* (*anodon*), toothless; see *Anodon*.] The toothless pterodactyls, a division of *Pterosauria*, represented by the family *Pteranodontidae*, by some ranked as a peculiar order.

Pteranodontidae (te-ran'ō-don'ti-dē), n. pl. [NL., < *Pteranodon* (t) + *-idae*.] A family of pterodactyls of the order *Pterosauria*, or giving name to the *Pteranodontia*, having toothless jaws and the coracoid bone solidly united with the scapula. Their remains occur in the Cretaceous. Some species have a spread of wing of 20 feet.

Pteraspis (te-ras'pis), n. [< Gr. *πτερόν*, wing, + *ἀσπίς*, shield.] A fossil genus of fishes, the remains of which are found in the Middle Devonian and the Lower Ludlow.

ptere (tēr), n. [< Gr. *πτερόν*, feather, wing, usually in pl., feathers, wings, plumes, plumage, foliage, also a fan, oar, side-row of columns, side-wall, etc., = E. *feather*: see *feather*.] In *zoöl.*, an alate or wing-like part or organ; specifically, one of the lobes of the prora of a cymba. A ptere resulting from the broadening or lobation of the prora (itself is known as a *proral ptere*; a lateral lobe, between the prora and the tropis, is called a *pleural ptere*; additional pteres, resulting from lateral outgrowths of the tropis or keel, are *tropial pteres*.

pteria, n. Plural of *pteron*.

Pterichthyidae (ter-ik'thi'dē), n. pl. [NL., < *Pterichthys* + *-idae*.] A family of fishes of uncertain relations, typified by the genus *Pterichthys*. It had a cephalic shield with dorsal eyes separated by a movable plate, a dorsal buckler and a flatish abdominal one, long pectoral appendages of two pieces, incased in armor, and a caudal portion destitute of a fin and covered with polygonal scales. The jaws were small and armed with confluent denticles. The organization of the species indicates that they could not have progressed

by swimming, and that they probably crawled by the use of the finless pectoral members. They inhabited the Devonian seas. Their pertinence to the class of fishes has been disputed, and they have even been referred to the tunicates in an order called *Antiaracha*.

Pterichthys (te-rik'this), n. [NL., < Gr. *πτερόν*, wing, + *ἰχθύς*, a fish.] A genus of fishes, typical of the family *Pterichthyidae*.

Pteridæ (te-rid'ē-ē), n. pl. [NL., < *Pteris* (-id-) + *-æ*.] A tribe of polypodiaceous ferns, typified by the genus *Pteris*. The sori are marginal or intramarginal, provided with an indusium formed of the reflexed margin of the frond, and opening inward.

pteridium (te-rid'i-um), n. [NL., < Gr. *πτερόν*, wing, + dim. *-ιδιον*.] A key-fruit or samara. Also *pteridium*.

pteridologist (ter-i-dol'ō-jist), n. [< *pteridology* + *-ist*.] One who is versed in the study of ferns.

pteridology (ter-i-dol'ō-jī), n. [< Gr. *πτερίς* (*pteris*), fern (see *Pteris*), + *-λογία*, < *λέγειν*, speak: see *-ology*.] The science of ferns; a treatise on ferns.

pteridomania (ter-i-dō-mā-ni-ā), n. [NL., < Gr. *πτερίς* (*pteris*), fern, + *μανία*, madness.] A mania or excessive enthusiasm in regard to ferns. [Rare.]

Your daughters, perhaps, have the prevailing *pteridomania*, and are collecting and buying ferns. Kingsley.

Pteridophyta (ter-i-dof'i-tā), n. pl. [NL., pl. of *pteridophytum*: see *pteridophyte*.] A division of the vegetable kingdom including the ferns and their allies; the vascular cryptogams. See *Cryptogamia*, and compare *Bryophyta*.

pteridophyte (ter-i-dō-fit), n. [< NL. *pteridophytum*, < Gr. *πτερίς* (*pteris*), fern, + *φυτόν*, plant.] One of the *Pteridophyta*.

pterigraphy (te-rig'ra-fi), n. [Irreg. for **pteridography*, < Gr. *πτερίς* (*pteris*), fern, + *γράφειν*, write.] In *bot.*, a description of ferns.

Pteridæ (te-r'i-dē), n. pl. [NL., < *Pteris* + *-idæ*.] A family of bivalve mollusks, typified by the genus *Pteris*; the wing-shells. Now called *Aviculidae*. Also *Margaritidae*, *Malleidae*.

pteron (tē'ri-on), n.; pl. *pteria* (-ē). [NL., < Gr. *πτερόν*, feather, wing; see *ptere*.] In *craniom.*, the region where the frontal, squamosal, parietal, and sphenoid bones meet or approach one another. The squamosal is usually cut off from the frontal by a short line of sphenoparietal articulation, where the lower anterior corner of the parietal joins the tip of the alisphenoid; but in some cases this line is reduced to nothing, and then the frontal and squamosal come into contact. See cut under *craniometry*.

In the region of the *pteron* in the male, the squamosal articulates with the frontal on the right side for a space of 4 mm. *Anthropological Jour.*, XVIII. 7.

pterilegistic (ter-i-plē-jis'tik), a. Same as *pterolegistic*. Webster.

Pteris (tē'ris), n. [NL. (Linnaeus, 1737), < Gr. *πτερίς* (*pteris*), also *πτερίς* (*ptere*), a kind of fern, so called from its feathery leaves, < *πτερόν*, a feather: see *ptere*.] A cosmopolitan genus of ferns, typical of the tribe *Pteridæ*; the brakes.

It includes plants of almost every kind of venation and division. The sporangia are in a continuous slender line occupying the entire margins of the fertile frond, and covered by its narrow reflexed edge, which forms a continuous membranaceous indusium. Of the more than 100 species known, only 4 are found in North America. *P. aquilina*, the common brake, is very abundant in rocky thickets, dry fields, etc. See *brake*, *bracken*, *adder-spill*, and cut under *prothallium*.

pterna (tēr'nā), n.; pl. *pternæ* (-nē). [< Gr. *πτερυγία*, the heel.] In *ornith.*, the heel-pad; the sole of the foot, at the place where the toes dispart.

Pterobranchia (ter-ō-brang'ki-ā), n. pl. [NL., < Gr. *πτερόν*, wing, + *βράγχια*, gills.] 1. In J. E. Gray's classification (1821), one of two orders of pteropods (the other being *Dactylobranchia*): same as *Gymnosomata*.—2. In Lankester's classification of molluscs, the second section of the third class of a phylum *Podarionia*, composed of two genera, *Rhabdopleura* and *Cephalodiscus*: called by others *Podostomata* and *Aspidophora*. *Encyc. Brit.*, XIX. 430.

pterobranchiate (ter-ō-brang'ki-āt), a. [< *Pterobranchia* + *-ate*.] Of or pertaining to the *Pterobranchia*.

pterocardiac (ter-ō-kār'di-ak), a. [< Gr. *πτερόν*, wing, + E. *cardiac*.] Alate, or wing-like, and cardiac: used specifically by Huxley to note an ossicle in the stomach of the crawfish, which articulates with the cardiac ossicle. See cut under *Astacidae*.

pterocarpous (ter-ō-kar'pus), a. [< Gr. *πτερόν*, wing, + *καρπός*, fruit.] In *bot.*, having winged fruit.

Pterocarpus (ter-ō-kār'pus), n. [NL. (Linnaeus, 1767), < Gr. *πτερόν*, wing, + *καρπός*, fruit.] A genus of leguminous trees of the tribe *Dalbergieae*, type of the subtribe *Pterocarpeae*. It is characterized by a broad or nearly orbicular and oblique pod, which is tipped by a lateral style, is flattened around the edges into a thin coriaceous or membranous wing, and contains in its hard thickened center one, two, or three seeds separated by woody partitions. The 18 species are all tropical, and natives of Asia, Africa, and America. They are large thornless trees, bearing alternate pinnate leaves, and yellow papilionaceous flowers, often showy and sometimes variegated with white or violet, forming racemes or loose panicles. In general they produce hard and valuable timber, and also gum-resins, some very important. For *P. marsupium*, the bija or bastard teak or Amboyna kino-tree, see *kino* and under *teak*. For *P. indicus*, the padouk, lingo-tree, Burmese rosewood, or Andaman redwood, see *kiabocoo-wood* and under *redwood*. *P. erinaceus* is the molompi, Gambia kino-tree, cornwood, or African rosewood. For *P. draco*, see *dragon's-blood*. *P. santalinus* is the red sandalwood, red sanders-wood, ruby-wood, or East Indian redwood, affording an important dyestuff.

Pterocaulon (ter-ō-kā'lon), n. [NL. (Elliott, 1824), < Gr. *πτερόν*, wing, + *καυλός*, stem.] A genus of composite plants of the tribe *Inuloidæ* and subtribe *Plucheinæ*. It is characterized by its small flower-heads massed in dense clusters which are spiked or scattered, and by the slender capillary pappus, and stem winged by the decurrent leaves. The 9 species are nearly equally divided between America and the Old World, and are principally natives of warm climates. They are herbs, or sometimes shrubby at the base, commonly whitened with a dense wool, and bearing alternate leaves and numerous small white or yellow flowers. Two species are found in the southern United States, *P. pycnostachyum* (see *black-root*, 2), and *P. virgatum*, a plant of Texas, Mexico, and the West Indies, known in Jamaica as *golden-locks* and *golden-tuft*. See *golden cudweed*, under *cudweed*.

Pterocephala (ter-ō-sef'ā-lā), n. pl. [NL., < Gr. *πτερόν*, wing, + *κεφαλή*, head.] Thecosomatous pteropods: a synonym of *Thecosomata*. Wagner, 1885.

Pterocles (ter'ō-klēz), n. [NL. (Temminck, 1809), < Gr. *πτερόν*, wing, feather, + *κλεις*, key, bolt, tongue of a buckle.] The typical genus of *Pteroclidæ*. There are 12 or 14 species, mostly Afri-

Sand-grouse (*Pterocles arenaria*).

can. Three are Asiatic—*P. arenaria*, the common sand-grouse (see *sand-grouse*), *P. fasciata*, and *P. alchata*; the first and last of these also occur in Europe, and the last is sometimes placed in a different genus, *Pterocircus*. See also cut under *ganga*.

Pteroclidæ (te-rok'li-dē), n. pl. [NL., < *Pterocles* + *-idæ*.] A family of sand-grouse, alone representing the *Pterocloromorphæ*, and composed of the subfamilies *Pteroclineæ* and *Syrhapinae*. They are essentially terrestrial columbine birds, modified for a grouse-like life; the digestive system resembles that of gallinaceous birds, but the pterylosis and many osteological characters are like those of pigeons.

Pterocloromorphæ (ter'ō-klō-mōr'fē), n. pl. [NL., < *Pterocles* + Gr. *μορφή*, form.] In Huxley's classification of birds, a superfamily group consisting of the sand-grouse, considered to be intermediate between the *Columbæ* and the *Gallinæ*.

pterocloromorphic (ter'ō-klō-mōr'fik), a. [< *Pterocloromorphæ* + *-ic*.] Having the structure and affinities of the *Pteroclidæ*; belonging to the *Pterocloromorphæ*.

pterocymba (ter-ō-sim'bā), n. [NL., < Gr. *πτερόν*, wing, + NL. *cymba*, q. v.] A cymba, or cymbate flesh-spicule of a sponge, whose prora are alate, or widened into proral and pleural pteres, whence a figure resembling an anchor results. *W. J. Sollas*, *Encyc. Brit.*, XXII. 418.

pterocymbate (ter-ō-sim'bāt), a. [< *pterocymba* + *-ate*.] Alate, as a cymba; having the form or character of a pterocymba.

Pterocynetes (te-ro-s'i-néz), *n. pl.* [NL., < Gr. πτερόν, wing, + κύων (kyn-), dog.] In some systems, a division of the mammalian order *Chiroptera*, including the frugivorous bats, or flying-foxes, as distinguished from all the rest of the order, then collectively called *Nycterides*. The two divisions correspond respectively to the terms *Frugivora* and *Animalivora*, which are more frequently used.

pterodactyl, **pterodactyle** (ter-ō-dak'til), *n.* [NL. < NL. *Pterodactylus*.] An extinct reptile of

Skeleton of Pterodactyl.

the genus *Pterodactylus* or order *Pterosauria*; a pterosaurian; an ornithosaurian; a flying-dragon. Also *pterodactylan*.

Pterodactyl (ter-ō-dak'til), *n. pl.* [NL., *pl. of Pterodactylus*.] The pterodactyls as a group of extinct flying-dragons, typified by the genus *Pterodactylus*: same as *Pterosauria*.

pterodactylan (ter-ō-dak'til-i-an), *n.* [NL. < *pterodactyl* + *-ian*.] Same as *pterodactyl*.

Pterodactylidæ (ter-ō-dak'til-i-dē), *n. pl.* [NL., < *Pterodactylus* + *-idæ*.] A family of pterodactyls, typified by the genus *Pterodactylus*. See *Pterosauridæ*. Bonaparte, 1841.

pterodactylous (ter-ō-dak'til-i-us), *a.* [NL. < *pterodactylus*, < Gr. πτερόν, wing, + δάκτυλος, finger, digit.] Adapted for flight by having one digit of the fore limb much enlarged and webbed, as a pterodactyl; specifically, pertaining to pterodactyls, or having their characters; pterosaurian; ornithosaurian.

Pterodactylus (ter-ō-dak'til-i-us), *n.* [NL. (Oken, 1816), < Gr. πτερόν, wing, + δάκτυλος, finger, digit.] The leading genus of the order *Pterosauria*. It was formerly conterminous with the group *Pterodactylæ*, but now gives name to the family *Pterodactylidæ*, and is restricted to species having the usual four joints in the ulnar digit, a very short flexible tail, the metacarpus usually more than half as long as the forearm, and the strong pointed jaws furnished with teeth to their tips. (Compare *Rhamphorhynchus*.) There are several species, extending from the Jura to the Chalk. See cut under *pterodactyl*.

Pterodiceræ (ter-ō-dis'e-ræ), *n. pl.* [NL. (Latreille, 1806), < Gr. πτερόν, feather, wing, + δίκρανος, a double horn: see *dicerous*.] In Latreille's classification, one of the two main divisions of the class *Insecta*, including all the winged orders. The other division is *Aptera*.

Pterodina (ter-ō-di'næ), *n.* [NL. (Ehrenberg), < Gr. πτερόν, feather, + δῶν, wheel, ring.] A genus of rotifers, typical of the family *Pterodindæ*.

Pterodinidæ (ter-ō-din'i-dē), *n. pl.* [NL., < *Pterodina* + *-idæ*.] A family of rotifers, typified by the genus *Pterodina*. They have a trochal disk of two transverse circular lobes, the wreath on each being double; the trophi are malleolate; and the foot is transversely wrinkled, wholly retractile, and ends in a ciliate cup.

pterodim (te-rō-di'im), *n.* Same as *pteridium*.
Pterodon (ter-ō-don), *n.* [NL. (De Blainville, 1841), < Gr. πτερόν, wing, + δόνη (dōn-) = E. tooth.] A genus of fossil carnivorous quadrupeds, closely related to *Hyænodon*, based upon remains of Eocene age found in France.

pteroglossine (ter-ō-glos'in), *a.* [NL. < Gr. πτερόν, feather, + γλῶσσα, tongue (see *Pteroglossus*), + *-ine*.] Having a feathery or brushy tongue: specifically applied to the aracarids.

Pteroglossus (ter-ō-glos'us), *n.* [NL., < Gr. πτερόν, feather, + γλῶσσα, tongue.] 1. In *ornith.*, a genus of *Rhamphastidæ*, including those toucans known as *aracarids*. Illiger, 1811. See cut under *aracari*.—2. In *entom.*, a genus of coleopterous insects of the family *Carabidæ*. Chaudoir, 1847. Also called *Oodius*.

pterographer (te-ro-gra-fēr), *n.* [NL. < *pterograph* + *-er*.] A writer of pterography; the author of a pterographic treatise.

pterographic (ter-ō-graf'ik), *a.* [NL. < *pterograph* + *-ic*.] Of or pertaining to pterography.

pterographical (ter-ō-graf'i-kal), *a.* [NL. < *pterograph* + *-al*.] Same as *pterographic*.

pterography (te-ro-gra-fī), *n.* [NL. < Gr. πτερόν, feather, + γραφειν, write.] The description of feathers; a treatise on plumage: a term of wider sense than *pterylography*, which it includes.

pteroid (tē'roid), *n.* [NL. < Gr. πτερόν, wing (see *ptere*), + εἶδος, form.] A slender bone of some pterodactyls extending from the carpal region in the direction of the humerus. Some consider it as an ossification of a tendon corresponding with one which is found in a similar position in birds, while others regard it as a rudimentary first digit, modified to support the edge of the patagium.

pteroid (tē'roid), *a.* [NL. < Gr. πτερίς, fern (see *Pteris*), + εἶδος, form.] In bot., fern-like; resembling a fern; flicoid.

pterological (ter-ō-loj'i-kal), *a.* [NL. < *pterology* + *-ic*.] Of or pertaining to pterology; founded on pterology: as, pterological characters; the pterological description of an insect.

pterology (te-ro-lō-jī), *n.* [NL. < Gr. πτερόν, wing, + λογία, < λέγειν, speak: see *-ology*.] In *entom.*, the science of insects' wings; the description of the venation or venation and other characteristics of the wing-structure.

pteroma (te-rō-mā), *n.*; *pl. pteromata* (-mā-tā). [NL., < Gr. πτερόμα, a 'wing' of a temple (see def.), also a feathered arrow, < πτερόν, furnish with feathers or wings, < πτερόν, feather, wing: see *ptere*.] In *arch.*, the space between the wall of the cella of a classical temple or any similar columnar structure and the pteron, or the columns of the peristyle.

Pteromalidæ (ter-ō-mal'i-dē), *n. pl.* [NL. (Walker, 1831), < *Pteromalus* + *-idæ*.] 1. The *Pteromalinae* considered as a separate family.—2. A family of parasitic *Hymenoptera*: used by Dalman as the equivalent of and superseding the family *Chalcididæ*.

Pteromalinae (ter-ō-mā-lī'næ), *n. pl.* [NL. (Walker), < *Pteromalus* + *-inæ*.] One of the largest subfamilies of *Chalcididæ*, named from the genus *Pteromalus*, comprising about 1,000 species of several tribes and many genera, having thirteen-jointed antennæ with a three-jointed club and two ring-joints. They are small, usually metallic insects, parasitic generally upon lepidopterous, dipterous, or coleopterous larvae. The group has 8 tribes, and nearly 100 genera besides *Pteromalus*.

pteromaline (te-rom'a-lin), *a.* Of or pertaining to the *Pteromalidæ* or *Pteromalinae*.

Pteromalus (te-rom'a-lus), *n.* [NL. (Swederus, 1795), < Gr. πτερόν, wing, + μάλος, even.]

A genus of chalcidid hymenopterous insects, giving name to the subfamily *Pteromalinae*. It is characterized by the one-spurred hind tibia; antennal club not clavate; head with the vertex sometimes medially acute; eyes occasionally hairy; mandibles four-toothed; ring-joints of antennæ plain; metathorax carinate; and abdomen never produced at the apex. It is a large unwieldy genus, universally distributed, parasitic upon insects of several different orders. *P. puparum* lives upon several lepidopterous larvae, notably that of *Pieris rapæ*.

Pteromalus puparum, a, male; b, female. (Lines show natural sizes.)

Pteromys (ter-ō-mis), *n.* [NL. (G. Cuvier, 1800), < Gr. πτερόν, wing, + μῦς, mouse.] A genus of *Sciuridæ*; the flying-squirrels. (a) First used in 1800 by G. Cuvier to include all the squirrels which have a patagium or parachute. (b) Restricted in 1825 by F. Cuvier to the large flying-squirrels of southern Asia and the Indian archipelago, having the tail terete and bushy, postorbital processes highly developed, and several other cranial and dental characters different from those of the small flat-tailed flying-squirrels of Europe and America called *Sciuropterus*.

pteron (tē'ron), *n.*; *pl. ptera* (-rā). [NL. < Gr. πτερόν, wing, side-row of columns: see *ptere*.] In *Gr. arch.* and *archæol.*, a range of columns; a portico.

Pteronura (ter-ō-nū'rā), *n.* [NL. (J. E. Gray, 1837), prop. *Pterura*, < Gr. πτερόν, wing, + οὐρα, tail.] A North American genus of otters of the family *Mustelidæ* and subfamily *Lutrinæ*, having the tail alate, or margined with a flange-like

fold or ridge on each side. The type is *P. sand-bachi*, known as the *margin-tailed otter*. Also *Pterura*.

Pteropædes (ter-ō-pē'déz), *n. pl.* [NL., < Gr. πτερόν, feather, wing, + πᾶς (pach-), child.] Those birds which are fledged and able to fly when hatched, as the mound-birds. Compare *Philopædes*.

pteropædic (ter-ō-pē'dik), *a.* [NL. < *Pteropædes* + *-ic*.] Having the characters of the *Pteropædes*.

Pteropappi (ter-ō-pap'i), *n. pl.* [NL., < Gr. πτερόν, feather, wing, + πάππος, down: see *pappus*.] A rare synonym of *Odontotormæ*.

pterope (ter'ōp), *n.* [NL. < NL. *Pteropus*, q. v.] A fruit-bat or flying-fox; a member of the genus *Pteropus* in a broad sense.

pteropegal (ter-ō-pē'gal), *a.* [NL. < *pteropegum* + *-al*.] Pertaining to the pteropegum, or having its character.

pteropegum (ter-ō-pē'gum), *n.*; *pl. pteropega* (-gā). [NL., < Gr. πτερόν, feather, wing, + πηγός, lit. fastened, < πηγνύω, fasten: see *pact*.] In *entom.*, the socket on the side of the thorax in which a wing is articulated.

Pterophora (te-rof'ō-rā), *n. pl.* [NL. (Clairville, 1798), < Gr. πτερόφωρος, having wings: see *Pterophorus*.] In Clairville's system, one of the prime divisions of *Insecta*, including all hexapodous insects except *Aptera*: same as *Ptilota*, *Pterodiceræ*, and *Pterygota*.

Pterophoridæ (ter-ō-for'i-dē), *n. pl.* [NL. (Zeller, 1841), < *Pterophorus* + *-idæ*.] A family of lepidopterous insects, typified by the genus *Pterophorus*, including the plume-moths. They have long slim bodies and legs, and most of them are remarkable for having their wings divided into lobes or feathers. The larvae are fusiform, sixteen-legged, and furnished with irregular protuberances and tubular hairs, and some of them resemble small bundles of dried leaves. The species are not numerous, although the family is of wide distribution. Also called *Alucidæ*. See *Pteropænes*, and cut under *plume-moth*.

Pterophorina (te-rof'ō-rī'næ), *n. pl.* [NL., < *Pterophorus* + *-ina*.] A division of moths, represented by the family *Pterophoridae*.

Pterophorus (te-rof'ō-rus), *n.* [NL. (Geoffroy, 1764), < Gr. πτερόφωρος, bearing feathers, feathered, winged, < πτερόν, feather, wing, + φέρω, < φέρειν = E. bear.] A genus of lepidopterous insects, type of the *Pterophoridae*. *P. monodactylus* occurs in Europe, western Asia, and all parts of North America. Its larva feeds on *Convolvulus* and *Chenopodium*. See cut under *plume-moth*.

Pterophyllum (ter-ō-fil'um), *n.* [NL. (Brongnart, 1828), < Gr. πτερόν, feather, wing, + φύλλον, a leaf.] 1. A genus of cycadaceous fossil plants, with linear leaves attached to the rachis by the full width of their bases, and at right angles to it; the nervation is simple and parallel to the length of the leaf. This genus is first seen in the upper part of the coal-measures, attains its greatest development in the Trias, and finally disappears at the close of the Jurassic.

2. A genus of fishes of the family *Cichlidæ*.

Pteropidæ, etc. See *Pteropodidæ*, etc.

Pteroplatea (ter-ō-plā'tē-ā), *n.* [NL., < Gr. πτερόν, wing (fin), + πλάτις (fem. πλάτεια), broad.] A genus of sting-rays, typical of the subfamily *Pteroplateinae*. *P. maculata* is an eastern and *P. marmorata* a western American species.

Pteroplateinae (ter-ō-plā'tē-ā-næ), *n. pl.* [NL., < *Pteroplatea* + *-inæ*.] A subfamily of trygonoid sting-rays, typified by the genus *Pteroplatea*. They have a very broad disk, the pectoral fins extending far sideways, and the tail short.

pteropod (ter'ō-pod), *a.* and *n.* [NL. < NL. *pteropus* (-pod-), < Gr. πτερόπους (-pod-), wing-footed (as *Hermes*), < πτερόν, wing, + πούς (pod-) = E. foot.] 1. *a.* Having an alate podium, or wing-like expansions of the foot, as a mollusk; or of pertaining to the *Pteropoda*. Also *pteropodous*.

II. *n.* A mollusk of the class *Pteropoda*. The shell-bearing pteropods are the *Thecosomata*; the naked pteropods are the *Gymnosomata*; spiny pteropods belong to the family *Cavolinidæ*, and spiral pteropods to the *Litminidæ*; slipper-pteropods are *Cymbulidæ*. Also *pteropode*.

Pteropoda (te-rof'ō-dā), *n. pl.* [NL., neut. *pl. of pteropus* (-pod-), wing-footed: see *pteropod*.] 1. A division of *Mollusca*, having the mesopodium or middle part of the podium or foot expanded into a pair of large alate lobes like wings or flippers, and used as such to swim with: the pteropods. The tentacles are abortive, the nephridium is single, and the general configuration is more or less unsymmetrical, somewhat as in gastropods. The propodium may be produced into tentaculiform organs. There are otidia or otocysts, and one opesidium. The pteropods are hermaphroditic or monocious; there are organs of

copulation and a single genital pore. According to the presence or absence of a mantle-skirt and shell, the *Pteropoda* are *Thecosomata* and *Gymnosomata*. All are oceanic. They originally formed the second class of Cuvier's branch *Mollusca*, under the French name *Pteropodes*. By most conchologists this view has been accepted, but others have united the pteropods with the cephalopoda, and still others with the gastropoda. By several anatomists they have been approximated to the tectibranchiata, and even supposed to be derived from different stocks of that order—the thecosomes from the *Cephalaspidea*, and the gymnosomes from the *Anaspidea*. Also called *Coponautae*. See cuts under *Caudofoveata* and *Pneumodermom*.

2. In De Blainville's classification (1825), one of two families of his fifth order, *Nucleobranchiata* (the other being *Nectopoda*), composed of the genera *Atlanta*, *Spiratella*, and *Argonauta*. It is thus a highly artificial group, comprising a part of the heteropods together with some cephalopods, etc.

pteropodan (ter-op'ō-dan), a. and n. [*pteropod* + -an.] Same as *pteropod*.

pteropode (ter'ō-pōd), n. [*pteropus* (-pod-).] 1. An animal of the genus *Pteropus*; a fruit-bat or flying-fox; a pterope.—2. Same as *pteropod*.

pteropodia, n. Plural of *pteropodium*.

pteropodial (ter'ō-pō-di-al), a. [*pteropodi*-um + -al.] Of or pertaining to a pteropodium: as, the pteropodial fins or wings of a pteropod.

Pteropodidae (ter'ō-pōd'i-dē), n. pl. [NL., < *Pteropus* (-pod-) + -idae.] A family of *Megach-*

Skeleton and Outline of a Flying-fox (*Pteropus*).

roptera, *Frugivora*, or fruit-eating bats, of the tropical and subtropical parts of the Old World. They are generally of large size, with the tail excluded from the interfemoral membrane when present, little or no epigallian lobe of the liver but a large caudate lobe, the cardiac end of the stomach generally elongated, the index-finger with three phalanges and usually a claw, and the molar crowns smooth. The family contains about 8 genera, of which the best-known are *Pteropus*, *Epomophorus*, and *Harypys*. It is sometimes divided into *Pterop* and *Macroloph*. Also called *Pteropidae*. See also cut under *Pteropus*.

pteropodium (ter'ō-pō-di-um), n.; pl. *pteropodia* (-s). [NL., < Gr. *πτερόν*, wing, + *πόδιον*, dim. of *πούς* = E. foot: see *podium*.] The peculiar podium or foot of a pteropod.

pteropodous (ter-op'ō-dus), a. [*pteropod* + -ous.] Same as *pteropod*.

Pteroptochidae (ter-op-tok'i-dē), n. pl. [NL., < *Pteroptochus* + -idae.] A South American family of formicarioid passerine birds, typified by the genus *Pteroptochus*, with tracheophonous mesomyodian syrinx, taxaspidean tarsi, operculate nostrils, and ten primaries; the rock-wrens. They are small wren-like birds of skulking habits, especially characteristic of Chili and Patagonia. There are about 24 species, leading genera of which, besides the type genus, are *Hylactes*, *Seytalopus*, and *Rhinocrypta*. Some of them are known as barking-birds.

Pteroptochus

(ter-op-tō'kus),

n. [NL. (Kitt-

litz, 1830, in

the form *Pter-*

optochos), < Gr.

πτερόν, wing,

+ *πτερός*, one

who crouches or

eriges.] The typical

genus of *Pterop-*

optochidae. *P. ru-*

becula and *P. al-*

bicollis in-

habit Chili.

Pteropus (ter'-

ō-pus), n. [NL.

(Brissson, 1756),

< Gr. *πτερόν*, wing,

footed: see *pteropod*.]

Fruit-bat (*Pteropus edulis*).

The typical genus of the flying-foxes, or large fruit-bats of the family *Pteropodidae*. It includes some 40 species, or more than half the family, chiefly of the Malay archipelago and Australia, having no tail, a pointed muzzle like a fox's, woolly fur on the neck, and the dental formula 2 incisors, 1 canine, and 3 premolars in each upper and lower half-jaw, and 2 molars above and 3 below on each side. *P. edulis* of Java, one of the best-known species, is the largest, measuring five feet in extent of wings. See also cuts under *Pteropodidae* and *flying-fox*.

Pterorhina (ter'ō-rī-nā), n. pl. [NL., prop. **Pterorrhina*, neut. pl. of **Pterorrhinus*: see *pterorrhine*.] A division of *Alcidae*, including those whose nostrils are feathered, as typical aukes, murre, and guillemots.

pterorhine (ter'ō-rī-n), a. [Prop. **Pterorrhine*, < NL. **Pterorrhinus*, < Gr. *πτερόν*, feather, wing, + *ῥίς* (ῥιν-), nose.] Having feathered nostrils, as an auk; belonging to the *Pterorhina*.

pterosaur (ter'ō-sār), n. [*Pterosauria*.] A member of the *Pterosauria*; a pterodactyl.

Pterosauria (ter'ō-sā'ri-ā), n. pl. [NL., < Gr. *πτερόν*, wing, + *σαῦρος*, a lizard.] 1. An order of extinct Mesozoic *Reptilia* adapted for flight; the pterosaurs, pterodactyls, ornithosaurs, or flying-dragons. The whole fore limb is modified to support a flying-membrane somewhat like that of bats, and the rest of the skeleton is conformable with this modification. The vertebrae are comparatively few, prococial, those of the neck very large, and from three to six of the pelvic ones are united to form a sacrum. The anterior ribs have bifurcated heads. The skull is of great size, with long heavy jaws and large eye-sockets including a circle of sclerotic ossifications. The sternum is broad and carinate, the scapula and coracoid are slender, and clavicles are wanting. The phalanges of the ulnar digit are extremely long and strong, and support the parachute. The hind limbs are smaller than the fore limbs, and comparatively weak. The order contains the families *Pterosauridae* and *Pteranodontidae*. They lived from the Lias to the Chalk. See cut under *pterodactyl*. Also called *Ornithosauria*, *Pterodactyls*.

2. Same as *Pterosauridae*.

pterosaurian (ter'ō-sā'ri-an), a. and n. I. a. Of or pertaining to the *Pterosauria*; ornithosaurian.

II. n. A pterosaur, pterodactyl, or ornithosaur.

Pterosauridae (ter'ō-sā'ri-dē), n. pl. [NL., < *Pterosauria* + -idae.] A family of pterodactyls, of the order *Pterosauria*, with teeth and separate scapula and coracoid bones. It is represented by such genera as *Pterodactylus*, *Rhamphorhynchus*, and *Dimorphodon*, from the Jurassic formation. Also *Pterosauria*.

Pterospermum (ter'ō-spēr'mum), n. [NL. (Schreber, 1789), < Gr. *πτερόν*, wing, + *σπέρμα*, seed.] A genus of polypetalous trees and shrubs of the order *Sterculiaceae* and tribe *Helicteraceae*. It is characterized by stalked anthers, with parallel linear cells, woody round or five-angled five-valved capsules, and winged seeds. The 16 species are all natives of tropical Asia. They are commonly clothed with stellate hairs, and bear oblique coriaceous leaves, and elongated flowers, which are axillary and nearly or quite solitary, and consist of a tubular five-cleft calyx with five obovate petals and a prominent column of united stamens. The flowers are usually white, fragrant, and several inches in length. *P. acerifolium* and *P. suberifolium* are trees of the East Indies, sometimes cultivated under the name of *wingseed*. *P. javanicum* is the bayur of Java.

Pterospira (ter'ō-spō-rā), n. [NL. (Nuttall, 1818), < Gr. *πτερόν*, wing, + *σπείρα*, seed.] A genus of root-parasitic plants belonging to the order *Monotropaceae*. It is characterized by a gamopetalous urn-shaped corolla with five short recurving lobes, five persistent sepals, ten stamens with pendulous anthers facing inward and two spurred on the back, and a five-lobed and five-celled capsule filled with minute seeds which terminate in a large and broad hyaline reticulated wings. The only species, *P. andromeda*, known as *pine-drops*, is a slender, purplish-brown, clammy-hairy, and scaly herb, growing 1 or 2 feet high, leafless like most parasites, and with roots consisting of a mass of coral-like thickened fibers. The white nodding flowers are borne in a long raceme. It is a rare plant, found on hard clay soil under pines from Vermont and Pennsylvania northward and westward across the continent. From its early discovery near Albany, and its resemblance to beech-drops, it is also known as *Albany beech-drops*.

pterostigma (ter'ō-stig'mā), n.; pl. *pterostigmata* (-mā-tā). [NL., < Gr. *πτερόν*, feather, wing, + *στίγμα*, a spot, mark: see *stigma*.] The carpus or stigma, a peculiar mark or spot on the wings of some insects. It is a dark-colored triangular or quadrate space on the anterior border of the fore wings of hymenoptera, and on both fore and hind wings of dragon flies. It corresponds to that one of the costal cells which is thickened to strengthen the costal border. — *Fenestrate pterostigma*. See *fenestrate*.

pterostigmal (ter'ō-stig'mal), a. [*pterostigma* + -al.] Pertaining to a pterostigma or having its character; pterostigmatic: as, a pterostigmal cell or spot.

pterostigmatic (ter'ō-stig-mat'ik), a. [*pterostigma* + -ic.] Having a pterostigma, as an insect's wing; provided with pterostigmata, as an insect; pterostigmal.

pterostigmatic (ter'ō-stig-mat'ik-al), a. [*pterostigmatic* + -al.] Same as *pterostigmatic*. Hagen.

pterotheca (ter'ō-thē'kā), n.; pl. *pterothecae* (-sē). [NL., < Gr. *πτερόν*, wing, + *θήκη*, case: see *theca*.] In *entom.*, a wing-case, or that part of the integument of a pupa on which is outlined the undeveloped wing beneath it.

pterotic (te-rot'ik), a. and n. [*pterotic*, < Gr. *πτερόν*, feather, wing, + *ὤς* (ὤτ-), = E. ear, + -ic.] I. a. In *zool.* and *anat.*, noting an ossification of the periotic capsule or petrosal bone, distinct from the prootic, epiotic, and opisthotic, which occurs in some vertebrates between the prootic and the epiotic.

II. n. A pterotic ossification. See first cut under *teleost* and cut under *Esox*.

Pterotrachea (ter'ō-trā-kē'ā), n. [NL. (Forskål), < Gr. *πτερόν*, wing, + *τραχίς*, fem. *τραχία*, rough: see *trachea*.] The typical genus of *Pterotracheidae*. Also called *Firola*.

Pterotracheacea (ter'ō-trā-kē-ā'sē-ā), n. pl. [NL., < *Pterotrachea* + -acea.] The *Pterotracheidae* considered as a suborder of heteropods.

Pterotracheidae (ter'ō-trā-kē-i-dē), n. pl. [NL. (J. E. Gray, 1840), < *Pterotrachea* + -idae.] A family of shell-less heteropods, typified by the genus *Pterotrachea*.

Different limits have been assigned to it. By some it is extended to all the heteropods with the branch carried in a dorsal peduncle and protected by a small or no shell, and the mesopodium lamelliform.

By others it is limited to *Pterotrachea* and *Firola*, having the visceral hump, reduced to a mere oval sac, embedded in the posterior region of the body, no shell, and a cylindrical slug-like form. Also called *Firolidae* and, as a suborder, *Pterotracheacea*.

Pterozamites (ter'ō-zam'i-tēz), n. [NL. (Schimper, 1870), < Gr. *πτερόν*, feather, + *Ζάμιτις*, q. v.] A genus of fossil cycadaceous plants, differing from other genera chiefly in having only the stronger veins fork at base. It embraces about 5 or 6 species, found in the Retic, Lias, and Oölite of Europe.

Pterura (te-rō'rā), n. Same as *Pteronura*.

pterygial (te-rij'i-al), a. [*pterygium* + -al.] Of or pertaining to a pterygium.

pterygium (te-rij'i-um), n.; pl. *pterygia* (-s). [NL., also *pterygion*; cf. L. *pterygium*, < Gr. *πτερυγιον*, a little wing, a fin, projection, film over the eye, growth of flesh over the nails, dim. of *πτερυξ* (πτερυξ), wing, < *πτερόν*, wing, feather: see *ptere*.] 1. In *zool.* and *anat.*, a limb or member of one of the vertebrates, as a fish, in the most general sense, without reference to its specialization in any given instance. A hypothetical pterygium, whence other pterygia are supposed to have been evolved, is an *archipterygium*; the ichthyic modification is a *chiropterygium*. Parts of the pterygium of an elasmobranchiate fish have been called *mesopterygium*, *metapterygium*, *propterygium*, bearing basalia and radialis, as in the accompanying figure.

2. In *pathol.*, a more or less triangular patch of hypertrophied conjunctiva and subconjunctival tissue with its apex at the edge of the cornea or upon the cornea.—3 In *entom.*, one of the two lateral expansions at the end of the rostrum of certain weevils. They lie above and partly conceal the scrobes or grooves in which the antennae are concealed.

pterygoblast (ter'i-gō-blāst), n. [*pterygion* (πτερυγιον), wing, + *βλαστός*, germ.] A germinal fin-ray; the histological element from which the embryonic fin-rays of fishes are developed. J. A. Ryder.

pterygobranchiate (ter'i-gō-brang'ki-āt), a. [*pterygion* (πτερυγιον), feather, + *βράγχια*, gills.] Having feathery gills: noting a section of isopods, in distinction from *phyobranchiate*.

pterygoda (ter-i-gō'dā), n. pl. [NL., < Gr. *πτερυγιον*, wing-like: see *pterygoid*.] In *entom.*,

Pterotrachea pedunculata.

Pterygium, or (right) Pectoral Limb of the Monkfish (*Squatina*). *p*, properterygium; *ms*, mesopterygium; *mt*, metapterygium - bearing respectively the properterygial, mesopterygial, and metapterygial basalia and radialis.

the tegulae, a pair of small movable scales or epaulets attached to the mesothorax of *Lepidoptera*, near the insertion of the first legs.

In front of the fore wings . . . are a pair of *pterygoda*, a kind of epaulets, which extend backwards.
Latreille, in *Cuvier's Règne Animal* (trans.), ed. 1849, [p. 476].

pterygode (ter'i-gōd), *n.* One of the pterygoda. Also *pterygoid*. *J. O. Westwood*.

pterygofaceting (ter'i-gō-fas'et-ing), *n.* [*pterygo*(id) + *facet* + *-ing*]. The formation of an articulate facet for the pterygoid bone on the rostrum of a bird's skull. *Coues*.

pterygoid (ter'i-goid), *a.* and *n.* [*Gr. πτερυγώδης* (contr. *πτερυγός*), wing-like, feathery, < *πτερυξ* (pteryx), a wing, + *είδος*, form.] 1. *a.* Wing-like or wing-shaped; aliform or alate: specifically applied in anatomy to certain bones or bony processes and associate parts.

—**Pterygoid artery**, a branch of the internal maxillary, from the second or pterygoid section of that vessel, supplying the pterygoid muscles. —**Pterygoid bones**, the pterygoids. —**Pterygoid canal**. Same as *Vidian canal* (which see, under *canal*). —**Pterygoid fossa**. See *fossa*.

—**Pterygoid muscles**, the pterygoides, or muscles which arise from the pterygoid bones or pterygoid processes of the sphenoid. In man the external pterygoid muscle arises from the external pterygoid process of the sphenoid and the part of the alisphenoid below the pterygoid ridge, and extends nearly horizontally outward to be inserted into the condyloid section of the lower jaw-bone: it is also called *ectopterygoid*. The internal pterygoid muscle arises from the pterygoid fossa and palate-bone, and passes downward and outward to be inserted into the inner surface of the ascending ramus and angle of the lower jaw-bone: it is also called *entopterygoid* and *internal masseter*. The pterygoid muscles effect the lateral and forward and backward movements of the jaw, and the internal maxillary raises it. —**Pterygoid nerves**, two branches of the inferior maxillary to the internal and external pterygoid muscles. —**Pterygoid notch**. See *notch*. —**Pterygoid plate**, a pterygoid process. —**Pterygoid plexus**. See *plexus*. —**Pterygoid process**. (a) Either one of two parts of the compound sphenoid bone of mammals. (1) The external pterygoid process is a process or extension of the alisphenoid, or great wing of the sphenoid bone, having no independent center of ossification, and never being a distinct part. (2) The internal pterygoid process, on the other hand, is a distinct bone, the pterygoid proper, having its own center of ossification, and representing the freely articulated pterygoid bone of lower vertebrates. These processes are also distinguished as *ectopterygoid* and *entopterygoid*. (b) The combined internal and external pterygoid processes, the two parts being distinguished as the *internal* and *external pterygoid plates*. (c) The pyramidal process, or tuberosity of the palate. —**Pterygoid ridge**, a ridge traversing the outer surface of the alisphenoid, or great wing of the sphenoid bone, delimiting the respective attachments of the temporal and external pterygoid muscles, and also serving to distinguish the temporal from the zygomatic fossa.

II. *n.* In *zool.* and *anat.*: (a) A bone of the facial part of the skull, forming a part of the hard palate, or pterygopalatal bar, commonly a horizontal rod-like bone, one of a pair on each side of the median line intervening between the palatal and the quadrate bone, or suspensorium of the mandible, and movably articulated with both, frequently also articulating with the basisphenoidal rostrum of the skull: in any mammal, detached from its posterior connection with the suspensorium, and commonly immovably sutured with the palatal and ankylosed with the sphenoid, when it forms the part known in human anatomy as the internal pterygoid process of the sphenoid. In fishes there are several different pterygoid bones, entering into the formation of the pterygopalatal bar or palatoquadrate arch, and distinguished as *entopterygoid*, *ectopterygoid*, and *metapterygoid*: see these words, and cut under *palatoquadrate*. See also cuts under *demognathus*, *dro-maenognathus*, *periotic*, *Petromyzon*, *Physeter*, *poison-fang*, *Python*, and *temporomastoid*. (b) A pterygoid muscle. —2. *pl.* In *entom.*, same as *pterygoda*.

pterygoideus (ter-i-goi-dē-us), *n.*; *pl.* *pterygoidei* (-i). [NL.: see *pterygoid*.] A pterygoid muscle. —**Pterygoideus externus** or *minor* and **pterygoideus internus** or *major*, two stout muscles of mastication; the pterygoid muscles (which see, under *pterygoid*). —**Pterygoideus proprius**, a small occasional muscle of man, passing from the alisphenoid to the outer plate or tuberosity of the palate.

pterygomaxillary (ter'i-gō-mak'si-lā-ri), *a.* [*pterygo*(id) + *maxillary*]. Pertaining to a pterygoid process or the pterygoid bone and to either the superior or inferior maxillary bone: specifically applied in anatomy to several parts.

—**Pterygomaxillary fissure**. See *fissure*. —**Pterygomaxillary fold**, the fold formed by the pterygomaxillary ligament in the mouth, back of the last molar tooth. —**Pterygomaxillary ligament**, a tendinous band passing from the apex of the internal pterygoid plate to the posterior extremity of the internal oblique line of the lower jaw.

pterygopalatal (ter'i-gō-pal'ā-tā), *a.* [*pterygo*(id) + *palatal*]. Same as *pterygopalatine*. —**Pterygopalatal bar**, the movable series of bones which connect the upper jaw of vertebrates below mammals with the suspensorium of the lower jaw. No such bar occurs in mammals, in which the lower jaw has no suspensorium, and the pterygoids are entirely cut off from con-

nections behind. In birds the bar is always a single and simple pterygoid bone, movably articulated behind with a quadrate and in front with a palate-bone. The case becomes complicated in lower vertebrates by the presence of more than one pterygoid, and in fishes with several pterygoids, variously disposed, the arrangement is more commonly called the *palatoquadrate arch*. See cut under *palatoquadrate*.

pterygopalatine (ter'i-gō-pal'ā-tin), *a.* [*pterygo*(id) + *palatine*]. Pertaining to the pterygoid process of the sphenoid, or to the pterygoid bone, and to the palate or palate-bone: as, the *pterygopalatine branch* of the internal maxillary artery. —**Pterygopalatine artery**, a small branch of the internal maxillary, which passes through the pterygopalatine canal to the pharynx, nasal fossa, and sphenoidal sinus. Also called *pharyngeal artery*. —**Pterygopalatine canal**. (a) The canaliculus pharyngeus. (b) The posterior palatine canal. —**Pterygopalatine foramen**. See *foramen*. —**Pterygopalatine nerve**, a small branch of Meckel's ganglion that passes through the canal of the same name to the pharynx.

pterygo-pharyngeus (ter'i-gō-far-in-jē-us), *n.* [NL.: < *pterygo*(id) + *pharyngeus*.] That part of the superior constrictor of the pharynx which arises from the internal pterygoid process. —**Pterygo-pharyngeus externus**, a small supernumerary muscle arising from the hamular process and inserted into the wall of the pharynx.

pterygoquadrate (ter'i-gō-kwōd'rāt), *a.* [*pterygo*(id) + *quadrate*]. 1. Pertaining to the pterygoid bone proper and to the quadrate bone, or suspensorium of the lower jaw, as in a vertebrate below mammals: as, the *pterygoquadrate articulation*. —2. Combining elements of the pterygoid and quadrate bones: as, the *pterygoquadrate cartilage* of a shark.

pterygosphenoid (ter'i-gō-sfē'noid), *a.* [*pterygo*(id) + *sphenoid*]. Same as *sphenopterygoid*.

pterygospinosus (ter'i-gō-spi-nō'sus), *n.*; *pl.* *pterygospinosi* (-si). [NL.: see *pterygospinosus*.] A muscular slip, occasionally seen in man, arising from the sphenoidal spine and inserted into the external pterygoid plate.

pterygospinosus (ter'i-gō-spi-nus), *a.* [*NL. pterygospinosus*, < *E. pterygo*(id) + *L. spinosus*, spinous.] Pertaining to a pterygoid process and to the spine of the sphenoid. —**Pterygospinosus ligament**, a fibrous band running from the spine of the sphenoid to the posterior margin of the outer pterygoid plate.

pterygostaphylinus (ter'i-gō-staf-i-lī-nus), *n.*; *pl.* *pterygostaphylini* (-ni). [NL.: < *Gr. πτερυξ* (pteryx), wing, + *σταφυλή*, uvula.] Same as *tensor palati*.

pterygostium (ter-i-gos'ti-um), *n.*; *pl.* *pterygostia* (-ā). [Also *pterygostemum*; NL. (Leach, 1829), < *Gr. πτερυξ* (pteryx), wing, + *L. ostium*, mouth.] One of the nervures or veins of an insect's wing. They are thickenings of the two surfaces of the upper and lower wing-membranes exactly opposed to each other, the inner surfaces being grooved so as to allow the circulation of fluids and the entrance of tracheae.

pterygostomial (ter'i-gō-stō'mi-ā), *a.* [*Gr. πτερυξ* (pteryx), wing, + *στόμα*, mouth, + *-ial*]. In *zool.*, noting the flaring anterior edges of the carapace of crustaceans, when these turn forward in front of the bases of the limbs, parallel with each other and with the axis of the body. *Milne-Edwards*. —**Pterygostomial plates**, those parts of the carapace of the brachyurous crustaceans which run forward parallel with the axis of the body. *Huxley*, *Anat. Invert.*, p. 296.

pterygostomial (ter'i-gō-stō'mi-ān), *a.* [*pterygostomial* + *-an*]. Same as *pterygostomial*. [Rare.]

Epilame longer than wide, and the *pterygostomial* regions rudimentary. *Eng. Cyc.*, Nat. Hist., III. 575.

Pterygota (ter-i-gō'tā), *n. pl.* [NL., neut. pl. of *Pterygotus*: see *pterygote*.] One of the prime divisions of *Insecta*, containing all hexapodous insects except *Aptera*. *Gegenbaur*. They are normally winged (wingless only as an adaptive specialized modification), and metabolous—that is, they undergo a more or less complete metamorphosis. Also called *Pterodicta*, *Pterophora*, and *Ptilota*.

pterygote (ter'i-gōt), *a.* [*NL. Pterygotus*, < *Gr. πτερυγώδης*, winged, < *πτερυξ* (pteryx), wing: see *pterygium*.] Winged; alate; having wings or wing-like parts; specifically, belonging to the *Pterygota*.

pterygotrabecular (ter'i-gō-trā-bek'ū-lār), *a.* [*pterygo*(id) + *trabecular*]. Pertaining to the pterygoid bone and the trabecular region of the skull.

A well developed *pterygo-trabecular* process—homologous . . . with the pedicle of the tadpole's suspensorium. *A. S. Woodward*, *Proc. Zool. Soc.*, 1886, p. 221.

Pterygotus (ter-i-gō'tus), *n.* [NL., < *Gr. πτερυγώδης*, winged: see *pterygote*.] A genus of extinct crustaceans of the Silurian period, belonging to the group *Eurypterida*, occurring chief-

ly in the passage-beds between the Silurian and the Devonian system. It has a long lobster-like form, composed in the main of a cephalothorax, an abdominal division of several segments, and a somewhat oval telson or tail-plate. The organs of locomotion, three or four pairs in number, are all attached to the under side of the carapace, as in the king-crab. *P. anglicus* is a species sometimes called *seraphim*.

Pterygura (ter-i-gū'rā), *n. pl.* [NL., < *Gr. πτερυξ* (pteryx), feather, wing, + *οὐρά*, tail.] A division of anomurous decapod crustaceans.

pterygurus (ter-i-gū'rus), *a.* Of or pertaining to the *Pterygura*.

pteryla (ter'i-lā), *n.*; *pl.* *pterylæ* (-læ). [NL., < *Gr. πτερόν*, feather, wing, + *ῥα*, wood.] A feather-tract; one of the sets or clumps of feathers which are inserted in definite tracts or areas in the skin of a bird, separated by apteria, or places where no feathers grow. The fact that birds' feathers are seldom implanted uniformly over the whole skin, but usually grow in definite patches, had been known long before the publication of Nitzsch's "System of Pterylography" in 1840; but it remained for this author to define the principal pterylae and point out the taxonomic significance of pterylosis. The most constant pterylae are eight: (1) *Pteryla spinalis*, the spinal or dorsal tract, from the nape of the neck to the tail, subject to much modification. (2) *Pteryla humeralis*, the humeral tract, on each wing, running from the shoulder obliquely backward, parallel with the scapula. (3) *Pteryla femoralis*, the femoral tract, a similar oblique strip on each thigh. (4) *Pteryla ventralis*, the ventral tract, forming most of the plumage of the under parts, and presenting numerous modifications. (5) *Pteryla capitalis*, the head-tract. (6) *Pteryla alaris*, the wing-tract. (7) *Pteryla caudalis*, the tail-tract. (8) *Pteryla cruralis*, the lower leg-tract.

pterylographic (ter'i-lō-graf'ik), *a.* [*pterylograph-y* + *-ic*]. Of or pertaining to pterylography; descriptive of pterylae or pterylosis.

pterylographical (ter'i-lō-graf'ik-al), *a.* [*pterylographic* + *-al*]. Same as *pterylographic*.

pterylographically (ter'i-lō-graf'ik-al-i), *adv.* With reference to pterylography; upon pterylographical principles.

pterylography (ter-i-log'ra-fī), *n.* [*NL. pterylogra* + *Gr. -γραφία*, < *γράφειν*, write.] The description of pterylae, or a treatise on pterylosis: a science which had its origin in the "System der Pterylographie" of Nitzsch, 1833-40.

pterylosis (ter-i-lō'sis), *n.* [NL., < *pteryla* + *-osis*.] The arrangement or disposition of ptilosis; the plumage of a bird, considered with reference to the manner in which the feathers are implanted in the skin in definite pterylae; the mode of feathering; the distribution of the feathers in tracts. It differs from *ptilosis* in that the latter relates to the character of the plumage itself, not to its disposition upon the body.

Ptilichthyidae (til-ik-thī'ī-dē), *n. pl.* [NL., < *Ptilichthys* + *-idae*.] A family of acanthopterygian fishes, typified by the genus *Ptilichthys*. The body is very elongated and anguilliform, the head small, the mouth oblique with the lower jaw projecting, branchial apertures restricted, dorsal very long and with about 80 spines and 145 rays, anal long, and ventrals absent. Only one species is known.

Ptilichthys (til-ik'this), *n.* [NL., < *Gr. πτίλον*, feather, + *ἰχθύς*, fish.] A genus of fishes, typi-

Spiny-back Eel (*Ptilichthys goodii*).

cal of the family *Ptilichthyidae*. The only known species is *P. goodii* of Bering Sea.

Ptilocercus (til-ō-sēr'kus), *n.* [NL. (J. E. Gray, 1848), < *Gr. πτίλον*, feather, + *κέρκος*, tail.] A

Pentail (*Ptilocercus lowei*).

genus of *Tupaia* or elephant-shrews, containing a single species, *P. lowei*, of Borneo, having a long tail furnished with distichous hairs toward the end, like a pen or feather, whence the name; the pentailes.

Ptilogonatinæ (til-ō-gon-a-ti'nē), *n. pl.* [NL., < *Ptilogony* (-gonat-) + *-inæ*.] A subfamily of oscine passerine birds, typified by the genus *Ptilogonyx*, referred to the conventional family *Ampelidæ*. The bill is slenderer than in *Ampelis*, with naked nasal scale and slightly bristled rictus; the tarsus is scutellate anteriorly and sometimes also on the sides; the wings are rounded, with ten primaries, of which the first is spurious; the tail is variable, and the head crested. The few species are confined to western North America, Mexico, and Central America. Also *Ptilogonydinae*.

Ptilogonyx (ti-log-ō-nis), *n.* [NL. (Swainson, 1824), also in the forms *Ptilogonyx*, *Ptilogonyx*, and *Ptilogonatus*; < Gr. *πτελον*, wing, + *γόνυ* (yōn-), knee, joint. Cf. *gonys*.] 1. The typical genus of *Ptilogonatinæ* or *Ptilogonydinae*. The type is *P. cinereus* of Mexico.—2. Extended to birds of the genus *Myiadestes* and others.—3. [l. c.] A bird of the genus *Ptilogonyx* in any sense. Townsend's ptilogonyx is *Myiadestes townsendi*. The black ptilogonyx is *Phainopepla nitens*. See cut under *fly-snap-per*.

ptilolite (til-ō-lit), *n.* [< Gr. *πτελον*, wing, + *λίθος*, stone.] A zeolitic mineral, occurring in white tufts or spongy masses of minute acicular crystals, found in cavities in augite-andesite in Jefferson county, Colorado. It is a hydrous silicate of aluminium, calcium, and potassium, and is remarkable for its high percentage of silica.

Ptilonopinae (til-ō-nō-pi'nē), *n. pl.* [NL., < *Ptilonopus* + *-inæ*.] A subfamily of *Columbidae*, named from the genus *Ptilonopus*. *P. J. Selby*, 1835. See *Treroninae*.

Ptilonopus (ti-lon-ō-pus), *n.* [NL. (Swainson, 1837), prop. *Ptilopus*, < Gr. *πτελον*, feather, + *πούς* = *E. foot*.] An extensive genus of pigeons of the family *Columbidae*, giving name to the *Ptilonopinae*. Also *Ptilonopus* (Swainson, 1825) and *Ptilopus* (Strickland, 1841).

Ptilopædes (til-ō-pē-dēz), *n. pl.* [< Gr. *πτελον*, down, + *παῖς* (paīd-), child.] In *ornith.*, in Sundevall's classification, a primary group of birds, embracing such as are clothed at birth with down (which sprouts not only from ptery-læ, but also from parts of the skin which form apteria when the true plumage is acquired), and are generally able to run about and feed themselves when hatched: opposed to *Psilopædes*: nearly equivalent to *Præcoeces*, but of more exact signification. Also called *Dasyptædes*, *Autophagi*.

ptilopædic (til-ō-pē-dik), *a.* [< *Ptilopædes* + *-ic*.] Of or pertaining to the *Ptilopædes*; præcoecial: opposed to *psilopædic*.

Ptilophyton (ti-lōf-i-ton), *n.* [NL. (Dawson, 1878), < Gr. *πτελον*, feather, + *φυτόν*, a plant.] A plant of very uncertain affinities, so called by Dawson and supposed by him to be aquatic, and more likely to have been allied to rhizocarps than to any other group. It consists of beautiful feathery fronds, bearing on parts of the main stem or petiole small rounded sporocarps. It is found in the Devonian and Lower Carboniferous of New York, in Nova Scotia, and in Scotland.

Ptilopteri (ti-lōp-tē-rī), *n. pl.* [NL., < Gr. *πτελον*, feather, + *πτερόν*, wing.] The penguins as an order of birds: conterminous with *Imppennes*, *Squamipennes*, *Sphenisci*, and *Sphenisciformes*.

Ptilorhis (til-ō-ris), *n.* [NL. (Swainson, 1825), erroneously *Ptilornis* and *Ptiloris*, prop. **Ptilorhis*, < Gr. *πτελον*, soft feather, + *ῥίς* (rīv-), nose.] A genus of *Paradisæidæ*, belonging to the subfamily *Eptimachinæ*, or slender-billed birds of paradise, having the tail not longer than the body, and a jugular shield of metallic plumes. The nostrils are feathered, whence the name. Four species of these beautiful birds inhabit Australia and New Guinea.—*P. paradisæ*, the rifle-bird, *P. victorie*, *P. alberti*, and *P. (Craspedophora) magnifica*. See cut under *rifle-bird*.

ptilosis (ti-lō-sis), *n.* [NL., < Gr. *πτελωσις*, plumage, also a disease of the eyelids resulting in loss of the eyelashes, < *πτελοῦσθαι*, be winged (or feathered), < *πτελον*, feather, wing.] 1. In *ornith.*, plumage; the feathering of a bird, considered with reference to the texture or other character of the feathers themselves. Compare *pterylosis*.—2. In *med.*, loss of the eyelashes.

Ptilota (ti-lō-tā), *n. pl.* [NL. (Macleay, 1821), < Gr. *πτελωτός*, winged, verbal adj. of *πτελοῦσθαι*, be winged: see *ptilosis*.] In Macleay's classification, one of the prime divisions of the

class *Insecta*, distinguished from *Aptera*, corresponding to Latreille's *Pterodictica*, and divided primarily into *Mandibulata* and *Haustellata*. See *Pterygota*.

Ptilotis (ti-lō-tis), *n.* [NL. (Swainson, 1837), < Gr. *πτελον*, feather, + *ὄψ* (ōr-) = *E. ear*.] A very extensive genus of meliphagine birds. It includes nearly 40 species, ranging through the Australasian, Australian, and Polynesian regions, mostly of plain dull olivaceous and yellowish colors, with the skin of the sides of the head often bare and wattled, or the parotic feathers (ear-covers) stiffened and usually white or yellow, forming a conspicuous mark, whence the name. *P. chrysotis* and *P. carunculata* are examples.

Ptinidæ (tin-i-dē), *n. pl.* [NL. (Leach, 1819), < *Ptinus* + *-idæ*.] A large family of serricorn coleopterous insects, containing beetles of small size, having the antennæ with from nine to eleven joints, the head retractile, and the elytra entire. Both larvae and beetles feed mostly on dead animal and vegetable matter. The larvae eat drugs, even pepper and tobacco. Some 44 genera and 150 species are recognized in the United States. *Lasioderma serricornis* is known in the United States as the cigarette-beetle, on account of the damage it does to cigarettes. *Sitodrepa panicea* is a wide-spread museum-pest, and is found in many drugs. Members of the genus *Anobium* are known as *death-watchers*. Many of the species are cosmopolitan. See cut under *book-worm*.

Ptinus (ti-nus), *n.* [NL. (Linnaeus, 1767), irreg. < Gr. *φθίνειν*, *φθίειν*, decay, waste, destroy: see *phthisis*.] A large and wide-spread genus of beetles, typical of the family *Ptinidæ*, of which about 80 species are known, 6 inhabiting the United States. A number of them occur both in Europe and in North America. *P. fur* is cosmopolitan and a well-known museum-pest. See cut under *book-worm*.

ptisan (tiz'an), *n.* [Also *ptisane*, formerly *pty-sane*, *tisan*; = *F. tisane* = *Pr. tizana*, *tipsana* = *Sp. Pg. It. tisana*, < *L. ptisana*, < Gr. *πτισάνη*, peeled barley, also a drink made from it, < *πτισσειν*, peel, husk.] 1. A mild harmless drink, or one having a slight medicinal quality, as barley-water or herb-tea.

For what ancient phlistion is there that in his works commendeth not *ptysane*, which is none other than pure barley braided in a mortar and sodden in water?

Sir T. Elyot, *Castle of Health*, II. 21.

2. Grape-juice allowed to drain on the slab, without pressure. *R. F. Burton*, *Arabian Nights*, V. 158, note.

P. T. O. An abbreviation of *Please turn over*: a direction, usually at the foot of a page, to call attention to matter on the other side of the leaf.

ptochocracy (tō-kōk-rā-si), *n.* [< Gr. *πτωχός*, a beggar (< *πτέσσειν*, crouch or cower from fear), + *-κρατία*, < *κρατεῖν*, rule.] Government by beggars; the rule of paupers: the opposite of *plutocracy*. [Rare.]

It [the opposition to the extension of the county franchise] alleges the risks we run from the old and the rich, the danger of a gerontocracy and a plutocracy; whereas, to make its argument good, it should have shown the imminence of a *ptochocracy*.

Gladstone, *Gleanings of Past Years*, I. 182.

ptochogony (tō-kōg-ō-ni), *n.* [< Gr. *πτωχός*, a beggar, + *-γονία*, generation: see *-gony*.] The production of beggars; pauperization. [Rare.]

The whole plan of the Bishop of London is a *ptochogony*—a generation of beggars.

Sydney Smith, *To Archdeacon Singleton*, III.

Ptolemæan (tol-e-mē'an), *a.* [< *L. Ptolemæus*, *Ptolemæus*, of Ptolemy, < *Ptolemæus*, < Gr. *Πτολεμαῖος*, Ptolemy.] Same as *Ptolemaic*. *Max Müller*, *Sci. of Lang.*, p. 27.

Ptolemaic (tol-e-mā'ik), *a.* [< Gr. *Πτολεμαϊκός*, pertaining to Ptolemy, < *Πτολεμαῖος*, Ptolemy: see def.] Of or pertaining to Ptolemy; (a) relating to one or all of the line of Ptolemies, rulers of Egypt from the end of the fourth to the first century B. C.; (b) relating to the Alexandrian geographer and astronomer Ptolemy (see below).—**Ptolemaic chart**. See *Bonne's map-projection*, under *projection*.—**Ptolemaic system**, the structure of the heavens according to Ptolemy, an Egyptian-Greek astronomer, whose recorded observations extend from 127 to 151 A. D. His "Treatise of Mathematics" (*Μαθηματικὴ σύνταξις*), commonly called the "Almagest," is mainly devoted to an investigation of the movements of the heavenly bodies. Ptolemy holds that the earth is stationary, because there is no appearance of variation in the perspective of the fixed stars. He admits it would simplify astronomy to suppose it rotated daily on its axis, but thinks that refuted by physical considerations, while, regarding the stars as devoid of weight, he sees no objection to supposing them to move with immense velocity. But these two errors of denying the motion of the earth both in translation and in rotation were not incompatible with a correct representation of the motions of the planets relatively to the earth. The figure shows his theory of Mars, which was exactly like that of Jupiter and Saturn. He supposed that about a circular deferent, which was really nearly similar and similarly placed to the true orbit of the planet about the sun, moved

an epicycle, which was really of nearly the same proportionate size as the earth's true orbit and parallel to it—this epicycle carrying the planet on its circumference.

Ptolemaic Theory of Mars

as to move uniformly relatively to P, the perigee of the epicycle, which it reaches so as to be then in opposition to the mean sun. The center D of the epicycle moves about the orbit so as to describe in equal times equal angles about E, the center of the equant. C, the center of the orbit, bisects the eccentricity ET. The essential errors in his representation were as follows. (1) He represented the deferent by the circle, thus giving it a breadth too great. This circle remained in an eccentric position, whence it was called the eccentric, as well as the deferent and the orbit. (2) Instead of supposing the moving radius, TD, to describe equal areas in equal times, he drew a line to D, the attachment of the epicycle with the deferent, from E, really corresponding to the empty focus of the ellipse, but called by him the center of the equant, and he supposed this line ED to turn with an equal motion so as to describe equal angles in equal times. This made an observable error only in the case of Mars. It made a tolerable approximation to the elliptic motion, which excited the admiration of Kepler, and it shows that Ptolemy aimed at something much better than a mere harmonic analysis of the motions of the planets. (3) He not only made the epicycle circular, but he placed its center upon the deferent, thus virtually neglecting the eccentricity as well as the ellipticity of the earth's orbit in its effects on the apparent places of the exterior planets. (4) He made the planet revolve in its epicycle so as to describe in equal times equal arcs measured from the perigee of the epicycle, as if the earth's motion were affected by the eccentricity of the orbit of the other planet. And (5) he made the planet come to the perigee of its epicycle when it was just opposite the mean place of the sun, instead of the true place. Other still more serious falsities affected his theories of the inferior planets and of the moon. Yet, notwithstanding all these errors, Ptolemy's theory satisfied pretty closely, in the cases of all the planets except Mercury and the moon, such observations as could be made in his time. In his phrase, it 'saved appearances.' The Ptolemaic theory continued in vogue until Copernicus (in 1543) explained the relations between the motions of the planets and that of the sun, and thus supplied a method for determining the relative magnitudes of the different planetary orbits. But the system of Copernicus did not in itself represent the phenomena any better than that of Ptolemy; and it was not until the great work of Kepler on the motions of Mars, published in 1609, that the real truth was known. The Almagest remains, however, a model of scientific investigation, most admirable for the genius with which it manages not only the astronomical problems attacked, but also those of pure mathematics.

Ptolemaist (tol-e-mā'ist), *n.* [< *Ptolemaic* + *-ist*.] A believer in the Ptolemaic system of astronomy.

ptomaine, ptomain (tō-mā-in), *n.* [Irreg. < Gr. *πτῶμα*, a corpse (prop. that which is fallen, < *πτέειν*, fall), + *-ine*.] A generic name of alkaloid bodies formed from animal or vegetable tissues during putrefaction, and the similar bodies produced by pathogenic bacteria. Some of them are poisonous.

ptosis (tō'sis), *n.* [< Gr. *πτῶσις*, a fall, a falling, < *πτέειν* (perf. *πέπτωκα*, verbal adj. *πεπτός*), fall, = *L. petere*, fall upon, attack, seek, etc.: see *petition*.] A falling of the upper eyelid, or inability to raise it, due to paralysis of the levator palpebræ. Slight ptosis may be due to paralysis of Müller's muscle innervated through the cervical sympathetic. Also called *blepharoptosis*, *blepharoplegia*.

ptotic (tō'tik), *a.* [< *ptosis* (*ptot*-) + *-ic*.] Pertaining to, characterized by, or affected with ptosis.

ptyalin, ptyaline (ti'a-lin), *n.* [< Gr. *πτελον*, spittle, < *πτέειν*, spit: see *spew*.] The peculiar principle of saliva, believed to be a proteid body, which acts as a ferment on starch, rapidly converting it into dextrose.

ptyalism (ti'a-lizm), *n.* [< Gr. *πτελισμός*, a spitting, < *πτελλίζειν*, spit much: see *ptyalize*.] In *med.*, salivation; a morbid and copious excretion of saliva.

ptyalize (ti'a-liz), *v. i.*; pret. and pp. *ptyalized*, ppr. *ptyalizing*. [< Gr. *πτελλίζειν*, spit much, < *πτελον*, spittle, < *πτέειν*, spit: see *ptyalin*.] To salivate.

ptyalogogue (ti'a-lō-gō'ik), *a.* [< *ptyalogogue* + *-ic*.] Promoting a flow of saliva.

ptyalogogue (ti-al-ō-gōg), *n.* [< Gr. *πτελον*, spittle, + *αγωγός*, leading, < *άγειν*, do, bring.] A medicine which causes salivation, or a flow of saliva.

Ptyas (tí'as), *n.* [NL., < Gr. πύας, a kind of serpent, lit. 'spitter,' < πρίν, spit.] A genus of *Colubrinæ* or snakes. They have the posterior maxillary teeth not abruptly longer than the preceding ones, rostral plate narrow and free laterally, one median dorsal row of scales, internasals separate from nasals, several laterals, and two or more preoculars. *P. mucosus* is known as the *rat-snake*.

ptychodont (tí'kō-dont), *a.* [*<* Gr. πτύξ (πτυχ-), πτυχή, a fold, + δόντις (δοντ-) = *E. tooth*.] In *odontol.*, having the crowns of the molar teeth folded.

Ptychodus (tí'kō-dus), *n.* [NL. (Agassiz, 1837), < Gr. πτύξ (πτυχ-), πτυχή, a fold, + δόντις (δοντ-) = *E. tooth*.] A genus of fossil selachians, of the Cretaceous age; so called from the transverse or radiating plications on the large square teeth. It was formerly supposed to be related to the cestron shark, but is now referred to or near the family *Mylodontidae*.

Ptychopleura (tí'kō-plō'rā), *n. pl.* [NL., < Gr. πτύξ (πτυχ-), πτυχή, a fold, + πλευρά, the side.] A group of lizards: same as *Cyclosaura*. Also *Ptychopleuri*.

ptychopleural (tí'kō-plō'ral), *a.* [*<* *Ptychopleura* + -al.] Of or pertaining to the *Ptychopleura*.

Ptychopteris (tí'kop'te-ris), *n.* [NL., < Gr. πτύξ (πτυχ-), πτυχή, a fold, + πτερίς, fern.] In *fossil bot.*, a genus of fossil ferns, known chiefly from the form of the leaf-scars. These are elongated-oval or elliptic in form; of their details but little has been made out. The fern-stems which have been placed in this genus are said by Schimper to bear a close resemblance in external appearance to the living *Cyathea* and *Allophila*. They are found in abundance in the Carboniferous, especially in the St. Etienne (France) coal-field, where they occur associated with leaves of *Pecopteris*, to which they may belong.

Ptychosperma (tí'kō-spér'mā), *n.* [NL. (Labillardiere, 1808), < Gr. πτύξ (πτυχ-), πτυχή, a fold, + σπέρμα, seed.] A genus of palms of the tribe *Areceæ*, type of the subtribe *Ptychospermeæ*. It is characterized by monocious flowers, both sexes within the same spadix, the staminate flowers having orbicular concave broadly imbricated and heeled sepals, acute petals as many as the sepals, and from twenty to thirty stamens—the pistillate flowers being smaller, nearly globose, and having a single ovary which becomes a one-celled fruit whose thick fibrous pericarp contains a single erect seed with ruminant albumen and a smooth or deeply five-grooved surface. The 11 species are natives of the Malay archipelago, Papua, Australia, and the islands of the Pacific. They are thornless palms, with a tall trunk marked by annular scars, and terminal pinnately divided leaves with the segments commonly dilated to the broad apex and there erose, or appearing as if eaten off. The flowers are small, and are borne in clusters on the slender spreading branches of a spadix inclosed by two spathe. The species are of little known industrial use, but rank among the most elegant of decorative palms. Those in greenhouse cultivation are sometimes called in general *feather-palms*, and very often *Seaforthia* (R. Brown, 1810), from Lord Seaforth, a patron of botany. *P. Seamani*, a beautiful dwarf species, produces a stem only about one inch in diameter and very strong and straight. Most of the species reach a commanding height: among them *P. Alexandræ*, the Alexandra palm, is remarkable as the tallest palm of Australia, exceeding 100 feet in height; *P. Cunninghamii*, the Illawarra palm, as found further south than almost any other palm; and *P. (Seaforthia) elegans*, the bangalow palm, as the most common in cultivation, and one of the most beautiful of all palms. The trunk of the last-named species is a smooth cylindrical shaft, swollen at the base and crowned by drooping feather-like leaves of a bright and intense green. Each leaf-stalk is dilated at the base into a smooth bright-green sheath completely inclosing the upper part of the trunk for 5 feet or more, below which the trunk is variegated by the broad deep-brown ring-like scars left by the preceding similar sheaths. This palm occurs in the coast forests of tropical Australia and to 85° south. See *palm*, and under it *Alexandra palm*, *bangalow palm*, and *feather-palm*.

Ptychozoon (tí'kō-zō'on), *n.* [*<* Gr. πτύξ (πτυχ-), πτυχή, a fold, + ζῷον, an animal.] A genus of

locephalum, about 7 inches long, having alate folds of the integument, whence the name.

ptygodere (tí'gō-dér), *n.* A lizard of the genus *Ptygoderus*.

Ptygoderus (ti-god'g-rus), *n.* [NL., irreg. < Gr. πτύξ (πτυχ-), πτυχή, a fold, + δέρος, skin, hide.] A genus of iguanoid lizards, having a crest of keeled scales on each side, as *P. pectinatus*.

Ptynx (tingks), *n.* [NL., < Gr. πτύξ, the eagle-owl.] 1. An old generic name of the darters: same as *Plotus*. *Moehring*, 1752.—2. A genus of smooth-headed owls, so named by Blyth in 1840. The type is *Ptynx uraltensis*, commonly called *Syrnium uraltense*.

Ptyobranchia (tí'ō-brang-kí'nā), *n. pl.* [NL., < *Ptyobranchus* + -ia².] In Günther's system, a group of *Muraenidae platyschistæ*, with the tail much shorter than the trunk, and the heart situated at a great distance behind the gills: same as the family *Moringuidæ*.

ptysmagogue (tis'ma-gog), *n.* [*<* Gr. πτύσσω, saliva (< πρίν, spit), + αγωγός, leading, < ἄγω, lead, bring.] A medicine that promotes discharges of saliva; a sialogogue.

ptyxis (tik'sis), *n.* [NL., < Gr. πτύξ, a folding, < πτύσσω, fold.] In *bot.*, the folding or configuration of a single part in a leaf- or flower-bud: opposed to *vernation* and *estivation*, the disposition of the parts conjointly.

pu' (pū), *v.* A Scotch form of *pull*.

Why pu' ye the rose, Janet?

What gars ye break the tree?

The Young Tamlane (Child's Ballads, I. 116).

pua (pō'ā), *n.* [Hawaiian.] A Hawaiian musical instrument, made of a gourd or a joint of bamboo. It has three holes, two of which are finger-holes. It is blown by putting the third hole to the player's nose. When made of gourd, it resembles the ocarina; and when of bamboo, it is a variety of nose-flute.

puant, *a.* [*<* OF. *puant*, < L. *puten*(-t)s, ppr. of *putere*, stink: see *putid*.] Stinking. *Skelton*. (*Hallwell*.)

pub (pub), *n.* [Abbr. of *public*, *n.*, 2.] A public house; a tavern. *Athenæum*, No. 3198, p. 177. [*Slang*, Eng.]

pub. An abbreviation of *public*, *publish*, or *publisher*.

pubbet (pub'l), *a.* [Origin obscure.] Fat; plump. [*Prov. Eng.*]

Thou shalt Me fynde fat and well fed,

As *pubbe* as may be.

Drant, tr. of Horace's Ep. to Tibullus.

pub. doc. An abbreviation of *public document*.

puberal (pū'be-rāl), *a.* [*<* L. *pubes*, *puber*, adult (see *puberty*), + -al.] Pertaining to puberty.

puberty (pū'ber-ti), *n.* [*<* OF. *puberte*, F. *puberté* = Fr. *pubertat* = Sp. *pubertad* = Pg. *puberdade* = It. *pubertà*, < L. *puberta*(-t)s, the age of maturity, manhood, < *pubes*, *puber*, grown up, of mature age, adult; of plants, downy, pubescent; < √ *pu*, beget.] 1. The condition of being able to reproduce; sexual maturity in the human race. In males this is usually developed between the ages of thirteen and sixteen, and in females somewhat earlier; and it appears that in very warm climates puberty is reached somewhat sooner than elsewhere. At common law the age of puberty is conclusively presumed to be fourteen in the male and twelve in the female.

2. In *bot.*, the period when a plant begins to bear flowers.

puberulent (pū'ber'ŭ-lent), *a.* [*<* L. *pubes*, *puber*, downy, pubescent, + -ulent.] 1. Finely and softly pubescent; downy.—2. In *bot.*, covered with fine, short down; minutely pubescent.

pubes (pū'bēz), *n.* [*<* L. *pubes*, the hair which appears on the body at the age of puberty, the genitals, < *pubes*, *puber*, grown up, of mature age; of plants, downy, pubescent: see *puberty*.] 1. The pubescence or hairiness of the genitals, which appears at puberty. Hence.—2. (a) The place where hair grows at puberty; the suprapubic or hypogastric region, at the middle of the lowest part of the abdomen: in women known as the *mons*, or *mons Veneris*. (b) The pubic bones, or bony framework of the pubes; the underlying skeleton of the pubic region, more fully called *os pubis*. There being a pair of pubic bones, right and left, each is now called *os pubis*, plural *ossa pubis*, or, more frequently, *pubis*, in the plural *pubes*. See *pubis*.

3. In *bot.*, same as *pubescence*, 3.—4. Plural of *pubis*.

pubescence (pū-bes'ens), *n.* [*<* *pubescen*(t) + -ce.] 1. The coming of puberty, or attaining to puberty; the state of being pubescent; puberty.

In the first [septenary] is dentition or falling of teeth; in the second *pubescence*. *Sir T. Browne*, *Vulg. Err.*, iv. 12.

2. Hairiness; especially, the fine soft hairs of various insects, etc.; lanugo.—3. In *bot.*: (a) The condition or character of being pubescent. (b) The down or hair which grows on many plant-surfaces. See *pubescent*.

pubescency (pū-bes'ens-i), *n.* [As *pubescence* (see -cy).] Pubescence.

From crude *pubescency* unto perfection.

Sir T. Browne, *Garden of Cyrus*, iii.

pubescent (pū-bes'ent), *a.* [*<* L. *pubescen*(-t)s, reach the age of puberty, become downy, < *pubes*, *puber*, of mature age, downy: see *pubes*.] 1. Arriving at puberty.—2. Covered with pubescence, or fine short hair; downy.—3. In *bot.*, covered or sprinkled with down or hairs: a general term, including *villous*, *hirsute*, *strigose*, *lanate*, etc., but when used alone in specific description denoting a soft or downy and short pubescence.

pubic (pū'bik), *a.* [*<* *pub-is* + -ic.] Of or pertaining to the pubes or pubis: as, the *pubic* bones; the *pubic* symphysis, ramus, spine, ligament, artery, etc.—**Pubic angle**, the angle formed by the pubic crest and the inner border of the pubis.—**Pubic arch**, the arch formed by the inferior ramus of each pubis converging to the pubic symphysis. In the male it is narrower and more acute-angled than in the female, being in the former case like a letter V inverted. It represents a great part of the inferior outlet of the pelvis. Also called *arch of the pubis*, sometimes *subpubic arch*.—**Pubic crest**, the crista pubis (which see, under *crista*).—**Pubic ligaments**, certain ligaments uniting the two pubic bones: an anterior, a superior, an inferior, and a posterior are distinguished, respectively specifically called *prepubic*, *suprapubic*, *intrapubic*, and *postpubic*.—**Pubic ramus**, one of the two branches of which each pubis chiefly consists in man and some other animals. In man the two rami are (a) the superior or horizontal, forming much of the true brim of the pelvis, and ankylosed with the ilium, and (b) the inferior, oblique, or descending ramus, forming each half of the pubic arch, partly encircling the obturator foramen, and ankylosed with the ischium.—**Pubic spine**, a prominent tubercle on the upper border of the horizontal ramus of the pubis of man, about an inch from the symphysis. Poupard's ligament is inserted into it. Also called *tuberculum pubis* or *tuberculum pubicum*.—**Pubic symphysis**, or *symphysis pubis*, the coming or growing together of the right and left pubic bones at the median line of the pubes. It may be a simple apposition or articulation of the bones, or complete ankylosis. In man the bones are commonly articulated but not ankylosed, forming in any case an immovable joint.—**Pubic vein**, a tributary to the external iliac vein from the obturator vein.

pubigerous (pū-bij'g-rus), *a.* [*<* L. *pubes*, the hair which appears on the body at the age of puberty (see *pubes*), + *gerere*, carry.] Bearing down or downy hairs; pubescent.

pubiotomy (pū-bi-ot'ō-mi), *n.* [*<* L. *pubis* (see *pubis*) + Gr. *τομία*, < *τέμνω*, *temno*, cut.] In *surg.*, a section of the pubic symphysis.

pubis (pū'bis), *n.*; *pl. pubes* (-bēz). [NL., for *os pubis*: *os*, bone; *pubis*, gen. of *pubes*, *pubes*: see *pubes*.] In *anat.* and *zool.*, a public bone, or bone of the pubes (*os pubis*); a distal inferior and anterior division of the pelvic arch, forming a part of the *os innominatum* or haunch-bone by ankylosis at the acetabulum with the ilium and ischium, and often, as in man and most mammals, united also with the ischium to circumscribe the obturator foramen, and, with its fellow of the opposite side, forming the pubic symphysis. In man each pubis is united to its fellow in the median line at the pubic symphysis, and the two circumscribe the brim of the pelvis in front by their bodies and horizontal rami, their descending rami becoming ankylosed with the ischium to circumscribe the obturator foramen, furnishing bony support to the genitalia, and forming part of the inferior strait or outlet of the pelvis. In a few mammals, and in all birds excepting the ostrich, there is no pubic symphysis. See *epipubis*, *prepubis*, and cuts under *Dromæus*, *epipubis*, *ligament*, *Ornithoscolida*, *pelvis*, *sacrum*, and *mammalia*.—**Angle**, arch, etc., of the pubis. See *pubis*.

public (pub'lik), *a.* and *n.* [Formerly *publick*, earlier *publicque*, *publike*, *publyke*; < OF. (and F.) *public*, *m.*, F. *publique*, *m.* and *f.*, = Sp. *público* = Pg. *público* = It. *pubblico*, *pubblico*, < L. *publicus*, in inscriptions also *publicus*, *poplicus*, pertaining to the people, contr. from **populicus*, < *populus*, people: see *people*.] I. *a.* 1. Of or belonging to the people at large; relating to or affecting the whole people of a state, nation, or community: opposed to *private*: as, the *public* good; *public* affairs; the *public* service; a *public* calamity; *public* opinion.

Publike toke his begynnynge of people, whiche in latin is *Populus*, in whiche worde is conteyned all the inhabitants of a realme or cite, of what estate or condition so euer they be.

And this was observed both for the *public* and private prayers. *Purchase*, *Pilgrimage*, p. 112.

There are also divers Convents, which have spacious and well kept Gardens, which are always open and *public* to People of any Note. *Lister*, *Journey to Paris*, p. 185.

We leave the narrow lanes behind, and dare

Th' unequal combat in the *public* square.

Dryden, *Æneid*, li.

3. Open to the view or knowledge of all; notorious: as, a *public* exposure; *public* scandal.

Of this ordonnance and bondes there were made instrumentes *public* and letters patentes. *Berners*, tr. of *Froissart's Chron.*, l. cixxiii.

Joseph her husband, being a just man, and not willing to make her a *public* example, was minded to put her away privily. *Mat.* i. 19.

4. Regarding or directed to the interests of the community at large, and not limited or confined to private, personal, or selfish matters or interests: as, *public* spirit; a *public* benefaction.

Every true member of the church hath a *public* spirit, preferring the church's interest to his own, and suffering with fellow-members in their suffering, and having a care of one another, 1 Cor. xii. 25, 26. *Baxter*, *Self-Denial*, li.

Notary public. See *notary*.—Public acts, bills, laws, legislation, statutes, such acts, bills, etc., as concern the community at large, or the state or its municipalities, as distinguished from *private* acts, etc. (see *private*), one important result of the distinction being in the rule that the courts take judicial notice of public acts, but a private act must be alleged and proved by him who relies upon it.—Public administrator, corporation, credit, document, domain, enemy, etc. See the nouns.—Public funds. See *fund*.—Public holiday. Same as *legal holiday* (which see, under *holiday*).—Public house. (a) An inn or tavern; in England, especially, one which rarely accommodates lodgers, and which has for its chief business the selling of beer and other liquors. [In the United States rare and used in a general sense.] (b) *Public house* and *public place* are used in numerous statutes against immoral practices, gaming, prostitution, etc., with varying limitations of meaning, but generally implying a place to which any one may have access without trespassing.—Public indecency. See *indecency*.—Public institution, an establishment of an educational, charitable, reformatory, or sanitary character, maintained and conducted for the use and benefit of the public, and usually at the public expense.

Education, shorter hours of labour, sanitary homes, and public institutions to take the place of the public house. *Nineteenth Century*, XXVI. 741.

Public lands, lands belonging to government, especially such as are open to sale, grant, or other method of disposal to whosoever will comply with the conditions prescribed by law.—Public law, international law. See *international*. a.—Public loan. See *loan*.—Public nuisance. See *nuisance*. b.—Public office. See *office*. c.—Public opinion. See *opinion*.—Public orator. See *orator*. d.—Public policy, the policy, or general purpose and spirit, of the law: thus, contracts calculated to defeat justice or to hinder wholesome competition in trade are held void, as against *public policy*; or against the policy of the law, even when there is no positive statutory prohibition. See *policy of the law*, under *law*.—Public printer, prosecutor, records, etc. See the nouns.—Public right, in *Scottish feudal law*, the technical name given to a heritable right granted by a vassal to be held, not of himself, but of his superior.—Public school. See *school*.—Public spirit. See *spirit*.—Public stores. (a) Naval and military stores, equipment, etc. (b) Warehouses to which dutiable goods are sent for appraisement; bonded warehouses, or stores in which goods are held under bond for duty until sold or exported. [U. S.]—Public trust, a trust constituted for the benefit either of the public at large or of some considerable part of it answering to a particular description. See *private*.—Public use. (a) In the constitutional provisions authorizing the taking by the state or nation of private property for the use of the people at large on making compensation, a use directly subservient to public necessity or convenience, as for a park, a highway, a railroad, etc., as distinguished from uses for private interest, though incidentally beneficial to the public, as for a mill or factory: thus, the supplying of water to a town is a *public use* for which it may constitutionally be authorized to condemn the rights of private owners in watercourses. (b) A use so intimately allied to or affecting the public welfare or convenience that the state may regulate it as to the management or charges: thus, the great grain-elevators of modern commerce, standing between the wharves of lake or ocean navigation and the termini of trunk lines of railway, have been held to be so affected with a *public use* that the state may regulate by law the rates of charges. (c) In *patent law*,

use without restriction by one or more members of the community, as distinguished from use by the inventor: thus, an inventor of a secret spring who should allow its use by others without patenting it might be deemed to allow its *public use*, although, from its peculiarities of structure and relation, its use could not be seen by the public.—Public war. See *war*.—Public waters, waters which are deemed navigable at common law. See *navigable*.—Public works, all fixed works constructed for public use, as railways, docks, canals, water-works, roads, etc.: more strictly, military and civil engineering works constructed at the public cost.

II. n. 1. The general body of people constituting a nation, state, or community; the people, indefinitely: with *the*.

God made man in his own image; but *the public* is made by newspapers, members of parliament, excise officers, poor-law guardians. *Dierckx*, *Coningbys*, lii. 1.

That . . . the nobler, and what are vulgarly called the higher classes of society, are insufficient in their number, their power, and co-operation of sentiment to support any particular theatre, or piece, independent of *the public*; and that it is only the great mass of the people that can finally establish the fate of any theatrical representation. *W. Cooke*, *Memoirs of S. Foote*, I. 64.

2. A public house. [*Colloq.*, Eng.]

It's so far from the world, as a man may say; not a decent *public* within a mile and a half, where one can hear a bit of news of an evening. *Mrs. Gaskell*, *Sylvia's Lovers*, xli.

In every little comfortable *public* within a circle of thirty miles' diameter, the home-brewed quivers in the glasses on the open tables. *The Atlantic*, LVIII. 458.

In *public*, in open view; before the people at large; not in private or secretly.

In private grieve; but, with a careless scorn,

In *public* seem to triumph, not to mourn. *Granelle*.

publican (pub'li-kān), n. [*ME. publican*, < *OF. publicain*, *publican*, *publicain*, *popelican*, etc., *F. publicain* = *Sp. Pg. It. publicano*, a publican, < *L. publicanus*, pertaining to the public revenues, or to their farming out or collection; as a noun, a farmer-general of the public revenue, a tax-gatherer; < *publicus*, public: see *public*.] 1. In ancient Rome, one who farmed the public revenues; a tax-gatherer. On account of their oppressive exactions, especially in the conquered provinces, the publicans were commonly regarded with detestation.

As Jesus sat at meat in the house, behold, many *publicans* and sinners came and sat down with him and his disciples. *Mat.* ix. 10.

How like a fawning *publican* he looks!

Shak., *M. of V.*, i. 3. 42.

Hence—2. Any collector of toll, tribute, customs, or the like.

The custom-house of certain *publicans* that have the tonaging and poundaging of all spoken truth. *Milton*, *Areopagitica*.

3. The keeper of a public house or other such place of entertainment. In law, under the term *publicans* are included innkeepers, hotel-keepers, keepers of ale-houses, wine-vaults, etc. *Wharton*. [Great Britain.]

The *publican* can . . . profitably combine the business of a bookmaker with the equally profitable business of selling intoxicant fluids. *Nineteenth Century*, XXVI. 849.

publicate (pub'li-kāt), v. t. [*L. publicatus*, pp. of *publicare*, publish: see *publish*.] To publish. [Rare.]

Little sins in them [the clergy], if *publicated*, grow great by their scandal and contagion. *Ep. Gauden*, *Tears of the Church*, p. 115. (*Davies*).

publication (pub-li-kā'shən), n. [*F. publication* = *Sp. publicacion* = *Pg. publicação* = *It. pubblicazione*, < *L. publicatio* (n-), a making public, an adjoining to the public treasury, < *publicare*, pp. *publicatus*, make public: see *publish*.] 1. The act of publishing, or bringing to public notice; notification to people at large, by speech, writing, or printing; proclamation; promulgation; announcement: as, the publication of statutes; publication of banns. In law, the publication of defamation consists in communicating it to any third person; the publication of a will is that act of a testator in which he declares to the subscribing witnesses that the instrument he asks them to attest is his will; in chancery proceedings, opening to the inspection of the parties depositions that have been taken and returned under seal to the court or clerk is *publication*.

The communication of a libel to any one person is a publication in the eye of the law. *Blackstone*, *Com.*, IV. xi.

On the third *publication* they [betrotten persons] are said to be asked out. *Dickens*, *David Copperfield*.

2. The act of offering a book, map, print, piece of music, or the like, to the public by sale or by gratuitous distribution.

An imperfect copy having been offered to a bookseller, you consented to the publication of one more correct. *Pope*.

3. A work printed and published; any book, pamphlet, or periodical offered for sale to the public: as, a monthly *publication*; an illustrated *publication*.—4t. Appearance in public; public appearance. [Rare.]

His jealousy . . . attends the business, the recreation, the publications, and retirements of every man. *Jer. Taylor*, *Works* (ed. 1835), I. 772.

Obscene publication. See *obscene*.—To pass publication, to reach the stage of a cause in chancery when the time for examining witnesses has expired, and the depositions kept secret may be disclosed on the application of either party.

public-hearted (pub'lik-här'ted), a. Having the interests of the people at heart; public-spirited.

They were *public-hearted* men; as they paid all taxes, so they gave up all their time to their country's service, without any reward. *Clarendon*, *Great Rebellion*.

publicist (pub'li-sist), n. [= *F. publiciste* = *Sp. Pg. publicista* = *It. publicista*; as *public* + *-ist*.]

1. A writer on the law of nature or the laws of nations; one who is versed in public or international law; one who treats of the rights and mutual obligations of nations.

The methodized reasonings of the great *publicists* and jurists form the digest and jurisprudence of the Christian world. *Burke*, *A Regicide Peace*, li.

The mixed systems of jurisprudence and morals constructed by the *publicists* of the Low Countries appear to have been much studied by English lawyers. *Maine*, *Ancient Law*, p. 45.

Many *publicists* still view the allowance of transit (to belligerents) as reconcilable with the notion of neutrality, and a number of treaties have expressly granted it to certain states. *Woolsey*, *Introd. to Inter. Law*, § 101.

2. One who is versed in or who writes upon the current political topics of the time.

This eminent *publicist*, . . . Mr. Arthur Pendenis.

Thackeray, *Pendenis*, xxxvi.

"Slow and sure" is not the motto of either reader or writer in these days. Public and *publicist* are acceptable to each other in proportion as they are ready to conform to the electric influences of the times. *Nineteenth Century*, XX. 515.

publicity (pub-lis'i-ti), n. [*F. publicité* = *Sp. publicidad* = *Pg. publicidade* = *It. pubblicità*; as *public* + *-ity*.] The state of being public, or open to the observation or inquiry of a community; notoriety: as, to give publicity to a private communication.

publicly (pub'lik-li), adv. In a public manner.

(a) Openly; without reserve or privacy.

Sometimes also it may be private, communicating to the judges some things not fit to be *publicly* delivered. *Bacon*.

When Socrates reproved Plato at a feast, Plato told him "it had been better he had told him his fault in private, for to speak it *publicly* is indecency."

Jer. Taylor, *Works*, V. 378.

But he so much scorned their charitie, and *publicly* defied the vitmerost of their cruelty, he wisely prevented their policies. Quoted in *Capt. John Smith's Works*, I. 152.

(b) In the name of the community; with general consent.

This has been so sensibly known by trading nations that great rewards are *publicly* offered for its supply. *Addison*.

public-minded (pub'lik-mīn'ded), a. Disposed to promote the public interest; public-spirited.

public-mindedness (pub'lik-mīn'ded-nes), n. A disposition to promote the public interest; public spirit.

All nations that grew great out of little or nothing did so merely by the *public-mindedness* of particular persons. *South*.

publicness (pub'lik-nes), n. 1. The character of common possession or interest; joint holding: as, the *publicness* of property.

The vast multitude of partners does detract nothing from each private share, nor does the *publicness* of it lessen property in it. *Boyle*, *Works*, I.

2. Openness or exposure to the notice or knowledge of the community or of people at large; notoriety: as, the *publicness* of a resort; the *publicness* of a scandal.

The *publicness* of a sin is an aggravation of it; makes it more scandalous, and so more criminal also. *Hammond*, *Works*, I. 218. (*Latham*).

public-spirited (pub'lik-spir'i-ted), a. 1. Having or exercising a disposition to promote the interest or advantage of the community; disposed to make private sacrifices for the public good: as, a *public-spirited* citizen.

At Geyra I went to the house of the aga, a venerable old man, who was one of those *public-spirited* Turks that entertains all strangers. *Pococke*, *Description of the East*, II. li. 71.

It was generous and *public-spirited* in you to be of the kingdom's side in this dispute. *Swift*.

2. Dictated by or based on regard for the public good: as, a *public-spirited* measure.

Another *public-spirited* project, which the common enemy could not foresee, might set King Charles on the throne. *Addison*.

public-spiritedly (pub'lik-spir'i-ted-li), adv. With public spirit.

public-spiritedness (pub'lik-spir'i-ted-nes), n. The quality or character of being public-spirited.

ited; a disposition to act with energy for the public interest or advantage; a willingness to make sacrifices of private interest for the public good.

The spirit of charity, the old word for *public-spiritedness*.

Puccinia (puk-sin'i-i), *n.* [*< NL. (Persoon, 1797), named after T. Puccini, an Italian anatomist*.] 1. A genus of parasitic fungi of the class *Uredineæ*; the rusts. Plants of this genus exhibit the phenomenon of heterostyly—that is, they pass through different stages of their life-history upon different host-plants. *P. graminis*, one of the commonest and most destructive species, may be taken as a type. It appears in the spring on the leaves of *Berberis vulgaris*, constituting what is known as *barberry-rust* or *barberry cluster-cups*. This is the aecidial stage, and received the name of *Aecidium Berberidis* be-

Puccinia graminis and *Aecidium Berberidis*.

1, puccinia on the leaf of a grass; 2, one of the uredo-spores; 3, one of the teliospores; 4, a part of the superior face of the leaf of *Berberis vulgaris*, showing the spermatogonia; 5, leaf of *Berberis vulgaris*, inferior face, showing the aecidia; 6, transverse section of the leaf of *Berberis vulgaris*, showing the spermatogonia on the superior and the aecidia on the inferior face; 7, the cupules, forming the groups of aecidia.

fore the heterostyly was suspected. Later in the season the uredo stage makes its appearance on the leaves and stems of the cultivated oats, wheat, etc., appearing as pale-yellowish or whitish spots on the leaves. Soon the tissues are ruptured, and the long lines of orange-red uredo-spores are exposed, now constituting the red rust of oats, etc. By the rapid germination of the uredo-spores the disease is quickly spread, and may involve the entire plant. In the fall, just before cold weather, the black teleuto-

spores are produced. This is known as the black rust, and is designed to carry the fungus over the winter, when it again begins its life-cycle on the barberry. About 450 species of *Puccinia* are known, not a few of which are serious pests to the agriculturist or horticulturist. See *heterostyly, barberry-fungus, rust, Uredineæ*.

2. A plant of this genus.

pudding-wife (pūd'ing-wif), *n.* A labroid fish, *Platygllossus radiatus*, with a long body, large scales, and the color bluish or bronze, with wavy sky-blue spots, a stripe from snout to nape, and blue stripes in the fins. It occurs from the Florida Keys to Brazil.

puddingy (pūd'ing-i), *a.* [*< pudding + -y*.] Resembling or suggestive of a pudding. [*Colloq.*]

A limpness and roundness of limb which give the form a *puddingy* appearance. *Mayhew*, *London Labour and London Poor*, III. 66.

puddle¹ (pud'1), *n.* [Early mod. E. also *puddel*; *< ME. podel*, a pool; origin obscure. Cf. *AS. pudd* (rare), a ditch or furrow (glossed by *L. sulcus*); *E. dial. pudge*, a ditch. The *W. pudel*, a puddle, is prob. *< E.*] 1. A small pool of water, especially of dirty rain-water; a muddy plash.

There's not a *Puddle* (though it strangely stink) But dry they draw 't, Sea-Water's dainty Drink.

Sylvester, tr. of *Du Bartas's Weeks*, II., The Schisme.

The Lucrine lake is but a *puddle* in comparison of what it once was, its springs having been sunk in an earthquake. *Addison*, *Remarks on Italy* (ed. Bohn), I. 432.

2. Clay to which a little water has been added and which has then been tempered, so as to make it homogeneous and increase its plasticity. It is used in a great variety of ways when a water-tight stopping is required. It is also called *puddling*.

puddle¹ (pud'1), *v.*; pret. and pp. *puddled*, ppr. *puddling*. [Early mod. E. also *poodle*; appar. from the noun, but prob. in part a var. of *pad-dle* and *pudder* in similar sense. In the technical sense, def. 3, the verb has been adopted into other tongues (*F. puddler*, etc.).] **I. trans.** 1. To make foul or muddy; stir up the mud or sediment in; hence, to befoul in a figurative sense.

Something . . . hath *puddled* his clear spirit. *Shak.*, *Othello*, III. 4. 143.

But such extremes, I told her, well might harm
The woman's cause. "Not more than now," she said,
"So puddled as it is with favouritism."

Tennyson, Princess, III.

2. To work puddle into; render water-tight by means of puddle. See *puddle*, n., 2.—8. To convert (pig-iron) into wrought-iron by stirring while subjected to intense heat, in order to expel the oxygen and carbon. See *puddling*, n., 2.

II. *intrans.* To make a stir, as in a pool.

Indeed I were very simple, if with Crabronius I should
poodle in a wasp's nest, and think to purchase ease by it!
Junius, Sin Stigmatised (1639), Pref. (Latham.)

puddle² (pud'li), n. [Cf. LG. **puddel*, *puarel*, something short and thick (*puddel-rund*, *puarel-rund*, short, thick, and round), *puddig*, thick, *puddeln*, *puddeln*, waddle, *puddel*, a thick-haired dog (see *poodle*).] A pudgy, ill-shaped, awkward person.

I remember when I was quite a boy hearing her called
a limping old puddle.

Miss Burney, Cecilia, vii. 5. (Davies.)

A foot which a puddle of a maid scalded three weeks
ago.
Carlyle, in Froude, Life in London, I. 16.

puddle-ball (pud'l-bāl), n. In iron-manuf., a lump of red-hot iron taken from the puddling-furnace in a pasty state to be hammered or rolled.

puddle-bar (pud'l-bār), n. Bar-iron as it comes from the puddle-rolls (see that word).—**Puddle-train**. See *muck-rolls*.

puddle-duck (pud'l-duk), n. The common domestic duck: so called from its characteristic habit of puddling water.

puddle-poet (pud'l-pō'et), n. A low, mean poet. [Rare.]

The puddle-poet did hope that the jingling of his rhyme
would drown the sound of his false quantity.

Fuller, Ch. Hist., I. iii. 1. (Davies.)

puddler (pud'lēr), n. One who or that which puddles; specifically, one who is employed in the process of converting cast-iron into wrought-iron.—**Rotary puddler**, in metal-working, a mechanical puddler in which the treatment of the molten metal is effected by the rotation of the furnace. See *Danks rotary furnace*, under *furnace*.

puddle-rolls (pud'l-rōlz), n. pl. In iron-manuf., a pair of heavy iron rollers with grooved surfaces, between which the lumps of iron taken from the puddling-furnace, after being subjected to a preliminary forging, are passed so as to be converted into rough bars.

puddling (pud'ling), n. [Verbal n. of *puddle*, v.] 1. In *hydraulic engin.*, the operation of working plastic clay behind piling in a cofferdam, the lining of a canal, or in other situation, to prevent the penetration of water; also, the clay or other material used in this operation.

—2. The operation of transforming pig-iron into wrought-iron in a reverberatory furnace. The object of puddling is to remove the carbon in the pig-iron; and this is effected partly by the direct action of the oxygen of the air at the high temperature employed, and partly by the action of the cinder formed, or the oxidized compounds of iron added during the process. After the iron "comes to nature" in the furnace, it is made up into balls for convenient handling; these are "shingled" by hammering or squeezing, and passed between rolls, by which the metal is made to assume any desired form. There are two methods of puddling: the process as originally performed is called *dry puddling*; that which is now most generally followed is known as *wet puddling*, but is oftener called *pig-boiling*. In the older process only white or refined iron could be used; in the newer unrefined iron is employed, and this melts more perfectly and boils up more freely than is the case when refined iron is used, which remains in a more or less pasty condition during the process; hence the name *pig-boiling*. The puddling process was invented in England by Henry Cort, about 1784, and he was also the inventor of the method of finishing iron by passing it through grooved rolls—processes of immense importance as determining the long-maintained supremacy of England in the iron-manufacturing business. The invention of what is known as "Bessemer steel" has considerably diminished, and is likely still further to diminish, the relative importance of the puddling process.—**Mechanical puddling**, the substitution for hand-labor of some one of the various mechanical contrivances which have been invented to make the operation of puddling less fatiguing for the workmen. Various methods of mechanical puddling have within the past few years come more or less extensively into use: one is to arrange the tools so as to imitate manual rabbling (see *rabble*) as nearly as possible; in the other method some form of rotating or oscillating hearth is employed, the motion of which replaces the operation of rabbling. See *Danks rotary furnace*, under *furnace*; also (under the same heading) *Pernot furnace*, a form which has been employed for puddling iron as well as for making steel.

puddling-furnace (pud'ling-fēr'nās), n. A kind of reverberatory furnace in which iron is puddled. See *puddling*, 2 (a), and cut in next column.

puddling-machine (pud'ling-mā-shēn'), n. See *puddling*, 2 (a).

puddling-rolls (pud'ling-rōlz), n. pl. Same as *forgo-train*.

Puddling-furnace.

Harper's Mag., LXXVIII. 156.

pudic (pū'dik), a. [= F. *pudique* = Sp. *pudico* = Pg. It. *pudico*, < *L. pudicus*, shamefaced, bashful, modest, < *pudere*, feel shame.] In *anat.*, *pudendal*.—**Pudic artery**. (a) *External*, one of two (a deep and a superficial) branches of the femoral artery, supplying parts of the pudenda. (b) *Internal*, a large and surgically very important branch of the anterior trunk of the internal iliac artery, the principal source of the blood-supply of the external genitals. It leaves the pelvis by the greater sciatic foramen, winds around the ischial spine, reenters the pelvis by the lesser sciatic foramen, courses along the inner side of the ramus of the ischium and pubis, gives off inferior hemorrhoidal and superficial and transverse perineal branches, and divides into three penial arteries—of the bulb and cavernous body and dorsum of the penis.—**Pudic nerve**, the smaller terminal division of the sacral plexus. It issues from the pelvis through the greater and reenters through the lesser sciatic foramen, and afterward divides into the perineal and dorsalis penia. It also gives off the inferior hemorrhoidal. Also called *common pudendal*, *pudendohemorrhoidal nerve*.—**Pudic vein**. (a) *External*, a tributary of the external saphenous, collecting blood from the genitals and inner part of the thigh. (b) *Internal*, a vein corresponding to the internal pudic

artery, except that it does not receive the blood from the dorsal vein of the penis.

pudical (pū'di-kāl), a. [Cf. *pudic* + -al.] Same as *pudic*.

pudicity (pū-dis'i-ti), n. [= F. *pudicité*, < *L. pudicitia*, modesty, chastity, < *pudicus*, bashful, modest: see *pudic*.] Modesty; chastity.

Sir P. Sidney. (Richardson.)

pueblo (pōeb'lō), n. [Sp., a town, village, people, < *L. populus*, people: see *people*.] 1. In Spanish America, a municipality; a town or village; any inhabited place. In the parts of the United States acquired from Mexico it is used in the sense of the English word *town*. It has the indefiniteness of that term, and like it, it sometimes applies to a mere collection of individuals residing at a particular place, a settlement or village, as well as to a regularly organized municipality.

In its special significance, a *pueblo* means a corporate town, with certain rights of jurisdiction and administration. In Spain the term *lugar* was usually applied to towns of this nature, but the Spanish Americans have preferred and persistently used the term *pueblo*.
Johns Hopkins Univ. Studies, 8th ser., IV. 48.

2. [cap.] A Pueblo Indian.—**Pueblo Indians**, a body of Indians in New Mexico and Arizona, who dwell in communal villages (*pueblos*). They are partly civilized and self-governing. Among the best-known of them are the Zunis.

(b) A block containing several grooved wheels. (c) A tackle or apparatus consisting of one or more pulley-blocks with a rope or ropes reeved through them for use in hoisting. The pulley serves to balance a great force against a small one; its sole use is to produce equilibrium; it does not save work, unless indirectly in some unmechanical way. The pulley is a lever with equal arms; but when it turns, the attachments of the forces are moved. Fig. 1 shows a fixed pulley. The equal weights *d* and *e* are in equilibrium, because they hang from the equal arms of the lever *ab*, having its fulcrum at *c*. Fig. 2 illustrates the principle of the movable pulley. The equal-armed lever, with fulcrum at *c*, has on one arm the weight *d* and on the other the force of the stretched string *be*. If there is equilibrium, this force must be equal to the weight of *d*. Thus, the total downward pull on *f*, one arm of the equal-armed lever *fg*, with fulcrum at *h*, is twice the weight of *d*, which must, therefore, be the weight of *i* to keep it in balance. We may also use the axiom that when a cord is free to move along its length it must be under equal stress in all its parts. Consequently, when a movable block is supported by a number of parallel parts of the same cord,

Pulleys.

these must bear equal shares of the load. Thus, in fig. 3, the lower block with the weight *b* brings equal strains upon four stretches of the cord, one of which is balanced by *a*. Consequently, the weight of *b* is four times that of *a*. But the effects of friction and of the stiffness of the cord are of great importance in the calculation of the advantages of pulleys. There is a great mechanical advantage in having separate blocks for all the movable pulleys, as in figs. 4 and 5. Thus, in fig. 4, the weight *a* is balanced over the lowest pulley by the pull on *b*, and the sum of these forces drawing down the lowest pulley is balanced over the second pulley by the pull on *c*, which is therefore double the weight at *b*. Thus, by means of four pulleys *a* balances *a* + 2*a* + 4*a* + 8*a* = *a* (24-1), or fifteen times instead of (as by the arrangement of fig. 3) only four times its own weight. Another arrangement is shown in fig. 5. Here, by means of four pulleys, *a* balances eight times its own weight.

2. In *anat.*: (a) A trochlea, or trochlear surface of an articulation. (b) A ligamentous loop which confines or changes the direction of the tendon of a muscle passing through it: as, the digastric muscle of the chin and the superior oblique of the eye both pass through a *pulley*. See cuts under *muscle* and *eye*. 1.—**Compound pulley**, a system of pulleys by which the power to raise heavy weights or overcome resistances is gained at the expense of velocity. See def. 1 (c).—**Conical pulley**, a cone-pulley.—**Crowning pulley**, a pulley with a convex rim, much used where from various causes belts are in danger of slipping off, the convexity tending to retain the belt on the rim.—**Dead pulley**. Same as *loose pulley*. [*Local*, Eng.]—**Differential pulley**, a peculiar machine operating upon the principle of the lever. Let *AD* (fig. 1) be a lever, having its fulcrum at *C*, half-way between *A* and *D*. From *D* and *B* (a point on *AC*) cords are attached to the equal arms of the lever *EF*, with fulcrum at *G*. Then, if weights are placed on *A* and *G* so as to balance one another, *G* is practically supported at the point half-way between *B* and *D*. The ratio of the weight at *G* to that at *A* is therefore 2 *AC* (*CD* - *BC*). The differential pulley has above one solid wheel with two grooved rims, the lower one being furnished with spikes to enter the links of a chain and prevent it from running over the wheel (see fig. 2). An endless chain is reeved upon this and upon a pulley below,

Crowning Pulley.

as shown in fig. 3. The lettering corresponds to that in fig. 1, and serves to show the principle. Fig. 4 shows the machine in action. Here *a* is the triangular frame of the

Differential Pulley.

traveler, *b* a link with which the hook *c* of the differential pulley *p* engages, and *r*, *r* rollers which support the frame on the rail *R*.—**Double-speed pulley**, a combination of two loose pulleys (see *loose pulley*) and toothed gearing with one fast-driven pulley, whereby two different speeds of rotation may be obtained with pulleys of the same diameter by shifting the band from the fast pulley to one of the loose pulleys. Also called *two-speed pulley*.—**Driven pulley**, in *mech.*, a pulley which receives its motion through a belt or band from another pulley called the *driving pulley*.—**Driving pulley**, a pulley which, by means of a belt or band, transmits its motion to another pulley. A wide-faced pulley is often both a driven and a driving pulley.—**Fast-and-loose pulleys**. See *fast*.—**Fast pulley**, a pulley firmly attached to the shaft from which it receives or to which it communicates motion.—**Flat-rope pulley**, a pulley with a sheave having in its perimeter a rectangular or nearly rectangular groove, instead of the usual semicircular score.—**Frame pulley**, a pulley which has, instead of a block, a sort of frame of iron in which the sheave or sheaves are pivoted.—**Loose pulley**, a pulley fitted loosely on a shaft and placed near a fast pulley to receive and support the belt when it is thrown off in order to disconnect the shaft. It is practically an idle-wheel.—**Parting pulley**, a pulley or belt-wheel that can be separated into two parts so that a shaft need not be dismantled in order to receive it.—**Scored pulley**, a pulley having a semicircular groove about its perimeter to receive a band of circular section, or a rope. *E. H. Knight*.—**Side pulley**, a pulley the block of which has laterally or vertically extending lugs, with holes therein, by which it may be bolted to a wall or post.—**Sliding pulley**, a pulley with a clutch mechanism placed so as to slide backward and forward on a shaft: used for coupling and disengaging machinery, and also as a pulley.—**Tug pulley**, in a well-boring rig, the pulley which, by means of the bull-rope acting as a crossed band, imparts motion to the bull-wheel of an oil-derrick. See *oil-derrick*.

Flat-rope Pulley for transmitting power by means of a band or rope. *f*, face of pulley; *g*, flanges.

pulley (pûl'i), *v. t.* [*pull*, *n.* Cf. *F. poulier*, raise with a pulley, < *poulie*, a pulley.] To raise or hoist with a pulley. [*Rare*.]

A Mine of white Stone was discovered hard by, which runs in a continued Vein of Earth, and is digged out with Ease, being soft, and is between a white Clay and Chalk at first: but being *pulleyed* up with (into ?) the open Air, it receives a crusty kind of Hardness, and so becomes perfect Freestone. *Hovell*, Letters, I. l. 16.

pulley-block (pûl'i-blok), *n.* A shell containing one or more sheaves, the whole forming a pulley.

pulley-box (pûl'i-boks), *n.* In a draw-loom, a frame containing the pulleys for guiding the tail-cords. *E. H. Knight*.

pulley-check (pûl'i-chek), *n.* An automatic clutch or locking device designed to prevent a rope from running backward through a pulley-block.

pulley-clutch (pûl'i-kluch), *n.* An automatic device, in the form of a grappling-tongs, for fastening a hoisting-pulley to a beam or rafter.

pulley-drum (pûl'i-drum), *n.* A pulley-shell or pulley-block.

pulley-frame (pûl'i-frâm), *n.* In *mining*, same as *head-frame*, *poppet-head*, etc.

pulley-mortise (pûl'i-môr'tis), *n.* Same as *chase-mortise*.

pulley-sheave (pŭl'i-shēv), *n.* The grooved roller over which a rope runs in a pulley-block.

pulley-shell (pŭl'i-shel), *n.* The outer part or casing of a pulley-block.

pulley-stand (pŭl'i-stand), *n.* A hanger on which pulleys can be adjusted as to height and angle of axis, so as to make them suit the belt, which may reach them at angles varying with the stem of the hanger. *E. H. Knight.*

pulley-stone (pŭl'i-stōn), *n.* In *geol.*, a name familiarly given to the siliceous pulley-like casts or molds of the joints and stems of encrinetes.

pulley-wheel (pŭl'i-hwēl), *n.* A pulley-sheave.

pulicat, pulicat (pŭl'i-kat), *n.* A cotton check handkerchief of real or imitation Indian make. *Balfour.*

pulint, n. See *pullen*.

pulling-jack (pŭl'ing-jak), *n.* A hydraulic jack which has a pulling instead of a pushing action.

pulling-out (pŭl'ing-out'), *n.*; pl. *pullings-out* (-ingz-out'). The lining worn with a slashed garment and drawn partly through the slash, so as to project loosely.

pull-iron (pŭl'ī-ern), *n.* 1. In a railroad-car, an eye-bolt or lug to which a chain may be attached when the car is to be moved by horses. —2. A hook or ring at the back end of the tongue of a horse-car, for attaching it to the car.

pullisht, v. An obsolete form of *polish*.

pullock (pŭl'ok), *n.* A putlog. *E. H. Knight.*

pull-off (pŭl'of), *n.* In *gun-making*, the power required to be applied to the trigger to discharge a gun.

pull-over (pŭl'ō-vēr), *n.* In *hat-manuf.*, a cap of silk or felted fur drawn over a hat-body to form the napping; also, a hat so made.

pull-piece (pŭl'pēs), *n.* In a clock, a wire or string which, when pulled, causes the clock to strike; used, if necessary, to bring the striking-mechanism into accord with the hands.

pull-pipes (pŭl'pīps), *n.* [A corruption of *pool-pipes*.] Various species of *Equisetum*: so called from their hollow stems and growth in wet places. [North. Eng.]

pull-to (pŭl'tō), *n.* In *weaving*, same as *lay-cap*.

pullulate (pŭl'ū-lāt), *v. i.*; pret. and pp. *pullulated*, pp. *pullulating*. [*L. pullulatus*, pp. of *pullulare* (> *It. pullulare*, *pullolare* = *Sp. pulular* = *Pg. pullular* = *F. pulluler*), put forth, sprout forth, < *pullulus*, a young animal, a sprout, dim. of *pullus*, a young animal, a chick: see *pullet*.] To germinate; bud.

Money is but as drugs and lentive ointments, to mitigate the swellings and diseases of the body, whose root remaineth still within, and *pullulateth* again, after the same or some other manner.

Greninger, On Ecclesiastes (1821), p. 175. Instead of repairing the mistake, and restoring religious liberty, which would have stifled this *pullulating* evil in the seed by affording it no further nourishment, they took the other course. *Warburton, Divine Legation*, II. 6.

Orvases or bulbules naked, bud-like, *pullulating* from the bases of the tentacula. *Johnston, British Zoophytes.*

pullulation (pŭl'ū-lā'shon), *n.* [= *F. pullulation* = *Pg. pullulatio* = *It. pullulazione*, < *L.* as if **pullulatio* (> *pullulare*, pp. *pullulatus*, *pullulate*: see *pullulate*.] 1. The act of germinating or budding.

These were the Generations or *Pullulations* of the Heavenly and Earthly Nature. *Dr. H. More, Moral Cabbala*, II. 2. Specifically, in *bot.*, a mode of cell-multiplication in which a cell forms a slight protuberance on one side, which afterward increases to the size of the parent-cell, and is cut off from it by the formation of a dividing wall at the narrow point of junction: same as *sprouting*. This mode of multiplication is especially characteristic of the yeast-plant and its allies.

pullus (pŭl'us), *n.* [NL., < *L. pullus*, a young animal.] 1. In *ornith.*, a chick; a very young bird; a nestling: applied to any bird in the down, or before it has acquired its first full feathering. Hence—2. In *zool.*, the young (embryonic or larval) condition of any animal.

Craven has . . . subsequently acknowledged that his *Shanagira perversa* (from the Indian Ocean) is only a *pullus* of *Triforia*. *P. Polesner, Challenger Reports*, XXIII, Zool. part Irv., (Report on Thecosomata, p. 40.

pulment, n. Same as *polment*.

Pulmobranchia (pul-mō-brang'ki-ā), *n. pl.* [NL., < *L. pulmo* (> *n.*, lung, + *branchia*, gills. In this and following compounds, *pulmo* is short for *pulmono*, prop. *pulmont*.] Same as *Pulmobranchiata*.

pulmobranchiæ (pul-mō-brang'ki-ē), *n. pl.* [NL., < *L. pulmo* (> *n.*, lung, + *branchiæ*, gills.]

Gills or branchiæ modified into organs of aerial respiration; the respiratory apparatus peculiar to certain animals. (a) The lung-sacs of air-breathing mollusks, as snails. See cut under *Pulmonata*. (b) The lung-sacs of certain arachnidans, as spiders; the pulmotrachæ. See cuts under *pulmonary* and *Scorpionidae*.

pulmobranchial (pul-mō-brang'ki-āl), *a.* [*L. Pulmobranchia* + *-al*.] 1. In *conch.*, breathing by means of pulmobranchiæ or lung-sacs; pertaining to pulmobranchiæ; pulmonate, pulmoniferous, or pulmonary, as a snail.—2. In *entom.*, breathing by means of pulmotrachæ; pertaining to pulmotrachæ; pulmonary, as a spider. = *Syn. Pulmobranchial*, etc. In application to those arachnidans which have lung-sacs by which they breathe, as well as by tracheæ, the terms *pulmonary*, *pulmonate*, *pulmobranchial*, *pulmobranchiate*, *pulmotrachæ*, *pulmotrachate*, and *pulmotrachey* mean the same, the first two terms being the least specific, since they are applied to other animals, the two middle terms being less specific, as shared by certain mollusks, the last three being specific and precise, since they apply only to these arachnidans. In application to mollusks, *pulmonary*, *pulmonate*, *pulmobranchial*, *pulmobranchiate*, and *pulmotrachate* are a parallel series of words, the first three shared by any other animals which have lungs, the fourth and fifth by arachnidans, the sixth being specific and precise.

Pulmobranchiata (pul-mō-brang'ki-ā-tā), *n. pl.* [NL., neut. pl. of *pulmobranchiatus*: see *pulmobranchiate*.] In De Blainville's classification (1825), the first one of three orders of his *Paracephalophora monoica asymmetrica*, containing the three families *Limnæa*, *Auriculacea*, and *Limacinea*, or the pulmonary gastropods, as snails, slugs, etc., both aquatic and terrestrial. Also *Pulmobranchia*. Now commonly called *Pulmonata* or *Pulmonifera*.

pulmobranchiate (pul-mō-brang'ki-āt), *a.* [*L. pulmobranchiatus*, < *pulmobranchia*, q. v.] Provided with pulmobranchiæ. (a) Breathing by lung-sacs or pulmobranchiæ, as mollusks; of or pertaining to the *Pulmobranchiata*. (b) Breathing by lung-sacs or pulmotrachæ, as spiders; pulmotrachate. = *Syn.* See *pulmobranchial*.

pulmocutaneous (pul'mō-kū-tā-nē-us), *a.* [*L. pulmo* (> *n.*, lung, + *cutis*, skin: see *cutaneous*.] Of or pertaining to the lungs and skin: said of the hindmost one of three passages into which each of the two aortic trunks of the adult frog is divided, which ends in pulmonary and cutaneous arteries.

pulmogastropod, pulmogastropod (pul-mō-gas-tēr'ō-pod, -gas-trō-pod), *a.* and *n.* [*L. pulmo* (> *n.*, lung, + *Gr. gastrōp*, stomach, + *πόδι* (pod-) = *E. foot*.] 1. *a.* Pulmonate or pulmoniferous, as a gastropod; of or pertaining to the *Pulmogasteropoda*.

II. *n.* A pulmonate gastropod; any member of the *Pulmogasteropoda*.

Also *pulmogasteropod*.

Pulmogasteropoda (pul-mō-gas-tēr'ō-pō-dā), *n. pl.* [NL.] Same as *Pulmonata*, 1 (a).

Pulmograda (pul-mog'rā-dā), *n. pl.* [NL., neut. pl. of *pulmogradus*: see *pulmograde*.] De Blainville's name of a group of scalephs, approximately the same as *Discophora*.

pulmograde (pul'mō-grād), *a.* and *n.* [*L. pulmogradus*, < *L. pulmo* (> *n.*, lung, + *gradū*, walk.] I. *a.* Having the characters of the *Pulmograda*; swimming by means of alternate contraction and expansion of the body, as if by a kind of respiration, as a jellyfish.

II. *n.* An scaleph of the group *Pulmograda*; a discophorous hydrozoan.

pulmometer (pul-mom'e-tēr), *n.* [*L. pulmo* (> *n.*, lung, + *Gr. μέτρον*, measure.] An instrument for measuring the capacity of the lungs; a spirometer.

pulmometry (pul-mom'e-tri), *n.* [*L. pulmo* (> *n.*, lung, + *Gr. μέτρον*, < *μέτρον*, measure.] The measurement of the capacity of the lungs; spirometry.

Pulmonacea (pul-mō-nā'shiā), *n. pl.* [*L. pulmo* (> *n.*, lung, + *-acea*.] In *conch.*, same as *Pulmonata*, 1.

pulmonar (pul'mō-nār), *a.* [= *F. pulmonaire*: see *pulmonary*.] Having lungs or lung-like organs; pulmonate or pulmonary; specifically, belonging to the arachnid order *Pulmonaria*.

Pulmonaria (pul-mō-nā'ri-ā), *n.* [NL. (Tournefort, 1700), so called from its reputation and former use; fem. of *pulmonarius*, pertaining to the lungs, as a pulmonary remedy: see *pulmonary*.] A genus of gamopetalous plants of the order *Boraginæ*, tribe *Boragæ*, and subtribe *Anchuseæ*. It is characterized by a five-lobed funnel-shaped corolla without scales in the throat, a five-cleft calyx enlarged in fruit, and four broad erect nutlets with an elevated and slightly concave basilar scar which is without a surrounding ring. There are 5 or 6 species, natives of Europe and Asia, especially of western Asia. They are erect perennial hairy herbs, bearing large petioled radical

leaves and a few small alternate stem-leaves, and terminal two-parted cymes of blue or purplish flowers. They are generally known as *lungwort* (which see), especially *P. officinalis*, which is the common English species, having also the old or local names of *spotted comfrey*, *bugloss ower*, *Jerusalem cowslip*, *beggar's-basket*, etc. See also *Joseph-and-Mary*.

Pulmonaria (pul-mō-nā'ri-ā), *n. pl.* [NL., neut. pl. of *L. pulmonaria*, pertaining to the lungs: see *pulmonary*.] 1. In *conch.*, same as *Pulmonata*, 1.—2. In *entom.*, the pulmonary arachnidans, as spiders and scorpions. In Latreille's system of classification they were one of two orders of *Arachnida*, the other being *Trachearia*. Also called *Pulmonaria* and *Pulmonata*.

pulmonaria, *n.* Plural of *pulmonarium*.

Pulmonariæ (pul-mō-nā'ri-ē), *n. pl.* Same as *Pulmonaria*, 2.

pulmonarious (pul-mō-nā'ri-us), *a.* [*L. pulmonarius*, diseased in the lungs: see *pulmonary*.] Diseased in the lungs; affected with pulmonary disease.

pulmonarium (pul-mō-nā'ri-um), *n.*; pl. *pulmonaria* (-ā). [NL., neut. of *L. pulmonarius*, pertaining to the lungs: see *pulmonary*.] In *entom.*, the lateral membrane often separating the dorsal and ventral abdominal segments, and containing stigmata or breathing-holes. *Kirby*.

pulmonary (pul'mō-nā-ri), *a.* and *n.* [= *F. pulmonaire* = *Sp. Pg. pulmonar* = *It. pulmonare*, *pulmonario*, < *L. pulmonarius*, pertaining to the lungs, affecting the lungs, < *pulmo* (> *n.*, lung, = *Gr. πνεύμων*, usually *πνεύμων*, lung: see *pneumonia*.] I. *a.* 1. Of or pertaining to the lungs, in the widest sense; respiratory: as, *pulmonary* organs.

The force of the air upon the *pulmonary* artery is but small in respect to that of the heart. *Arbuthnot*.

2. Affecting the lungs: as, *pulmonary* disease. —3. Remedial of affections of the lungs; *pulmonic*: as, *pulmonary* medicine. —4. Done by means of lungs; aerial, as a mode of breathing: opposed to *branchial* or *tracheal*: as, *pulmonary* respiration. —5. Having lungs, lung-sacs, or lung-like organs; able to breathe air; *pulmobranchiate*, *pulmonate*, or *pulmoniferous*: distinguished from *branchiate*: as, a *pulmonary* mollusk. —6. Of or having the characteristics of the *Pulmonaria*: distinguished from *tracheary*: as, a *pulmonary* arachnid. — *Pulmonary alveoli*, air-cells. See *alveolus* (b). — *Pulmonary artery*, any artery conveying blood directly from the heart to the lungs; in man, a large vessel, about two inches in length, conveying venous blood from the right cardiac ventricle. It divides into two branches, called the right and the left *pulmonary* artery, for the respective lungs. See cuts under *lung* and *thorax*. — *Pulmonary branchiæ*, of spiders and other arachnidans, peculiar breathing-organs or gills, situated in the abdomen and consisting of many membranous folds, appearing like the leaves of a book or porte-monnaie. The air enters these folds from the exterior orifice, and passes through the membrane to the blood which circulates between them. See cut below. — *Pulmonary calculus*, see *calculus*, 2. — *Pulmonary cartilage*, the second costal cartilage of the left side. — *Pulmonary circulation*, the lesser circulation of the blood, from the right cardiac ventricle through the pulmonary artery, pulmonary capillaries, and pulmonary veins, back to the left auricle. See cut under *circulation*. — *Pulmonary consumption*, phthisis. — *Pulmonary lobules*, small sections of lung-tissue, each receiving a bronchiole, and separated from one another by connective-tissue septa in which vessels ramify. — *Pulmonary nerves*, a variable number of branches of the pneumogastric, distributed to the root of the lungs. — *Pulmonary pleura*, the pleura pulmonalis. — *Pulmonary plexuses*. See *plexus*. — *Pulmonary sac*, in *entom.*, a special form of respiratory organ found only in some arachnidans (spiders), being an involution of the integument, the walls of which are so folded as to expose a large surface to the air, which is alternately inspired and expired, the blood being brought to the sacs by venous channels. — *Pulmonary sinuses*, the sinuses of Valsalva in the pulmonary artery. — *Pulmonary valves*, the semilunar valves of the right cardiac ventricle. — *Pulmonary veins*, any veins which bring blood direct from the lungs to the heart; in man, four veins, two from each lung, which convey arterial blood to the left auricle of the heart. See cuts under *lung* and *thorax*. — *Pulmonary vesicles*, air-cells. = *Syn.* See *pulmobranchial*.

II. *n.*; pl. *pulmonaries* (-riz). 1. A pulmonary arachnid, as a spider or scorpion; a member of the *Pulmonaria*. — 2. Lungwort.

Pulmonata (pul-mō-nā'tā), *n. pl.* [NL., neut. pl. of *pulmonatus*, having lungs: see *pulmonary*.] 1. In *conch.*: (a) An order or subclass of *Gasteropoda*, air-breathing and adapted to a terrestrial life; the true pulmonate or pulmoniferous gastropods, as snails and slugs, having the pallial cavity or mantle-chamber converted into a lung-sac, no ctenidia or true gills, and generally no true operculum to the shell. Some other gastropods are pulmonate in the sense that they

II. *n.*; pl. *pulmonaries* (-riz). 1. A pulmonary arachnid, as a spider or scorpion; a member of the *Pulmonaria*. — 2. Lungwort.

Pulmonata (pul-mō-nā'tā), *n. pl.* [NL., neut. pl. of *pulmonatus*, having lungs: see *pulmonary*.] 1. In *conch.*: (a) An order or subclass of *Gasteropoda*, air-breathing and adapted to a terrestrial life; the true pulmonate or pulmoniferous gastropods, as snails and slugs, having the pallial cavity or mantle-chamber converted into a lung-sac, no ctenidia or true gills, and generally no true operculum to the shell. Some other gastropods are pulmonate in the sense that they

breathe air, but are otherwise structurally related to the pectinibranchiate or to the rhipidoglossate gastropods. The *Pulmonata* are hermaphrodite, with highly developed copulatory and other sexual organs in every individual, and well-formed odontophore. A shell is usually present, sometimes small or wanting; its aperture is closed in some cases by a pseudopericolum. They are divided into *Basomatophora* and *Stylomatophora*. There are more than

Diagram of the Anatomy of the Snail (*Helix*), illustrating structure of *Pulmonata*.

a, mouth; b, tooth; c, odontophore; d, gullet; e, crop; f, stomach; g, coiled end of the visceral mass; h, rectum; i, anus; j, renal sac; k, heart; m, lung-sac, or modified pallial chamber; n, its external opening; o, thick edge of mantle; p, extent of the foot; r, s, nervous ganglia round the esophagus.

6,000 species. By Férussac and many later conchologists the order was extended to include the operculate tænioglossate and rhipidoglossate terrestrial gastropods, the true *Pulmonata* being then called *P. inoperculata*, and the others *P. operculata*. This use of the word was long prevalent, but is now obsolete. Also called *Pulmonica*, *Pulmonifera*, *Pulmonogasteropoda*, and *Pulmogasteropoda*. (b) A section of rhipidoglossate gastropods, characterized by adaptation for aerial respiration, and including the families *Helicinidae*, *Hydrocenidae*, and *Proserpinidae*. Fischer.—2. In entom., the pulmonary arachnidans: same as *Pulmonaria*², 2.

pulmonate (pul'mō-nāt), a. and n. [*NL. pulmonatus*, < *L. pulmo*(-n), lung: see *pulmonary*.] I. a. Having lungs, lung-sacs, or lung-like organs; pulmonary or pulmoniferous, as a mollusk or an arachnid; pulmonated, as a vertebrate: distinguished from *branchiate* and *tracheate*.—Syn. See *pulmonibranchiate*.

II. n. A member of the *Pulmonata* in either sense, as a snail or a spider.

pulmonated (pul'mō-nā-ted), a. [*pulmonate* + -ed.] Same as *pulmonate*.

In the lower *pulmonated* Vertebrata, the sacculization is more marked near the entrance of the bronchia.

Huxley, *Anat. Vert.*, p. 92.

Pulmonica (pul'mō-nē-ā), n. pl. [*NL.*, < *L. pulmo*(-n), lung: see *pulmonate*.] In Latreille's classification, an order of *Gasteropoda*: now called *Pulmonata* or *Pulmonifera*.

pulmonian (pul'mō-ni-an), n. [*L. pulmo*(-n), lung, + -an.] A pulmonate gastropod, as a snail.

Pulmonibranchiata (pul'mō-ni-brang-ki-ā-tā), n. pl. [*NL.*] The more correct form of *Pulmonibranchiata*.

pulmonibranchiate (pul'mō-ni-brang-ki-āt), a. The more correct form of *pulmonibranchiate*.

pulmonic (pul-mon'ik), a. and n. [= *F. pulmonique* = *Pg. pulmonico* (cf. *Sp. pulmonico*), < *L. pulmo*(-n), lung: see *pulmonary*.] I. a. Of or pertaining to the lungs.

An ulcer of the lungs may be a cause of *pulmonic* consumption, or consumption of the lungs.

Harvey, *Consumptions*.

Pulmonic circulation. Same as *pulmonary circulation* (which see, under *pulmonary*).

II. n. 1. A medicine for diseases of the lungs. *Dunghison*.—2. One who is affected with a disease of the lungs.

Pulmonicks are subject to consumptions, and the old to asthmas. *Arbuthnot*.

pulmonifer (pul-mon'i-fēr), n. [*NL. Pulmonifera*.] A pulmonate gastropod, as a snail; any member of the *Pulmonifera*.

Pulmonifera (pul-mō-nif'ē-rā), n. pl. [*NL.*, neut. pl. of *pulmonifer*, having lungs: see *pulmoniferous*.] In *conch.*: (a) Same as *Pulmonata*, 1 (a). (b) The *Pulmonata* considered as a subclass of gastropods, *Pulmonata* then being reserved as the ordinal name. (c) A section of tænioglossate pectinibranchiate gastropods, characterized by a modification of the respiratory apparatus as a lung for aerial respiration. It includes the families *Cyclostomidae*, *Pomatidae*, *Cyclophoridae*, and *Aciculiidae*. Fischer. *Adelopneumona* is a synonym.

pulmoniferous (pul-mō-nif'ē-rus), a. [*NL. pulmonifer*, < *L. pulmo*(-n), lung, + *ferre* = *E. bear*.] 1. Provided with lungs, as an animal; pulmonary or pulmonate, as a mollusk; of or

pertaining to the *Pulmonifera*.—2. Containing the lungs, as a part of the body: as, the *pulmoniferous* somites of an arachnid.

Pulmonigrada (pul-mō-nig'rā-dā), n. pl. [*NL.*, neut. pl. of *pulmonigradus*: see *pulmonigrade*.] Same as *Pulmonigrada*.

pulmonigrade (pul-mon'i-grād), a. and n. [*NL. pulmonigradus*, < *L. pulmo*(-n), lung, + *grad*, walk.] Same as *pulmograde*.

pulmonobranchious (pul'mō-nō-brang'kus), a. [*L. pulmo*(-n), lung, + *Gr. βράχια*, gills.] Pulmonate, as a gastropod; pulmonibranchiate. [Rare.]

Affording a good character for dividing the land *pulmonobranchious* Mollusca into two families.

Eng. Cyc., *Nat. Hist.*, III. 65.

pulmonogasteropod (pul'mō-nō-gas'tēr-ō-pod), a. and n. Same as *pulmogasteropod*.

Pulmonogasteropoda (pul'mō-nō-gas'tēr-ō-dā), n. pl. [*NL.*, < *L. pulmo*(-n), lung, + *NL. Gasteropoda*.] Same as *Pulmonata*, 1 (a).

pulmotracheal (pul-mō-trā-kē-āl), a. [*L. pulmo*(-n), lung, + *NL. trachea*, windpipe, + -al.] In entom., pulmobranchial; pertaining to or done by means of pulmotrachæ: as, *pulmotracheal* respiration.

Pulmotrachæaria (pul-mō-trā-kē-ā-ri-ā), n. pl. [*NL.*, < *L. pulmo*(-n), lung, + *NL. trachea*, windpipe.] A group of pulmobranchiate or pulmotrachæate arachnidans; an order of *Arachnida*, containing those arachnidans which have pulmonary sacs as well as trachæ, as spiders and scorpions. See cut under *Scorpionidae*.

pulmotrachæary (pul-mō-trā-kē-ā-ri), a. and n. I. a. Of or pertaining to the *Pulmotrachæaria*.

II. n.; pl. *pulmotrachæaries* (-riz). A pulmotrachæate arachnid.

pulmotrachæate (pul-mō-trā-kē-āt), a. [*L. pulmo*(-n), lung, + *trachea*, windpipe, + -ate.] Pulmobranchiate, as a spider; of or pertaining to the *Pulmotrachæaria*.

pulp (pulp), n. [= *F. pulpe* = *Sp. pulpa* = *Pg. It. polpa*, < *L. pulpa*, the fleshy part of an animal body, etc., solid flesh, the pulp of fruit, etc.] A moist, slightly cohering mass, consisting of soft undissolved animal or vegetable matter. Specifically—(a) The soft, succulent part of fruit: as, the *pulp* of an orange, or of a grape. In the American grape of the *Vitis Labrusca* varieties (as Concord, etc.) the pulp is a distinct portion of the berry inclosing the seeds, and is characteristically tough and sour. It is inclosed in a sweet and well-flavored layer formed beneath the skin.

The savoury *pulp* they chew, and in the rind, Still as they thrashed, scoop the brimming stream.

Milton, *P. L.*, iv. 335.

(b) The material from which paper is manufactured after it is reduced to a soft uniform mass. (c) Chyme; the pulped mass of food after chymification and before chylification. (d) The soft pulpy core of a tooth, consisting chiefly of the nerve accompanied by its vessels and connective tissue; a tooth-pulp. (e) The soft elastic fibrocartilage forming much of the substance of the intervertebral disks. It chiefly occupies the interior of these disks, whose periphery is more fibrous and tougher. To the compressibility and elasticity of this pulp is mainly due the action of the disks in serving as buffers to diminish concussion of the spine. The pulp is compressible enough to account also for the fact that a man may be appreciably taller in the morning after lying all night than in the evening after a day spent on the feet. (f) In *mining*, slimes; ore pulverized and mixed with water.

In the case of silver the ore is frequently pulverized by stamps, and the resulting *pulp* amalgamated in pans or barrels.

Encyc. Brit., XVI. 465.

Blue, dental, etc., pulp. See the adjectives.—**Persistent pulps.** See *dental pulp* (b).—**Pulp-colors.** See *color*. **pulp** (pulp), v. [*pulpa*, n.] I. *trans.* 1. To make into pulp, in any sense; reduce to pulp: as, to *pulp* wood-fiber for paper; to *pulp* old papers.—2. To deprive of the surrounding pulp or pulpy substance: as, to *pulp* coffee-beans.

The other mode is to *pulp* the coffee immediately as it comes from the tree. By a simple machine a man will *pulp* a bushel in a minute.

Bryan Edwards.

II. *intrans.* To be or to become ripe and juicy like the pulp of fruit.

A kiss should bud upon the tree of love,
And *pulp* and ripen richer every hour. *Keats*.
The buried seed begins to *pulp* and swell
In Earth's warm bosom. *R. H. Stoddard*, *Ode*.

pulpamentat (pul-pa-men'tā), n. pl. [*L.*, pl. of *pulpamentum*, meat, pulp, < *pulpa*, meat, pulp: see *pulp*.] Delicacies; tidbits.

What, Friday night, and in affliction, too, and yet your *pulpamenta*, your delicate morsels!

B. Jonson, *Every Man out of his Humour*, v. 7.

pulpatoont, n. [Origin obscure.] A kind of confection or cake, supposed to be made of the pulp of fruits.

With a French troop of *pulpatoons*, mackaroons, kick-shaws, grand and excellent. *Nabbes*, *Microcosmus*, III.

pulp-boiler (pulp'boi'lēr), n. Same as *pulp-digester*.

pulp-cavity (pulp'kav'i-ti), n. The hollow interior of a tooth which contains the pulp. Also called *nerve-canal*. See cut under *tooth*.

pulp-digester (pulp'di-jes'tēr), n. In *paper-manuf.*, a machine for digesting straw, wood, bamboo, and other materials, to free the fibrous matter from gluten, gum, starch, and other extraneous matters. Such machines are essentially boilers, in which the paper-stock is cooked with various chemicals under more or less steam-pressure. In some digesters the boilers are stationary and are provided with a stirring-mechanism; in others the boilers are made to rotate. Also called *pulp-boiler*.

pulp-dresser (pulp'dres'er), n. In *paper-manuf.*, an apparatus for clearing paper-pulp from impurities, and freeing it from lumps and knots.

pulp-engine (pulp'en'jin), n. In *paper-manuf.*, a machine for converting paper-rags, esparto,

Pulp-engine, consisting of an oblong iron vat *a*, rounded at the ends and divided by a partition *b*, over which is journaled a cylinder *c*, having grooves into which chisel-edged blades *d* are inserted in sets of three, generally to the number of sixty; beneath these, and set at an angle therewith, other blades *e* are fixed in the bottom of the vat; the distance between the two may be adjusted by raising or lowering the cylinder *c*. The part *f* of the bottom is sloping, and has a recess *g* for the reception of grit. A hood *h* prevents the pulp from being thrown out of the machine, and one side of this is a sieve *i*, with a removable cover *j*, through which the foul water expelled from the pulp passes and is discharged through the opening *k*.

and other materials into a pulp with water. Also called *pulper*, *pulp-machine*, *pulping engine*, and *pulp-mill*.

pulper (pul'pēr), n. 1. A machine for reducing roots, as turnips, mangel-wurzel, etc., to a pulp; a root-pulper.—2. A machine for removing the fleshy pulp of coffee-berries.—3. A pulp-digester, pulp-grinder, or pulp-engine.

pulpet, n. A Middle English form of *pulpit*. **pulp-grinder** (pulp'grin'dēr), n. In *paper-manuf.*, a form of grinding-mill for crushing, disintegrating, and grinding partially made paper-pulp, or for grinding wood to form paper-stock.

pulpifier (pul'pi-fī'ēr), n. An apparatus for grinding up fresh meat, and converting it into an almost jelly-like pulp as an aid to digestion for dyspeptics. Also called *meat-pulpifier* and *meat-pulverizer*.

pulpify (pul'pi-fi), v. t.; pret. and pp. *pulpified*, ppr. *pulpifying*. [*pulp* + -ify.] To render pulpy; make into pulp.

These actions [of rumination] are repeated until the greater portion of the grass which has been cropped is *pulpified*.

Huxley, *Anat. Vert.*, p. 334.

pulpiness (pul'pi-nēs), n. A pulpy character or consistency.

pulping-machine (pul'ping-mā-shēn'), n. In *agri.*, a pulper or root-pulper.

pulpit (pul'pit), n. and a. [*ME. pulpit*, *pulpet*, < *OF. pulpite*, *F. pupitre*, dial. *pulpito* = *Sp. pulpito* = *Pg. It. pulpito*, < *L. pulpitum*, a staging, stage, platform, scaffold.] I. n. 1. A rostrum or elevated platform from which a

Pulpit of Niccolò Pisano, in the Baptistery at Pisa, Italy.

speaker addresses an audience or delivers an oration; specifically, in the Christian church, an elevated and more or less inclosed platform from which the preacher delivers his sermon

and, in churches of many denominations, conducts the service.

And Ezra the scribe stood upon a *pulpit* of wood, which they had made for the purpose. Neh. viii. 4.

Produce his body to the market-place,
And in the *pulpit*, as becomes a friend,
Speak in the order of his funeral. Shak. J. C., III. l. 229.

And the reader droned from the *pulpit*,
Like the murmur of many bees.
Longfellow, King Witlaf's Drinking-Horn.

2. A bow of iron lashed to the end of the bowsprit of a whaling-vessel, and forming a support for the waist of the harpooner, to insure his safety.—The *pulpit*, preachers collectively, or what they preach.

By the *pulpit* are adumbrated the writings of our modern saints in Great Britain. Swift, Tale of a Tub, I.

II. a. Of or pertaining to the pulpit or preachers and their teaching: as, *pulpit* eloquence; *pulpit* utterances.

pulpit (pul'pit), v. t. [*pulpit*, n.] To place in or supply with a pulpit. [Rare.]

Certainly it is not necessary to the attainment of Christian knowledge that men should sit all their life long at the feet of a *pulpit* divine. Milton, Touching Hirelings.

pulpitarian (pul-pi-tā'-ri-an), n. [*pulpit* + *-arian*.] A preacher. [Rare.]

The Scottish brethren were acquainted by common intercourse with these directions that had netted the agrieved *pulpitarians*. Bp. Hacket, Abp. Williams, l. 90. (Davies.)

pulpiteer (pul-pi-tēr'), n. [*pulpit* + *-eer*.] A preacher: a contemptuous term.

Then it was under the name of puritans and round-heads, and now it is openly as ministers, under the name of priests, and blackcoats, and presbyters, and *pulpiteers* [that many servants of the Lord are reviled]. Baxter, Self-Denial, Epistle Monitory.

To chapel; where a heated *pulpiteer*,
Not preaching simple Christ to simple men,
Announced the coming doom, and fulminated
Against the scarlet woman and her creed. Tennyson, Sea Dreams.

pulpitery (pul'pi-tēr'), n. [*pulpit* + *-ery*.] One who preaches from a pulpit; a preacher.

O most gentle *pulpiter*! what tedious homily of love have you wearied your parishioners withal! Shak., As you Like it, III. 2. 163.

pulpitical (pul-pit'i-kal), a. [*pulpit* + *-ical*.] Of or pertaining to the pulpit; suited to the pulpit. [Rare.] Imp. Dict.

pulpitically (pul-pit'i-kal-i), adv. In a manner suited to the pulpit. [Rare.]

To proceed then regularly and *pulpitically*. Lord Chesterfield, Letters. (Latham.)

pulpitish (pul'pi-tish), a. [*pulpit* + *-ish*.] Smacking of the pulpit; like a pulpit performance.

pulpitman (pul'pit-man), n. A preacher.

Grew a fine *pulpitman*, and was benefited. Massinger, Duke of Milan, III. 2.

Dr. Hooper preached. . . . This is one of the first rank of *pulpit men* in the nation. Evelyn, Diary, Nov. 5, 1681.

pulpitry (pul'pit-ri), n. [*pulpit* + *-ry*.] Teaching such as that given from the pulpit; preaching.

They teach not that to govern well is to train up a nation in true wisdom and virtue. . . . and that this is the true flourishing of a land, other things follow as the shadow does the substance; to teach thus were mere *pulpitry* to them. Milton, Reformation in Eng., II. (Davies.)

pulpless (pul'ples), a. [*pulp* + *-less*.] Lacking or deficient in pulp; free from pulp.

There is a greater interest manifested by the masses of the dental profession in the retention of *pulpless* teeth. Science, XI. 216.

pulp-machine (pul'p-mā-shēn'), n. Same as *pulp-engine*.

pulp-meter (pul'p-mē-tēr), n. A device for regulating the quantity of pulp supplied to a paper-machine, that the quantity may be adjusted to the required width and weight of the sheet.

pulp-mill (pul'p-mil), n. A pulp-grinder, pulp-ing-machine, or pulper.

pulpous (pul'pus), a. [= F. *pulpeux* = Sp. Pg. *pulposo* = It. *polposso*, *pulpy*, < L. *pulposus*, fleshy, < *pulpa*, the fleshy portion of a body, solid flesh: see *pulp*.] Consisting of or resembling pulp; pulpy.

The redstreak, . . . whose *pulpous* fruit
With gold irradiate and vermilion, shines
Tempting. J. Phillips, Cider, I.

pulpousness (pul'pus-nes), n. The state or quality of being pulpous; softness and moistness. Imp. Dict.

pulp-strainer (pul'p-strā-nēr), n. A sieve for straining pulp; specifically, a sieve for this purpose used in paper-making.

pulp-washer (pul'p-wosh'ēr), n. A machine for cleansing paper-pulp from dirt and foreign matter; a pulp-dresser. It has a screen to retain grain, stones, etc., and devices for carrying off dirty water and admitting a fresh supply.

pulpy (pul'pi), a. [*pulp* + *-y*.] Like pulp; soft; fleshy; pulaceous; succulent: as, the *pulpy* covering of a nut; the *pulpy* substance of a peach or cherry.

Long'st thou for Butter? bite the *pulpy* part,
And neuer better came to any Mart.
Sylvestor, tr. of Du Bartas's Weeks, l. 3.

In lupins these *pulpy* sides [of the bean] do sometimes arise with the stalk in a resemblance of two fat leaves. Sir T. Browne, Urn-burial, III.

Pulpy disease of the synovial membrane, Brodie's disease. See *disease*.

pulque (pul'ke), n. [Sp., < Mex. *pulque*.] A fermented drink made in Mexico and some countries of Central America from the juice of the agave or maguey, *Agave Americana*. The sap, which abounds in sugar and mucilage when the plant is about to flower, is at that time drawn into a cavity formed by cutting out the bud and upper leaves. The yield may be as much as two gallons a day for several months. The juice is fermented in reservoirs of rawhide, and early in the process is pleasant, resembling spruce-beer, but at the end acquires the putrid odor of the animal matter contained in the hides. It is, however, a favorite beverage with the Mexicans.

pulque-brandy (pul'ke-bran'di), n. A strong spirituous liquor produced in Mexico by distilling pulque, the larger part of which is so consumed; aguardiente; mescal.

pulsate (pul'sāt), v. i.; pret. and pp. *pulsated*, ppr. *pulsating*. [*L. pulsatus*, pp. of *pulsare*, beat, strike, push, drive: see *pulse*.] To beat or throb, as the heart or a blood-vessel; contract and dilate in alternation or rhythmically, as the heart in systole and diastole, the disk of a jellyfish in swimming, the vacuoles in some protozoans, etc.

The heart of a viper or frog will continue to *pulsate* long after it is taken from the body. Darwin.

pulsatile (pul'sā-til), a. and n. [= F. *pulsatile* = Sp. *pulsátil* = Pg. *pulsatil* = It. *pulsatile*, < ML. *pulsatilis*, beating, striking, throbbing (neut. *pulsatilis*, a sieve), < L. *pulsare*, pp. *pulsatus*, beat, strike: see *pulsate*, *pulse*.] I. a. 1. Capable of pulsating; pulsating or pulsatory; throbbing; beating.—2. Requiring to be struck in order to produce sound; in *music*, noting an instrument the tone of which is produced by blows, as of a hammer, as a drum, tambourine, cymbals, or a bell. The epithet is not commonly used with reference to stringed instruments, like the dulcimer or the pianoforte, though it properly belongs to them. Compare *percussive*.

II. n. A musical instrument which is sounded by means of blows.

pulsatilla (pul-sā-til'ā), n. [ML. *pulsatilla*, *pulsatilla*, dim., < L. *pulsare*, pp. *pulsatus*, beat, strike: see *pulsate*, *pulsatile*.] The pasque-flower, *Anemone Pulsatilla*; also, in *pharmacography*, *A. pratensis* and *A. patens* (var. *Nuttalliana*). These plants have medicinal properties. Also *pulsatilla*. See *pasque-flower*.

pulsation (pul-sā'shōn), n. [= F. *pulsation* = Pr. *pulsacio* = Sp. *pulsacion* = Pg. *pulsacão* = It. *pulsazione*, < L. *pulsatio* (n.), a beating, a striking, < *pulsare*, pp. *pulsatus*, strike, beat: see *pulsate*, *pulsatile*.] 1. The act or process of pulsating, or beating or throbbing: as, the *pulsation* of the heart, of an artery, of a tumor.—2. A single beat of the heart or a blood-vessel.—3. A beat or stroke by which some medium is affected, as in the propagation of sound. See *beat*, n., 2.—4. In *law*, a beating without pain.

The Cornelian law "de injuriis" prohibited *pulsation* as well as verberation, distinguishing verberation, which was accompanied with pain, from *pulsation*, which was attended with none. Blackstone, Com., III. viii.

pulsive (pul'sā-tiv), a. [= F. *pulsatif* = Sp. Pg. *pulsativo*; as *pulsate* + *-ive*.] Same as *pulsatile*.

pulsator (pul-sā'tōr), n. [*L. pulsator*, one who beats or strikes, < *pulsare*, pp. *pulsatus*, beat, strike: see *pulsate*.] 1. A beater; a striker.—2. The pulsometer pump.—3. A small gravitating machine or shaker, used in diamond-mining in South Africa and elsewhere. It works on the same principle as the jigger.

Pulsatoria (pul-sā-tō'-ri-ā), n. pl. [NL.: see *pulsator*.] A group of parasitic *Infusoria*, called a subclass, framed for the reception of *Pulsatella convoluta*, a rhythmically pulsatile organism without cilia and with a differentiated contractile vesicle, found in the mesoderm of a planarian worm, *Convoluta schulzei*.

pulsatory (pul'sā-tō-ri), a. [= Sp. Pg. *pulsatorio*, < L. *pulsare*, beat, strike: see *pulse*.] Same as *pulsatile*.

An inward, pungent, and *pulsatory* ache within the skull. Sir H. Wotton, Reliquiae, p. 418.

Pulsatory current, in *elect.*, a current rapidly and regularly intermitted.

The *pulsatory* current is one which results from sudden or instantaneous changes in the intensity of a continuous current. Jour. Franklin Inst., CXXI. 34.

pulse (puls), n. [Now accented to L. spelling; in ME. *poulce*, *pouse*, *pous*, < OF. *pouls*, *pous*, *poux*, a beat, stroke, pulse, F. *pouls*, *pulse*, = Pr. *pols* = Sp. Pg. *pulso* = It. *polso* = D. *pols* = MLG. *puls* = G. Sw. Dan. *puls*, *pulse*, < L. *pulsus*, a beating, striking, pushing (*pulsus venarum*, 'the beating of the veins,' the pulse), < *pellere*, pp. *pulsus*, strike, drive, push. Cf. *pulse*, v.] 1. A beat; a stroke; especially, a measured, regular, or rhythmical beat; a short, quick motion regularly repeated, as in a medium of the transmission of light, sound, etc.; a pulsation; a vibration.

The vibrations or *pulses* of this medium, that they may cause the alternate fits of easy transmission and easy reflexion, must be swifter than light, and by consequence above 700,000 times swifter than sounds. Newton.

I . . . caught once more the distant about,
The measured *pulse* of racing oars
Among the willows. Tennyson, In Memoriam, lxxxvii.

2. Specifically, in *physiol.*, the series of rhythmically recurring maxima of fluid tension in any blood-vessel, consequent on the contractions of the heart. These may be perceived by palpation, and recorded by the sphygmograph, and often produce a visible effect in dilating the vessel, or causing a lateral movement of it. The pulse is for the most part confined to the arteries, but a venous pulse occurs (see below). There is one arterial pulse for each ventricular systole; but in disease a ventricular systole may be too feeble to produce a sensible pulsation in a distant artery, as at the wrist, or again each pulsation may be double. (See *dirotic pulse*.) The features of the pulse are the times between successive pulsations, the maxima and minima of pressure, and the way in which the tension changes from maximum to minimum and to maximum again, represented in the form of the sphygmographic tracing. The normal pulse exhibits approximately equal and equidistant maxima, the rate being in adults between 70 and 80 (see *pulse-rate*); the rise of pressure is sharp, the fall slow with only a slight dirotic wave; the extent of change (amplitude) is not excessive; and the tension of the blood in the vessel is neither too high nor too low. As taken with Basch's sphygmomanometer, the radial (maximum) tension in health usually lies between 135 and 165 millimeters mercury.

He perceived by his *pous* he was in peril to deye,
And bote he hadde recouer the rather that rise sholde he neuere. Piers Plowman (C), xx. 66.

His *pous* (var. *pous*, *poulce*) and pawmes of his hondes. Chaucer, Troilus, III. 1120.

Yet she 's warm, her *pulses* beat,
'Tis a sign of life and heat. Fletcher, Faithful Shepherdess, III. 1.

Stir not a *Pulse*; and let my Blood,
That turbulent, unruly Flood,
Be softly staid. Congress, On Mrs. Hunt.

3. In *music*, same as *beat* or *accent*.—4. Figuratively, feeling; sentiment; general opinion, drift, tendency, or movement, private or public: as, the *pulse* of an occasion; the *pulse* of the community.—*Anacrotic pulse*, a pulse in which the first wave is not the highest, so that the ascending limb of the pulse-curve is notched.—*Bounding pulse*, a large, more or less frequent pulse.—*Corrigan's pulse*, the typical pulse of aortic regurgitation: a large, quick, suddenly collapsing pulse.—*Dirotic pulse*, a pulse in which the dirotic wave is excessive; a double pulse.—*Entoptic pulse*, pulsation of the retinal arteries, as revealed by the ophthalmoscope or by Purkinje's method.—*Filiform pulse*, a thready pulse; the pulse when the artery is contracted and the pulsations are feeble.—*Frequent pulse*, a pulse in which the number of beats per minute is excessive. Also called *rapid* and sometimes *quick pulse*.—*Full pulse*, a large pulse, the artery not being contracted.—*Hard pulse*, a pulse where the artery is not easily compressed, the blood-tension being high; *pulsus durus*.—*Hyperdirotic pulse*, a very marked dirotic pulse.—*Infrequent pulse*, a pulse in which the number of pulsations per minute is abnormally low; *pulsus rarus*. Sometimes called *slow pulse*.—*Irregular pulse*, a pulse in which the pulsations are of unequal strength or recur at unequal intervals, or which is abnormal in both these respects.—*Large pulse*, a pulse in which the amplitude or difference between the maximum and minimum of tension is great; *pulsus magnus*.—*Monocrotic pulse*, a pulse with only one distinguishable wave.—*Polycrotic pulse*, a pulse where there are several secondary waves.—*Postdirotic pulse*, a pulse in which the postdirotic wave is well marked.—*Predicrotic pulse*, a pulse in which there is a large predicrotic wave.—*Quick pulse*, (a) A pulse in which the rise of tension is very rapid, or in which the time occupied by the rise and the greater part of the fall is very short; *pulsus celer*. (b) A frequent pulse.—*Recurrent pulse*, the reappearance of a pulse in an artery beyond the point where it is compressed, due to distal anastomosis.—*Slow pulse*, (a) A pulse in which the rise of tension is very slow, or in which the time occupied by the rise and the greater part of the fall is unusually long; *pulsus tardus*. (b) An infrequent pulse.—*Small pulse*, a pulse

in which the amplitude or difference between maximum and minimum of tension is small; *pulsus parvus*.—**Soft pulse**, a pulse where the artery is easily compressed; *pulsus mollis*. The individual pulsations may be well marked.—**Thrady pulse**, a very small, frequent pulse in a contracted artery.—**To feel one's pulse**, figuratively, to sound one's opinion; try or know one's mind.—**Wiry pulse**, a small, frequent pulse in a contracted artery.

pulse¹ (puls), *v.*; pret. and pp. *pulsed*, ppr. *pulsing*. [*L. pulsare*, beat, strike, push, drive, freq. of *pellere*, pp. *pulsus*, beat, strike, push, drive. Cf. *push¹*, ult. < *L. pulsare*, and see *compel*, *expel*, *impel*, *propel*, *repel*, *appulse*, *compulse*, *expulse*, *impulse*, etc.: see also *pulsate*, and *pulse²*, *n.*] **I. trans.** 1. To drive.

And I (my sunne) thy noble name with foule reproch have stain'd.
Pulse forth through spyte from princely throne, and place where father rain'd.
Phaer, Aeneid.

2. To drive by a pulsation of the heart. [Rare.] **II. intrans.** To beat, as the arteries or heart.

Faint panting *pulse* his loyns, and tier'd with pains his entrails beat.
Phaer, Aeneid, x.

The heart, when separated wholly from the body, in some animals, continues still to *pulse* for a considerable time.
Ray.

pulse² (puls), *n.* [*ME. puls*, also *pouse*, < *OF. pouls*, *pols*, *pous*, < *L. puls* (*pult-*) = *Gr. πῦλος*, pottage of beans, peas, etc., porridge. Cf. *poulitice*.] 1. The esculent seeds of leguminous plants cultivated as field or garden crops, as peas, beans, lentils, etc.

With Elijah he partook,
Or as a guest with Daniel, at his *pulse*.
Milton, P. R., II. 278.

2. One of the plants producing pulse.

Every *puls*,
There lande is colde, is herest nowe to hula.
Palladius, Husbandrie (E. E. T. S.), p. 160.
High climb his *pulse* in many an even row,
Deep strike the ponderous roots in soil below.
Crabbe, Works, I. 41.

pulse-curve (puls'kerv), *n.* The sphygmographic tracing of a pulse-wave.

pulse-glass (puls'gläs), *n.* An instrument intended to exhibit the ebullition of liquid at low temperatures, constructed like a cryophorus. The bulbs are connected by a slender stem, and partially charged with water, ether, or alcohol, the supernatant air having been expelled by boiling, and the opening hermetically sealed by a blowpipe. If one of the bulbs is grasped, the heat of the hand will cause the formation of vapor and drive the liquid into the other bulb, producing a violent ebullition in the latter. *E. H. Knight.*

pulseless (puls'les), *a.* [*< pulse + -less.*] Having no pulse or pulsation.

He lay a full half-hour on the sofa, death-cold, and almost *pulseless*.
Kingsley, Two Years Ago, xi.

pulselessness (puls'les-nes), *n.* Failure or cessation of the pulse.

pulsellum (pul-sel'um), *n.*; pl. *pulsella* (-ä). [*NL., dim. of L. pulsus*, a beating; see *pulse¹*.] A propulsive filament or flagelliform appendage, as the tail of a spermatozoan, which by its lashing motions propels the body to which it is attached. It is a modified form of flagellum chiefly characteristic of spermatozoa, but possessed by some few flagellate infusorians, whose action serves to drive the animalcule backward through the water. *E. R. Lankester; W. S. Kent.* Compare *flagellum*, *gubernaculum*, *tracellum*.

The flagellum of the Flagellata is totally distinct from the *pulsellum* of the Bacteria. *Encyc. Brit., XIX. 856.*

pulse-rate (puls'rät), *n.* The number of pulsations of an artery in a minute. The normal pulse-rate of man in adult life, reclining, and undisturbed by exertion, averages, for the time between breakfast and retiring at night, about 72. There is a large diurnal variation, the rate falling to 60 or below during the night, and rising to 75 or more at noon or some other time during the day. The rate is from 140 to 120 or less during the first year of life, falls in the next year to 100, and reaches the adult rate shortly after puberty; after 60 years of age there is a slight increase. The pulse-rate of woman is 3 to 5 beats higher than that of man. Height of stature diminishes pulse-rate. The rate during health varies greatly, from unknown causes, in different persons—some rates being 40 or less, and others 100 or more, without inconvenience or other derangement of health. The pulse-rate is higher in a standing than in a sitting, or, still more, in a recumbent posture. It is raised by excitement, by exertion, by pyrexia, by various drugs and diseases.

pulse-warmer (puls'wär'mér), *n.* A wristlet. [Colloq.]

pulse-wave (puls'wäv), *n.* The wave of raised tension and arterial expansion which starts from the aorta with each ventricular systole, and travels to the capillaries. Its velocity varies greatly, but in most cases lies between 4 and 12 meters per second.—**Fundamental or primary pulse-wave**, the wave resulting from the primary or ventricular impulse; the wave indicated by the initial

upward stroke of the pulse-curve.—**Secondary pulse-wave**, a wave following the primary wave, and due to the elastic nature of the arterial walls; a wave indicated by an elevation following the initial upward stroke of the pulse-curve. See *pulse¹*, 2.

pulsific (pul-sif'ik), *a.* [*< pulse + -ific.*] Exciting the pulse; causing pulsation. [Rare.]

To make [the muscular constriction of the heart] nothing but a *pulsific* corporeal quality in the substance of the heart itself is very unphilosophical and absurd.
Cudworth, Intellectual System, p. 161.

pulsimeter (pul-sim'e-tér), *n.* [Also *pulsometer*; < *L. pulsus*, pulse, + *Gr. μέτρον*, measure.] An instrument for measuring the strength or quickness of the pulse.

pulsion (pul'shon), *n.* [*< LL. pulsio(n)-*, a beating, a striking, < *L. pellere*, pp. *pulsus*, beat, strike, drive; see *pulse¹*.] The act of driving forward: opposed to *suction* or *traction*.

How general and ancient soever the common opinion may be that attraction is a kind of motion quite differing from *pulsion*, if not also opposite to it, yet I confess I concur in opinion . . . with some modern naturalists that think attraction a species of *pulsion*.
Boyle, Cause of Attraction by Suction, I.

The operation of nature is different from mechanism, it doing not its work by trusion or *pulsion*, by knockings or thrustings, as if it were without that which it wrought upon.
Cudworth, Intellectual System, p. 156.

pulsive (pul'siv), *a.* [*< L. pulsus*, pp. of *pellere*, beat, strike, drive (see *pulse¹*), + *-ive*.] 1. Constraining; compulsory. [Rare.]

The *pulsive* strain of conscience.

Marston.

2. Impulsive. *Nares.*

In end my *pulsive* brains no art affords
To mint, or stamp, or forge new coyned words.
John Taylor, Works (1630).

pulsometer (pul-som'e-tér), *n.* [*< L. pulsus*, a beating, + *Gr. μέτρον*, measure.] 1. Same as *pulsimeter*.—2. In *mech.*, a kind of steam-condensing pump acting on the principle of a vacuum-pump. By interposing a stratum of air between the steam and the water it forms a far more economical machine than the old style of vacuum-pump. In the illustration *a* and *a'* are bottle-shaped chambers; *b* is the bonnet with steam-passages; *c* is a spherical valve which excludes the steam from one chamber while permitting it to flow into the other. Steam enters at *s*; *d* is an induction-passage for water; *e* and *e'* are vulcanized rubber valves; *f* and *f'* valve-seats; *h* the delivery-passage, shown (with other parts) in dotted outline; *g* and *g'* eduction-valves for water; *i* and *i'* valve-guards; *j*, an air-chamber; *k* and *k'* bonnets covering openings whereby the valves may be reached for adjustment or repair; *l* and *l'* rods which hold the induction-valves and their attachments in place; *n* and *n'* brass socket-headed bolts which secure the valves *g* and *g'* and their attachments in their places. Into the neck of each of the chambers *a* and *a'* is screwed a small inlet air-valve (not shown). A similar valve is fitted to the chamber *j*. Steam entering chamber *a* expels its contents, and then, condensing, forms a partial vacuum. The valve then closes the opening into that chamber, and admits steam into the other. Water then rises to fill the vacuum chamber; also a little air enters through the minute air-valve in the neck. By this time the contents of the other chamber are expelled, the steam condenses therein, and other events follow as described for the first chamber. The small quantity of air admitted, being heavier than steam, forms a film over the upper surface of the water, and, being a non-conductor of heat, prevents wasteful condensation of steam, which would otherwise arise from the direct contact of the steam with the water. The machine derives its name from the pulsatory action of the steam ejected, and the analogy of its form, with its interior valves, to the construction of the heart. Also called *aquimeter*.

Pulsometer, shown in section.

pulsus (pul'sus), *n.* [*L.: see pulse¹*.] The pulse.—**Pulsus alternans**, a pulse in which alternate beats are strong and weak.—**Pulsus bigeminus**, a pulse made up of cycles consisting of two beats followed by a pause.—**Pulsus celer**, a quick pulse. See *pulse*.—**Pulsus dicrotus**, a dicrotic pulse. See *pulse*.—**Pulsus differens**, a pulse unequal in strength, or dissimilar in form in the two radials.—**Pulsus durus**, a hard pulse. See *pulse*.—**Pulsus filiformis**, a filiform pulse. See *pulse*.—**Pulsus hyperdicrotus**, a hyperdicrotic pulse. See *pulse*.—**Pulsus intercurrents**, a pulse in which there is an extra beat intercalated in a normal series.—**Pulsus intermittens**, an intermittent pulse. See *pulse*.—**Pulsus magnus**, a large pulse. See *pulse*.—**Pulsus mollis**, a soft pulse. See *pulse*.—**Pulsus monocrotus**, a monocrotic pulse.—**Pulsus myurus**, a pulse which becomes feebler and then stronger in alternate series.—**Pulsus paradoxus**, a pulse

which for the most part or entirely disappears during inspiration, returning with expiration. It occurs in some cases when the aorta is compressed during inspiration by cicatricial bands produced by pericarditis or mediastinitis, in some cases of adherent pericardium, and in some of stenosis of the trachea or larynx.—**Pulsus parvus**, a small pulse. See *pulse*.—**Pulsus quadrigeminus**, a pulse in which there is a longer pause after every four beats.—**Pulsus tardus**, a slow pulse. See *pulse*.—**Pulsus tremulus**, a very feeble pulse just perceptible at the wrist as a faint fluttering sensation.—**Pulsus trigeminus**, a pulse with a longer pause after every three beats.—**Pulsus venosus**, the alternating expansion and contraction of a vein or veins, either due to the contractions of the heart acting backward through the large veins, or constituting a direct centripetal pulse due to arterial relaxation.

pult¹, *v.* A Middle English form of *pelli*.

pultaceous (pul-tä'shius), *a.* [*< L. pult* (*pult-*), pottage, porridge (see *pulse²*), + *-aceous*.] 1. Soft or semi-fluid, as the substance of a poultice; pulpy.—2. Macerated; pulpified; partly digested: as, a *pultaceous* mass of food in the stomach.

Pultenaea (pul-te-né'ä), *n.* [*NL.* (Sir J. E. Smith, 1793), named after Richard Pulteney (1730–1801), an English botanist.] A genus of leguminous shrubs of the tribe *Podalyrieæ*. It is characterized by united keel-petals, a large banner-petal, two ovules, an ovate two-valved pod, persistent bractlets closely investing the calyx, and dry or thread-like stipules. The 75 species are all Australian. They bear undivided and alternate or rarely whorled flat or concave leaves, and brownish stipules often enlarged to form an involucre under the yellow or orange flowers, which are solitary in the axils or crowded in terminal heads. They are dwarf and ornamental evergreens, usually from 1 to 3 feet high, cultivated chiefly under the name *Pultenaea*; one, *P. daphnoides*, which reaches 8 feet, is known in Victoria as *will-flower*. See *Viminaria*.

pulteri, *n.* An obsolete form of *poulterer*.

pultisset, pultiset, *n.* Obsolete forms of *poultice*.

pultriet, *n.* An obsolete form of *poultry*.

pulture, *n.* See *pulture*.

pulu (pö'lö), *n.* [Hawaiian.] A fine silky yellowish fiber obtained in the Hawaiian Islands from tree-ferns of the genus *Cibotium*, the bases of whose leafstalks it densely covers. It is exported in considerable quantity, chiefly to San Francisco, for use in stuffing mattresses, etc. A species of the genus, *C. Barometz*, of tropical Asia and the Malay Islands, yields (as do also species of *Dicksonia*) a like product, used for the same purpose, and also employed in surgery as a mechanical styptic.

pulv. An abbreviation of Latin *pulvis*, powder: used in medical prescriptions.

pulverable (pul've-ra-bl), *a.* [*< L. pulvereare*, cover with dust, reduce to powder (< *pulvis* (*pulver-*), dust, powder), + *-able*.] Capable of being pulverized, or reduced to fine powder. [Rare.]

In . . . the Indies he furnished himself with some liquid substances afforded by wounded plants, that as soon as he came near Europe, and not before, turned into consistent and *pulverable* bodies.
Boyle, Works, I. 636.

pulveraceous (pul've-rä'shius), *a.* [*< L. pulvis* (*pulver-*), dust, powder, + *-aceous*.] In bot. and zool., having a dusty or powdery surface; pulverulent.

pulverain† (pul've-rän), *n.* [= *F. pulverin*, < *It. polverino*, < *polvere*, powder; see *powder*.] A powder-horn, especially one for fine priming-powder.

pulverate (pul've-rät), *v. t.*; pret. and pp. *pulverated*, ppr. *pulverating*. [*< L. pulveratus*, pp. of *pulverare* (> *It. polverare*), cover with dust, reduce to powder, < *pulvis* (*pulver-*), dust, powder; see *powder*.] To beat or reduce to powder or dust; pulverize. [Rare.]

They litter them [their horses] in their own dung, first dried in the Sun and *pulverated*. *Sandys, Travels, p. 51.*

Pulveratores (pul've-rä-tö'röz), *n. pl.* [*NL., pl. of pulverator*, < *L. pulverare*, pp. *pulveratus*, reduce to powder; see *pulverate*.] Birds which habitually roll themselves in the dust, as the *Rasores*.

pulver-day† (pul'ver-dä), *n.* Same as *Pulver-Wednesday*.

pulver-dish† (pul'ver-dish), *n.* [*< L. pulvis* (*pulver-*), dust, ashes, + *E. dish*.] A vessel in which were placed the ashes which were to be sprinkled upon the faithful on Ash Wednesday.

pulveraceous (pul've-rä'shius), *a.* [*< L. pulvis* (*pulver-*), dust, powder, + *-aceous*.] In bot. and zool., having a dusty or powdery surface; pulverulent.

pulverin, **pulverine** (pul've-rin), *n.* [*< L. pulvis* (*pulver-*), dust, ashes, + *-in*, *-ine*.] Ashes of barilla.

pulverizable (pul've-ri-zä-bl), *a.* [= *F. pulverisable* = *Sp. pulverizable* = *It. polverizzabile*; as *pulverize* + *-able*.] Capable of being pulverized. Also spelled *pulverisable*.

pulverization (pul've-ri-zä'shon), *n.* [= *F. pulverisation* = *Sp. pulverizacion* = *Pg. pulve-*

The flowers perfumed the air with smells of incense, ambergris, and *pulvillio*, and were so interwoven with one another that they grew up in pieces of embroidery.

a. having a loose, spongy or cellular structure

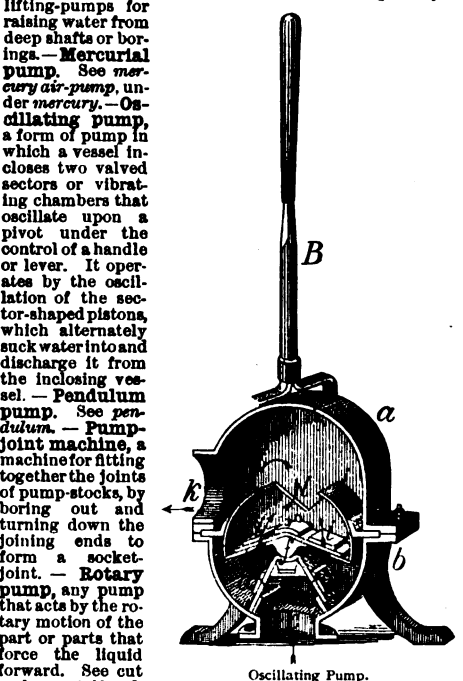

phragm-pump, a reciprocating diaphragm pump; **phragm** performs the function of a valve; **f**, base, supporting all other parts.

piston. In the *chain-pump*, the "buttons" on the chain are substantially pistons of a lifting-pump. In the *spiral-pump*, which forces water through a spiral passage, as the Archimedean screw, the portions of the walls of the passage lying behind the liquid are the analogues of pistons. In *rotary pumps*, acting by direct pressure or by centrifugal force, or having a turbinate form, the analogues of pistons are the rotating vanes, buckets, etc. In *propeller-pumps*, the blades of the propeller-wheel represent the pistons. In pumps of the *monte-jus* variety, including steam vacuum-pumps, the pulsometer, etc., the representation of the piston is a volume of steam which first presses upon the liquid, and is then condensed and replaced by an equal volume of liquid, which in its turn is displaced by another volume of steam. In *jet-pumps*, the analogue of the piston is either a liquid column moving at high velocity to force other portions of liquid or vapor forward, or a column of air, gas, or vapor, which, in the steam injector and ejector, is steam that is condensed to a liquid during its movement without much reduction in its velocity.] 2. [*pump*¹, v.] An artful effort to extract or elicit information, as by indirect question or remark. [Colloq.]

I was the easier indeed because, for all her *pumps*, she gave no hints of the key and the door, &c., which, had he communicated to her, she would not have forborne giving me a touch of. Richardson, Pamela, L. 171.

Atmospheric, centrifugal, centripetal pump. See the adjective. — **Circulating pump,** the pump employed to move a current of cold water through a surface-condenser. In a marine engine the water is taken from the sea, made to circulate through the condenser, and then thrown overboard. — **Dental pump,** a device for freeing the mouth from saliva during dental operations. Also called *saliva-pump*. — **Differential pump.** See *differential*. — **Double-acting pump,** a pump which, instead of discharging and inducing liquid in its outward stroke only, both inducts and discharges at each stroke. An inlet- and an outlet-valve is arranged at each end of the pump; the piston is solid and valveless; an induction branch-pipe or passage leads to each inlet-valve; and a discharge branch-pipe or passage leads from each outlet-valve. — **Eccentric pump,** a cylinder in which revolve a hub and axis arranged eccentrically. The water enters by one opening and escapes by another, expelled by flaps upon the hub, which serve as pistons in the space between the hub and case. — **Jack-head pump,** a pump having its delivery-pipe attached to the pump-barrel or cylinder by a goose-neck connection. This form of attachment is used especially in lifting-pumps for raising water from deep shafts or borings. — **Mercurial pump.** See *mercury air-pump*, under *mercury*. — **Oscillating pump,** a form of pump in which a vessel incloses two valve sectors or vibrating chambers that oscillate upon a pivot under the control of a handle or lever. It operates by the oscillation of the sector-shaped pistons, which alternately suck water into and discharge it from the inclosing vessel. — **Pendulum pump.** See *pendulum*. — **Pump-joint machine,** a machine for fitting together the joints of pump-stocks, by boring out and turning down the joining ends to form a socket-joint. — **Rotary pump,** any pump that acts by the rotary motion of the part or parts that force the liquid forward. See cut under *centrifugal*.

Oscillating Pump.

The body of the pump is made in two sections, *a* and *b*, flanged and bolted together. The induction-chamber *c* has upwardly opening valves *d*, through which water is drawn by oscillating the handle *a*, causing corresponding oscillation of the piston *f*, which turns upon *a* as a center, and is provided with valves *e*, opening upwardly into the chamber *b*, into which the water is forced at each successive oscillation, and discharged therefrom through the eduction-opening *h*.

— **Saliva-pump.** Same as *dental pump*. — **Single-acting pump,** in contradistinction to *double-acting pump*, a pump that inducts and discharges during one stroke only—the outward stroke. Compare *stroke*. — **Spiral-pump.** Same as *Archimedean screw* (which see, under *Archimedean*). — **Steam jet-pump,** a jet-pump in which water is driven by steam. In the case of the injector this form of pump is used to feed water to the boiler. See *injector* and *ejector*, which are special names for steam jet-pumps. — **Steam vacuum-pump.** See *vacuum-pump*. — **Submerged pump,** a pump the barrel and valves of which are submerged, while its pump-rod and discharge-pipe extend above the surface of the water in which the pump-barrel is placed. The principal advantage pertaining to submerged pumps is that their working parts are not liable to be obstructed by the formation of ice (called *freezing up*), as is the case with pumps exposed to effects of very cold air. — **To fetch a pump.** See *fetch*. — **To prime a pump.** See *prime*. (See also *air-pump*, *chain-pump*, *flor-pump*, *force-pump*, *jet-pump*.)

pump¹ (pump), v. [= *D. pompen* = *G. pumpen* = *Sw. pumpa* = *Dan. pumpe*; from the noun.

Cf. E. dial. plump = *G. plumpen*, pump.] **I. intrans.** To work a pump; raise water or other liquid with a pump.

Not so, oh Charon, wanting to defray,
Thou hast my pines, I *pump* part of the way,
Then tag'd at th' oar, being that only soule
Who in thy barge did neither mourne nor houle.
Heywood, Dialogues (Works, ed. Pearson, 1874, VI. 233).
Mariners . . . while they pour out their vows to their
saviour gods, at the same time fall lustily to their tackle,
and *pump* without intermission.

Warburton, Divine Legation, III. 6.
Pumping of the barometer, the oscillation of the mercury in the tube of a barometer, resulting from sudden movements of the instrument, or sometimes from the mechanical influence of blasts of air in compressing or rarefying the air when the barometer is placed near an obstruction. At sea, where the barometer is subject to the pitching and rolling of the vessel, pumping is especially troublesome, and in order to diminish it, marine barometers are constructed with the tube contracted for a considerable part of its length.

II. trans. 1. To raise with a pump: as, to *pump water*. — **2.** To free from water or other fluid by means of a pump or pumps: as, to *pump a ship*. — **3.** To elicit or draw out by or as by artful interrogation: as, to *pump out* secrets.

I'll stand aside whilst thou *pump'st* out of him
His business. B. Jonson, Tale of a Tub, IV. 2.
4. To subject to a pumping process for the purpose of extracting, procuring, or obtaining something, such as money, information, or secrets.

Here — 'tis too little, but 'tis all my store;
I'll in to *pump* my dad, and fetch thee more.
Randolph, Muses Looking Glass, II. 4.
Not to rove, and *pump* one's Fancy
For Popish Similes beyond Sea.
Prior, To Fleetwood Shephard.

I am going to *pump* Mr. Bentley for designs.
Walpole, Letters, II. 264.
He . . . finally made a motion with his arm as if he were working an imaginary pump-handle, thereby intimating that he (Mr. Trotter) considered himself as undergoing the process of being *pumped* by Mr. Samuel Weller.
Dickens, Pickwick, xvi.

To pump ship, to urinate. [Low.]
pump² (pump), n. [Prob. < *F. pompe*, pump, ornament, show (> *L.G. pump*, pump, show); cf. *G. pumphosen*, wide pantaloons, < (*L.G.*) *pump*, pump, show, + *hosen*, hose; *pumpstiefel*, a large, clumsy boot, < (*L.G.*) *pump*, pump, show, + *stiefel*, boot: see *pomp*. For the form, cf. *pumpet* for *pomp*.] A low shoe or slipper, with a single unvelted sole, and without a heel, or with a very low heel, worn chiefly for dancing.

Thy *pumps*, as white as was the milk,
And yet thou wouldst not love me.
Greenleaves Child's Ballads, IV. 242.
Thou shalt not need to travel with thy *pumps* full of gravel any more, after a blind jade and a hamper.
B. Jonson, Poetaster, III. 1.
The usual attire of a gentleman, viz. *pumps*, a gold waistcoat, a crush hat, a sham frill, and a white choker.
Thackeray, Book of Snobs, I.

pumpage (pum'pāj), n. [*pump*¹ + *-age*.] The amount pumped; the quantity or amount raised by pumping.

The *pumpage* for the year averaged 69,658,969 gallons per day.
Sanitarian, XVII. 119.

pump-barrel (pum'bar'el), n. The wooden or metal cylinder or tube which forms the body of a pump, and in which the piston moves.

pump-bit (pum'bit), n. Same as *nose-bit*.

pump-bob (pum'bob), n. In a steam-engine, a form of bell-crank lever serving to convert rotary motion into reciprocating motion, for operating a pump-piston.

pump-bolt (pum'bōlt), n. A toggle-pin used on fishing-vessels. [Massachusetts, U. S.]

pump-box (pum'boкс), n. 1. The piston of the common pump, having a valve opening upward. — 2. The casing or cap of a pump. — **Lower pump-box,** the casing of the lower valve of a pump. — **Upper pump-box,** the casing of the upper valve.

pump-brake (pum'brāk), n. The arm or handle of a pump, more particularly that form which has a horizontal hand-piece at the end of a lever. See *brake*.

pump-cart (pum'kärt), n. A vehicle carrying a pump and reservoir, used for watering and irrigating. E. H. Knight.

pump-chain (pum'chān), n. The chain of a chain-pump. See *chain-pump*.

pump-cistern (pum'p'sis'tēr), n. 1. *Naut.*, a cistern over the head of a chain-pump to receive the water, whence it is conveyed through the ship's side by the pump-dales. — 2. A contrivance to prevent chips and other matters from getting to and fouling the chain-pumps.

pump-coat (pum'kōt), n. *Naut.*, a canvas cover fastened about a pump, and nailed to

the partners, to prevent water from running down its sides.

pump-dale (pum'p'dāl), n. The discharge-spout (originally and still commonly a trough) of a pump, which directs the flow; specifically, a long detachable hose or tube used on board ship to conduct water from a pump across the ship and over the side. Pump-dales are also used in tanneries to convey tan-liquor pumped from one vat into another. Also called *dale*.

pumped¹ (pump't), p. a. [*pump*¹ + *-ed*.] Out of breath; panting; breathless: sometimes with out. [Colloq. or slang.]

Darkness began to set in, the artillery horses were *pumped out*, and orders were given to retire.
W. H. Russell, Diary in India, II. 570.

pumped² (pump't), a. [*pump*² + *-ed*.] Provided with pumps; wearing pumps or low dress shoes. [Rare.]

All the young gentlemen tightly cravatted, curled, and *pumped*.
Dickens, Dombey and Son, xiv.

pumper (pum'pēr), n. [= *G. pumper*; as *pump*¹ + *-er*.] 1. One who or that which pumps.

The flame lasted about two minutes from the time the *pumper* began to draw out the air. Boyle, Works, I. 28.
2. A mineral-oil well from which the oil must be pumped up, as distinguished from one from which the oil issues in a natural jet.

pumpnickel (pum'pēr-nīk'el), n. [*< G. pumpnickel*, formerly also *pompernickel*, orig. a heavy, blockish fellow, hence applied to a coarse, heavy bread; < *pumper*, the noise of a heavy fall (< *pumpen*, fall, pump; see *plump* and *pump*), + *Nickel*, a popular abbr. of the common personal name *Nicolaus*, *Nicholas*: see *Nick*, *nickel*.] A kind of coarse bread made from unbolted rye, used especially in Westphalia. It has a little acidity, but is agreeable to the taste, though not very nourishing. Also called *bompernickel*.

pumpet, n. See *pomp*.

pump-gear (pum'gēr), n. *Naut.*, apparatus employed in pumping.

pump-handle (pum'han'dl), n. The handle or lever attached to the piston-rod of a pump for moving the piston up and down.

She's five and forty. She's red hair. She's a nose like a *pump-handle*.
Thackeray, Book of Snobs, xi.

pump-head (pum'hed), n. The cap or top of a chain-pump, which serves to guide the water into the discharge-spout, and as a cover for the pump and well; a pump-hood.

pump-hood (pum'hūd), n. A semicylindrical frame covering the upper wheel of a chain-pump; a pump-head. It directs the water into the discharge-spout, and prevents the throwing out of part of it by centrifugal force.

pump-house (pum'pūs), n. Same as *pump-room*.

It is customary to begin the morning [Bath, 1766] by bathing, which continues from six till about nine; the company then repair to the *pump-house*, some to drink the hot waters, but more for pastime, as they are here amused by a band of music, which fills up the intervals of wit and pleasantry.
LIFE OF QUIN (reprint 1887), p. 50.

pumping-engine (pum'ping-en'jin), n. Any form of motor for operating a pump. While pumping-engines of many types are merely large steam-pumps, a distinction appears to obtain between the terms. Pumping-engines are among the largest engines constructed. They are often built as beam-engines, as at the water-works of Louisville in Kentucky, and also as horizontal engines directly connected with horizontal pumps, as in the common steam-pump.

pumping-shaft (pum'ping-shāft), n. See *shaft*.
pumpion (pum'pion), n. [Also *pompion*, *pompeon*, *poumpion*, *pompon*; < OF. *pompon*, a melon, a variant (simulating a reduplicated form) of earlier *pepon* (> ME. *pepon*), < L. *pepo(n)*, < Gr. *πέπων*, a kind of melon: see *pepo*. Cf. *pippin*.] Hence *pumpkin*, q. v.] A pumpkin. [Obsoleto or archaic.]

Herbes of the bygger sorte, as gourdes, melones, cucumers, *pompions*, oltrons, and suche other, coome to their perfection in the space of thirte dayes.
Peter Martyr (tr. in Eden's First Books on America, [ed. Arber, p. 168].

All manner of strange fruits, as pomegranates, oranges, *pompions*.
Stow (Arber's Eng. Garner, I. 477).

We'll use this unwholesome humidity, this gross watery *pumpion*; we'll teach him to know turtles from jays.
Shak., M. W. of W., III. 3. 43.

Indian *pompions*, the water melon, and the musk-melon. S. Clarke, Four Plantations in America (1670), p. 26.

Observe a *pompion*-twine adroit;
Pluck me one cup from off the castle-moat!
Along with cup you raise leaf, stalk, and root,
The entire surface of the pool to boot.
Browning, Sordello, II.

pump-kettle (pum'ket'l), n. A convex perforated diaphragm fixed at the bottom of a

pump-tube to prevent the entrance of foreign matters; a strainer. *E. H. Knight.*

pumpkin (pump'kin), *n.* [Formerly also *pumkin* (and in popular use, though spelled *pumpkin*, now generally pronounced pump'kin, as if written *punkin*); an altered form, simulating the term *-kin*, of *pumpion*.] The fruit of a variety of *Cucurbita Pepo*; also, the plant which produces it. The plant is a coarse decumbent vine, often many feet long; the leaves are heart-shaped and somewhat lobed, nearly a foot across, and rough and almost prickly, as are also their hollow stalks. The gourd-like fruit is nearly globular or somewhat oblong, flattened at the ends, a foot or more in length, and of a deep orange-yellow color when ripe. Inside it is partly filled with a dryish stringy pulp containing the seeds; the esculent part is a fleshy layer an inch or two thick beneath the rind. The pumpkin is of supposed Asiatic origin, and is cultivated in many countries; in England it has been cultivated either as a curiosity or for food since 1570. It is thought to have been known to the American aborigines, and to have been planted by them among their maize. In America it has been largely given as food to cattle, and is also used on the table, especially in pumpkin-pie; but in culinary use it is now largely superseded by the squash, and is less grown for other purposes than formerly. The pumpkin has various subvarieties, and is closely related to the vegetable marrow. (See *marrow*.) The name is sometimes wrongly applied to forms of the squash. In England occasionally called *gourd* or *pumpkin-gourd*. See *Cucurbita*.

We had an entertainment of boiled wheat with meat in it, and a dish of the *pumkin* kind, dressed after their way. *Pococke, Description of the East, II. i. 181.*

pumpkin-head (pump'kin-hed), *n.* A stupid fellow; a dolt. [Colloq., U. S.]

pumpkin-seed (pump'kin-sēd), *n.* 1. The seed of the pumpkin.—2. One of many small centrarchoid fishes of the genus *Lepomis* or *Pomotis*, especially the common sunfish of the eastern United States, *L. gibbosus*: so called from the shape. Also *tobacco-box*. See cut under *sunfish*. [U. S.]—3. A type of yacht-built boat, broad and cat- or sloop-rigged. It is a very wet sailer. *Henshall, [Florida].*—4. A very flat, wide row-boat, of the shape of a pumpkin-seed, used in water that is shallow or encumbered with weeds or grass. [U. S.]

pumpkin-vine (pump'kin-vin), *n.* The pumpkin-plant.

pump-lug (pump'lug), *n.* A lug cast upon the cross-head of a locomotive, to which the pump-plunger is attached, and which imparts a reciprocating motion to the plunger.

pump-piston (pump'pis'ton), *n.* The plunger, cup, or bucket, reciprocating in a cylinder, by means of which the function of a pump is performed.

pump-plunger (pump'plun'jēr), *n.* 1. The solid piston of a plunger-pump: used to distinguish this class of pump-piston from those which contain a valve.—2. A pump-piston of which the part that operates in the pump-barrel also extends out through the stuffing-box, and is either itself the piston-rod or plunger-rod, or is connected with a piston-rod or plunger-rod exteriorly to the stuffing-box.

pump-room (pump'rōm), *n.* A room connected with a mineral spring, in which the waters are drunk.

Her first resolution . . . [was to seek Miss Tilney] in the *Pump Room* at noon. In the *Pump Room* one so newly arrived in Bath must be met with. *Jane Austen, Northanger Abbey, ix.*

pump-scraper (pump'skrā'pēr), *n.* A circular plate used for cleaning out a pump-barrel.

pump-spear (pump'spēr), *n.* The rod connecting the handle and the valve of a pump.

pump-staff (pump'stáf), *n.* The pump-spear or piston-rod of a pump.

pump-stock (pump'stok), *n.* The body of a pump.

pump-stopper (pump'stop'ēr), *n.* *Naut.*, a plug.

pump-thunder (pump'thun'dēr), *n.* [So called in allusion to its booming cry; < **pump*, var. of *bump*, + *thunder*.] The American bittern, *Botaurus magitans* or *lentiginosus*. Also called *thunder-pumper*. [Local, U. S.]

pump-well (pump'wel), *n.* 1. A well from which water or other fluid is raised by means of a pump.—2. *Naut.*, a compartment formed by bulkheads round the pumps on shipboard, to keep them clear of obstructions, to protect them from injury, and to afford ready admittance for examining their condition.

pumyt, *n.* [A quasi-sing. form of *pumice*, taken as plural: see *pumice*. Cf. *pumice-stone*.] A pebble; a stone. [Rare.]

And off the *pumies* latched.

Spenser, Shep. Cal., March.

pun (pun), *v. t.*; pret. and pp. *punned*, ppr. *punning*. [< ME. **punen*, < AS. *punian*, beat,

pound: see *pound*, the same word in diff. form.] To beat; strike with force; ram; pound, as in a mortar; reduce to powder. [Obsolete or prov. Eng.]

He would *pun* thee into shivers with his fist, as a sailor breaks a biscuit. *Shak., T. and C., II. i. 42.*

The roots must be first sliced and dried in the sunne, or by the fire, and then, being *punned* into flour, will make good bread. *Hakluyt's Voyages, III. 272.*

Yea sometimes in the winter season, when he was in the country, he refused not to cleave wood, and to *punne* barley, and to doe other country works only for the exercise of his body. *Coghan's Haven of Health, p. 225.*

Too much stress cannot be laid upon good sound *punning*. The earth, as it is thrown in, should be thoroughly well *punned* at every stage.

Preece and Stoevright, Telegraphy, p. 196.

pun (pun), *r.*; pret. and pp. *punned*, ppr. *punning*. [Usually explained as a particular use of *pun*, pound, as if to pound or beat words, as it were into new shapes (cf. *twist*, *urest*, as used of words; *clench*, *clinch*, a *pun*); but this explanation requires the verb to have been orig. transitive, 'to pound' (sc. words); evidence of such a use is lacking, and it is not certain that the verb precedes the noun.] *I. intrans.* To make puns.

Who dealt in doggrel, or who *punned* in prose.

Dryden, tr. of Juvenal, x. 180.

II. trans. To affect by a pun.

The sermons of Bishop Andrews and the tragedies of Shakspeare are full of them [puns]. The sinner was *punned* into repentance by the former, as in the latter nothing is more usual than to see a hero weeping and quibbling for a dozen lines together.

Addison, Spectator, No. 61.

pun (pun), *n.* [See *pun*, *v.*] An expression in which the use of a word in two different applications, or the use of two different words pronounced alike or nearly alike, presents an odd or ludicrous idea; a play on words that are alike or nearly alike in sound but differ in meaning; a kind of verbal quibble.

A *pun* can be no more engraven than it can be translated. When the word is construed into its idea, the double meaning vanishes. *Addison, Ancient Medals, II.*

A better *pun* on this word [gay] was made on the Beggar's Opera, which, it was said, made Gay rich, and Rich gay. *Walpole, Anecdotes of Painting, V. 92, note.*

= *Syn. Pun, Paronomasia, Assonance.* *Pun* and *paronomasia* are often confounded, but are in strictness distinct in form and effect. A *pun* is a play upon two senses of the same word or sound, and its effect is to excite a sense of the ludicrous: as,

They went and told the sexton, and

The sexton told the bell.

Hood, Sally Brown.

Even when taken into sober discourse, the *pun* has an effect at least of oddity: as,

For Suffolk's duke, may he be suffocate.

Shak., 2 Hen. VI., I. i. 124.

Hence modern taste excludes puns from serious writing and speaking. *Paronomasia* is rather the use of words that are nearly but not quite alike in sound, and it heightens the effect of what is said without suggesting the ludicrous: as, "Per angusta ad augusta"; "And catch with his surcease success." *Shak., Macbeth, I. 7. 4.*

To begirt the almighty throne

Beeching or besieging.

Milton, P. L., v. 869.

As in these examples, it is most likely to be used where the words thus near in sound are far apart in meaning. It is very common in the original languages of the Bible, especially in the Old Testament, as in Isa. v. 7. An attempt to imitate it may be found in Mat. xxi. 41, revised version. *Assonance* is the bare fact of resemblance of sound, being generally accidental, and in the majority of cases disagreeable to the ear: as, *unfold old truths, our power, if of, is as, and Andrew drew, the then condition.* For the technical meaning of *assonance*, see def. 2 under that word.

puna (pō'nā), *n.* [Peruv.] In the Peruvian Andes, nearly the same as *paramo*.

Tschudi says that by the name of *puna* is designated the high table-land in Peru and Bolivia lying between the two great chains of the Cordillera, beginning at an elevation of about 10,500 feet above the sea-level, and extending to the regions of eternal snow.

J. D. Whitney, Names and Places, p. 196.

punatoo (pun-a-tō'), *n.* [Cingalese.] In Ceylon, the preserved pulp of the fruit of the palmyra-palm. It is the chief food of the poorer classes of the peninsula of Jaffna for several months of the year, and is used in soups, etc.

puna-wind (pō'nā-wind), *n.* A cold and remarkably dry wind which blows from the Cordilleras across the table-land called the Puna, in Peru.

punch (punch), *v. t.* [< ME. *punchen* = Sp. *punchar* (< ML. *punctare*), *punzar* = Pg. *punçar* (< ML. **punctiare*, *punctuare*), pierce, prick, punch, sting, < ML. *punctuare*, *punctare*, pierce, prick, punch, < L. *punctum*, *punctus*, a point: see *point*, *n.* and *v.* The E. form is in part due to the related noun *puncheon* (see *puncheon*), and has been in part confused with ME. *pun-*

chen, var. of *punischen*, punish (see *punch*), also with ME. *bunchen*, beat, strike (see *bunch*),]

1. To make a hole or holes in with a punch or some similar instrument; pierce; perforate: as, to *punch* a metal plate.

When I was mortal, my anointed body

By thee was *punched* full of deadly holes.

Shak., Rich. III., v. 3. 125.

2. To make with or as with a punch: as, to *punch* a hole in something.—**Punching-and-shearing machine**, a machine having both punches and shearing-plates connected with the same standard or bed, and with the same driving pulley or motor.—**Punching-press**, a die-press constructed like an ordinary punching-machine.

punch (punch), *n.* [< *punch*, *v.*; in part prob. abbr. of *puncheon*, *q. v.*] 1. A tool the working end of which is pointed, blunt, a continuous edge inclosing an area, or a pattern in relief or intaglio, and which acts either by pressure or percussion (applied in the direction of its longitudinal axis) to perforate or indent a solid material, or to drive out or in objects inserted in previously formed perforations or cavities. The pointed punch may be regarded as a chisel with a very narrow edge, cutting, therefore, in one point only, and forcing adjacent parts of the material asunder by a wedge-like action. The action of a punch with a continuous edge inclosing an area is also analogous to the action of a chisel. The action of a flat-nosed punch, when used with a die to which it is fitted, is that of a shear-blade, the parts of the material operated upon being separated by sliding over each other, instead of being wedged apart, as is the operation of the pointed punch. Hardened and tempered steel is the usual material of which punches are made. Solid punches with engraved faces are used for stamping-dies, as in coining, and with plain flat faces are used in connection with accurately fitted dies for making clean-cut holes in metal plates, and also for punching out blanks for buttons, coins, small gear-wheels, etc. Hollow punches, or punches having continuous edges inclosing an area, are principally used for cutting either very thin, soft sheet-metal, as tin, brass, or copper plates, or other soft flexible substances, as leather, paper, or cloth. The pointed punch is used for marking centers in the operation of turning, or for punching holes in thin materials where clean cutting is of no importance, as in punching holes in sheet-zinc or -tin for the reception of nails in nailing such sheets to wood.

a, piece to be punched; *b*, punch; *c*, handle; *d*, support for *a*; *e*, *f*, tongs. The punch is operated by striking with a hammer or sledge at *m*. The tongs are usually held in the left hand of the smith, and the handle of the punch in his right hand, his assistant delivering the blows.

2. A tool used to force nail-heads below the surface.—3. A stone-masons' chipping-tool; a *puncheon*.—4. In *surg.*, an instrument used for extracting the stumps of teeth.—5. In *decorative art*, a tool in the form of a bar, sometimes fitted with a handle and engraved at the end in a cross, concentric ring, or other device. It is used for impressing ornamental patterns upon clay or other plastic materials.—6. The engraved model of a printing-type on the end of a steel rod: so called from its being punched in a copper bar which makes the matrix, or a reversed impression of the model.—7. In *carp.*, studding by which a roof is supported.—8. In *hydraul. engin.*, a short length placed on the top of a pile to permit the monkey of a pile-driver to bear upon it when it has been driven too low to be struck directly; a *dolly*.—9. In *coal-mining*, same as *pout*. [North. Eng.]—**Centering punch**, a pointed steel punch with parallel sides, sliding freely in the stem of an inverted funnel or centering cone. *C. P. B. Shelley, Workshop Appliances, p. 166.*—**Coopers' punch**, a punch operated by a lever and making two holes at once. It is used to punch rivet-holes in iron hoops.—**Duplex punch**, (*a*) A punch which has a counter-die on the opposite pan, as in a ticket-punch. (*b*) A punch operated by the rolling action of two levers on one fulcrum, forming a toggle.—**Hollow punch**. See def. 1.

punch (punch), *v. t.* [< ME. *punchen*, a synecopated form of *punischen*, punish (cf. similar synecopated ME. forms of *polish*, *vanish*, and the reverse in ME. *perishen*, var. of *perchen*, *percen*, pierce: see *pierce*). *Punch* in this sense has been confused with *punch*, with which it is now practically identified: see *punch*, and cf. *bunch*.] 1. Same as *punish*.

Punchyn, or chastysen, punysshēn, punlo, castigo.

Prompt. Paro., p. 416.

For your errors on erthe . . .

3e schulle be punched.

Alexander and Dindimus, I. 747.

2. To give a blow, dig, or thrust to; beat with blows of the fist: as, to *punch* one on the head, or to *punch* one's head. [Colloq.]

With a goade he *puncht* each furious dame,
And made them every one cast downe their greene and leaue speares.

Chapman, Iliad, VI.

Smart chap that cabman—handled his fives well; but if I'd been your friend in the green jenny—... *punch* his head—'cod I would. *Dickens, Pickwick Papers*, II.

Won't you please *punch* that fire, and give us more blaze? *C. D. Warner, Backlog Studies*, p. 155.

punch² (punch), *n.* [*< punch², v.*] A blow, dig, or thrust, as with the fist, elbow, or knee: as, to give one a *punch* in the ribs or a *punch* on the head. [Colloq.]

punch³ (punch), *a.* and *n.* [Perhaps a var. of *bunch¹*; cf. *punchy* with *bunchy*.] *I. a.* Short and fat. [Prov. Eng.]

II. n. 1. A short, fat fellow.

I. . . did hear them call their fat child *punch*, which pleased me mightily, that word being become a word of common use for all that is thick and short.

Pepys, Diary, April 30, 1669.

2. A short-legged, barrel-bodied horse, of an English draft-breed.

A stout Suffolk *punch*, about thirteen hands and a half in height. *Barham, Ingoldsby Legends*, I. 119.

Punch⁴ (punch), *n.* [Abbr. of *Punchinello*, by conformation with *punch³*.] A short hump-backed hook-nosed puppet, with a squeaking voice, the chief character in a street puppet-show called "Punch and Judy," who strangles his child, beats his wife (Judy) to death, belabors a policeman, and does other tragical and outrageous things in a comical way.

punch⁵ (punch), *n.* [Formerly also *pouneche*, *punce* (= *D. pons* = *G. Sw. Dan. punsch* = *F. punch*, *pouche* = *Sp. Pg. pouche* = *It. punchio*, *punchio*, *< E.*); so called from its five ingredients, *< Hind. panch*, five, *< Skt. pancha*, five, = *E. five*: see *five*. The *Hind. panch* does not seem to occur alone in the sense of 'punch,' but it is much used in composition to denote various mixtures of five things, as *panch-amrit*, a mixture of milk, curds, sugar, glue, and honey, *panch-bhadra*, a sauce of five ingredients, *panch-pallar*, a medical preparation from the sprouts of five trees, etc., or sets of five things, as *panch-pir*, five saints, *panch-gavya*, the five things yielded by the cow, etc.; also alone for an assembly of five men, or any council (cf. *punchayet*).] A drink commonly made with wine or spirits, and either water or some substitute, as a decoction of tea, and flavored with lemon-juice or lemon-peel and sugar. *Punch* is usually named from the alcoholic liquor which it contains, as brandy-*punch*, claret-*punch*, rum-*punch*, but sometimes also from other ingredients, as milk-*punch*, tea-*punch*, or from some person or circumstance, as *Regent's punch*, Swedish *punch*, Webster *punch*.

Er'en now the godlike Brutus views his score
Scroll'd on the bar-board, swinging with the door;
Where, tipping *punch*, grave Cato's self you see,
And Amor Patriæ vending smuggled tea.

Crabbe, Works, I. 186.

Punch had begun to make its appearance, but it was a simple liquor to what afterwards became known by that name.

J. Ashton, Social Life in Reign of Queen Anne, I. 202.

Cobbler's punch. See *cobbler¹*.—**Roman punch.** See *Roman*.

punchayet (pun-chi'et), *n.* [*Hind. panchayat*, contr. *panchāt*, a court of arbitration consisting of five or more members, a council; cf. *panch*, a council of five, *< punch*, five: see *punch⁵*.] In the village communities of Hindustan, a committee of five men sitting as a jury to try offenses against caste, etc., or as an administrative council or the like.

Bigamy is a Parsee abomination, . . . and the unfortunate Jemahedjee was excommunicated by the honorable *punchayet*. *J. W. Palmer, The New and the Old*, p. 274.

punch-bowl (punch'bōl), *n.* [= *Sw. punschbål* = *Dan. punschbølle*; as *punch⁵ + bowl¹*.] A bowl in which the ingredients of punch are mixed, and from which it is served by means of a ladle. See cut under *monteith*.

They hae gard [caused] fill up as *punch-bowl*.

Jack o' the Side (Child's Ballads, VI. 88).

Take, for instance, the *punch-bowl*. . . It was a thing to be brought forth and filled with a fragrant mixture of rum, brandy, and curaçoa, lemon, hot water, sugar, grated nutmeg, cloves, and cinnamon.

W. Beant, Fifty Years Ago, p. 170.

punch-check (punch'chek), *n.* Same as *bell-punch*.

punch-cutter (punch'kut'er), *n.* The engraver on punches of letters for a type-foundry.

puncheon¹ (pun'chon), *n.* [Formerly also *punchion*, *punchin*; *< ME. punchon*, *punsoun*, *< OF. poinchon*, *poinson*, *F. poignon* = *Sp. punzon* = *Pg. punção* = *It. punzone*, a sharp instrument, a bodkin, dagger, *< L. punctio(n)*, a pricking, puncture, *< pungere*, pp. *punctus*, prick, punch: see *punch¹* and *point¹*. Cf. doublet *punction*.] *1.* A perforating- or stamping-tool; a punch. (a) An iron instrument with a sharp steel point, used in

marble-working: as, a dog's-tooth or gradin *puncheon*; a stone-cutters' *puncheon*. *E. H. Knight*. (b) A tool by which a plate-mark is put upon silverware or the like.

That other signet of gold, w' my *puncheon* of ivory and silver, I geue and bequeath unto Robert my secunde sone. *Fabian, Chron.*, I. Pref., p. vii.

2. In carp.: (a) A short upright piece of timber in framing; a dwarf post, stud, or quarter. (b) A slab of split timber with the face smoothed with an adz or ax, sometimes used for flooring or bridge-boards in the absence of sawed boards. [U. S.]

The house was constructed of logs, and the floor was of *puncheons*—a term which in Georgia means split logs with their faces a little smoothed with the axe or hatchet. *Georgia Scenes*, p. 12.

He had danced on *puncheon* floors before, but never on one that rattled so loudly. *The Century*, XXXIX. 286.

(c) One of the small quarters of a partition above the head of a door. *E. H. Knight*.

puncheon² (pun'chon), *n.* [Formerly also *punchion*; *ME. not found*; *< OF. poinson*, *ponçon*, *F. poignon*, a wine-vessel, = *It. punzone*, a wine-vessel; perhaps so called orig. with ref. to the stamp or print impressed on the cask by a puncheon or stamping-tool, and so a transferred use of *puncheon¹* (cf. *hogshead*, a cask). The *OF. poçon*, *posson*, a small measure, quarter of a pint, can hardly be related. The *G. dial. (Bav.) punzen*, *ponzen*, a cask, is perhaps of *F. origin*.] A cask; a liquid measure of from 72 to 120 gallons: as, a *puncheon* of wine. The *puncheon* of beer in London contained 72 beer-gallons; that of wine, 84 wine-gallons. The latter value was legalized in 1428.

And he's sew'd up the bloody hide,

A *puncheon* o' wine put in.

King Henry (Child's Ballads, I. 149).

puncher (pun'cher), *n.* [*< punch¹ + -er¹*.] One who or that which punches, perforates, or stamps.

He was a rival of the former, who used *puncheons* for his graving, which Johnson never did, calling Simon a *puncher*, not a graver.

Walpole, Anecdotes of Painting, II. 250.

punch-glass (punch'glās), *n.* A small tumbler or ornamental mug with a handle, made of glass and used for punch and similar drinks: usually forming part of a set, as with a tray, or a tray and punch-bowl.

punch-gut¹, *a.* Pot-bellied.

O swinish, *punch-gut* God, say they, that smells rank of the sty he was sowed up in.

Kennet, tr. of Erasmus's Praise of Folly, p. 19. (*Darwin*.)

punch-house (punch'hous), *n.* In India, an inn or tavern; specifically, in the Presidency towns, a boarding-house or house of entertainment for seamen.

Sailors, British and American, Malay and Lascar, [belong] to Flag Street, the quarter of *punch-houses*. *J. W. Palmer, The New and the Old*, p. 264.

punchint¹, *n.* An obsolete variant of *puncheon¹*. **Punchinello** (pun-chi-nel'ō), *n.* [Formerly also *Punchanello*, *Punchinello*; = *F. Polichinelle*, *< It. pulcinello*, a clown, buffoon, prop, a puppet, dim. of *pulcino*, formerly also *polcino*, a young chicken, a child; cf. *pulcella*, *f.*, a young girl, maiden, = *F. pucelle* (see *pucelle*); ult. *< L. pulvis*, the young of an animal, a chicken: see *pullet*. Cf. *Punch⁴*.] *1.* [*f. c.*] A puppet; specifically, a popular puppet of Italian origin, the prototype of Punch. See *Punch⁴*. [In the first quotation the name is applied to an exhibitor of puppets.]

1668, March 29. Rec. of *Punchinello*, the Italian popet player, for his booth at Charing Cross, £2 12s. 6d.

Overseer's Books of the Parish of St. Martin's in the Fields, (London. (Nares.)

'Twas then, when August near was spent,
That Bat, the grillo'd saint,
Had usher'd in his Smithfield-revels,
Where *punchinelloes*, popes, and devils
Are by authority allow'd,
To please the giddy gaping crowd.

Hudibras Redivivus (1707). (Nares.)

2. Any grotesque or absurd personage, likened to the familiar character of the popular comedy in Italy.

Being told that Gilbert Cooper called him [Johnson] the Caliban of literature: "Well," said he, "I must dub him the *Punchinello*." *Boswell, Johnson*, stat. 61.

punching-bag (pun'ching-bag), *n.* A bag, generally large and heavy, suspended from the ceiling, to be punched by an athlete, especially a boxer, for the sake of exercise.

punching-bear (pun'ching-bār), *n.* A punching-machine, operated by hydraulic power or by ordinary lever-power, for punching holes in bars or sheets of metal.—**Close-mouthed punching-bear**, a punching-bear which has a central opening through the body of the machine, into which metal bars are thrust and brought into position for the action of the

punch.—**Open-mouthed punching-bear**, a punching-bear which has in its side an opening or slot for the insertion of the margin of a metallic sheet or plate to be punched. See cut under *bear²*, 9.

punching-machine (pun'ching-ma-shēn'), *n.* A power-punch for making rivet-holes in plates, tubes, and other work in wrought-iron. Such machines are operated by means of cams with steam or other power. They are often combined with shearing-machines.

punchion¹, *n.* An obsolete form of *puncheon¹*. **punch-jug** (punch'jug), *n.* A jug, usually of pottery, formed in a grotesque shape like Punch.

punch-ladle (punch'lā'dl), *n.* A ladle of medium size, the bowl of which has two spouts, one on each side, used for filling glasses from a punch-bowl.

punch-pliers (punch'pli'ēr), *n. pl.* A tool with two jaws, one bearing a hollow punch, and the other constituting a flat die against which the punch works. Punches of this nature are used by shoemakers, railroad and street-car conductors, etc.

punch-prop (punch'prop), *n.* In coal-mining, a short prop of timber used to support the coal in holing or undercutting; a punch. Also called *sprag*.

punchy (pun'chi), *a.* [*< punch³ + -y¹*; prob. in part a var. of *paunchy*, *< paunch + -y¹*.] *Paunchy*; pot-bellied; short, squat, and fat. [Colloq.]

A fat, little, *punchy* concern of sixteen.

Barham, Ingoldsby Legends, II. 124.

punct¹ (pungkt), *n.* [*< L. punctum*, a point: see *point¹*.] A point.

And neuertheless at the same instant and *punct* of time it maketh day and high noone in one place, and nyght and mydnyght on the opposite part.

R. Eden (First Books on America, ed. Arber, p. xlii).

punct² (pungkt), *v. t.* [*< ML. punctare*, pierce, punch: see *punch¹*, *point¹*.] To pierce; puncture. *Hallirell*.

puncta, *n.* Plural of *punctum*.

Punctaria (pungk-tā'ri-ā), *n.* [NL. (Greville), so called in allusion to the dots formed by the sporangia and hairs; *< L. punctum*, point, dot: see *point¹*.] A genus of olive-brown seaweeds, with a simple membranaceous frond which is composed of from two to six layers of cuboidal cells. The unilocular sporangia, which are immersed in the frond, are formed from the superficial cells; the plurilocular sporangia also are collected in spots and immersed, except at the apex. There are 5 or 6 widely distributed species.

Punctariaceæ (pungk-tā'ri-ā-sē-ā), *n. pl.* [NL. *< Punctaria + -aceæ*.] An order of marine algae of the class *Phaeosporææ*, taking its name from the genus *Punctaria*; a family of fucoide algae. The root is a minute naked disk. The frond is cylindrical or flat, unbranched, and cellular. The fructification consists of sori scattered all over the fronds in minute distinct dots, composed of roundish sporangia, producing zoospores.

punctate (pungk'tāt), *a.* [*< ML. punctatus*, marked with dots (NL. *punctatus*, pointed), pp. of *punctare*, mark with dots, mark, point, *< L. punctum*, point, dot: see *point¹*.] *1.* Having a point or points; pointed.—*2.* In *math.*, having an acnode, or point separate from the rest of the locus spoken of. *Newton*, 1706.—*3.* In *bot.* and *zool.*, having dots scattered over the surface; studded with points, as of color, shape, texture, etc.; dotted; pitted.

punctated (pungk'tā-ted), *a.* [*< punctate + -ed²*.] Punctate; dotted; finely pitted.

Nearly allied to this is the genus *Bacillaria*; . . . its valves have a longitudinal *punctated* keel.

W. B. Carpenter, Microsc., § 265.

Punctated curve, a curve with an acnode, or separate point.

punctate-striate (pungk'tāt-strī'āt), *a.* In *entom.*, having striæ or impressed lines with punctures in them at more or less regular intervals. Also *punctato-striate*.

punctate-sulcate (pungk'tāt-sul'kāt), *a.* In *entom.*, sulcate or grooved, with punctures in the grooves. Also *punctatosulcate*.

punctuation (pungk-tā'shon), *n.* [*< ML. punctatio(n)*, *< punctare*, mark, dot: see *point¹*.] *1.* The state or condition of being punctate, in any of the senses of that word.

The absence of *punctuation* in the test is referred to metamorphism, as in *C. Guierangeri* all stages were discovered, from impunctate to completely punctate. *Science*, III. 325.

2. In *civil law*, a document made between the parties before the contract to which it refers has binding force, generally merely with the object of putting clearly before them the principal points discussed. *Goudsmit*.—**Punctuation of Emu**, a document prepared at Bad Ems, Germany, in 1788, by representatives of the Roman Catholic archbishops of Co-

logne, Treves, Mainz, and Salzburg, in which episcopal rights were maintained against the pretensions of the papal see.

punctator (pungk-tā'tor), *n.* [*< ML. punctator*, one who marks with dots (applied to one who so marked the names of persons absent from service), *< punctare*, mark with dots: see *punctate*.] One who marks with dots: specifically applied to the Masorites, who invented the Hebrew vowel-points. See *masoretic*.

punctatostriate (pungk-tā'tō-stri'āt), *a.* Same as *punctate-striate*.

punctatosulcate (pungk-tā'tō-sul'kāt), *a.* Same as *punctate-sulcate*.

puncticular (pungk-tik'ū-lār), *a.* [*< NL. "puncticulum*, dim. of *L. punctum*, point: see *point*.] Comprised in a point; being a mere point as to size. [Rare.]

The *puncticular* originals of periwinkles and gnats. *Sir T. Browne*, *Urn-burial*, III.

punctulate (pungk-tik'ū-lāt), *a.* [*< NL. "punctulatus*, *< "puncticulum*, dim. of *L. punctum*, point: see *point*.] Minutely punctate; punctulate.

Punctidae (pungk'ti-dē), *n. pl.* [*< NL. < Punctum + -idē*.] A family of geophilous pulmonate gastropods, typified by the genus *Punctum*, having the shell heliciform, the mantle submedian, the jaw disintegrated into many separate pieces, and the teeth peculiarly modified, represented only by medians and laterals, having the bases of attachment longer than wide, and the free parts narrowed and reflected. It contains a few minute species, such as the *Punctum pygmaeum* of Europe and *P. minutissimum* of North America.

punctiform (pungk'ti-fōrm), *a.* [*< L. punctum*, point, + *forma*, form.] Like a point or dot; having the character of a point; located in a point.

A *punctiform* sensation of cold is experienced. *Science*, VII. 450.

punctigerous (pungk-tij'ē-rus), *a.* [*< L. punctum*, point, + *gerere*, carry.] Having a small simple eye or eye-spot, without a lens: opposed to *lentigerous*. *Encyc. Brit.*, XVI. 680.

punctilio (pungk-til'io), *n.* [Formerly also *punctilio*; *< Sp. puntillo = It. puntiglio*, a small point, punctilio, *< LL. punctillum*, a small point, a dot, dim. of *L. punctum*, point: see *point*. Cf. *puncto*.] 1. A small point. *B. Jonson*.

In that *punctilio* of time wherein the bullets struck him... he is in an instant dissipated. *The Unhappy Maritima*, 1669 (Harl. Misc., IV. 4). (Davies.)

2. A nice point, especially in conduct, ceremony, or proceeding; also, particularity or exactness in the observance of forms.

Where reputation is, almost every thing becometh; but where that is not, it must be supplied by *punctilios* and compliments. *Bacon*, *Advancement of Learning*, II. 308.

'Death! to trifle with me at such a juncture as this—now to stand on *punctilios*—love me! I don't believe she ever did. *Sheridan*, *The Duenna*, I. 2.

She enjoins the *punctual* discharge of all her personal debts within a year. *Prescott*, *Ferd. and Isa.*, II. 16.

Punctual coordinate. Same as *point-coordinate*.
punctualist (pungk'tū-āl-ist), *n.* [*< punctual + -ist*.] One who is very exact in observing forms and ceremonies.

Bilson hath decipher'd us all the galanteries of Signore and Monsignore, and Monsieur, as circumstantially as any *punctualist* of Castel, Naples, or Fountain-Bleau could have done. *Milton*, *Church-Government*, II. 1.

punctuality (pungk'tū-āl'i-ti), *n.* [= *F. ponctualité*; as *punctual + -ity*.] The state or character of being punctual. (a) *Scrupulous exactness with regard to matters of fact or detail; exactness; nicety.*

I have in a table
With curious *punctuality* set down,
To a hair's breadth, how low a new-stamped courtier
May vail to a country gentleman.

Massinger, *Emperor of the East*, I. 2.
Who teaches you the mimic posture of your body, the *punctuality* of your beard, the formality of your pace?

Shirley, *Witty Fair One*, II. 1.
(b) Adherence to the exact time of meeting one's obligations or performing one's duties; especially, the fact or habit of promptness in attendance or in fulfilling appointments.

We were not a little displeased to find that, in the first promise of *punctuality* our Rais had made, he had disappointed us by absenting himself from the boat.

Bruce, *Source of the Nile*, I. 47.

(c) The character of being, or existence in, a point.
A state of rest in our own body or in external things, the perception of any defined and static form whatever, and most of all the very possibility of unspaciality or *punctuality*, must be subsequently inferred as negative instances from indeterminate extension and movement. *G. S. Hall*, *German Culture*, p. 280.

punctually (pungk'tū-āl-i), *adv.* [*< punctual + -ly*.] In a punctual manner. (a) With attention or reference to minute points or particulars; nicely; exactly; precisely.

In imitation of what I have seen my Father do, I began to observe matters more *punctually*, which I did use to set down in a blanke almanac. *Evelyn*, *Diary* (1631), p. 9.

What did you with it?—tell me *punctually*;
I look for a strict account.

Massinger, *Emperor of the East*, IV. 5.
It [the gift of reading] consists, first of all, in a vast intellectual endowment, . . . by which a man rises to understand that he is not *punctually* right, nor those from whom he differs absolutely wrong.

R. L. Stevenson, *Books which have Influenced me*, p. 14.
(b) With scrupulous exactness or promptness in regard to the fulfilling of obligations, duties, appointments, etc.: as, to pay debts or rent *punctually*.

punctualness (pungk'tū-āl-nes), *n.* [*< punctual + -ness*.] Exactness; punctuality; promptness.

Yet I can obey those wherein I think power is unguided by prudence with no less *punctualness* and fidelity.

Boyle, *Works*, II. 413.

punctuate (pungk'tū-āt), *v. t.*; pret. and pp. *punctuated*, ppr. *punctuating*. [*< ML. punctare* (> *F. ponctuer*), mark with points, *< L. punctus*, a point: see *point*, *n.*, and cf. *point*, *v.*, *punch*, *v.*, and *punctate*.] 1. In *writing* and *printing*, to mark with points in some sig-

nificant manner; specifically, to divide into sentences and parts of sentences by the conventional signs called points or marks of punctuation: as, to *punctuate* one's letters carefully. See *punctuation*.—2. Figuratively, to emphasize by some significant or forcible action; enforce the important parts or points of in some special manner: as, to *punctuate* one's remarks by gestures. [Colloq.]

punctuate (pungk'tū-āt), *a.* [*< ML. punctatus*, pp.: see the verb.] In *entom.*, same as *punctured*.

punctuated (pungk'tū-āt-ed), *a.* [*< punctuate + -ed*.] In *zool.*, same as *punctate*.

punctuatum (pungk'tū-āt'im), *adv.* [*< NL.*, formed in imitation of *verbatim* and *literatim*, *< L. punctus*, a point: see *punctuate*.] Point for point; with respect to every point or mark of punctuation: in the phrase *verbatim, literatim, et punctuatum*, word for word, letter for letter, and point for point.

punctuation (pungk'tū-ā'shon), *n.* [= *F. ponctuation*, *< ML. punctuatio(n-)*, a marking with points, a writing, agreement, *< punctuare*, mark with points, settle: see *punctuate*.] 1. In *writing* and *printing*, a pointing off or separation of one part from another by arbitrary marks; specifically, the division of a composition into sentences and parts of sentences by the use of marks indicating intended differences of effect by differences of form. The points used for punctuation exclusively are the period or full-stop, the colon, the semicolon, and the comma. (See *point*, *n.*, II. (a).) The interrogation- and exclamation-points serve also for punctuation in the place of one or another of these, while having a special rhetorical effect of their own; and the dash is also used, either alone or in conjunction with one of the preceding marks, in some cases where the sense or the nature of the pause required can thereby be more clearly indicated. (See *parenthesis*.) The modern system of punctuation was gradually developed after the introduction of printing, primarily through the efforts of Aldus Manutius and his family. In ancient writing the words were at first run together continuously; afterward they were separated by spaces, and sometimes by dots or other marks, which were made to serve some of the purposes of modern punctuation, and were retained in early printing. Long after the use of the present points became established, they were so indiscriminately employed that, if closely followed, they are often a hindrance rather than an aid in reading and understanding the text. There is still much uncertainty and arbitrariness in punctuation, but its chief office is now generally understood to be that of facilitating a clear comprehension of the sense.

Close punctuation, characterized especially by the use of many commas, was common in English in the eighteenth century, and is the rule in present French usage; but *open punctuation*, characterized by the avoidance of all pointing not clearly required by the construction, now prevails in the best English usage. In some cases, as in certain legal papers, title-pages, etc., punctuation is wholly omitted. The principles of punctuation are subtle, and an exact logical training is requisite for the just application of them. *G. F. Marsh*, *Lects. on Eng. Lang.*, xix. 2. In *zool.*, the punctures of a punctate surface.

The very fine and close *punctuation* of the head, etc. *Waterhouse*, in *Trans. Entom. Soc. of London*.

pungar (pung'gār), *n.* A crab. *Halliwel*. [*Local, Eng.*]

pungence (pun'jens), *n.* [*< pungen(t) + -ce*.] Pungency.

Around the whole rise cloudy wreaths, and far
Bear the warm *pungence* of o'er-boiling tar.

Crabbe, Works, II. 6.

pungency (pun'jen-si), *n.* [*As pungece* (see *-cy*).] Pungent character or quality; the power of sharply affecting the taste or smell; keenness; sharpness; tartness; causticity.

The *pungency* of forbidden lust is truly a thorn in the flesh.

Jer. Taylor, Great Exemplar, Pref., p. 10.

This unsavory rebuke, which probably lost nothing of its *pungency* from the tone in which it was delivered, so incensed the pope that he attempted to seize the paper and tear it in pieces.

Prescott, Ferd. and Isa., II. 10.

=*Syn.* Poignancy, acridness, pointedness.

pungent (pun'jent), *a.* [= *Sp. Pg. It. pungente*, *< L. pungen(t)-s*, ppr. of *pungere*, pierce, prick, sting, penetrate: see *point*.] From *L. pungere* are also *E. punch*, *punction*, *punchion* (and prob. *punchion*), *point*, *punct*, *punctule*, *punctilio*, *punctilious*, etc., *punctual*, *punctuate*, etc., *puncture*, *compunction*, *expunge*, *pounce*, *poignant* (doublet of *pungent*), etc.] 1. Piercing; sharp.

A rush which now your heels do lie on here
Was whilome used for a *pungent* spear.

Chapman, Gentleman Usher, II. 1.

Specifically—(a) In *bot.*, terminating gradually in a hard sharp point, as the lobes of the holly-leaf. (b) In *entom.*, fitted for piercing or penetrating: as, a *pungent* ovipositor.

2. Sharp and painful; poignant.

We also may make our thorns, which are in themselves

pungent and dolorous, to be a crown.

Jer. Taylor, Works (ed. 1835), I. 325.

3. Affecting the tongue like small sharp points; stinging; acrid.

Among simple tastes, such as sweet, sour, bitter, hot, *pungent*, there are some which are intrinsically grateful.

The *pungent* grains of titillating dust.

Pope, R. of the L., v. 84.

5. Hence, sharply affecting the mind; curt and expressive; caustic; racy; biting.

A sharp and *pungent* manner of speech.

Dryden.

She could only tell me amusing stories, and reciprocate

any racy and *pungent* gossip I chose to indulge in.

Charlotte Brontë, Jane Eyre, ix.

The attention of the reader is continually provoked by the *pungent* stimulants which are mixed in the composition of almost every sentence.

Whipple, Ess. and Rev., I. 14.

=*Syn.* Sharp, stinging, keen, peppery, acrid, caustic. *Piquant*, *Pungent*, *Poignant*. That which is *piquant* is just tart enough to be agreeable; that which is *pungent* is so tart that, if it were more so, it would be positively disagreeable; that which is *poignant* is likely to prove actually disagreeable to most persons. *Pungent* is manifestly figurative when not applied to the sense of taste, or, less often, of smell; *piquant* is similar, but less forcible; *poignant* is now used chiefly of mental states, etc., as *poignant* grief, or of things affecting the mind, as *poignant* wit.

pungently (pun'jent-li), *adv.* With pungency; sharply.

pungi (pöng'gē), *n.* [*Hind. pūngi*.] A Hindu pipe or nose-flute composed of a gourd or nut-shell into which two wooden pipes or reeds are inserted. It emits a droning or humming sound, and is the instrument commonly used by snake-charmers.

pungled (pung'gld), *a.* [*Origin obscure*.] Shriveled; shrunken: applied specifically to grain whose juices have been extracted by the insect *Thrips cerealium*. *Halliwel*. [*Prov. Eng.*]

A kind of schooner peculiar to the oyster-trade of Chesapeake Bay, sailing fast, and holding from 300 to 600 bushels of oysters. *Broca*.—**Canoe pungy**, a canoe like a pungy, used in oyster-dredging. [*Chesapeake Bay*.]

Punic (pū'nik), *a.* and *n.* [*< L. Punicus, Pœnicus*, Carthaginian, *< Pœnus*, a Carthaginian, a Phœnician, akin to *Gr. φοῖνῆς*, a Phœnician: see *Phœnician*.] 1. *a.* Of, pertaining to, or characteristic of the Carthaginians, who were characterized by the Romans as being unworthy of trust; hence, faithless; treacherous; deceitful.

Yes, yes; his faith attesting nations own;
'Tis *Punic* all, and to a proverb known!

Brooke, tr. of Tasso's Jerusalem Delivered, II.

Punic apple, the pomegranate.

But the territories of Carthage chalengeth to itself the *punicke* apple; some call it the pomegranat [*granatum*], and they have made several kinds thereof.

Holland, tr. of Pliny, xiii. 19.

Punic faith. See *faith*.—**Punic wars**, in *Rom. hist.*, the three wars waged by Rome against Carthage, 264–241, 218–201, and 149–146 B. C. They resulted in the overthrow of Carthage and its annexation to Rome.

II. *n.* The language of the Carthaginians, which belongs to the Canaanitish branch of the

Semitic tongues, and is an offshoot of Phœnician, and allied to Hebrew.

Punica (pū'ni-kā), *n.* [*NL. (Tournefort, 1700)*, *< L. punicum*, sc. *malum*, the pomegranate, lit. 'Carthaginian apple,' *< L. punicus*, Carthaginian: see *Punic*.] A monotypic genus of plants of the polypetalous order *Lythraceæ*, formerly classed in the *Myrtaceæ*, or myrtle family, and by many constituted into a separate order, *Granatææ* (Don, 1826). It is anomalous in its ovary, which is inferior and consists of two circles of cells, a lower set of three or four and an upper circle of from five to ten, each with many ovules crowded in numerous rows on enlarged fleshy placentas, which become united to the membranous partitions and walls. It is also characterized by very numerous stamens in many rows, ovate versatile anthers on slender incurved filaments, leaf-like, spirally rolled seed-leaves with two auricles at their bases, and a persistent flexuous style with swollen base and capitate stigma. The only species, *P. granatum*, the pomegranate, is a native of western Asia to northwestern India, growing in the Himalayas to the altitude of 6,000 feet, long naturalized throughout the Mediterranean countries, and now widely cultivated in subtropical regions, including, in the United States, chiefly Louisiana, Texas, and Florida. (See *pomegranate*, *balauista*, and *balautine*.)

Of ornamental varieties may be mentioned especially the variety *nana*, the dwarf pomegranate, a favorite double-flowered lawn and greenhouse plant, native of the East Indies, and now naturalized in places in the southern United States and West Indies.

punice, *v. t.* An obsolete form of *punish*.

punishability (pun'ish-a-bil'i-ti), *n.* [= *F. punissabilité*.] The quality of being punishable; liability to punishment.

The vexed question of *punishability* is raised by certain forms of insanity. *A. Bain, Emotions and Will*, p. 522.

punishable (pun'ish-a-bl), *a.* [*< OF. punissable*, *F. punissable*; as *punish* + *-able*.] Deserving punishment; liable to punishment; capable of being punished by right or law: applied to persons or conduct.

That time was when to be a Protestant, to be a Christian, was by Law as *punishable* as to be a traitor.

Milton, Elkonoelastes, xl.

Dangerous tumults and seditions were *punishable* by death.

Bancroft, Hist. U. S., I. 97.

punishableness (pun'ish-a-bl-ness), *n.* The character of being punishable.

punisher (pun'ish-er), *n.* One who punishes; one who inflicts pain, loss, or other evil for a crime or offense.

For he [the Sultan] is of no bloody disposition, . . . yet he is an unrelenting *punisher* of offences, even in his own household. *Sandys, Travels*, p. 57.

So should I purchase dear
Short intermission bought with double smart.
This knows my *Punisher*. *Milton, P. L.*, iv. 108.

punishment (pun'ish-ment), *n.* [*< punish + -ment.*] 1. The act of punishing; the infliction of pain or chastisement.

How many sorts of fears possess a sinner's mind? fears of disappointments, fears of discovery, and fears of punishment. *Stillington, Sermons*, I. 2.

We now come to speak of *punishment*: which, in the sense in which it is here considered, is an artificial consequence, annexed by political authority to an offensive act in one instance; in the view of putting a stop to the production of events similar to the obnoxious part of its natural consequences in other instances.

Bentham, Introd. to Morals and Legislation, xii. 36.

Crime and *punishment* grow out of one stem. *Punishment* is a fruit that unsuspected ripens within the flower of the pleasure which concealed it.

Emerson, Compensation.

It is impossible to separate that moral indignation which expresses itself in *punishment* from the spirit of self-redress for wrongs. *Woolsey, Introd. to Inter. Law*, § 20 a.

2. Pain, suffering, loss, confinement, or other penalty inflicted on a person for a crime or offense, by the authority to which the offender is subject; a penalty imposed in the enforcement or application of law.

Whatever hath been said or written on the other side, all the late statutes, which inflict capital *punishment* upon extollers of the Pope's supremacy, . . . have for their principal scope, not the punishment of the error of conscience, but the repressing of the peril of the state.

Bacon, Charge upon the Commission for the Verge.

So this Prophet [Amos] tells us that the true account of all Gods *punishments* is to be fetched from the sins of the people.

Stillington, Sermons, I. 1.

I proceed, in the next place, to consider the general nature of *punishments*, which are evils or inconveniences consequent upon crimes and misdemeanours; being devised, denounced, and inflicted, by human laws, in consequence of disobedience or misbehaviour in those to regulate whose conduct such laws were respectively made.

Blackstone, Com., IV. 1.

3. Pain or injury inflicted, in a general sense; especially, in colloquial use, the pain inflicted by one pugilist on another in a prize-fight.

Tom Sayers could not take *punishment* more gally.

Thackeray, Philip, iv.

Canonical punishments. See *canonical*.—Syn. 2. Chastisement, correction, discipline. See *chastise*.

puniton (pū-nish'on), *n.* [*< ME. punitio, punitio = F. punitio = Pr. punitio = Sp. punitio = Pg. punitio = It. punitio, < LL. punitio (n-), a punishment, < L. punit, pp. punitus, punish: see punish.*] Punishment.

The dole that thou haste for Gaffray thy sone,
That the monke brende so discordantly,
Knowith thys, that it was for *punitio*
Taken vpon the of religion hy.

Rom. of Parthenay (E. E. T. S.), I. 3671.

The translation of kingdoms and governments by such wonderful methods and means, for the *punitio* of tyrants and the vices of men, of which history abounds with examples [is the decree of a most admirable disposer].

Evelyn, True Religion, I. 85.

punitive (pū-ni-tiv), *a.* [*< OF. punitif = Pg. It. punitivo, < L. punitre, pp. punitus, punish: see punish.*] Pertaining to or involving punishment; awarding or inflicting punishment: as, *punitive law* or justice.

The *punitive* part of repentance is resolved on, and begun, and put forward into good degrees of progress.

Jer. Taylor, Works (ed. 1835), I. 70.

The penal code then would consist principally of *punitive* laws, involving the imperative matter of the whole number of civil laws: along with which would probably also be found various masses of expository matter, appertaining, not to the civil, but to the punitory laws.

Bentham, Introd. to Morals and Legislation, xvii. 29, note.

Punitive damages. Same as *exemplary damages* (which see, under *damages*).

punitory (pū-ni-tō-ri), *a.* [*< LL. as if *punitorius, < punitor, a punisher, < L. punitre, pp. punitus, punish: see punish.*] Punishing, or tending to punishment; punitive.

"Let no man steal," and "Let the judge cause whoever is convicted of stealing to be hanged." . . . The former might be styled a simple imperative law: the other a *punitory*; but the *punitory*, if it commands the punishment to be inflicted, and does not merely permit it, is as truly imperative as the other; only it is *punitory* besides, which the other is not.

Bentham, Introd. to Morals and Legislation, xix. 2, note.

Punjabee, Punjabi (pun-jā'bē), *n.* [*< Hind. Pers. Panjābī, < Pers. panj, five, + āb, water, river.*] 1. A native or an inhabitant of the Punjab (or Panjab), literally the country of the five rivers, in extreme northwestern British India.

He was clad in the white dress of a *Punjabee*.

Proc. Soc. Psych. Research (London), IX. 368.

2. The dialect of the Punjab, a variety of Hindi.

punjum (pun'jum), *n.* [*E. Ind.*] Same as *panjam*.

punk (pungk), *n.* [*Appar. reduced from spunk. Cf. funk¹, rotten wood.*] 1. Wood decayed through the influence of a fungus or otherwise, and used like tinder; touchwood.—2. Tinder made from certain fungi. See *amadou* and *fungus-tinder*.—3. A prostitute; a courtesan.

This *punk* is one of Cupid's carriers.

Shak., M. W. of W., II. 2. 141.

punka (pung'kă), *n.* [*Also punkah; < Hind. pankha, a fan (cf. Pers. pankan, a fan), akin to pankha, a wing, feather, and to paksha (< Skt. paksha), a wing.*] In the East Indies, a fan of any kind; specifically, a swinging screen consisting of cloth stretched on a rectangular frame, hung from the ceiling and kept in motion by a servant, or in some cases by machinery, by means of which the air of an apartment is agitated.

The cool season was just closing. *Punka* fans were coming into play again.

J. W. Palmer, The New and the Old, p. 401.

The day following I was engaged to pull a *punkah* in the house of an English lawyer.

F. M. Crawford, Mr. Isaacs, I.

punk-fist (pungk'fist), *n.* Same as *puckfist*.

punkin (pung'kin), *n.* A dialectal or colloquial form of *pumpkin*.

punkish (pung'kish), *a.* [*< punk + -ish.*] Meretricious.

The credit of a good house is made not to consist in inward hospitality, but in outward walls. These *punkish* outsiders beguile the needy traveller; he thinks there cannot be so many rooms in a house and never one to harbour a poor stranger.

Rev. T. Adams, Works, I. 28.

punkling (pungk'ling), *n.* [*< punk + -ling.*] A little or young punk. See *punk*, 3.

And then earn'd your royal a day by squiring punks and *punklings* up and down the city?

Fletcher (and another), Love's Cure, II. 1.

punk-oak (pungk'ök), *n.* The water-oak, *Quercus aquatica*.

punky (pung'ki), *n.*; pl. *punkies* (-kiz). [*Origin obscure.*] A minute dipterous insect common in the Adirondack region of New York and in the Maine woods, which bites severely and is a great nuisance to travelers and sportsmen. It has not been determined entomologically, but is probably a midge of the genus *Ceratomyza*.

Sandy beaches or gravelly points are liable to swarm with midges or *punkies*.

Sportsman's Gazetteer, p. 642.

punnage (pun'āj), *n.* [*< pun² + -age.*] Punning. [*Rare.*]

The man who maintains that he derives gratification from any such chapters of *punnage* as Hood was in the daily practice of committing to paper should not be credited upon oath.

Poe, Marginalia, clxxvii. (*Davies*.)

punner (pun'er), *n.* [*< pun¹ + -er.*] One who or that which puns or rams earth into a hole; specifically, a tool for ramming earth. [*Eng.*]

The hole should not be hastily filled up, but ample time be given to the *punners* to do their share of the work.

Price and Stoevright, Telegraphy, p. 196.

punner (pun'er), *n.* [*< pun² + -er.*] One who makes puns; a punster. *Swift*.

punnet (pun'et), *n.* A small but broad shallow basket for displaying fruit or flowers.

punning (pun'ing), *n.* [*Verbal n. of pun², v.*] The practice of making puns.

Several worthy gentlemen and critics have applied to me to give my censure of an enormity which has been revived after being long suppressed, and is call'd *punning*.

Steele, Tatler, No. 32.

punning (pun'ing), *p. a.* [*Ppr. of pun², v.*] Given to making puns; exhibiting a pun or play on words: as, a *punning* reply.—*Punning* arms, in her., same as *adversive arms* (which see, under *arm*).²

punnology (pu-nol'ō-jī), *n.* [*Irreg. < pun² + -ology.*] The art of punning. [*Rare.*]

He might have been better instructed in the Greek *punnology*.

Pope, (Jodrell).

punquettor, *n.* [*< punk + It. dim. -etto.*] Same as *punk*, 3. [*Slang.*]

Marry, to his cockatrice, or *punquetto*, half a dozen tafata gowns or satin kirtles in a pair or two of months—why, they are nothing.

B. Jonson, Cynthia's Revels, II. 1.

punster (pun'ster), *n.* [*< pun² + -ster.*] One who puns or is skilled in punning; a quibbler on words.

Whatever were the bons mots of Cicero, of which few have come down to us, it is certain that Cicero was an inveterate *punter*; and he seems to have been more ready with them than with repartees.

I. D'Israeli, Curios. of Lit., I. 126.

punt (punt), *n.* [*< ME. *punt, < AS. punt = D. ponte, pont = MLG. punte, a punt, ferry-boat, pontoon, < L. ponto(n-), a punt, a pontoon: see pontoon.*] 1. A flat-bottomed, square-ended, mastless boat of varying size and use. The smaller punts are used in fishing, and by sportsmen in shooting wild fowl; larger ones are often used as ferry-boats across shallow streams, and still larger ones are used as lighters and scows.

As for Pamphilus, . . . of his making is the picture of Vlysses in a *punt* or small bottom.

Holland, tr. of Pliny, xxv. 10.

They came on a wicked old gentleman breaking the laws of his country, and catching perch in close time out of a *punt*.

H. Kingsley, Ravenshoe, lxi.

2. [*< punt¹, v., 3.*] In *foot-ball*, a kick of the ball as it is dropped from the hands and before it strikes the ground.

punt (punt), *v.* [*< punt¹, n.*] I. *trans.* 1. To convey in a *punt*:

as, he was *punted* across the river.

Hence—2. To propel as a *punt* is usually propelled, by pushing with a pole against the bed of the water;

force along by pushing: as, to *punt* a boat.—

3. In *foot-ball*, to kick, as the ball, when it is dropped from the hands, and before it touches

the ground; give a *punt* to.—4. In general, to knock; hit.

To see a stout Flamand of fifty or thereabouts solemnly *punting*, by the aid of a small tambourine, a minute india-rubber ball to another burgher of similar aspect, which is the favourite way in which all ages and sexes take exercise on the digue, is enough to restore one's faith in human nature.

Contemporary Rev., XLIX. 62.

II. *intrans.* To hunt for aquatic game in a *punt* and with a *punt-gun* (which see).

punt (punt), *n.* [= *F. ponte, a punt, < Sp. punto, a point, a pip at cards, < L. punctum, a point: see point.*] A point in the game of basset.

punt (punt), *v. t.* [*< F. pointer, punt (at cards), < ponte, punt: see punt², n.*] To play at basset or ombre.

Another is for setting up an assembly for basset, where none shall be admitted to *punt* that have not taken the oath.

Addison, Freeholder, No. 8.

Wretch that I was! how often have I swore,
When Winnall tally'd, I would *punt* no more!

Pope, The Basset Table.

He was tired of hawking, and fishing, and hunting,
Of billiards, short-whist, chicken-hazard, and *punting*.

Barham, Ingoldsby Legends, II. 252.

punt (punt), *n.* Same as *punt*, *pontil*.

puntee (pun'tē), *n.* Same as *punt*, *pontil*.

punter (pun'ter), *n.* [*< punt¹ + -er.*] 1. One who fishes or hunts in a *punt*.

He . . . caught more fish in an hour than all the rest of the *punters* did in three.

T. Hook, Gilbert Gurney, III.

2. One who punts a boat.

Wherever you go, you see the long, straight boat with its passengers luxuriously outstretched on the cushions in the stern, the *punter* walking from the bow and pushing on his long pole.

The Century, XXXVIII. 488.

punter (pun'ter), *n.* [*< punt² + -er.*] One who marks the points in the game of basset; a marker.

There used to be grown men in London who loved . . . to accompany lads to the gaming-table, and perhaps have an understanding with the *punters*.

Thackeray, Virginians, xxx. (*Davies*.)

Some of the *punters* are professional gamblers, others are mere general swindlers.

Fortnightly Rev., N. S., XXXIX. 324.

punt-fishing (punt'fish'ing), *n.* Fishing from a *punt* or boat on a pond, river, or lake.

punt-gun (punt'gun), *n.* A heavy gun of large caliber (usually 1½ inches) and long range, used with large shot for killing water-fowl from a *punt* (which see).

puntil (pun'til), *n.* Same as *pontil*.

puntilla (pun-til'ä), *n.* [*Sp., dim. of punto, point: see point¹.*] Lacework; hence, in *decorative art*, decoration in color or relief in slender lines or points resembling lace: applied especially to such work of Spanish origin.

Punting.

punto (pun'tō), *n.* [*< Sp. It. punto, < L. punctum, a point: see point.* Cf. *puncto.*] 1. A point; specifically, in music, a dot or point.

This cannot be any way offensive to your own, and is expected to the utmost punto by that other nation.

Bp. Hacket, Abp. Williams, l. 150. (Davies.)

2^d. One of the old forms given to the beard.

I have yet
No ague, I can look upon your buff,
And punto beard, yet call for no strong-water.
Shirley, Honoria and Mammon, l. 2.

3. A thrust or pass in fencing; a point.

I would teach these nineteen the special rules, as your punto, your reverse, your stoccata, your imbroccato, your passada, your montanto.

B. Jonson, Every Man in his Humour, iv. 5.

4. A stitch or method of work with the needle or the loom: same as *point*, 18.—5. Same as *pontil*.

A solid iron rod tipped with melted glass, called a *punto*.
Ure, Dict., II. 657.

Punto dritto, a direct point or hit.

Your dagger commanding his rapier, you may give him a *punto*, either *dritto*, or *riverso*.

Saviole, On the Duello, K2. (Nares.)

Punto reverso, a back-handed stroke.

Ah, the immortal passado! the *punto reverso*!
Shak., R. and J., II. 4. 27.

puntsman (punts'man), *n.*; pl. *puntsmen* (-men). [*< punt's*, poss. of *punt*, + *man*.] A sportsman who uses a punt.

It being the desire of *puntsmen* to pot as many birds as possible by one shot.

W. F. Greener, The Gun, p. 531.

punty (pun'ti), *n.*; pl. *punties* (-tiz). [Also *puntee*, *pony*, etc.: see *pontil*.] 1. Same as *pontil*.

Now the glass globe is fastened to two bars, the *punty* and the blow-pipe.

Harper's Mag., LXXIX. 254.

2. An oval or circular dot or depression: a kind of ornamentation employed in glass-cutting.

punty-rod (pun'ti-rod), *n.* Same as *pontil*.

puny (pū'ni), *a.* and *n.* [Formerly also *pune*, *punie*, *punay*, also *puine*, *pueny*, the form *puine* being still retained archaically in legal use; *< OF. puisne, F. putné, < ML. postnatus*, later-born, younger, *< L. post*, after, + *natus*, born: see *postnate*.] 1. *a.* 1st. Later-born; younger; junior. See *puine*, 1.—2. Small and weak; inferior or imperfectly developed in size or strength; feeble; petty; insignificant.

How the young whelp of Talbot's, raging-wood,
Did flash his *puny* sword in Frenchmen's blood!
Shak., 1 Hen. VI., iv. 7. 36.

I do but ask my month,
Which every petty, *puine* devil has.
B. Jonson, Devil is an Ass, i. 1.

He is a *puny* soul who, feeling pain,
Finds ease because another feels it too.
Wordsworth, The Borderers, III.

—**Syn.** 2. Little, diminutive, stunted, starveling.
II. *n.*; pl. *punies* (-niz). A young, inexperienced person; a junior; a novice.

Nay, then, I see thou'rt but a *puny* in the subtilly
Mystery of a woman.

Tourneur, Revenger's Tragedy, i. 3.

There is only in the amity of women an estate for will,
and every *puny* knows that is no certain inheritance.

Dekker and Webster, Westward Ho, i. 2.

He . . . must appear in Print like a *punie* with his
guardian and his censors hand on the back of his title to
be his bayl and surety that he is no idiot or seducer.

Milton, Areopagitica, p. 31.

Others to make sporte withall; of this last sorte were
they whom they call freshmenn, *punies* of the first year.

Christmas Prince at St. John's Coll., p. 1. (Nares.)

puny², *n.* [Adapted as a sing. from the supposed plural *punice*, *punese*, *< F. punaise*, a bedbug: see *punice*.] A bedbug: same as *punice*.

In the *punieship* or nonage of Cerdicke Sandes . . . the
best houses and wallees there were of mude.

Nashe, Lenten Stuffe (Harl. Misc., VI. 171). (Davies.)

pup (pup), *n.* [Abbr. from *puppy*, erroneously regarded as a dim. of *pup*.] Same as *puppy*, 2.—To be in *pup*, to be pregnant, or heavy with young: said of dogs. [Colloq.]

pup (pup), *v.* *t.*; pret. and pp. *pupped*, ppr. *pup-ping*. [*< pup*, *n.*] To bring forth pups, as a bitch; whelp, as a carnivorous quadruped.

pupa (pū'pā), *n.*; pl. *pupae* (-pē). [*< NL. pupa*, a pupa, chrysalis, *< L. pupa*, pupa, a girl, a doll, puppet, fem. of *pupus*, a boy, child; cf. *puer*, a boy, child, *pusus*, a boy, *< √ pu*, beget. From *L. pupus*, pupa, are also ult. *pupe*, *pupil*, *pupit*, etc., *puppet*, *puppy*, *pup*, etc.] 1. The

third and usually quiescent stage of those insects which undergo complete metamorphosis, intervening between the larval and the imaginal stage. It is usually called the second stage, the egg not being counted. Some pupae, as those of mosquitoes, are active. The pupa of some insects is called a *puparium*, and of others a *nymph* or *chrysalis*. See these words. See also cuts under *beetle*, *Carpocapsa*, *chinch-bug*, *Ectotylus*, and *house-fly*. 2. A stage in the development of some other arthropods, as cirripeds. See *locomotive pupa*, below.—3. [*cap.*] [*NL.*] In *conch.*, the typical genus of *Pupidae*; the chrysalis-shells.—**Coarctate pupa**, conical pupae, exarate pupae, inert pupae. See the adjectives.—**Incased pupa**. See *incase*.—**Locomotive pupa**, in *Cirripedia*, the third stage of the larva, the first being a nauplius, the second resembling *Daphnia* or *Cypris*. In this stage little is visible externally but the carapace, the limbs being hidden. There are, however, large lateral eyes and six pairs of legs, and the gut-formed gland is well developed. After swimming awhile the pupa becomes attached to some object, at first only by its suckorial disks, soon, however, becoming permanently fixed to the spot by the secretion of a cement. See cut under *Cirripedia*.

This locomotive pupa . . . is unable to feed; . . . other important alterations take place during the passage of the locomotive pupa into the fixed young Cirripede.

Huxley, Anat. Invert., p. 250.

Mature, naked, obtected, etc., pupa. See the adjectives.—**Pupa coarctata**, a coarctate pupa.

The pupa, in the majority of Diptera, is merely the larva with a hard case (*pupae coarctatae*).

Pascoe, Class. Anim., p. 122.

Pupa obtecta, an obteected pupa.

Pupacea (pū-pā'sē-ā), *n.* pl. [*NL.*, *< Pupa* + *-acea*.] Same as *Pupidae*.

pupal (pū'pal), *a.* [*< pupa* + *-al*.] Of or pertaining to a pupa; nymphal; chrysalid; pupiform.

puparial (pū-pā'ri-al), *a.* [*< puparium* + *-al*.] Of or pertaining to a puparium, or dipterous pupa.

puparium (pū-pā'ri-um), *n.*; pl. *puparia* (-ā). [*NL.*, *< pupa*, a pupa: see *pupa*.] A pupa included within the last larval skin; a coarctate pupa; a larva pupigera, as in all dipterous insects of the division *Cyclorhapha* and in many of the *Orthorhapha*. See cut under *Pipiza*.

pupate (pū'pāt), *v.* *i.*; pret. and pp. *pupated*, ppr. *pupating*. [*< pupa* + *-ate*.] To become a pupa; enter upon the pupal state; undergo transformation from the state of the grub or larva to that of the perfect insect or imago: as, to pupate under ground; to pupate in winter.

pupation (pū-pā'shon), *n.* [*< pupate* + *-ion*.] The act of pupating, or the state of being a pupa; the pupal condition; the time during which an insect is a pupa.

pupe (pūp), *n.* [*< F. pupe, < NL. pupa*, a pupa: see *pupa*.] Same as *pupa*. *Wright.*

pupelo (pū'pe-lō), *n.* [Perhaps a corrupted form, ult. *< F. pomme*, apple. Cf. *pomperkin*.] Cider-brandy. [New Eng.]

In Livingston there were five distilleries for the manufacture of cider-brandy, or what was familiarly known as *pupelo*.

S. Judd, Margaret, l. 7.

Pupidae (pū'pi-dē), *n.* pl. [*NL.*, *< Pupa* + *-idae*.] A family of geophilous pulmonate gastropods, typified by the genus *Pupa*. The animal has a nearly smooth jaw and teeth like those of *Helicidae*; the shell is generally pupiform, but sometimes conic or cylindrical, and has usually a contracted aperture and teeth or lamellae on the lips. The species are mostly of small size. By many they are united with the *Helicidae*. Also called *Pupacea*.

pupifera (pū-pi'fē-rā), *n.* pl. [*NL.* (Lichtenstein), *< pupa*, a pupa, + *L. ferre* = *E. bear*.] The return migrant generation of plant-lice, or the last winged generation, which gives birth agamically to the true sexual generation. See *pseudogyne*.

pupiform (pū'pi-fōrm), *a.* [*< NL. pupa*, pupa, + *L. forma*, form.] 1. In *entom.*, having the form or character of a pupa; pupal; puparial: as, a *pupiform* larva.—2. In *conch.*, shaped like a shell of the genus *Pupa*; resembling one of the *Pupidae* in the form of the shell.

pupigenous (pū-pi'jē-nus), *a.* [*< NL. pupa*, pupa, + *-genus*, producing: see *-genous*.] Same as *pupiparous*.

pupigerous (pū-pij'ē-rus), *a.* [*< NL. pupa*, pupa, + *L. gerere*, carry.] Having the pupa contained within the last larval skin; forming a puparium, as most dipterous insects; coarctate, as a pupa. See *larva pupigera*, under *larva*.

Pupa of *Prionus last-collis*.

pupilarity

In the other group [of dipterous insects], which are always *pupigerous*, the perfect insect escapes from the larval skin through a more or less circular opening.

Stand. Nat. Hist., II. 406.

pupil (pū'pil), *n.* and *a.* [Formerly also *pupill*; *< OF. pupille, pupille, F. pupille*, *m.* and *f.*, = *Fr. pupille* = *Sp. pupilo*, *m.*, *pupila*, *f.*, = *Pg. It. pupillo*, *m.*, *pupilla*, *f.*, a ward, *< L. pupillus*, *m.*, *pupilla*, *f.*, an orphan child, a ward or minor, dim. of *pupus*, a boy, pupa, a girl: see *pupa*.] 1. *n.* 1. A youth or any person of either sex under the care of an instructor or tutor; in general, a scholar; a disciple.

Tutors should behave reverently before their *pupils*.
Str. R. L'Etrange.

2^d. A ward; a youth or person under the care of a guardian.

What, shall King Henry be a *pupil* still
Under the surly Gloucester's governance?
Shak., 2 Hen. VI., l. 3. 49.

3. In *civil law*, a person under puberty (fourteen for males, twelve for females), over whom a guardian has been appointed.

II. *a.* Under age; in a state of pupillage or nonage; minor.

The custody of his *pupil* children.

Westminster Rev., CXXVIII. 708.

pupil (pū'pil), *n.* [Formerly also *pupill*; *< F. pupille*, *f.*, = *Fr. pupilla* = *Sp. pupila* = *Pg. It. pupilla* = *D. pupil* = *G. pupille* = *Sw. pupill* = *Dan. pupil*, *< L. pupilla*, the pupil of the eye, a particular use (as a 'baby' in the eye: see *baby*) of *pupilla*, an orphan girl, a ward or minor, dim. fem. of *pupa*, a girl: see *pupill*.] 1. The orifice of the iris; the hole or opening in the iris through which light passes. The pupil appears usually as a black spot in the middle of the colored part of the eye, this appearance being due to the darkness of the back of the eye. The pupil contracts when the retina is stimulated, as by light, on accommodation for near distances and on convergence of the visual axes; pain may cause a dilatation. The size of the pupil is determined by the circular and radiating muscular fibers of the iris. It may also be influenced by drugs: thus, opium contracts and belladonna dilates the pupil. The same consequences may result from disease or injury. The shape of the pupil in most animals is circular, as the expression of the uniform action of the contractile fibers of the iris; but in many animals it is oval, elliptical, or slit-like. Thus, the pupil of the cat contracts to a mere chink in the sunlight, and dilates to a circle in the dark. The pupil of the horse is a broad, nearly parallel-sided fissure obtusely rounded at each end. The variability of the pupil in size is not less remarkable in owls than in cats, but in these birds it keeps its circular figure, changing in size from a mere point to a disk which leaves the iris a mere rim. The pupil sometimes gives zoological characters, as in distinguishing foxes from wolves or dogs. See *iris*, 6, and cuts under *eye*.

2. In *zool.*: (a) The central dark part of an ocellated spot. See *ocellus*, 4. (b) A dark, apparently interior, spot seen in the compound eyes of certain insects, and changing in position as it is viewed from different sides.—**Argyll-Robertson pupil**, a pupil which does not contract from light, but does with accommodation for short distances. It is a frequent symptom in locomotor ataxia.—**Exclusion of the pupil**. See *exclusion*.—**Occlusion of the pupil**, the filling up of the pupil with inflammatory material.—**Pinhole pupil**, the pupil when so contracted, as it sometimes is, as to resemble a pinhole.

pupilarity (pū'pi-lā'bil'i-ti), *n.* [*< pupil* + *-able* + *-ity* (see *-ility*).] Pupillary nature; confidential character. [Rare.]

What can he mean by the lambent *pupilarity* of slow,
low, dry chat, five notes below the natural tone?

Sterne, Tristram Shandy, lv. 1.

pupilage, pupillage (pū'pi-lāj), *n.* [= *Sp. pupilage* = *Pg. pupillagem*; as *pupil* + *-age*.] 1. The state of being a pupil or scholar, or the period during which one is a pupil.

Most Noble Lord, the pillar of my life

And Patron of my *Muses pupillage*.
Spenser, To Lord Grey of Wilton.

The severity of the father's brow, . . . whilst they [the children] are under the discipline and government of *pupilage*, I think . . . should be relaxed as fast as their age, discretion, and good behaviour could allow it.

Locke, Education, § 26.

2. The state or period of being a ward or minor.

Three sones he dying left, all under age,
By means whereof their uncle Vortigere
Usurpt the crowne during their *pupillage*.
Spenser, F. Q., II. x. 64.

There, there, drop my wardship,
My *pupillage* and vassalage together.

B. Jonson, Staple of News, l. 1.

That they themselves might confine the Monarch to a kind of *Pupillage* under their Hierarchy.

Milton, Reformation in Eng., II.

pupillar, pupillar (pū'pi-lār), *a.* Same as *pupillary*.

pupilarity, pupillarity (pū'pi-lār'i-ti), *n.* [= *F. pupillarité* = *Fr. pupillaretat*, *< ML. *pupillaria* (-t)s, *pupillarieta* (-t)s, *< L. pupillaris*,

pupillary: see *pupilarity*¹.] In *Scots* law, the interval from birth to the age of fourteen in males and twelve in females; pupilage.

It's a fatherless bairn, . . . and a motherless; . . . we are in loco parents to him during his years of *pupilarity*.
Scott, *Heart of Mid-Lothian*, v.

Dickens, Tale of Two Cities, II. 23.

11. A knob or raised thumb-piece, allowing the hand which holds the handle to throw back the hinged cover of a tankard, beer-mug, or similar vessel.—*Ball purchase* (*naut.*), a kind of burton, consisting of four single blocks and a fall, frequently used for topsail-halyards of small vessels in the United States: so called from the name of the inventor.—*Gadsden purchase*, a territory purchased by the United States from Mexico in 1853 for \$10,000,000, and included in the southern part of New Mexico and Arizona: so called from James Gadsden, United States minister to Mexico, who negotiated the treaty.—*Griquet purchase*, an arrangement of blocks and falls for mounting and dismounting heavy guns on the deck of a man-of-war.—*Gun-tackle purchase*. See *gun-tackle*. 2.—*Louisiana purchase*, the territory which the United States in 1803, under Jefferson's administration, acquired by purchase from France, then under the government of Bonaparte as first consul. The price was \$15,000,000. The purchase consisted of New Orleans and a vast tract extending westward from the Mississippi river to the Rocky Mountains, and from the Gulf of Mexico to British America. The United States claimed West Florida and the extreme northwest, including Idaho, Oregon, and Washington as parts of the purchase; but it appears that they were wrong in so doing. Texas, which was part of the purchase, was ceded to Spain in 1819 by the treaty by which Florida was acquired. In 1845 it again became a part of the United States.—*Peak-purchase*. See *peak*. 1.—*Purchase of Land Act*. See *land*. 1.—*Purchase system*, the system under which commissions in the British army were formerly purchased. By this system nearly all the first appointments and a large proportion of the subsequent promotions of officers were effected. The regulation prices of commissions varied from £450 for an ensigncy to £7,250 for a lieutenant-colonelcy in the Life Guards, the highest commission purchaseable. The system was abolished in 1871.—*Rolling purchase*. Same as *cranegut*, 1.—*To raise a purchase*. See *raise*. 1.

Let the physician apply himself more to *purgation* than
to alteration, because the offence is in quantity. *Bacon*.

We do not suppose the separation . . . finished before
the *purgation* of the air began.
T. Burnet, Theory of the Earth.

2. The act of cleansing from the imputation of
guilt; specifically, in *old law*, the clearing of
one's self from a crime of which one has been
publicly suspected and accused. It was either
canonical (that is, prescribed by the canon law, the form
whereof used in the spiritual court was that the person
suspected took his oath that he was clear of the facts ob-
jected against him, and brought his honest neighbors with
him to make oath that they believed he swore truly) or
vulgar (that is, by fire or water ordeal, or by combat).
See *ordeal*.

She was always an honest, civil woman; her neighbours
would have gone on her *purgation* a great way.
Latimer, 5th Sermon bef. Edw. VI., 1549.

The inquisitors had a discretion to allow the accused to
make the canonical *purgation* by oath instead of undergo-
ing corporal torture, but the rule which allows this to be
done at the same time discountenances it as fallacious.
Encyc. Brit., XXIII. 468.

purgative (pér'ga-tiv), *a.* and *n.* [*< F. purga-
tif* = Fr. *purgatif* = Sp. Pg. It. *purgativo*, < L. *pur-
gativus*, cleansing, cathartic, < L. *purgare*,

purgatorial ghosts.
J. Mede, Apostacy of Latter Times (1641), p. 45.

II. n. A believer in purgatory.

Boswell. We see in Scripture that Dives still retained an
anxious concern about his brethren.
Johnson. Why, sir, we must either suppose that passage
to be metaphorical, or hold with many divines and all
Purgatorialians, that departed souls do not all at once ar-
rive at the utmost perfection of which they are capable.
Boswell, Life of Johnson, III. 193. (*Davies*.)

purgatorious (pér-ga-tó-ri-us), *a.* [*< L. pur-
gatorius*, cleansing: see *purgatory*.] Having
the nature of or connected with purgatory.

gatorie*, *purgatorie*, *purgatorie*, *n.*, = F. *purga-
toire* = Fr. *purgatori*, *purgatori* = Sp. Pg. It. *purgatorio*, < L. *purgatorius*, cleansing, pur-
gative (ML. *purgatorium*, neut., a place of pur-
gation, purgatory, also a wash-house, laundry), < L. *purgare*, pp. *purgatus*, cleanse: see *purge*.] 1. *a.* Tending to cleanse; cleansing; expiatory.

This *purgatory* interval is not unfavourable to a faithless
representative, who may be as good a canvasser as he was
a bad governor.
Burke, Rev. in France.

II. n.; pl. purgatories (-riz). 1. In the belief
of Roman Catholics and others, a place of pur-
gation in which the souls of those dying peni-
tent are purified from venial sins, or undergo
the temporal punishment which, after the guilt
of mortal sin has been remitted, still remains to
be endured by the sinner. It is not considered as a
place of probation; for the ultimate salvation of those in
purgatory is assured, and the impenitent are not received
into purgatory. The souls in purgatory are supposed, how-
ever, to receive relief through the prayers of the faithful
and through the sacrifice of the mass. The common be-
lief in the Latin Church is that the purgatorial suffering is
by fire; the Greek Church, however, does not determine
its nature.

A robber had remission rather thanne the alle,
Without penance of *purgatorie* to haue paradis for euere.
Piers Plowman (A), xl. 278.

How many men have been miserably afflicted by this
fiction of *purgatory*!
Burton, Anat. of Mel., p. 609.

2. Any place or state of temporary suffering
or oblivion.

Any subject that was not to their palat they either con-
demn'd in a prohibition, or had it straight into the new
Purgatory of an Index.
Milton, Areopagitica, p. 10.

3. A gorge or cleft between perpendicular or
steeply inclined walls of rock. [New Eng.]
It is nearly the same as *sume* (used as a topographical
word), except that localities called *sumes* in New England
always have a stream of water running through them,
which the *purgatories* have not.

The best-known localities bearing the name of *purgato-
ries* are those at Sutton and Great Barrington, Mass., and
there is one on the sea-shore at Newport, R. I.

J. D. Whitney, Names and Places, p. 160.

Purgatory hammer, one of the ancient and prehistoric
perforated axes found in Scotland. This implement was
so named as being supposed to have been buried with its
owner in order that he might have the wherewithal "to
thunder at the gates of Purgatory till the heavenly janitor
appeared" (*Wilson*, Prehist. Ann. of Scotland, I. 191).

As we find the little flint arrow-head associated with
Scottish folk-lore as the Elf's bolt, so the stone hammer
of the same period was adapted to the creed of the middle
ages. The name by which it was popularly known in
Scotland almost till the close of last century was that of
the *Purgatory Hammer*.

Wilson, Arch. and Prehist. Ann. of Scotland, p. 135.

St. Patrick's Purgatory, a cavern in an island in Lough
Derg, county Donegal, Ireland, to which pilgrimages are
made, where Christ is said to have appeared to St. Pat-
rick and showed him a deep pit, telling him that whoever
remained in it a day and a night should be purified from
his sins and behold both the torments of the damned
and the joys of the blessed. A person of the name of
Owen is said to have done this in the above cavern, for-
merly also called *Owen's cave*.

He sette all heaue and glommyng, as if he had come
lately from Troponius' cave, or Saint Patrick's purgatory.
Brutus, Praise of Folie, sig. A. (*Nares*.)

purge (pér), *v.*; pret. and pp. *purged*, pp.
purging. [Early mod. E. also *pourge*; < ME. *purgen*, < OF. (and F.) *purger* = Fr. Sp. Pg. *purgar* = It. *purgare*, < L. *purgare*, make pure,
cleanse, < *purus*, clean, pure, + *agere*, make,
do.] 1. *trans.* 1. To cleanse or purify by sep-
arating and carrying off whatever is impure,
heterogeneous, foreign, or superfluous; cleanse;
clean, or clean out.

Nowe *purge* upp broke and diche.

Palladius, Husbandrie (E. E. T. S.), p. 190.

The people doe etteasones adde their owne industry to
cleanse and *purge* them [the streets].
Coryat, Crudities, I. 213.

Nor have we yet quite *purged* the Christian Land;

Still Idols here, like Calves at Bethel, stand.

Cowley, Death of Crashaw.

Thy chill persistent rain has *purged* our streets

Of gossipry. *Browning*, Ring and Book, II. 17.

2. To remove by some cleansing or purifying
process or operation; clear or wash away: often
followed by *away* and *off*.

Purge away our sins, for thy name's sake. Ps. lxxix. 9.

I am thy father's spirit,
Doom'd for a certain term to walk the night,
And for the day confined to fast in fires,
Till the foul crimes done in my days of nature
Are burnt and *purged away*. *Shak.*, Hamlet, I. 5. 13.

The ethereal mould,
Incapable of stain, would soon expel
Her mischief, and *purge* of the baser fire,
Victorious. *Milton*, P. L., II. 141.

National corruptions were to be *purged* by national ca-
lamities. *Goldsmith*, Bolingbroke.

3. To clear from moral defilement or guilt: in
this and next sense often followed by *of* or *from*.

My heart is *purged* from grudging hate.

Shak., Rich. III., II. 1. 9.

4. To clear from accusation of a crime, as by or-
deal, or from charge of contempt, as by oath
showing that there was no wrong intent; free
from taint or suspicion of crime.

He [Richard III.] sent to the Queen, being still in Sano-
tuary, divers Messengers, who should first excuse and *purge*
him of all Things formerly attempted and done against her.
Baker, Chronicles, p. 231.

As usual, the first charge gave rise to a large number of
informations. Thomas Mowbray, the earl-marshal, was
unable to deny that he had some inkling of the plot, and
archbishop Arundel had to *purge* himself from a like sus-
picion. *Stubbs*, Const. Hist., § 312.

5. To clarify; defecate, as liquors.—6. To op-
erate on by or as by means of a cathartic.

He *purged* him with salt water. *Arbutnot*.

7. To void.

The satirical rogue says . . . that old men have grey
beards, that their faces are wrinkled, their eyes *purging*
thick amber and plum-tree gum. *Shak.*, Hamlet, II. 2. 200.

8. To trim.

Care the ground well, dresse the vines, *purge* the trees,
and alway haue memorie of the Goddesse Ceres.
Quevara, Letters (tr. by Hellowes, 1577), p. 73.

Every branch that beareth fruit, he *purgeth* [in the re-
vised version *cleanseth*] it, that it may bring forth more
fruit. *John* xv. 2.

II. intrans. 1. To become pure by clarifica-
tion.—2. To take a purge; produce evacuations
from the intestines by means of a cathartic.

I'll *purge*, and leave sack, and live cleanly, as a nobleman
should do. *Shak.*, I Hen. IV., v. 4. 168.

3. To be cleansed or purified by the escape of
certain gases, as a lake or river. See *purging*, 2.
purge (pér), *n.* [*< purge*, *v.*] 1. The act of
purging; purgation.

The preparative for the *purge* of paganism out of the
kingdoms of Northumberland. *Fuller*.

2. Anything that purges; specifically, a medicine that evacuates the intestines; a cathartic. —*Pride's Purge*, in *Eng. Hist.*, a forcible reduction, December 6th, 1648, of the membership of the Long Parliament, effected by troops under the command of Colonel Pride, who excluded all persons suspected of Royalist or Presbyterian sympathies. The diminished Parliament was known as the *Rump*, and consisted of about 60 to 80 members.

purge-cock (pér'j'kok), *n.* A purging-cock.

When it becomes necessary to empty the receiver, use is made of a *purge-cock*. *Sci. Amer. Supp.*, p. 8397.

purger (pér'jér), *n.* [*< purge + -er*]. 1. A person or thing that purges or cleanses.

We shall be call'd *purgers*, and not murderers.

Shak., J. C., II. 1. 180.

Faith is a great *purger* and purifier of the soul. *Jer. Taylor, Works* (ed. 1835), II. 22.

2. A cathartic.

It is of good use in physic if you can retain the purging virtue and take away the unpleasant taste of the *purger*. *Bacon, Nat. Hist.*, § 20.

purgery (pér'jér-i), *n.*; pl. *purgeries* (-iz). [= *F. purgerie*; as *purge + -ery*]. The part of a sugar-house where the sugar from the coolers is placed in hogheads or in cones, and allowed to drain off its molasses or imperfectly crystallized cane-juice. *E. H. Knight*.

purging (pér'jér), *n.* [Verbal *n.* of *purge*, *v.*] 1. Any purifying process.—2. A diarrhea or dysentery; looseness of the bowels.

purging-agaric (pér'jér-á-gá-rik), *n.* The white or "female" agaric, *Polyporus officinalis*, a fungus growing upon the larch of the Old World. It is more or less employed in Europe as a cathartic.

purging-cassia (pér'jér-kash'ia), *n.* The plant *Cassia fistula*, or its fruit. See *Cassia*.

purging-cock (pér'jér-kok), *n.* The mud-cock or discharge-valve of a steam-boiler. *E. H. Knight*.

purging-flax (pér'jér-flaks), *n.* An Old World plant, *Linum catharticum*, a decoction of which is used as a cathartic and diuretic.

purging-nut (pér'jér-nut), *n.* See *Jatropha*.

purification (pū'ri-fi-kā'shon), *n.* [*< F. purification = Sp. purificación = Pg. purificação = It. purificazione, < L. purificatio (-n-), a purifying, < purificare, pp. purificatus, make clean: see purify.*] 1. The act of purifying; the act of freeing from impurities, or from whatever is heterogeneous or foreign: as, the *purification* of liquors or of metals.—2. The act or process of cleansing ceremonially; a ritual observance by which the person or thing subjected to it is cleansed from a ceremonial uncleanness, as a symbol of a spiritual cleansing. Ceremonial purification by washing or by other means was common to the Hebrews, Greeks, Romans, and other peoples, and is still practised by the Mohammedans, Greeks, and Roman Catholics, as well as by Hindus and other Orientals. In the Jewish ceremonial law the use of water was essential to purification, and it was often accompanied by sacrifices. The purifications of the Mosaic law fall under several heads, among which are those for defilement arising from secretions, those for leprosy, those for pollution from corpses, and those for defilement from eating the flesh of certain animals.

3. A cleansing of the soul from guilt; the extinguishment of evil desire as something which does not belong to the children of God.

Water is the symbol of *purification* of the soul from sin. *Jer. Taylor, Worthy Communicant*, I. § 3.

4. In the Roman Catholic and Anglican churches, the pouring of wine into the chalice to rinse it after communion, the wine being then drunk by the priest.—*Purification of St. Mary the Virgin*, a feast observed in the Roman Catholic and some other liturgical churches on February 2d, in commemoration of the purification of the Virgin Mary, according to the Jewish ceremonial, forty days after the birth of Christ. Also called *Candlemas*, *Hypapante*, *Presentation of Christ in the Temple*, and *Purification of Our Lady*.

Tewysday, the 11 Day of Februaril, that was the *Purification of our lady*, the wynde made well for us. *Torkington, Diary of Eng. Travell*, p. 61.

purification-flower (pū'ri-fi-kā'shon-flou'ér), *n.* The European snowdrop, *Galanthus nivalis*, which blossoms at about the time of the feast of the Purification, when maidens in white formerly walked in procession. Compare *fair-maids-of-February*.

purificative (pū'ri-fi-kā-tiv), *a.* [*< F. purificatif = Pr. purificatiu = It. purificativo, < L. purificare, pp. purificatus, purify, make clean: see purify.*] Having power to purify; tending to cleanse. *Johnson*.

purificator (pū'ri-fi-kā-tor), *n.* [Also *purificatory*; *< ML. purificatorium, < L. purificare, pp. purificatus, make clean: see purify.*] In the Roman Catholic and Anglican churches, a cloth or napkin used to wipe the chalice before the mixture (*krasis*) and oblation, and the cele-

brant's fingers and mouth and the holy vessels after the ablutions. Before celebration and until the offertory, and after celebration, it covers the chalice, and the paten rests on it covered by the pall and veil. Also called *mundatory*.

purificatory (pū'ri-fi-kā-tō-ri), *a. and n.* [= *F. purificatoire = Sp. Pg. purificadorio = It. purificatorio, n., < L. purificatorius, cleansing, < L. purificare, pp. purificatus, make clean: see purify.*] 1. *a.* Purificative. *Johnson*.

II. *n.* Same as *purificator*.

purifier (pū'ri-fi-ér), *n.* 1. One who or that which purifies or cleanses; a cleanser; a refiner; specifically, a purificator.

He shall sit as a refiner and *purifier* of silver.

Mal. III. 3.

2. In *milling*, an apparatus for separating bran-scales and flour from grits or middlings.—*Dry-lime purifier, wet-lime purifier*. See *gas-purifier*.

puriform (pū'ri-fōrm), *a.* [*< L. pus (pur-), pus + forma, form.*] Pus-like; resembling pus.

purify (pū'ri-fi), *v.*; pret. and pp. *purified*, ppr. *purifying*. [*< ME. purifyen, < OF. purifier, F. purifier = Sp. Pg. purificar = It. purificare, < L. purificare, make clean or pure, < purus, clean, pure, + facere, make.*] I. *trans.* 1. To make pure or clear; free from contamination or extraneous admixture: as, to *purify* liquors or metals; to *purify* the blood; to *purify* the air.

—2. To make ceremonially clean; cleanse or free from whatever pollutes or renders ceremonially unclean and unfit for sacred service.

Whoever hath killed any person, and whosever hath touched any slain, *purify* both yourselves and your captives on the third day, and on the seventh day. *Num. xxxi. 19.*

3. To free from guilt, or the defilement of sin; free from whatever is sinful, vile, or base.

Who gave himself for us, that he might redeem us from all iniquity, and *purify* unto himself a peculiar people, zealous of good works. *Tit. II. 14.*

Thy soul from all guilt will we *purify*.

And sure no heavy curse shall lie on thee.

William Morris, Earthly Paradise, III. 33.

4. To elevate and free from barbarisms or inelegances: as, to *purify* a language.

II. *intrans.* To grow or become pure or clear.

We do not suppose the separation of these two liquors wholly finished before the purification of the air began, though let them begin to *purify* at the same time.

T. Burnet, Theory of the Earth.

Purim (pū'rim), *n.* [Heb.] An annual festival observed by the Jews on the 14th and 15th of the month Adar (about the 1st of March). It is preceded by the Fast of Esther on the 13th. These three days commemorate the deliverance of the Jews by Esther from the massacre planned by Haman, as related in the book of Esther.

Wherefore they called these days *Purim* after the name of Pur. *Esther ix. 26.*

puriri (pū-rē-rē), *n.* [Maori.] A New Zealand tree, *Vitex littoralis*, 50 or 60 feet high, with robust spreading branches. It yields a very hard, heavy, and durable timber, of a brown color, in short lengths, often curved, suitable for ships' frames and many other purposes.

purism (pūr'izm), *n.* [= *F. purisme = Sp. Pg. It. purismo; as pure + -ism.*] The exclusion of admixture of any kind; the affectation of rigid purity, as in language, style, etc.; specifically, excessive nicety as to the choice of words.

The English language, however, it may be observed, had even already become too thoroughly and essentially a mixed tongue for this doctrine of *purism* to be admitted to the letter. *Craik, Hist. Eng. Lit.*, I. 419.

Orthographic *purism* is of all kinds of *purism* the lowest and the cheapest, as is verbal criticism of all kinds of criticism, and word-faith of all kinds of orthodoxy.

Whitney, Linguistic Studies, 2d ser., p. 192.

purist (pūr'ist), *n.* [= *F. puriste = Sp. Pg. It. purista; as pure + -ist.*] 1. One who aims scrupulously at purity, particularly in the choice of language; one who is a rigorous critic of purity in literary style.

He (Fox) was so nervously apprehensive of sliding into some colloquial incorrectness . . . that he ran into the opposite error, and purified his vocabulary with a scrupulously unknown to any *purist*.

Macaulay, Sir James Mackintosh.

2. One who maintains that the New Testament was written in pure Greek. *M. Stuart*. [Rare.]

puristic (pūr'is-tik), *a.* [*< purist + -ic.*] Pertaining or relating to purism; characteristic of a purist. *Maurice*.

puristical (pūr'is-ti-kal), *a.* [*< puristic + -al.*] Same as *puristic*.

puritan (pū'ri-tan), *n. and a.* [Irreg. *< L. purita(-t-), purity, + -an.* The *F. Puritain* and *Sp. Pg. It. Puritano* are from *E.* The noun precedes the adj. in use.] I. *n.* 1. One who is very strict and serious in his religious life, or who pretends to great purity of life: first used

about 1564, and applied to certain Anabaptists: frequently a term of contempt.

About that time were many congregations of the Anabaptists in London, who cawld themselves *Puritans* or Unspotted Lambs of the Lord.

Stow, Memoranda (Three Fifteenth-Century Chronicles, [Camden Soc., p. 148].

Shak., Pericles, iv. 6. 9.

She would make a *puritan* of the devil, if he should cheapen a kiss of her.

2. [*cap.*] One of a class of Protestants which arose in England in the sixteenth century. The Puritans maintained a strict Calvinism in doctrine, and demanded, in opposition to those who desired a reform of the church service, the substitution of one from which should be banished all resemblance whatever to the forms of the Roman Catholic Church. Large numbers of them were found both in and out of the Church of England, and various repressive measures were directed against them by the sovereigns and by the prelates Parker, Whitgift, Bancroft, Laud, and others. In the reign of Charles I. the Puritans developed into a political party and gradually gained the ascendancy, but lost it on Cromwell's death, and after the Restoration ceased to be prominent in history. During their early struggles many of them emigrated to New England, especially to the Massachusetts Bay Colony. One band of Puritans who separated entirely from the Church were called *Separatists* or *Brownists*, and from them came the founders of the Plymouth Colony, often called *Pilgrim Fathers* or *Pilgrims*.

Now as solemn as a traveller, and as grave as a *Puritan's* ruff. *Marston, Antonio and Melinda*, I. Ind.

From that time followed nothing but Imprisonments, troubles, disgraces on all those that found fault with the Decrees of the Convocation, and strait were they branded with the Name of *Puritans*.

Milton, Reformation in Eng., I.

The extreme *Puritan* was at once known from other men by his gait, his garb, his lank hair, the sour solemnity of his face, the upturned white of his eyes, the nasal twang with which he spoke, and above all by his peculiar dialect. *Macaulay*.

=*Syn. Puritan, Pilgrim*. Careful distinction should be made between the *Pilgrims* or *Pilgrim Fathers*, who settled at Plymouth in 1620, and the *Puritans*, who in 1628–30 founded the colony of Massachusetts Bay at Salem and Boston.

II. *a.* [*cap.*] Of, pertaining to, or characteristic of the Puritans.

Hee's gone; I'll after him
And know his trespasses, seems to beare a part
In all his ills, but with a *Puritan's* heart.

Tourneur, Revenger's Tragedy, II. 2.

Mr. Pyncheon's long residence abroad, and intercourse with men of wit and fashion—courtiers, worldlings, and free-thinkers—had done much toward obliterating the grim *Puritan* superstitions which no man of New England birth, at that early period, could entirely escape.

Hawthorne, House of Seven Gables, xiii.

Gathering still, as he went, the May-flowers blooming around him;—

"*Puritan* flowers," he said, "and the type of *Puritan* maidens,

Modest and simple and sweet, the very type of Priscilla!" *Longfellow, Miles Standish*, III.

=*Syn. Puritan, Puritanic*. *Puritanic* (or *puritanical*) is now generally used in a deprecative sense; *Puritan* in a commendatory or a neutral sense.

puritanic (pū'ri-tan'ik), *a.* [*< puritan + -ic.*]

1. Pertaining to the Puritans or their doctrines and practice. Hence—2. Very scrupulous in religious matters; exact; rigid: often used in contempt or reproach.

Too dark a stole

Was o'er religion's decent features drawn

By *puritanic* zeal. *W. Mason, English Garden*, IV.

=*Syn. See Puritan, a.*

puritanical (pū'ri-tan'ikal), *a.* [*< puritanic + -al.*] Same as *puritanic*.

Wearing feathers in thy hair, whose length before the vigorous edge of any *puritanical* pair of scissors should shorten the breadth of a finger, let the three housewifely spinsters of destiny rather curtail the thread of thy life.

Dekker, Gull's Hornbook, p. 83.

Puritanical and superstitious principles. *I. Walton*.

It is quite certain that Bunyan was, at eighteen, what, in any but the most austere *puritanical* circles, would have been considered as a young man of singular gravity and innocence.

Macaulay, Encyc. Brit., IV. 526.

puritanically (pū'ri-tan'ikal-i), *adv.* In a puritanical manner; with the exact or rigid notions or manners of the Puritans.

puritanism (pū'ri-tan-izm), *n.* [= *F. puritanisme = Sp. Pg. puritanismo; as puritan + -ism.*] 1. Strictness of religious life; puritanic strictness in religious matters.—2. The principles and practices of the Puritans.

How resplendent and superb was the poetry that lay at the heart of *Puritanism* was seen by the slightest eyes of John Milton, whose great epic is indeed the epic of *Puritanism*.

M. C. Tyler, Hist. Amer. Lit., I. 266.

puritanize (pū'ri-tan-iz), *v. i.*; pret. and pp. *puritanized*, ppr. *puritanizing*. [*< puritan + -ize.*]

To conform to the opinions of Puritans; affect or teach puritanism.

purity (pū'ri-ti), *n.* [*< ME. purete, < OF. purete, F. pureté = Sp. puridad = Pg. pureza = It. purità, < L. purita(-t-), cleanness, pureness, < L. purus, clean, pure: see pure.*] The condition or quality of being pure. (*a*) Freedom from

foreign admixture of heterogeneous matter: as, the *purity* of water, of wine, of spirit; the *purity* of drugs; the *purity* of metals.

The *pureté* of the quinte essence schal be sublymed above, and the groat schal abide byneth in the botome. *Book of Quinte Essence* (ed. Furnivall), p. 6.

The slight touch of Renaissance in some of the capitals of the palace in no sort takes away from the general *purity* of the style. *E. A. Freeman, Venice*, p. 257.

(b) Cleanness; freedom from foulness or dirt; as, the *purity* of a garment. (c) Freedom from guilt or the defilement of sin; innocence: as, *purity* of heart or life.

If we describe *purity* by reference to contrasts, then it is a character opposite to all sin.

Bushnell, Sermons for New Life, p. 264.

(d) Freedom from lust, or moral contamination by illicit sexual connection; chastity.

So bold is Lust that ahe

Dares hope to find a Blot in *Purity*. *J. Beaumont, Psyche*, II. 207.

(e) Freedom from sinister or improper views; sincerity: as, *purity* of motives or designs.

Princes have vouchsafed grace to trifles offered from a *purity* of devotion. *Ford, 'Tis Pity, Ded.*

(f) Freedom from foreign idioms, or from barbarous or improper words or phrases: as, *purity* of style or language.

After Caesar and Cicero's Time, the Latin Tongue continued in Rome and Italy in her *Purity* 400 Years together. *Hovell, Letters*, II. 58.

=*Syn.* (c) and (d) Immaculateness, guilelessness, honesty, integrity, virtue, modesty. (f) *Purity, Propriety, Precision.* As a quality of style, "*Purity* . . . relates to three things, viz. the form of words [etymology], the construction of words in continuous discourse [syntax], and the meaning of words and phrases [lexicography]." (*A. Phelps, Eng. Style*, p. 9.) "*Propriety* . . . relates to the signification of language as fixed by usage." (*A. Phelps, Eng. Style*, p. 79.) "The offences against the usage of the English language are . . . *improprieties*, words or phrases used in a sense not English." (*A. S. Hall, Rhet.*, p. 19.) "An author's diction is pure when he uses such words only as belong to the idiom of the language, in opposition to words that are foreign, obsolete, newly coined, or without proper authority. A violation of *purity* is called a barbarism. . . . But another question arises. . . . Is the word used correctly in the sentence in which it occurs? . . . A writer who falls in this respect offends against *propriety*." (*J. S. Hart, Comp. and Rhet.*, pp. 68, 74.) "*Precision* includes all that is essential to the expression of no more, no less, and no other than the meaning which the writer purposes to express." (*A. Phelps, Eng. Style*, p. 6.)

Parsons may be ranked among the earliest writers of our vernacular diction in its *purity* and pristine vigor, without ornament or polish. *I. D'Israeli, Amen. of Lit.*, II. 85.

In our own tongue we may err egregiously against *propriety*, and consequently against *purity*, though all the words we employ be English, and though they be construed in the English idiom. The reason is evident: they may be misapplied; they may be employed as signs of things to which use hath not affixed them. This fault may be committed either in single words or in phrases. *G. Campbell, Philosophy of Rhetoric*, II. III. § 3.

Our verse . . . had become lax and trivial, and we needed to be recalled to *precision* and moral vigor.

E. Gosse, From Shakespeare to Pope, p. 181.

Purkinjean (pér-kin'jē-an), *a.* [*< Purkinje* (see def.) + *-an*.] Pertaining to or named after the Bohemian physiologist Purkinje (1787-1869): as, the *Purkinjean vesicle*, discovered by him in 1825. See *germinal vesicle*, under *germinal*.

Purkinje's cells. See *cells of Purkinje*, under *cell*.

Purkinje's fibers. Large beaded and reticulated fibers found in the subendocardial tissue of some animals, and occasionally in man.

Purkinje's figures. See *figure*.

Purkinje's vesicle. See *germinal vesicle*, under *germinal*.

purl¹ (pér'l), *v. t.* [Formerly also *pirl*; *< Sw. porla*, *purl*, bubble, as a stream; cf. *D. borrelen*, bubble; a freq. form from the imitative base seen in *pirl* and *purr*.] It is partly confused with *pirl*, *prill*, whirl. To flow with a rippling or murmuring sound, as a shallow stream over or among stones or other obstructions; ripple along in eddying and bubbling swirls.

From dry Rocks abundant Rivers *purl'd*.

Sylvester, tr. of Du Bartas's Weeks, I. 3.

The brooks run *purling* down with silver waves.

Parnell, Health.

Swift o'er the rolling pebbles, down the hills,

Louder and louder *purl* the falling rills.

Pope, Iliad, xxi. 297.

See from the weedy earth a rivulet break,

And *purl* along the untrodden wilderness.

Bryant, The Path.

purl¹ (pér'l), *n.* [Formerly also *pirl*; *< purl*¹, *v.*] 1. A continued murmuring sound, as of a shallow stream of water running over small stones: as, the *purl* of a brook.—2. A murmuring brook or rippling stream of water.

A broket or *pirl* of water.

Leland's Itinerary (1769), III. 182. (*Hall'swell*.)

purl² (pér'l), *v.* [Formerly also *pirl*; *< ME. pyr-len*, whirl, throw; cf. *purl*¹.] 1. *intrans.* 1. To curl or swirl; move in rippling or eddying swirls.

From his lips did fly
Thin winding breath, which *purl'd* up to the sky.
Shak., Lucrèce, I. 1407.

A *purling* wind that flies
Off from the shore each morning, driving up
The billows far to sea.

Chapman, Caesar and Pompey, II. 1.
2. To upset; overturn; capsize. [*Slang.*] See the quotation under II., 2.

II. *trans.* 1. To whirl about; cause to rotate: as, the wind *purls* a snow-drift.—2. To upset; overturn; also, specifically, as a hunting term, to unseat or unhorse. [*Slang.*]

They commonly paddle in companies of three; so then, whenever one is *purled* the other two come on each side of him, each takes a hand and with amazing skill and dexterity they reseat him in his cocked hat, which never sinks, only *purls*.

C. Reade, Never too Late, xxxviii. (*Davies*.)

3. To wind, as thread, upon a reel or spindle.

I *pyrie* wyrd of golde or syluer, I wynde it vpon a whele

as sylke women do. *Palgrave. (Jamicson.)*

purl² (pér'l), *n.* [*< purl*², *v.* Cf. *purl*¹, *n.*] 1. A circle or curl made by the motion of water; a ripple; an eddy.

Whose stream an easie breath doth seem to blow,
Which on the sparkling gravel runs in *purlies*,
As though the waves had been of silver curles.

Drayton, Mortimeriades, I. 1506. (*Richardson*.)

So have I seen the little *purlis* of a spring sweat through the bottom of a bank, and interenate the stubborn pavement.

Jer. Taylor, Works (ed. 1835), I. 849.

purl³ (pér'l), *v. t.* [*Contr. of purlie*.] 1. To ornament with a decorative border of any sort; decorate with fringe or embroidery; *purlie*.

For all the copes and vestements wer but of one peece, so woven for the purpose, cloth of tissue and powdered with redde roses *purled* with fine gold.

Is thy skin whole? art thou not *purl'd* with scabs?

Fletcher (and another), Sea Voyage, I. 3.

2. To invert, as a stitch in knitting; turn over and knit the other way; seam.

purl³ (pér'l), *n.* [*Contr. of purlie*.] 1. A border of embroidery or perhaps

of lace, or gold lace or galloon. Throughout the fifteenth, sixteenth, and seventeenth centuries the term is in use, and evidently with different significations, but always as an ornamental adjunct, an edging or the like to a garment. Also *pearl*.

Himself came in next after a triumphant chariot made of carnation velvet, enriched with *purl* and *pearl*.

Sir P. Sidney.

How many puffs and *purls* lay in a miserable case for want of stiffening [starch]!

Middleton, Father Hubbard's Tales.

My lord, one of the *purls* of your band is, without all discipline, fallen out of his rank.

Massinger and Field, Fatal Dowry, II. 2.

2. A spiral of gold or silver wire, used in lace-work.—3. An inversion of the stitches in knitting, which gives to parts of the work an appearance different from the general surface, such as the ribbed appearance of those parts where great elasticity is required.—4. A plait or fold, as in an article of dress.—5. In lace-making, a kind of lace in common use in the sixteenth century, and often of great value. The term is used in the general sense as indicating the fabric spoken of, and also as denoting a certain quantity of it: as, so many shillings the *purl*.

purl⁴ (pér'l), *n.* [Appar. another spelling of *pearl*, so called with ref. to the bubbles on the surface, *< pearl*, *v.*] A drink, of which beer is the principal ingredient, defined about 1815 as hot beer mixed with gin: same as *dog's-nose*; in later times, a stimulating mixture of beer, gin, sugar, and ginger. It was, before coffee and tea were used, commonly made to be drunk in the morning, and hence the liquor is called *early purl*.

Early in the morning I set my books . . . in order. Thence, forth to Mr. Harper's to drink a draft of *purl*.

Pepey, Diary, Feb. 19, 1660.

My lord duke would have a double mug of *purl*.

Steele, Spectator, No. 88.

Mr. Swiveller . . . had by this time taken quite as much to drink as promised to be good for his constitution (*purl* being a rather strong and heady compound).

Dickens, Old Curiosity Shop, I. viii.

Again, there was *purl*—*early purl*. Once there was a club in the neighbourhood of Covent Garden which existed for the purpose of arising betimes and drinking *purl* before breakfast.

W. Besant, Fifty Years Ago, p. 170.

purl-house (pér'l'hous), *n.* A place where *purl* is sold and drunk.

There were lower depths yet: there were the *purl houses*, where "Trademen flock in their Morning gowns, by Seven, to cool their Flucks."

J. Ashton, Social Life in Reign of Queen Anne, I. 234.

purlieue (pér'li-kü), *v. t.* Same as *parlecue*.

purliet, *n.* An obsolete form of *purlieu*.

purlieu (pér'lü), *n.* [Formerly also *purlue*, *purluy*; an altered form, simulating *F. lieu*, a place (see *lieu*), of *purlie*, *purlly*, *purlie*, prop. land which, having been part of a royal forest, has been severed from it by perambulation or survey, *< OF. pourallee*, *puralee*, a going through or about, perambulation, *< pour-*, *pur-* (*< L. pro-*), used for *per-*, *par-* (*< L. per*), through, + *alee*, a going; see *alley*.] 1. Land added to a royal forest by unlawful encroachment, but afterwards disafforested, and restored to the former owners, its bounds and extent being settled by perambulation.

With all amercements due
To such as hunt in *purliey*; this is something,
With mine own game reserved.

Randolph, Muses' Looking-glass, iv. 3.

As a *purliey* hunter, I have hitherto beaten about the circuit of the forest of this microcosm.

Burton, Anat. of Mel., p. 227.

Th' infernal Nimrod's halloo!

The lawless *purlieus*? and the game they follow! . . . These *purlieus* men are devils; and the bounds . . . Temptations. *Quarles, Emblems*, III. 9.

Cf. *porphyry*, from the same Gr. source.]
 1. *n.* 1. A color formed by the mixture of blue and red, including the violet of the spectrum above wave-length 0.417 micron, which is nearly a violet-blue, and extending to but not including crimson. The following color-disk formulae will serve to identify several purples. The red used is the most intense procurable, so that mixed with 7 per cent. of blue it gives a good carmine.

	Red.	Blue.	Black.	White.
Auricle purple	17	28	55	0
Dahlia purple	14	7	79	0
Heliotrope purple	26	26	25	25
Indian purple	29	31	40	0
Magenta	67	33	0	0
Mauve	37	50	0	13
Plum purple	5	25	70	0
Pomegranate purple	50	10	40	0
Royal purple	55	12	33	0
Saffron	88	17	0	0
Wine purple	50	17	33	0

Of the various colors called *purple* at any time, the Tyrian dye (which was properly a crimson) was anciently the most celebrated. This color was produced from an animal juice found in a shell-fish called *murex* or *conchylium* by the ancients. See *Purpura*, 2.

Musidorus . . . had upon him a long cloak . . . made of purple satin; not that purple which we now have and is but a counterfeit of the Getulian *purple*, which yet was far the meaner in price and estimation, but of the right Tyrian *purple*, which was nearest to a colour betwixt our murrey (a dark-reddish brown) and scarlet.

Sir P. Sidney, Arcadia, v.

Great part of the colouring yet remains upon the stones: red, in all its shades, especially that dark dusky colour called Tyrian *purple*. Bruce, Source of the Nile, I. 105.

Purple is very seldom used in English heraldry. It is nonsense, however, to say it is improper to use it, as it is quite good heraldry.

Books of Precedence (E. E. T. S., extra ser.), I. 96, note 1.

2. A cloth robe, dress, or mantle of this hue, formerly the distinguishing dress of emperors, kings, or princes: as, to wear the *purple*.

Full long ago I was in this *purpose*,
Butt thenne I myght not telle yow what I ment.
Generydes (E. E. T. S.), I. 484.

I schall do my part as feythfully as I can to lett Wyndhamys *porpose* tyl ye come home.
Paston Letters, I. 259.

Infirm of *purpose*!
Give me the daggers.
Shak., *Macbeth*, II. 2. 52.

At this Time Intelligence was given to the Lords that Richard, King of the Romans, had a *Purpose* to come into England.
Baker, Chronicles, p. 86.

The *purpose* firm is equal to the deed:
Who does the best his circumstance allows
Does well, acts nobly; angels could no more.
Young, Night Thoughts, II. 1. 90.

A certain hot fellness of *purpose*, which annihilated everything but itself.
Hawthorne, Seven Gables, viii.

5. Import; meaning; purport; intent.

The intent and *purpose* of the law
Hath full relation to the penalty,
Which here appeareth due upon the bond.
Shak., *M. of V.*, IV. 1. 247.

With words to this *purpose*, he [Ambrose] put back the Emperor as inferior to himself.
Milton, Ana. to Salmasius.

64. Discourse; conversation.

For she in pleasant *purposes* did abound,
And greatly joyed merry tales to faine.
Spenser, F. Q., II. vi. 6.

74. Instance; example.

Sir R. L. Strange.

84. pl. A sort of conversational game. Compare *cross-purpose*, 2.

Off *purposes*, off riddles he devyad,
And thousands like which flowed in his braine.
Spenser, F. Q., III. x. 8.

For sport's sake let's have some Riddles or *Purposes* ho!
B. Jonson, Cynthia's Revels, IV. 1.

94. A dance resembling a cotillion, a characteristic feature of which was the introduction of confidential or coquettish conversation.

The *Purpose* was so called because the figure exacted that at stated intervals the couples should dance together through the doorway into an adjoining room, and, having made the circuit of that apartment, should return, unbosomed of any secrets they might have had to interchange, to the rest of the laughing company. It was a figure obviously adopted for the triumph of coquetry and the discomfiture of mankind.
Whyte Melville, Queen's Maids, xvi.

Of *purpose*, on *purpose*, purposely; intentionally; with design: as, to do a thing on *purpose*; the door was left open of *purpose*.

Wherefore we must thinke he did it of *purpose*, by the odde sillable to glue greater grace to his meeter.
Pultenham, Arte of Eng. Poesie, p. 108.

Nature herself seemed to have studied of *purpose* how to make herself there admired.
Howell, Letters, I. i. 39.

Her father, a hale and hearty man, died, on *purpose*, I believe, for the pleasure of plaguing me with the care of his daughter.
Sheridan, School for Scandal, III. 1.

To all intents and *purposes*. See *intent*.—To be in *purpose*, to be resolved; intend.

I am in *purpose* to passe perilous wayes,
To kaire with my kene mene, to conquire gone landes.
Morte Arthure (E. E. T. S.), I. 641.

purposedly (pér'pós-tli), *adv.* [*< purposed*, pp. of *purpose, v.*, + *-ly*. Cf. *purposely*.] Intentionally; designedly; purposely.

North, tr. of *Plutarch*, p. 615.

purposeful (pér'pós-fül), *a.* [*< purpose* + *-ful*.] 1. Characterized by purpose or definite aim; having an object in view; full of purpose or meaning; of serious import or significance: opposed to *aimless*.

The group of mother and child on page 89 is sincere, *purposeful*, downright drawing.
The Nation, Dec. 16, 1900, p. 589.

The funeral offerings of food, clothing, weapons, &c., to the dead are absolutely intelligible and *purposeful* among savage races, who believe that the souls of the departed are ethereal beings, capable of consuming food.
E. B. Tylor, Encyc. Brit., II. 122.

Hence—2. Intended; made or introduced on purpose.

The angles [were] all measured, and the *purposeful* variation of width in the border therefore admits of no dispute.
Ruskin.

purposefully (pér'pós-fül-i), *adv.* With full purpose or design; of set purpose.

You may indeed perhaps think . . . that it is much more pardonable to slay needlessly than *purposefully*.
Ruskin.

purposefulness (pér'pós-fül-nes), *n.* Purposeful character or quality; adaptation to a purpose: as, the *purposefulness* of an architectural design.

The *purposefulness* of the process of evolution.

purposelessness (pér'pós-les-nes), *n.* 1. Lack of definite or practical purpose or aim.—2. The state or quality of being purposeless, and therefore without design or final cause. See *dys teleology*.

purpose-like (pér'pós-lik), *a.* 1. Having a definite purpose or object to be subserved: as, a *purpose-like* person or action.—2. Having the appearance of being fit for a purpose.

Cuddie soon returned, assuring the stranger . . . that the gudewife should make a bed up for him at the house, mair *purpose-like* and comfortable than the like o' them could gie him.
Scott, Old Mortality, xxxviii.

purposely (pér'pós-li), *adv.* [*A reduction of purposedly*; as if *purpose* + *-ly*.] Intentionally; designedly; on purpose.

purposer (pér'pós-ér), *n.* [*< purpose* + *-er*.] 1. One who purposes, resolves, or determines on any particular course of action; one who

forms a resolution.—2. One who proposes or sets forth anything.

purposive (pér'pós-iv), *a.* [*< purpose* + *-ive*.] 1. Having an aim or purpose; having an end in view; purposeful. [Rare.]

We want a word to express the adaptation of means to an end, whether involving consciousness or not; the word *purposive* will do very well, and the adjective *purposive* has already been used in this sense.
W. K. Clifford, Lectures, II. 168.

To ascertain the origin and progress of *purposive* action it seems, then, that we must look to the effects of pain rather than to those of pleasure. *Encyc. Brit.*, XX. 73.

2. Accomplishing some end; functional; useful in animal or vegetable economy: applied in biology to parts and organs which are not rudimentary or vestigial, and may therefore be regarded as teleological.

purposiveness (pér'pós-iv-nes), *n.* The quality or character of being purposive, or designed for an end. [Rare.]

Its movements, instead of being wholly at random, show more and more signs of *purposiveness*. *Contemporary Rev.*

purpoynit, *n.* An obsolete form of *pourpoint*.

Chaucer.

purpresture (pér-pres'tür), *n.* [Also *pourpresture*; < *OF. pourpresture, pourpresture, purpresture* (ML. *purprestura, porprestura, proprestura*), an encroachment, purpresture, a fee paid by villeins for the privilege of inclosing land; a variant of *pourpresture, porpresture, purprisure*, an inclosure, space occupied, < *purprise, porprise, purprise, purprine*, an inclosure: see *purprise*.] In law, a nuisance consisting in an inclosure of or encroachment on something that belongs to another person or to the public, as the shutting up or obstruction of a highway or of navigable waters. Encroachments other than against the public are no longer termed *purprestures*.

The offence of *purpresture* . . . was an encroachment on the forest rights, by building a house within the forest, and it made no difference whether the land belonged to the builder or not. *Encyc. Brit.*, IX. 400.

purprise (pér-priz'), *n.* [Early mod. E. also *purprise*; < *ME. purprise*, < *OF. pourprise, porprise, purprise*, an inclosure, < *pourpris, porpris, purpris*, pp. of *pourprendre, porprendre, purprendre*, seize upon, occupy, encroach upon, invest, surround, inclose, < *pour-, por-, pur-*, < *L. pro*, before, + *prendre*, take: see *prehend* and *prize*.] *surprise*, etc. Cf. *purpresture*.] A close or inclosure; also, the whole compass of a manor.

And eke amydde this *purprise*
Was maad a tour of gret malistrise.
Rom. of the Rose, I. 4171.

The place of justice is a hallowed place; and therefore not only the bench, but the footpace and precincts and *purprise* thereof ought to be preserved without scandal and corruption. *Bacon, Judicature* (ed. 1887).

purpult, *a.* A Middle English form of *purple*.

purpura (pér'pü-rä), *n.* [NL., < *L. purpura*, < *Gr. πορφύρα*, the purple-fish, a purple dye or color: see *purple*.] 1. In

med., an eruption of small purple spots and patches, caused by extravasation of blood in the skin; the purples.—2. [cap.] A genus of gastropods, typical of the family *Purpuridae*. The animal has a purpurigenous gland, and secretes a purplish fluid which has given name to the genus. The shell is generally oblong-ovate, its surface usually being rather rough with spines or tubercles. The species are numerous, and are divided in various subgenera, considered by some as genera. *P. lapidulus* is an abundant northern species, common to both shores of the Atlantic. See also cut under *operculum*.—**Malignant purpura**, cerebrospinal fever.—**Purpura hemorrhagica**, purpura attended with hemorrhage into and from mucous membranes, and often into serous membranes and cavities. Pyrexia may be present or absent. Also called *morbus maculosus Werthoffi*.—**Purpura nautica**, scurvy.—**Purpura nervosa**, purpura with rheumatoid pains, with colic and vomiting, sometimes hemorrhage from the bowels, and frequently cutaneous edema. It occurs mostly in children. The specific name refers to a supposed dependence on the sympathetic nervous system.—**Purpura papulosa**, purpura in which the ecchymoses are interspersed with livid papules. Also called *lichen lividus*.—**Purpura rheumatica**, a disease characterized by a purpuric eruption, often with some fever, nausea, colicky pains, diarrhea, or constipation, and with rheumatoid pains and often swelling and redness in certain joints.—**Purpura simplex**, a disease characterized by a purpuric eruption, with slight general symptoms such as languor and loss of appetite. The spots come out in successive crops, each lasting a week or ten days; there may be a number of such recurrent eruptions.—**Purpura**

It forms deep-red or purple compounds with most bases, whence the name. It cannot be obtained except in combination. Also *isopurpuric*.

purpuric (pér-pū-rik), *a.* [*L. purpura + -ic*.] Of the nature of or pertaining to purpura.—**Malignant purpuric fever**. See *fever*.

Purpuridæ (pér-pū-ri-dē), *n. pl.* [NL., < *Purpura* + *-idæ*.] A family of gastropods, typified by the genus *Purpura*: same as the subfamily *Purpurinæ*.

Purpurifera (pér-pū-ri-fē-rā), *n. pl.* [NL.: see *purpuriferous*.] In Lamarck's system, a family of trachelipodous gastropods containing species producing a purple fluid, and others supposed to resemble them. It included the *Purpurinæ* (but not the *Muricinæ*) and various incongruous genera referred by modern authors to different families and even sub-orders.

purpuriferous (pér-pū-ri-fē-rus), *a.* [*L. purpura*, purple, + *ferre*, bear.] Purpuriparous; belonging to the *Purpurifera*.

purpuriform (pér-pū-ri-fōrm), *a.* [*L. Purpura*, *q. v.*, + *L. forma*, form.] Resembling a shell of the genus *Purpura*; related or belonging to the *Purpuridæ*. Also *purpuroid*.

purpurigenous (pér-pū-ri-jē-nus), *a.* [*L. purpura*, purple, + *gignere*, genere, bear: see *-genous*.] Producing purple.—**Purpurigenous gland**, a gland, especially developed in the gastropods of the family *Muricidæ*, secreting a liquid of a purplish color.

purpurin, **purpurine** (pér-pū-rin), *n.* [*L. purpura*, purple, + *-in*, *-ine*.] A red coloring matter, $C_{14}H_5O_2(OH)_3$, used in dyeing, extracted from madder and prepared artificially by the oxidation of artificial alizarin. Its application in dyeing is similar to that of alizarin. In commerce it is known as *alizarin*, *yellow shade* (of red), the true alizarin giving blue shades of red.

Purpurinæ (pér-pū-ri-nē), *n. pl.* [NL., < *Purpura* + *-inæ*.] A subfamily of *Muricidæ*, characterized by having an operculum with a lateral nucleus. It includes the genera *Purpura*, *Acanthina*, *Pentadactylus*, *Concholepas*, and others.

purpuriparous (pér-pū-ri-pā-rus), *a.* [*L. purpura*, purple, + *parere*, bring forth, bear.] Producing or secreting a purple substance: as, the *purpuriparous* glands of the sea-hare.

purpuroid (pér-pū-roid), *a.* [*L. purpura*, purple, + *Gr. εἶδος*, form.] Same as *purpuriform*.

purrl, **purrl** (pér), *v.* [Imitative; cf. *purrl*, *purrl*, and *puss*.] I. *intrans.* To utter a low murmuring sound expressive of satisfaction or pleasure, as a cat. The sound is made by throwing the vocal cords into vibration measured and regulated by the respiration; and this vibration is strong enough to make the whole larynx tremble, so that it may be felt or seen from the outside. Purring is highly characteristic of the cat tribe, though probably not confined to it.

I know somebody to whose knee that black cat loves to climb;
Against whose shoulder and cheek it likes to purr.
Charlotte Brontë, *Shirley*, xii.

Sitting drowsy in the fire-light, winked and purred the mottled cat.
Whittier, *Mary Garvin*.

Purring thrill, a thrill or tremor, or sense of fine vibration, perceptible to the hand, as sometimes over an aneurism, or over the heart in some cases of valvular lesion. It resembles the sensation which the back of a purring cat yields to the hand. Also called *purring tremor*, *purring fremitus*, and, in French, *fremissement catatre*.

II. *trans.* To express or signify by purring.

Her ears of jet and emerald eyes
She saw, and purr'd applause.
Gray, *Death of a Favourite Cat*.

[Figuratively of persons in both uses.]

purrl, **purrl** (pér), *n.* [*L. purrl*, *v.*] The sound made by a cat in purring.

(She) thrills the hand that smooths her glossy fur
With the light tremor of her grateful purr.
O. W. Holmes, *Terpsichore*.

purrl, *n.* See *purrl*.

purrl, **purrl** (pér), *n.* [Also *purrl*; perhaps ult. < *AS. pur*, occurring in two glosses, as a synonym of *rāradumbula*, a bitter (glossed by *L. onocrotalus*, a pelican), or of *hæferblāte*, appar. a snipe (E. dial. *hammerbleat*).] A sandpiper, *Tringa alpina*, commonly called *dunlin*.

purrl (pér), *n.* [Origin obscure.] A bivalve of the family *Veneridæ*, *Tapes decussata*. It inhabits chiefly the European coasts on sandy or gravelly bottoms between tide-marks. It burrows in the ground, and is usually indicated by two little holes about an inch apart, made by the siphons. The purs are held in some cases for food, being considered better than cockles. Also called *butler-fish*.

purrl, *n.* See *purrl*.

purrl, *n.* An obsolete form of *perry*.

purree, **purree** (pur'ē), *n.* A yellow coloring matter. See *euxanthin*. Also called *Indian yellow*.

Cf. *burse*, *bourse*.] 1. A bag or pouch; specifically, a small bag or case in which money is contained or carried.

Her girdle was greene, and at that hung a large leather purse.
Greene (?), *Vivian*.

A pouch with many parts and purses thin,
To carry all your tools and trinkets in.
J. Denny (Arber's Eng. Garner, I. 164).

Out has he ta'en a purse o' gowd,
Was a' fou to the string.
Brown Adam (Child's Ballads, IV. 62).

2. Figuratively, money; means; resources.

Had men beene as forward to adventure their purses,
and performe the conditions they promised mee, as to crop
the fruits of my labours, thousands ere this had beene bet-
tered by these designs. *Capt. John Smith*, *Works*, II. 241.

But here att'rd beyond our purses we go,
For useless ornament and flaunting show.
Dryden, tr. of Juvenal's *Satires*, III. 286.

He needs his purse, and knows how to make use on it.
Fletcher, *Spanish Curate*, I. 1.

You never refused your purse and credit to the service
and support of learned or ingenious men.
Swift, *Improving English Tongue*.

A purseful of money; a sum of money offered as a prize or collected as a present: as, to win the purse in a horse-race; to make up a purse as a present.—5. A specific sum of money. In Turkey large accounts are often set down in purses of 500 Medjidie piasters, equivalent to 4 pounds 10 shillings of English money, or about \$22.

Belt-purse or Sporran, 17th century.

The Greeks have three churches, and their bishop resides here, who has an income of about four purses a year.
Pococke, *Description of the East*, II. II. 24.

A Turkish merchant residing in Cairo died leaving property to the amount of six thousand purses.
R. W. Lane, *Modern Egyptians*, I. 136.

6. In zoöl. and anat., some kind of a pouch, bursa, marsupium, or oviscapule.—A light purse, or an empty purse, poverty, or want of resources.—A long purse, or a heavy purse, wealth; riches.—Cold purse. See *cold*.—Halfpenny-purse, a small purse worn at the side: the name probably implies its use for the smallest coins, as, perhaps, the silver halfpence of the middle ages down to the seventeenth century.—Maundy purse. See *maundy*.—Mermald's purse. See *mermaid's purse*.—Privy purse. (a) An allowance for the private expenses of the British sovereign, forming part of the civil list. (b) An officer of the British royal household charged with the payment of the sovereign's private expenses. His official title is *keeper of the privy purse*.—Purse of state, in *her*, a bag or pouch resembling an armouillère, bearing the arms of the sovereign or state on the side, and having cords formed into an elaborate knot or plaiting.—Sword and purse, the military power and wealth of a nation.

purrl (pér), *v. t.*; pret. and pp. *purrl*, *purrl*, *purrl*. [*L. ME. pursen*, *porsen*; < *purrl*, *n.* For the sense 'wrinkle,' 'pucker' (like the mouth of a purse drawn together with a gathering-string), cf. *pucker*, as related to *poke*, a bag, sack, pocket.] I. *trans.* 1. To put in a purse.

gene poure people the pans; ther-of porse thou none,
Ac gene hem forth to poure folke that for my loue hit ask-
eth.

putanism (püt-tá-nizm), n. [< F. *putanisme* (= Sp. *putanismo*, *putaismo* = It. *putanismo*), prostitution, < *putain* (= It. *puttana*), a prostitute, < *pute*, a prostitute: see *put*³.] Customary lewdness or prostitution in a female.

putation (püt-tá'shon), n. [< ME. *putacion*, < OF. *putation*, < L. *putatio*(-n-), a pruning, lopping, also (LL.) a reckoning, computing, considering, < *putare*, pp. *putatus*, cleanse, trim, prune, fig. adjust, settle (*rationem* or *rationes*) accounts; hence reckon, count, compute, value, estimate, esteem, consider, think, suppose, believe; < *putus*, clean, clear: see *pute*.] 1. A lopping or pruning, as of trees; pruning.

Eke that be apte unto *putacion*

Of bowes drie or foule elacion.

Palladius, Husbandrie (E. E. T. S.), p. 91.

2. The act of considering, deeming, or supposing; supposition; estimation.

If we were not the actors and sufferers, it is not possible that we should be made the natural subjects of the accidents of another's body, by any *putation*, estimation, or misjudging whatsoever.

Baxter, Life of Faith, iii. 8.

putative (püt-tá-tiv), a. [< F. *putatif* = Sp. Pg. *putativo*, < LL. *putativus*, supposed, < L. *putare*, pp. *putatus*, think, suppose: see *putation*.] Supposed; reputed; commonly thought or deemed: as, the *putative* father of a child.

Thus things indifferent, being esteem'd useful or pious, became customary, and then came for reverence into a *putative* and usurp'd authority.

Jer. Taylor, Dissuasive from Popery, II. l. § 2.

Her *putative* parents had impressed,

On their departure, their enjoyment.

Browning, King and Book, l. 175.

Putative marriage, in canon law, a marriage contracted in violation of an impediment, but in good faith on the part of at least one party.

put-by (püt'bi), n. An excuse for setting aside or ignoring. See quotation under *put-off*.

put-case (püt'kás), n. [< *put*¹, v., + obj. *case*¹, n.] A propounder of hypotheses, or hypothetical cases.

He used to say that no man could be a good lawyer that was not a *put-case*.

Roger North, Lord Guilford, l. 20. (Davies.)

putchuk, *putchock* (pu-chuk', pu-chok'), n. [E. Ind.] In India, the costus-root.—Green or native green *putchuk*, the Chinese *Aristolochia recurviflora*: so called from some resemblance of its rootstock to the putchuk imported from India. It is used as a remedy for burns and indigestion, and like many other species of *Aristolochia*, is regarded as an antidote to snake-poison.

Physicians, however, now credit these plants with the virtues of diaphoretics, stimulant tonics, and emmenagogues only. The drug is obtained chiefly from cultivation, and is at Ningpo a large article of commerce.

pute (püt), a. [< L. *putus*, cleansed, clean, clear, pure, unmixed (usually joined with *purus*, pure: *purus putus*, or *purus ac putus*), orig. pp., < *pu*, in *purus*, pure, clean: see *pure*. From this adj. are also ult. E. *putamen*, *putation*, *putative*, *compute*, *count*, *account*, *dispute*, *repute*, etc.] Clear; pure; mere.

Arminius . . . acknowledges faith to be the pure *pute* gift of God.

Sp. Hall, Via Media (trans.), v. (Davies.)

Generally pure *pute* Italians, preferred in England, transmitted the gain they got . . . into their own country.

Fuller, Worthies, York, III. 464. (Davies.)

That cause . . . was pure and *pute* factions.

Roger North, Examen, p. 527. (Davies.)

puteal (püt-té-ál), n. [L., a stone curb surrounding the mouth of a well, < *puteus*, a well: see *pute*.] An inclosure surrounding a well to prevent persons from falling into it; a well-curb. Sculptured examples of both antiquity and the middle ages occur, among which are works of art of high excellence. See *cut* under *puteo*.

puteli (püt'é-li), n. [E. Ind.] A broad flat-bottomed boat, used for transporting the products of India down the Ganges. It is from 40 to

Puteli of the Ganges.

65 feet long, lightly made, and capable of conveying a heavy cargo. The puteli is surmounted by a large flat-topped shed, nearly as long as the boat, and carries a single large square sail.

puteriet, n. [ME., < OF. *puterie* (= Sp. *puteria*; ML. reflex *puteria*), prostitution, < *pute*, a prostitute: see *put*³.] Prostitution. *Chaucer*.

putid (püt'id), a. [< L. *putidus*, stinking, fetid, < *putere*, stink, be rotten, < *pu*, = Skt. *√puy*, stink. Cf. *putrid*.] 1. Stinking; rotten.

This Mother of divinest Love, as pure

As is that other *putid*!

J. Beaumont, Psyche, ll. 220.

2. Mean; low; worthless; foul; dirty; disgusting.

Putid fables and ridiculous fictions.

Jer. Taylor (?), Artif. Handsomeness, p. 126.

putidity (püt'id-i-ti), n. [< *putid* + -ity.] The quality of being putid; foulness; vileness; meanness.

putidness (püt'id-nés), n. [< *putid* + -ness.] The quality of being putid; rottenness; putidity.

High-tasted sauces made with garlic or onions, purposely applied to tainted meats, to make their putridness less perceptible.

Bp. Gauden, Tears of the Church, p. 199. (Davies.)

putlog (pút'log), *n.* [*< put¹ (†) + log¹.*] In *corp.*, one of a number of short pieces of tim-

a, putlog; *b*, putlog-bolts; *c*, ledger.

ber used in building to carry the floor of a scaffold. They are placed at right angles to the wall, one end resting on the ledgers of the scaffold, and the other in holes left in the wall, called *putlog-holes*.

putlog-hole (pút'log-hól), *n.* One of a series of small holes left in a wall, to admit the ends of putlogs.

put-off (pút'óf), *n.* An excuse; a shift for evasion or delay.

There be so many *put-offs*, so many put-byes, so many respects and considerations of worldly wisdom.

Latimer, Sermon of the Plough.

"We want t' man who came here for hiding last night; t' man called John Whitehead." "He came not here last night." "That's a *put-off*." He came this morning—then."

A. E. Barr, Friend Olivia, III.

putois (F. pron. pú-two'), *n.* [F. *putois* (ML. *puticius*), a polecat, its fur, a brush made of its fur, < L. *putere*, stink: see *putid*.] A brush supposed to be made of the hair of the polecat, used by painters of ceramic ware.

putoo (pút'ú), *n.* [Cingalese.] A dish made from flour or meal from the germinal shoots of the palmyra-nut, scraped cocoanut, and jack-fruit, much esteemed by the Cingalese.

Putorius (pú-tó'ri-us), *n.* [NL., < L. *putor*, a stench, < *putere*, stink: see *putid*.] An extensive genus of *Mustelidae*, belonging to the subfamily *Mustelinae*, having 34 teeth, instead of 38 as in *Mustela*, and containing the animals known as *weasels*, *stoats*, *ermine*s, *polecats*, *ferrets*, and *minks*. They are related to the martens and sables, but are smaller, with much slenderer body and tail, and very short limbs. They inhabit nearly all countries. They are often destructive to poultry, but are beneficial in destroying rats, mice, and other vermin. Species inhabiting cold countries turn white in winter, the tip of the tail remaining black. Such fur is highly prized, known as *ermine*. The common weasel, *Putorius vulgaris*, is one of the smallest species, 6 or 8 inches long, with a short tail. *P. erminea* is the common stoat or ermine. *P. f. s. f.* is the polecat, of which a variety, *P. furo*, commonly an albino with pink eyes, is the domesticated ferret. The spotted polecat is *P. sarmaticus*. (See *sarmaticus*.) The black-footed ferret of the western prairies of the United States is *P. (Cynomys) nigriceps*. The bridled weasel of South America is *P. frenatus*. A Siberian form, *P. sibiricus*, is the red sable, chorok, or kolinsky (which see). An aquatic species, somewhat otter-like, is *P. tetrozo*, the European mink. The American mink is *P. vison*. See *outs* under *Cynomys*, *ermine*, *ferret*, *mink*, *polecat*, and *weasel*.

putout, *n.* [ME., < OF. *puter*, a prostitute: see *put³*.] A pimp; a procurer; a keeper of a brothel. *Chaucer*.

put-pin (pút'pin), *n.* [*< put¹, v., + obj. pin¹.*] Same as *push-pin*.

Playing at *put-pin*, doting on some glass (Which, breath'd but on, his falsed glass doth pass).

Marston, Scourge of Villainie, viii. 206.

Putranjiva (put-ran-jí'vā), *n.* [NL. (Wallich, 1824), from a native name in India, < Skt. *putra*, son, + *jiva*, living.] A genus of apetalous trees of the order *Euphorbiaceae* and tribe *Phyllanthaceae*. It is characterized by numerous staminate flowers in dense heads at the nodes, each with a slender unequally five-lobed calyx and two or three stamens; pistillate flowers with three short spreading styles expanded into broad fleshy papillose branches; and an ovary of three carpels each with two ovules, becoming in fruit an ovoid drupe with one cell and one seed. The two species are natives of the mountains of central and southern India, and are large timber-trees with close-grained and very hard wood, bearing rigid and entire velvety alternate leaves, and axillary flowers, the staminate numerous and short-stalked and the pistillate one or few and long-stalked. *P. Roxburghii* is known in India as *wild olive*.

putredinous (pú-tred'í-nus), *a.* [*< OF. putredineux* = Pg. It. *putredinoso*, < LL. *putredo* (-din-), rottenness, < L. *putrere*, be putrid: see *putrid*.] Proceeding from putrefaction, or partaking of the putrefactive process; having an offensive smell.

A *putredinous* ferment coagulates all humours, as milk with rennet is turned.

Floyer, Animal Humours.

putrefacient (pú-tré-fá'shíent), *a.* and *n.* [= Pg. *putrefaciente*, < L. *putrefacien(t)s*, ppr. of *putrefacere*, putrefy: see *putrefy*.] 1. *a.* Same as *putrefactive*.

Putrefacient action on the blood and tissues after the lapse of some hours.

Allen, and Neurol., IX. 303.

II. *n.* An agent or a substance that produces putrefaction.

putrefacted (pú-tré-fak-ted), *a.* [Also *putrifacted*; < L. *putrefactus*, pp. of *putrefacere*, putrefy, + -ed².] Putrid; putrefied.

Vermine bred of *putrifacted* slime.

Marston, Antonio and Mellida, II., iv. 4.

putrefaction (pú-tré-fak'shón), *n.* [Also *putrifaction*; < ME. *putrifaccioun*, < OF. *putrefaction*, F. *putréfaction* = Pr. *putrefaccio* = Sp. *putrefaccion* = Pg. *putrefacção* = It. *putrefazione*, < LL. *putrefactio(n)-*, < L. *putrefacere*, pp. of *putrefacere*, putrefy: see *putrefy*.] 1. The act or process of putrefying; the decomposition of animal and vegetable substances, attended by the evolution of fetid gases. Putrefaction is at present believed to be a result of the activity of organisms of the simplest form—the *Schizomycetes*. It can therefore take place only when the conditions are favorable for the life and growth of these organisms. A temperature of from 60° to 80° F., a moderate degree of humidity, and limited access of air are the conditions most favorable to putrefaction. Extremes of heat and cold, salt, sugar, vinegar, carbolic acid, corrosive sublimate, and other antiseptics prevent putrefaction by destroying or rendering inactive the organisms which induce it. The chemical changes in a putrefying body are most complex. From proteid bodies are formed leucine, tyrosine, a considerable number of alkaloids, the ptomaines, compound ammonias, hydrogen sulphid, and many other solid and gaseous products. See *fermentation*, and *germ theory* (under *germ*).

Alle philosophis seyn that the feure contynuele is gendrid of *putrefaccioun* of blood and of corrupcion of humours. *Book of Quinte Essence* (ed. Furnivall), p. 21.

All creatures that have breath in their nostrils must suddenly return to *putrefaction*.

J. Walton, Complete Angler, p. 31.

Pasteur proved that in the special fermentation which bears the name of *putrefaction* the primum movens of the *putrefaction* resides in microscopic vibrios of absolutely the same order as those which compose the butyric ferment.

Life of Pasteur (trans.), p. 57.

2. Putrefied matter.

putrefactionist (pú-tré-fak'shus), *a.* [*< putrefacti(on) + -ous.*] Putrefying; putrid.

Drunkennesse, whose *putrefactionist* alime

Darkens the splendour of our common wealth.

Times Whistle (E. E. T. S.), p. 70.

putrefactive (pú-tré-fak'tiv), *a.* [Also *putrifactive*; = F. *putréfactif* = Sp. Pg. *putrefactivo* = It. *putrefattivo*, < L. *putrefactus*, pp. of *putrefacere*, putrefy: see *putrefy*.] 1. Pertaining to putrefaction: as, the *putrefactive* smell or process, or the *putrefactive* fermentation.

If the bone be corrupted, the *putrefactive* smell will discover it.

Wiseman, Surgery.

There were small signs yet of the acetous and *putrefactive* stages which were to follow in the victory and decline of Puritanism.

Lovell, Among my Books, 1st ser., p. 154.

2. Causing putrefaction.

The vessels of the living body, whether of man or animals, are sealed up beyond the reach of *putrefactive* germs so long as they are in a sound and healthy state.

S. B. Herriek, Wonders of Plant Life, p. 77.

putrefactiveness (pú-tré-fak'tiv-nes), *n.* Putrefactive character, quality, or condition. Also *putrifactiveness*.

putrefiable (pú-tré-fi-á-bl), *a.* [Also *putrifiable*; < *putrefy* + -able.] Liable to putrefy; subject to or causing putrefaction.

For absorption of *putrefiable* materials Remarch has used with great satisfaction turf enclosed in gauze bags.

W. T. Belfield, Rel. of Micro-Org. to Disease, p. 60.

putrefier (pú-tré-fi-ér), *n.* A putrefacient. Also *putrifier*.

An account of a series of experiments upon *putrefiers* and antiseptics.

Workshop Receipts, 2d ser., p. 196.

putrefy (pú-tré-fi), *v.*; pret. and pp. *putrefied*, ppr. *putrefying*. [Also *putrify*; < ME. *putrefien*, < OF. *putrefier*, F. *putréfier* = Sp. Pg. *putreficar* (< ML. *putreficare*) = It. *putrefare*, < L. *putrefacere*, cause to rot, putrefy, putrefieri, rot, putrefy, < *putrere*, be rotten (see *putrid*), + *fieri*, pass. of *facere*, make, do.] *It. trans.*

1. To render putrid; cause to decay with an offensive odor; cause to become fetid by rotting. See *putrefaction*.—2. To make carious or gangrenous.

A wound was so *putrefied* as to endanger the bone.

Sir W. Temple.

3. To corrupt; make foul or offensive. [Rare.]

They would but stink and *putrefy* the air.

Shak., 1 Hen. VI., iv. 7. 90.

II. *intrans.* To become putrid; decay with a fetid smell. See *putrefaction*.

Wounds and bruises, and *putrifying* sores. *Isa. i. 6*

Whence they shew uppe thaire fertillitee, So turne them with the plough to *putrife*; And after that thil lande shal multiplie.

Palladius, Husbandrie (E. E. T. S.), p. 182.

Many substances in nature which are solid do *putrify* and corrupt into worms.

Bacon, Advancement of Learning, I. 42.

=Syn. *Decay*, *Corrupt*, etc. See *rot*.

putrescence (pú-tres'ens), *n.* [*< F. putrescence* = It. *putrescenza*; as *putrescen(t)* + -ce.] Putrescent character or condition; tendency to putridity or decay; a putrid state.

We must confess in the common *putrescence* it may promote elevation, which the breaking of the bladder of gall, so small a part in man, cannot considerably advantage.

Sir T. Browne, Vulg. Err., iv. 6.

In attempting to sterilize a putrescible solution by means of cold, it was found that, though in some cases *putrescence* was delayed, in no case were the organisms completely destroyed.

Science, VI. 393.

putrescent (pú-tres'ent), *a.* [*< OF. putrescent* = It. *putrescente*, < L. *putrescen(t)s*, ppr. of *putrescere*, grow rotten, decay, freq. from *putrere*, be rotten or putrid: see *putrid*.] 1. Becoming or growing putrid, or fetidly rotten; in course of putrefying; tainted with putrefaction or decay: as, *putrescent* flesh.

Stately, externally powerful, although undermined and *putrescent* at the core, the death-stricken empire still dashed back the assaults of its barbarous enemies.

Molloy, Dutch Republic, I. 18.

If from the hospitals . . . All the diseases in one moat were gathered, Such was it here, and such a stench came from it As from putrescent limbs is wont to issue.

Longfellow, tr. of Dante's Inferno, xxix. 51.

2. Of or pertaining to the process of putrefaction: as, a *putrescent* smell.

putrescible (pú-tres'í-bl), *a.* [*< OF. (and F.) putrescible* = It. *putrescibile*, < L. *putrescere*, grow rotten, + -ible.] Subject to putrefaction; liable to become putrid: as, *putrescible* substances.

It does not appear to be *putrescible*.

Philosophical Transactions (1798), I. § 2.

Finely divided charcoal is usually stated to have strong antiseptic powers. It certainly has a remarkable action upon *putrescible* substances.

W. A. Miller, Elem. of Chem., § 355.

putrid (pú'trid), *a.* [*< F. putride* = Sp. *putrido* = Pg. It. *putrido*, < L. *putridus*, rotten, corrupt, < *putrere*, be rotten, *putris*, rotten; cf. *putere*, be rotten, Ir. *putar*, stinking, L. *pus*, matter, etc.: see *putid* and *pus*.] 1. In a state of decay or putrefaction; exhibiting putrefaction; corrupt; fetid from rottenness; stinking: said of animal and vegetable bodies: as, *putrid* flesh.

The wine to *putrid* blood converted flows.

Waller, Æneid, iv.

A wide and melancholy waste Of *putrid* marshes.

Shelley, Alastor.

2. Indicating a state of putrefaction; proceeding from or pertaining to putrefaction: as, a *putrid* scent.—*Putrid* fever. See *fever* 1.—*Putrid* sore throat, gangrenous pharyngitis.

putridity (pú'trid'í-ti), *n.* [= F. *putridité* = It. *putridità*; as *putrid* + -ity.] 1. The state of being putrid; corruption; fetid rottenness.—2. Putrid matter.

A hundred and thirty corpses of men, nay of women and even children, . . . lie heaped in that glaciére; putrid under *putridities*.

Carlyle, French Rev., II. v. 3.

putridness (pú'trid-nes), *n.* Putrid character or condition.

putrifacted, **putrifaction**, etc. See *putrefacted*, etc.

putrifaction (pú'tri-fi-ká'shón), *n.* [*< putrefy* + -ation (see -fy).] Putrefaction.

Putrifaction must needs be in a bodye.

Confutation of N. Shanton (1546).

putrify, *v.* See *putrefy*.

putrify 1 (pú'tri), *a.* [*< L. putris*, putridus, rotten: see *putrid*.] Putrid.

Howl not, thou *putry* mould! groan not, ye graves!

Marston, Antonio and Mellida, II. (Richardson.)

putry 2, *n.* Same as *puterie*.

putt 1 (put), *v.* 4. [A spelling of *putt*; obsolete in the general sense.] In *golf-playing*, to play with a putter; play when the ball lies at a short distance from the hole.

putt 1 (put), *n.* [*< putt* 1, *v.*] In *golf-playing*, a stroke made with a putter, or made in attempting to hole a ball.

putt 2, *n.* See *putt* 2.

puttah, *n.* Same as *patah*.

putter 1 (pút'ter), *n.* [*< putt* 1 + -er.] 1. One who puts or places: as, a *putter* of obstacles in one's way.—2. One who puts or hauls coal from the place where it is mined to the point

from which it is raised to the surface; one who transports coal on any underground road. Also called *haullier*, *drawer*, and *trammer*. [Little, if at all, used in the United States.]—3. One who puts or throws, especially a stone: as, he is but a poor *putter*. [In this sense pronounced put'er in Scotland.]

Fame saying that Troy trains up approved sons
In deeds of arms, braue putters-off of shafts,
For winging lances, masters of their craft.

Chapman, *Odyssey*, xviii. 379.

4 (put'er). In *golf-playing*, a club with a stiff and comparatively short shaft, generally used when the ball is on the putting-green.—*Putter* on. (a) One who urges, instigates, or incites; an instigator or inciter.

They vent reproaches

Most bitterly on you, as *putter* on

Of these exactions. *Shak.*, *Hen. VIII.*, i. 2. 24.

(b) One who puts or places something on something else.—*Putter out*, formerly, one who deposited money on going abroad, on condition of receiving a very much larger sum on his return, the money being forfeited in case of his non-return. This mode of gambling was practised in the reigns of Elizabeth and James I. On dangerous expeditions the money received was sometimes as much as five pounds for every pound deposited.

Or that there were such men

Whose heads stood in their breasts? which now we find
Each *putter-out* of five for one will bring us
Good warrant of. *Shak.*, *Tempest*, iii. 3. 43.

*putter*² (put'er), *v. i.* A variant of *potter*².

Lies abed Sunday morning, and gets up late to *putter*
with the furnace. *The Century*, xxvi. 636.

putti (put'ti), *n. pl.* [It., *pl. of putto*, a little child, < *L. putus*, a boy, child: see *pupul*.] Representations of Cupid-like nude children common in the art of the fifteenth and following centuries, especially in Italy.

puttier (put'tier), *n.* [*< putty, v., + -er*.] One who putties; one who fills up or cements with putty, as a glazier.

Cracked old houses where the painters and plumbers
and *puttyers* are always at work.

Thackeray, *Lovel the Widower*, ii.

putting-green (put'ing-grēn), *n.* In *golf*, all that part of the course within twenty yards of a hole, excepting hazards.

Some of the *putting-greens* [at St. Andrews] are not what they should be, . . . but others, again, are things of beauty. The green of the "hole o' cross" is probably the best in all the world of golf.

Golf (Badminton Library), p. 313.

putting-stone (put'ing-stōn), *n.* In Scotland, a heavy stone to be thrown with the hand, raised and thrust forward from the shoulder: chiefly used in gymnastic exercises or athletic sports.

She lifted the heavy *putting-stone*,

And gave a sad "Ohon!"

Ross the Red and White Lily (Child's Ballads, V. 177).

putto, *n.* See *puttoo*.

puttock (put'ok), *n.* [*< ME. puttok, potok*; origin uncertain.] A kind of hawk. (a) The kite or glede, *Mivus regalis*. (b) The common buzzard, *Buteo vulgaris*.

The Hen which when the *Puttocks* hath caught his
Chekin beginneth to cackle.

Lily, *Euphues*, *Anat. of Wit*, p. 92.

Who finds the partridge in the *puttock's* nest

But may imagine how the bird was dead,

Although the kite soar with unbloody beak?

Shak., 2 *Hen. VI.*, iii. 2. 191.

puttoo (put'tō), *n.* [*< Also putto; < Hind. puttū*.] A fabric made in Cashmere and neighboring countries of the longer and coarser wool of the goat, after the fine and soft undergrowth has been separated from it. See *cashmere shawl*, under *cashmere*. Also called *Cashgar cloth*.

putty (put'ti), *n.* [*< OF. potee*, brass, copper, tin, etc., calcined, also a potful, *F. potée*, powdered tin, oxid, putty, also a potful, < *pot*, a pot: see *pot*. Cf. *potin*, *potain*, *pot-metal*.] 1. A kind of paste or cement compounded of whitening, or soft carbonate of lime, and linseed-oil, mixed to the consistence of dough. In this state it is used by glaziers for fixing the panes of glass in window-sashes, etc., and also by house-painters to stop up holes and cavities in woodwork before painting. It is often tinted with various pigments to make it agree in color with the surface on which it is used.

2. A powder of oxid of tin, used in polishing glass and steel: sometimes called *jewelers' putty*.—3. A very fine cement, used by plasterers and stone-masons, made of lime only. See the quotation.

Fine stuff [mortar made of fine white lime] very carefully prepared, and so completely macerated as to be held in solution in water, which is allowed to evaporate till it is of sufficient consistence for working, is called *putty*, plasterers' *putty*. *Workshop Receipts*, 1st ser., p. 121.

4. A mixture of ground materials in which in potteries earthenware is dipped for glazing.—5. A mixture of clay and horse-dung used in making molds in foundries.—*Glycerin putty*, a kind of putty, more properly a cement, made of glycerin and litharge.

putty (put'ti), *v. t.*; pret. and pp. *puttied*, ppr. *puttying*. [*< putty, n.*] To cement with putty; fill up with putty.

putty-eye (put'ti-ī), *n.* A name given by pigeon-fanciers to the eyes of pigeons which have a thick orbit of a fleshy character.

putty-faced (put'ti-fast), *a.* Having a face resembling putty in pastiness or color.

putty-knife (put'ti-nif), *n.* A knife with a blunt,

Putty-knives.

flexible blade, used by glaziers for laying on putty; a stopping-knife.

putty-powder (put'ti-pou'dér), *n.* An artificially prepared oxid of tin (SnO₂), sometimes mixed with oxid of lead (PbO), used for polishing glass and other substances.

puttyroot (put'ti-rōt), *n.* An American orchid, *Aplectrum hiemale*, producing every year on a slender rootstock a corm an inch in diameter, filled with an extremely glutinous matter, which has been used as a cement, whence the name.

Puttyroot (*Aplectrum hiemale*).

1, upper part of flowering scape; 2, a leaf from a bulb of the season, showing attachment to bulb of preceding season; 3, fruiting scape.

Each corm persists till there are three or four horizontally connected. The newest sends up, late in summer, a single much-veined and plaited leaf, which lasts through the winter, and in spring a scape a foot or more high, with a loose raceme of brownish flowers. Also called *Adam and Eve*.

putty-work (put'ti-wérk), *n.* Decoration by means of a composition in which ornaments are modeled while it is soft, and which grows very hard. Coffers, picture-frames, shrines, etc., were elaborately decorated in this material in Italy in the sixteenth and seventeenth centuries, color being often added to the ornaments in relief.

put-up (put'up), *a.* Concocted or planned by intimates or insiders, but so as to appear to emanate from or be the work of others; speciously conceived, planned, or carried out: as, a *put-up* job. [*Colloq.*]

"Well, master," said Blathers. . . . "This warn't a *put-up* thing." "And what the devil's a *put-up* thing?" demanded the doctor impatiently. "We call it a *put-up* robbery, ladies," said Blathers, turning to them as if he pitied their ignorance, but had a contempt for the doctor's, "when the servants is in it."

Dickens, *Oliver Twist*, xxi. (*Dabbs*.)

puture, *culture* (pū'tūr, pul'tūr), *n.* [*< OF. peuture*, *puture*, *pouture*, *poture*, *puture*, food, nourishment, < *ML. "putura*, *putura*, food, potage, < *L. puls* (*pult*), a thick broth or pottage: see *pulse*.] A custom claimed by keepers in forests, and sometimes by bailiffs of hundreds, to take food for man, horse, and dog from the tenants and inhabitants within the perambulation of the forest, hundred, etc.

In 6 Henry VIII (1514) *puture* was paid for the forest which was reclaimed towards the close of that reign. *Baines*, *Hist. Lancashire*, II. 25.

puzi (puk'si), *n.* [*Mex. Ind.*] The larvæ of the various dipterous insects of the genus

Ephydra, which inhabit the alkali lakes of western North America, and are made into edible cakes: so called by Mexican Indians and Spanish Americans. See *Ephydra*, *ahuatl*, and *koochabee*.

Puzi Fly (*Ephydra californica*).
(Line shows natural size.)

*puy*¹, *n.* Same as *poy*.

*puy*² (pwē), *n.*

[*F. puy*: see *poy*, *pew*.] One of the small volcanic cones which are common in Auvergne, central France.

It is a most striking sight to see the small cones or *Puys* of the later date, of which there are not fewer than 250, still looking as fresh and perfect as though they had been in eruption within the present century.

Prestwich, *Geol.*, I. 363.

*Puya*¹ (pū'yā), *n.* [*NL. (Molina, 1782)*, from a native name in Chili.] A genus of monocotyledonous plants of the order *Bromeliaceæ*, unlike the rest of its tribe *Pitcairniæ* in its loculicidal, not septicidal, dehiscence, and otherwise characterized by a filiform style, three-valved capsule, and numerous seeds surrounded by a wing. There are 3 or 4 species, natives of Peru and Chili. They bear narrow spiny leaves crowded at the base or apex of the unbranched and sometimes arborescent stem, and a terminal simple or pyramidally compound raceme, with a single showy flower under each bract. Several species are in cultivation under glass, sometimes under the former name *Pourretia*, including white and yellow, and less often blue, pink, and green flowering varieties. See *chagual gum*, under *gum*.

*puya*² (pū'yā), *n.* 1. See *pooa*.—2. A textile fiber yielded by the *pooa*.

puysance, *puysant*. Middle English forms of *puissance*, *puissant*.

puzzelt, *n.* [*Appar. < OF. pucelle*, a girl, maid: see *pucelle*. Some compare *It. puzzolente*, filthy.] A dirty drab.

Pucelle or *puzzel*, dolphin or dogfish.

Shak., 1 *Hen. VI.*, i. 4. 107.

No, nor yet any droyle or *puzzel* in the country but will carry a nosegay in her hand.

Stubbs, *Anat. of Abuses*. (*Nares*.)

puzzle (puz'l), *n.* [*By apheresis, as if "pozol," "posol," from early mod. E. apposol, apposelle, apposelle, < ME. opposayle, a question put, < apposen, apposen, E. oppose, by apheresis pose, question: see oppose and pose*.] 1. A difficult question or problem; specifically, a riddle, or a toy or contrivance which is designed to try one's ingenuity.

Keep it like a *puzzle*, chest in chest,
With each chest lock'd and padlock'd thirty-fold, . . .
I yet should strike upon a sudden means
To dig, pick, open, find, and read the charm.
Tennyson, *Merlin and Vivien*.

2. Embarrassment; perplexity: as, to be in a *puzzle*, or in a state of *puzzle*.

puzzle (puz'l), *v.*; pret. and pp. *puzzled*, ppr. *puzzling*. [*< puzzle, n.*] 1. *trans.* 1. To perplex or pose with or as with difficult points, problems, or questions; put to a stand; gravel.

My Thoughts are now *puzzled* about my Voyage to the Baltic Sea upon the King's Service, otherwise I would have ventured upon an Epithalamium.

Howell, *Letters*, ii. 72.

A very shrewd disputant in those points is dexterous in *puzzling* others.

Dr. H. More, *Divine Dialogues*.

You meet him under that name inognito; then, if an accident should happen, both you and she may be safe, and *puzzle* the truth.

Steele, *Lying Lover*, ii. 1.

2. To entangle; make intricate.

The ways of heaven are dark and intricate,
Puzzled in mazes and perplex'd with error.

Addison, *Cato*, i. 1.

They disentangle from the *puzzled* skein . . .
The threads of politic and shrewd design
That ran through all his purposes.

Couper, *Task*, iii. 145.

3. To resolve or discover by long cogitation or careful investigation; make out by mental labor; cogitate; with *out*.

He endeavoured to *puzzle* its principle *out* for himself.

Gladsome.

The bloodhound has a much more delicate nose than any other known breed of hound, and can puzzle out a cold scent under the most adverse conditions.

The Century, XXXVIII, 190.

=Syn. 1. *Perplex*, etc. (see *embarrass*), poses, nonplus, bewildered, stagger.

II. *intrans.* To be bewildered; be perplexed or posed.

"And now," he cried, "I shall be pleased to get Beyond the Bible—there I puzzle yet." Crabbe.

puzzle-cup (puz'l-kup), *n.* Same as *surprise-cup*.

A two-handled puzzle-cup painted with flowers. Hamilton Sale Catalogue, 1882, No. 306.

puzzledom (puz'l-dum), *n.* [*< puzzle + -dom.*] A puzzled or perplexed condition; bewilderment. [Colloq.]

I was resolved to travel with him into the land of puzzledom. Richardson, Clarissa Harlowe, VI, 367. (Davies.)

The wonderful interior of the double basilica opens upon us. The first feeling is simply puzzledom. E. A. Freeman, Venice, p. 79.

puzzlehead (puz'l-hed), *n.* One who puzzles over matters that are plain and intelligible; a person of confused notions.

"All this theistic philosophy of yours only means so much grist to their mill in the end." "They don't see it in that light themselves," said Robert, smiling. "No," returned the Squire, "because most men are puzzleheads." Mrs. Humphry Ward, Robert Elsmere, xli.

puzzle-headed (puz'l-hed'ed), *a.* Given to puzzling over matters that are plain and intelligible; also, characteristic of puzzleheads.

He [Maittaire] seems to have been a puzzle-headed man, with a large share of scholarship, but with little geometry or logic in his head, without method, and possessed of little genius. Johnson, in Boswell, an. 1780.

puzzle-headedness (puz'l-hed'ed-nes), *n.* The state of being puzzle-headed or a puzzlehead. The Academy, April 26, 1890, p. 291.

puzzle-jug (puz'l-jug), *n.* A surprise-cup.

puzzle-lock (puz'l-lok), *n.* See *lock*.

At one time it used to be supposed that locks which could only be opened by setting a number of rings or disks to a particular combination of letters could not possibly be opened by anybody who was not in possession of the secret; and hence they were also called puzzle-locks. Encyc. Brit., XIV, 746.

puzzlement (puz'l-mnt), *n.* [*< puzzle + -ment.*] The state of being puzzled; bewilderment.

"I have heard of a wedding very often," said Fanny, with a pretty look of puzzlement and doubt, "but I don't know exactly what it means." Bulwer, Night and Morning, v. 6.

A delightful air of puzzlement came over her face. W. C. Russell, Jack's Courtship, xxviii.

puzzle-monkey (puz'l-mung'ki), *n.* [*< puzzle, v., + obj. monkey.*] Same as *monkey-puzzle*. See *Araucaria*.

puzzle-peg (puz'l-peg), *n.* A short piece of board fastened under the lower jaw of a dog, and projecting a few inches beyond it, to prevent him from putting his nose close to the ground.

puzzler (puz'lér), *n.* [*< puzzle + -er.*] One who or that which puzzles or perplexes.

Hebrew, the general puzzler of old heads. A. Brome, Elegy on his Schoolmaster.

puzzle-ring (puz'l-ring), *n.* A number of small rings intertwined with one another so that they cannot be separated, the puzzle being to bring them together in the form of a single ring or in some other combination, as a sort of knot.

puzzling (puz'ling), *p. a.* [Pr. of *puzzle, v.*] 1. Perplexing; embarrassing; bewildering.—2. Evidencing bewilderment or perplexity; easily bewildered or perplexed.

The servant is a puzzling fool, that heeds nothing. Sir R. L'Estrange.

puzzlingly (puz'ling-li), *adv.* In a puzzling manner; perplexingly.

puzzolana, puzzolano (puz-ō-lā'nā, puz-ō-lā'nō), *n.* Same as *pozzolana*.

puzzolite (puz-ō-lit), *n.* [*< puzzol(ana) + -ite.*] Same as *pozzolana*.

pwys, *n.* [W., a state of rest, weight, a weight.] A Welsh weight of wool, about two pounds.

pxt. A contraction of the Latin *pinxit*, '(He) painted (it).'

pyæmia, pyæmic. See *pyæmia, pyæmic*.

Pyænepsia (pi-ænep'si-ā), *n. pl.* [*< Gr. Πυænepsia* (sc. *ἐπέα*), an Athenian festival (see *def.*), said to be so called from a dish of beans which was then cooked and eaten, *< πᾶνός*, a bean, *+ ἐπερ*, boil.] In ancient Athens, an annual festival of Apollo, celebrated on the 7th of the month Pyænepsion (October–November). It had the character of a harvest-feast.

pyarthrosis (pi-ār-thrō'sis), *n.* [NL., *< Gr. πᾶν*, pus (see *pus*), *+ ἄρθρωσις*, a jointing; see *arthrosis*.] The presence of pus in a joint.

pyat, *n.* See *piet*.

Pycnanthemum (pik-nan'thē-mum), *n.* [NL. (F. A. Michaux, 1803), so called in allusion to the dense inflorescence; *< Gr. πυκνός*, thick, dense, *+ ἄνθεμον*, blossom.] A genus of gamopetalous plants of the order Labiales, tribe Satureiæ, and subtribe Menthoideæ. It is characterized by its four nearly equal straight and divergent stamens, a calyx sometimes two-lipped, with five teeth and about thirteen nerves, and a somewhat two-lipped corolla, with five ovate lobes, the flowers in dense verticillasters, involucre with crowded bracts, and commonly corymbosely panicle. The 18 species, known as *mountain-mint*, and sometimes as *American basil* (see *basil*), are North American, and all but one are natives of the eastern or southern United States. They are erect and rigid perennial herbs, warmly aromatic and odoriferous, often hoary with minute down, and with flat-topped inflorescence, frequently conspicuous by reason of large whitened floral leaves. The flowers are whitish or purple and purple-dotted. They are commonly dimorphic in having in different flowers their stamens either exerted or included. The *P. lanceolatum* is sometimes known as *Virginian thyme* or *prairie-hyssop*. See cut under *linear*.

Pycnaspideæ (pik-nas-pid'ē-ē), *n. pl.* [NL., *< Gr. πυκνός*, thick, dense, *+ ἀσπίς* (*ασπίδ*), a round shield.] In Sundeval's system of classification, the fourth cohort of scutellipantar *Paseres*, including a heterogeneous group of chiefly Neotropical birds, such as those of the genera *Rupicola*, *Chasmorhynchus*, *Cephalopterus*, *Tityra*, and *Lipaugus*, to which are added the East Indian genera *Calyptomena*, *Eurylemus*, and others.

pycnaspidean (pik-nas-pid'ē-an), *a.* [*< Pycnaspideæ + -an.*] In ornith., having the planta, or back of the tarsus, studded with many small irregular scales or plates, as a modification of the scutellipantar tarsus.

pycnaster (pik-nas'tēr), *n.* [*< Gr. πυκνός*, thick, dense, *+ ἀστήρ*, a star.] A kind of sponge-spicule. Solas.

pycnid, pycnid (pik'nid), *n.* Same as *pycnidium*, 1.

pycnides, *n.* Plural of *pycnis*.

pycnidia, *n.* Plural of *pycnidium*.

pycnidial (pik-nid'i-al), *a.* [*< pycnidium + -al.*] Relating to a pycnidium, or having its character.

pycnidiophore (pik-nid'i-ō-fōr), *n.* [*< NL. pycnidium, q. v., + Gr. φέρειν* = *E. bear*.] In bot., a compound sporophore bearing pycnidia.

pycnidiospore (pik-nid'i-ō-spōr), *n.* [*< NL. pycnidium + Gr. σπόρος*, seed.] In bot., same as *stylospore*.

pycnidium (pik-nid'i-um), *n.*; pl. *pycnidia* (-ē). [NL., *< Gr. πυκνός*, thick, dense, *+ dim. -idium*.] 1. In bot., a receptacle in ascomycetous fungi, resembling a peritheciium, in which stylospores or pycnosporos are produced: same as *clinosporangium*. See *stylospore*. Also *pycnid, pycnide*.—2. [cap.] [NL.] In entom., a genus of coleopterous insects of the family Tenebrionidae. Also called *Oochrotus*. Erichson, 1846.

pycnis (pik'nis), *n.*; pl. *pycnides* (pik'ni-dēz). [NL., *< Gr. πυκνός*, thick, dense, compact.] In bot., the same or nearly the same as *clinosporangium*.

pycnite (pik'nit), *n.* [*< Gr. πυκνός*, thick, dense, compact, *+ -ite*.] A compact columnar variety of topaz, from the tin-mines of Saxony and Bohemia.

Pycnocomia (pik-nok'ō-mā), *n.* [NL. (Benth, 1849), *< Gr. πυκνός*, thick, *+ κόμη*, hair (alluding to the stamens).] A genus of apetalous shrubs of the order Euphorbiaceæ, tribe Crotonæ, and subtribe Plukenetieæ. It is characterized by numerous stamens which are often flexuous in the bud, small terminal anthers, and a long columnar style. The 8 species are equally divided in nativity between tropical Africa and the Mascarene Islands. They are shrubs, sometimes becoming small trees, bearing large entire leaves crowded at the end of the branches, and monœcious flowers in racemes in the upper axils, remarkable for the large number of the elongated stamens, often over fifty, borne on an elevated receptacle and intermixed with glands. See *bomah-nut*.

pycnocnidium (pik'nō-kō-nid'i-um), *n.*; pl. *pycnocnidia* (-ē). [NL., *< Gr. πυκνός*, thick, *+ NL. conidium, q. v.*] In mycol., an asexually produced spore or conidium the character of which has recently (1888) been demonstrated. It is what has been called a *spermatium* in certain lichens, and was thought to be a fertilizing organ, but on being sown on a proper medium it immediately germinated and produced a thallus.

pycnodont (pik'nō-dont), *a. and n.* I. *a.* Pertaining to the *Pycnodontidae*, or having their characters

II. *n.* A fossil fish of the family *Pycnodontidae*.

Pycnodontes (pik-nō-dont'ēz), *n. pl.* [NL., pl. of *Pycnodus* (-odont-).] Same as *Pycnodontidae*.

Pycnodontidae (pik-nō-dont'i-dē), *n. pl.* [NL., *< Pycnodus* (-odont-) + *-idae*.] A family or suborder of ganoid fishes, typified by the genus *Pycnodus*. The tail is homocercal; the neural arches and ribs are ossified; the roots of the ribs are but little expanded in the older genera, but enlarged in the later ones, so as to simulate vertebrae; the paired fins are not lobate; the teeth on the palate and on the sides of the mandible are obtuse; the intermaxillary teeth are incisiform; and none of the fins are fulcrate. These fishes are characteristic of the Mesozoic and Tertiary; all are extinct.

Pycnodontini (pik'nō-dont'i-ni), *n. pl.* [NL., *< Pycnodus* (-odont-) + *-ini*.] Same as *Pycnodontoides*.

pycnodontoid (pik-nō-dont'oid), *a. and n.* I. *a.* Resembling or related to a pycnodont; belonging to the *Pycnodontoides*.

II. *n.* A member of the *Pycnodontoides*.

Pycnodontoides (pik'nō-dont'oi-dē-ī), *n. pl.* [NL., *< Pycnodus* (-odont-) + *-oides*.] A suborder of ganoid fishes, characterized by a persistent notochord, rhombic scales in pleurolepidal rows, paired fins without axial skeleton, and effulcate and branchiostegal rays. The principal family is that of the *Pycnodontidae*.

Pycnodus (pik'nō-dus), *n.* [NL. (Agassiz, 1833), *< Gr. πυκνός*, thick, *+ δούς* (*δοῦν*) = *E. tooth*.] The typical genus of *Pycnodontidae*.

Pycnogonata (pik-nō-gon'a-tā), *n. pl.* [NL., *< Gr. πυκνός*, thick, *+ γόνυ* (*γονατ*), knee, joint.] Same as *Pycnogonida*.

Pycnogonida (pik-nō-gon'i-dē), *n. pl.* [NL., *< Pycnogonum* + *-ida*.] A group of marine arthropod articulate animals, combining some characters of both *Crustacea* and *Arachnida* with others of neither of these classes; the sea-spiders. They have a four-segmented cephalothorax bearing four pairs of many-jointed legs ending in claws, and in the female a pair of additional appendages

Ammothea pycnogonoides, one of the *Pycnogonida*—female. *a*, esophagus; *b*, stomach, prolonged into the limbs *e* and antennae *d*; *c*, rectum.

between the anterior legs; a rudimentary unsegmented abdomen; a tubular or proboscis-like mouth, simple or appendaged; four ocelli; no respiratory organs; and the sexes distinct. The palpi when present have from five to nine joints and end in a claw. The group has been variously rated as a family, suborder, order, subclass, and class, and has been called or placed in *Arachnoida*, *Aranei-formia*, *Aporobranchia*, *Lavigrada*, *Nymphonacea*, *Pan-topoda*, *Podocornata*, *Polygynopoda*, *Pseudarachna*, *Pycnogonata*, *Pycnogonidae*, *Pycnogonidea*, and *Pycnogonida*. Some are parasitic, others are found moving sluggishly among seaweeds. Leading genera are *Pycnogonum*, *Phoxichilus*, *Nymphon*, and *Ammothea*. See also cut under *Nymphon*.

Pycnogonidae (pik-nō-gon'i-dē), *n. pl.* [NL., *< Pycnogonum* + *-idae*.] 1. A family of *Pycnogonida*, typified by the genus *Pycnogonum*, containing parasites of comparatively stout form, with relatively short and knotty legs, and tubular mouth without either mandibles or palpi.—2. Same as the group *Pycnogonida*.

Pycnogonidea (pik'nō-gō-nid'ē-ē), *n. pl.* [NL.] Same as *Pycnogonida*.

Pycnogonides (pik'nō-gon'i-dēz), *n. pl.* [NL.] Same as *Pycnogonida*.

pycnogonidium (pik'nō-gō-nid'i-um), *n.*; pl. *pycnogonidia* (-ē). [NL., *< Gr. πυκνός*, thick, *+ NL. gonidium*.] In bot., same as *stylospore*.

pycnogonoid (pik-nog'ō-noid), *a. and n.* I. *a.* Resembling a sea-spider; of or pertaining to the *Pycnogonida*.

II. n. Any member of the *Pynogonida*.
Pynogonum (pik-nog'ō-num), *n.* [NL., < Gr. πυνός, thick, + γόνυ, knee, joint.] The typical genus of *Pynogonidae*. *P. littorale* is a parasite of cetaceans, and is half an inch long.

pynometer (pik-nom'e-tēr), *n.* [*<* Gr. πυνός, thick, dense, + μέτρον, measure.] An instrument for determining the relative density or specific gravity of solid bodies; a specific-gravity flask. It consists of a glass flask with a long tubular stopper. The flask, when filled with distilled water, and when the stopper is pressed in till the water overflows through the tubule of the stopper, will at any given temperature hold a specific volume and therefore a specific weight of the liquid. The combined weight of the flask and its stopper, and the weight of water it contains when the stopper is pressed in, having been ascertained, and

Pynometers.

also the total weight of the flask and its contents after the solid body has been placed in it, the then unfilled space refilled with distilled water, and the stopper again pressed in, the weight of the solid body in air and the weight of the water displaced by it when it is put in the pynometer can be easily determined. These are the data necessary to compute the relative density or specific gravity of the body—a unit of mass of distilled water at 4° C. divided by its apparent volume at the same temperature being the usual unit of density. This unit is written "1.000" in specific-gravity tables in which the specific gravity of bodies lighter than water is expressed in three places of decimals. See *density*, *densimeter*, *specific gravity* (under *gravity*), *volume*, and *mass*.

pynometochia (pik'nō-me-tō'ki-ā), *n.* [NL., < Gr. πυνός, thick, close, crowded, + μετοχή, a participle.] Use of participles or participial clauses at short intervals; close succession of participles. Compare *oligometochia*.

pynometochic (pik'nō-me-tō'kik), *a.* [*<* *pynometochia* + *-ic*.] Characterized by using or containing participles in close succession.

pynon (pik'nōn), *n.* [Also *pyknon*; < Gr. πυνόν, neut. of πυνός, thick, dense, close, compact.] 1. In *anc. Gr. music*, one of the short intervals in the chromatic or enharmonic scales, usually about equivalent to a quarter-step.—2. In *medieval music*, a half-step or semitone.

Pynonotidae (pik'nō-not'i-dē), *n. pl.* [NL., < *Pynonotus* + *-idae*.] The bulbuls, rock-thrushes, or *Pynonotinae* rated as a family of *Passeres*.

Pynonotinae (pik'nō-nō-ti'nē), *n. pl.* [NL., < *Pynonotus* + *-inae*.] A subfamily of turdiform or thrush-like oscine passerine birds, placed in the family *Turdidae*, or merged in the subfamily

Brachypodinae; the bulbuls or rock-thrushes, typified by the genus *Pynonotus*.

pynonotine (pik-nō-nō'tin), *a.* Resembling or related to *Pynonotus*; belonging to the *Pynonotinae*.

Pynonotus (pik-nō-nō'tus), *n.* [NL. (Kuhl, 1826), < Gr. πυνός, thick, + νότος, the back.] An extensive genus of Old World thrush-like passerine birds, typical of the subfamily *Pynonotinae* or family *Pynonotidae*. It contains about fifty kinds of bulbuls, ranging from Persia and Palestine to South Africa. Also spelled *Picnonotus*. See cut in preceding column.

pynospore (pik'nō-spōr), *n.* [*<* Gr. πυνός, close, + σπόρος, seed.] Same as *stylospore*. *De Bary*.

pynostyle (pik'nō-stīl), *a.* [*<* Gr. πυνός, thick, close, compact, + στήλη, column.] In *classical columnar arch*, according to the Vitruvian system, noting a conventional intercolumniation, less than that usually employed. It is commonly reckoned at one diameter and a half.

pyet, *n.* See *pie*¹, *pie*², etc.

pyebaldt, *a.* An obsolete form of *piebald*.

pyedema (pi-ē-dē'mā), *n.* [NL., < Gr. πύον, pus (see *pus*), + οίδημα, a swelling, tumor.] Infiltration with pus.

pyelitic (pi-e-lit'ik), *a.* [*<* *pyelitis* + *-ic*.] Of or pertaining to *pyelitis*; affected with *pyelitis*.

pyelitis (pi-e-lit'is), *n.* [NL., < Gr. πύελος, a trough or pan, hence the pelvis, + *-itis*.] Inflammation of the pelvis of the kidney. Also called *endonephritis*.

pyelocystitis (pi'e-lō-sis-ti'tis), *n.* [NL., < Gr. πύελος, pelvis, + κύστις, bladder, + *-itis*.] Inflammation of the renal pelvis and of the urinary bladder.

pyelonephritic (pi'e-lō-nef-rit'ik), *a.* [*<* *pyelonephritis* + *-ic*.] Of, pertaining to, or affected with *pyelonephritis*.

pyelonephritis (pi'e-lō-nef-rit'is), *n.* [NL., < Gr. πύελος, pelvis, + νεφρός, kidney, + *-itis*.] Inflammation of the kidney and the renal pelvis.

pyemia, **pyæmia** (pi-ē-mi-ā), *n.* [NL. *pyæmia*, < Gr. πύον, pus (see *pus*), + αἷμα, blood.] In *pathol.*, a febrile disease caused by the absorption of pus, or certain of its constituents, or of its bacteria, with the formation of metastatic abscesses.

pyemic, **pyæmic** (pi-ē-mik), *a.* [*<* *pyemia*, *pyæmia* + *-ic*.] Of, pertaining to, or characterized by *pyemia*; of the nature of *pyemia*; affected with *pyemia*.

pyengadu (pi-eng'gā-dō), *n.* [E. Ind.] An acacia-like tree, *Xylia dolabriformis*, one of the ironwoods, found in considerable quantities in India, Burma, etc. It rises 70 or 80 feet without branches, and furnishes a reddish-brown timber in large sizes and of remarkable quality. It is heavier than water, and so hard that the Burmese work it only before seasoning. It resists decay even better than teak, and its heartwood is proof against white ants and teredo. From its power of resisting shocks, it is valued for gun-carriages, but it is also used for numerous other purposes requiring strength, hardness, and durability. Also *pyngado*.

pye-powder, *n.* An old spelling of *piepowder*.

pyet, *n.* A variant of *pie*.

Pygæra (pi-jē'rā), *n.* [NL. (Ochsenheimer, 1810), < Gr. πύγη, rump, + αἶψα, raise, lift up.] A genus of lepidopterous insects of the bombycid family *Notodontidae*, occurring in Europe and Asia; the buff-tips. *P. bucephala* is an example.

pygal (pi'gal), *a.* and *n.* [*<* Gr. πύγη, rump, + *-al*.] 1. *a.* In *zool.*, of or pertaining to the rump or posterior part of an animal.—**Pygal plate** or **shield**, in *herpet.*, one of the posterior median pieces of the carapace of a turtle. See *pygidium*, *uro-pygium*, and cuts under *carapace* and *Chelonina*.

II. n. The posterior median or supracaudal plate of the carapace of a tortoise; a pygal shield.

pygarg (pi'gärg), *n.* [*<* L. *pygargus*, a kind of antelope, also a kind of eagle, < Gr. πύργος, a kind of antelope, also the white-tailed eagle, *Falco albicilla*, also a kind of sandpiper, *Totanus ochropus*, lit. 'white-rumped,' < πύγη, rump, + ἀργός, shining, white.] 1. A kind of antelope, perhaps the addax.

The hart, and the roebuck, and the fallow deer, and the wild goat, and the pygarg (marg. or, bison; Heb. *dishon*), and the wild ox, and the chamols. Deut. xiv. 5.

2. The osprey, sea-eagle, or fish-hawk.

pygargus, *n.* Same as *pygarg*, 2.

pygargus (pi-gär'gus), *n.*; *pl.* *pygargi* (-jī). [NL.: see *pygarg*.] 1. Same as *pygarg*, 2.—2. [cap.] [NL.] A genus of hawks: same as *Circus*. Koch, 1816.

pyght. Same as *pight*, an obsolete past participle of *pitch*¹.

pygidial (pi-jid'i-al), *a.* [*<* *pygidium* + *-al*.] Of or pertaining to the *pygidium*; caudal; anal; cercal.

Pygididae (pi-jī-dī'i-dē), *n. pl.* [NL., < *Pygidium* + *-idae*.] A family of nematognathous fishes, typified by the genus *Pygidium*. They have a naked body, air-bladder confined in a capsule formed by the lateral processes of the anterior vertebrae only, the dorsal generally posterior, and no adipose fin. The species, about 40, are confined to the fresh waters of South America. Also called *Trichomycteridae*.

pygidium (pi-jid'i-um), *n.*; *pl.* *pygidia* (-jī). [NL., < Gr. πύγη, rump, + dim. -ιδιον.] 1. A posterior part of the body, in any way distinguished; an

Posterior End of *Polynoe*, a polychaetous annelid.

A, from above, B, from below, showing *pygidium*, etc.; c, c', notopodial and neuropodial cirri of last true somite of the body; d, cirri of *pygidium*; g, setae; A, inferior tubercle; x, anus.

anal, caudal, or pygal part or organ: said chiefly of insects, crustaceans, and worms. (a) In *entom.*, the last dorsabdominal segment, when modified or specialized, as into an ovipositor, sting, anal forceps or cerci, etc. The term is much used in the classification of coleoptera, hymenoptera, and some of the homoptera. In *Coleoptera*, the term generally applies to any part of the dorsabdominal segments which may be visible beyond the ends of the closed elytra. This is usually harder than the part covered by the elytra. When more than one segment is thus exposed, *pygidium* may be restricted to the last one, the next preceding being distinguished as *propygidium*. (b) The terminal division of the body of a trilobite. See cut under *Trilobites*. (c) The terminal segment of a worm. 2. [cap.] A genus of nematognathus, typical of the family *Pygididae*. Later called *Trichomycterus*.—**Divided pygidium**. See *divided*.

pygmean, **pygmean** (pig-mē'an), *a.* [*<* L. *pygmaeus*, < Gr. πύγματος, dwarfish: see *pygmy*, *pygmy*.] Pertaining to a pygmy or dwarf; very small; dwarfish.

Throng numberless, like that *pygmean* race
 Beyond the Indian mount. Milton, P. L., l. 780.

pygmy, **pygmy** (pig'mi), *n.* and *a.* [Early mod. E. also *pygme*, *pygme*, *pygme*; < ME. *pygney*, *pygney*, *pygme* = OF. *pygme*, *pygme*, F. *pygme* = Sp. *pygmeo* = Pg. *pygmeo*, *pygmeo* = It. *pygmeo* = G. *pygme* = Sw. *pygme* = Dan. *pygme* = Russ. *pygme*, < L. *Pygmaeus*, a Pygmy, dwarf, as adj. dwarfish, < Gr. Πύγμας, in pl. Πύγμαιος, a Pygmy, a dwarf, adj. dwarfish, lit. long or tall as a πύγμη, < πύγη, a measure of length, the distance from the elbow to the knuckles, equal to 18 δάκτυλοι ('fingers') or about 13½ inches, a particular use of πύγμη, a fist, akin to L. *pygnus*, the fist: see *pugil*¹, *pugnacious*.] 1. *n.*; *pl.* *pygmies* (-miz). 1. [cap.] One of a fabulous race of dwarfs, mentioned by various ancient authors. The *Pygmies* (*Pygmaei*, with an eponymic ancestor *Pygmaeus*) of Greek fable were represented by Homer as dwelling on the southern shores of Ocean, and as being warred upon by the cranes in their annual migrations. Later writers placed them in India and elsewhere. The African *Pygmies* described by Herodotus, and hitherto supposed to be equally fabulous, were apparently the same as the remarkable race or races of dwarfs found by recent explorers in various parts of equatorial Africa, especially those discovered by Stanley (1888) in the forests of the upper Congo region.

Hence—2. A little or dwarfish person; a dwarf; also, anything very small of its kind.

In another Ylether ben litylle folk, as Dwerghes; and thei ben to so meche as the *Pygmies*, and thei han no Mouthe, but in stede of hire Mouthe thei han a litylle round hole. Mandeville, Travels, p. 265.

Thy God reigns in his Ark, and I on Earth:
 I Challenge Him. Him (if he dare come forth),
 Not thee, base *Pygme*.
 Sylvester, tr. of Du Bartas's Weeks, II, The Trophies.
Pygmies are *pygmies* still though perch'd on Alps,
 And *pyramids* are *pyramids* in vales.
 Young, Night Thoughts, vi.

3. The chimpanzee: perhaps as the supposed original of the fabled *Pygmies*.

II. a. 1. Belonging to or resembling a pygmy; pygmean; dwarfish; very small of its kind; little.

Behold the Child among his new-born blisses,
 A six years' Darling of a *pygmy* size.
 Wordsworth, Ode to Immortality.

2. In *zool.*, very small of its kind; dwarfish or dwarf: applied to many animals.

White-eared Bulbul (*Pynonotus leucotis*).

pygmy, pigmy (pig'mi), *v. t.*; pret. and pp. *pygmied, pigmied*, ppr. *pygmying, pigmying*. [*< pygmy, n.*] To make like a pygmy; dwarf. [Rare.]

Stand off, thou poetaster, from thy press,
Who *pygmies* martyrs with thy dwarf-like verse.
Wood, *East Oxon.* (1st ed.), II. 799. (*Latham.*)

pygmy-weed (pig'mi-wēd), *n.* A plant, *Tillaea simplex*, a tufted annual an inch or two high, found on muddy banks from Nantucket to Maryland.

Pygobranchia (pi-gō-brang'ki-ā), *n. pl.* [NL., *< Gr. πυγή, rump, + βράγχια, gills.*] In J. E. Gray's classification (1821), one of two orders (the other being *Polybranchia*) of gymnobranchiate gastropods, having plumose or branching gills surrounding the anus on the middle of the hinder part of the back, and the skin more or less spiculous. It was framed to receive the families *Onchidoridae*, *Dorididae*, *Goniodoridae*, *Polyceridae*, *Triopidae*, and *Ceratoleomidae*. *Anthobranchia* is a synonym.

Pygobranchiata (pi-gō-brang'ki-ā'tā), *n. pl.* [NL., neut. pl. of *pygobranchiatus*: see *pygobranchiate*.] Same as *Pygobranchia*.

pygobranchiate (pi-gō-brang'ki-āt), *a.* [*< NL. pygobranchiatus, < Gr. πυγή, rump, + βράγχια, gills: see branchiate.*] Having gills around the anus; of or pertaining to the *Pygobranchiata*.

pygodidymus (pi-gō-did'i-mus), *n.*; pl. *pygodidymi* (-mi). [NL., *< Gr. πυγή, rump, + διδυμος, double, twofold, twin.*] Same as *dipygus*.

pygopagus (pi-gop'a-gus), *n.*; pl. *pygopagi* (-gi). [NL., *< Gr. πυγή, rump, + πάγος, that which is fixed or firmly set, < πηγνύω, make fast, make solid.*] In *teratol.*, a double monster with union at the buttocks.

pygoparasiticus (pi-gō-par-a-sit'i-kus), *n.*; pl. *pygoparasitici* (-si). [NL., *< Gr. πυγή, rump, + παρασιτικός, parasitic.*] In *teratol.*, a pygopagus where one fetus is a parasite.

pygope (pi'gōp), *n.* A lizard of the family *Pygopodidae*; a pygopod.

Pygopidae (pi-gop'i-dē), *n. pl.* [NL.] Same as *Pygopodidae*.

pygopod (pi'gō-pod), *a. and n.* [*< Gr. πυγή, rump, + ποῖς (pod-) = E. foot.*] I. *a.* 1. In *ornith.*, rump-footed, as an auk, loon, or grebe; having the legs inserted far back, appearing close by the rump; of or pertaining to the *Pygopodes*.—2. In *herpet.*, of or pertaining to the *Pygopodidae*.

II. *n.* In *herpet.*, a lizard of the family *Pygopodidae*.

Pygopodes (pi-gop'ō-dēz), *n. pl.* [NL.: see *pygopod*.] An order of swimming and diving birds, the rump-footed birds, having the legs inserted very far back, and buried in the common integument of the body nearly to the heel. Its limits have varied with different writers, but it is now generally considered to include the loons, grebes, and auks, and to exclude the penguins, which, though pygopodous, are otherwise very different in important respects. It then consists of the families *Colymbidae*, *Podicipedidae*, and *Alcidae*. In consequence of the position of the legs, these birds can hardly walk, and when on land they assume a more or less nearly upright attitude. See cuts under *Alca*, *grebe*, and *loon*.

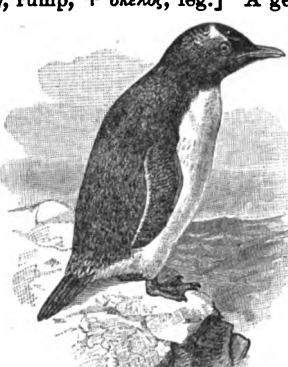

Pygopodidae (pi-gō-pod'i-dē), *n. pl.* [NL., *< Pygopodes + -idae.*] An Australian family of eriglossate lacertilians, typified by the genus *Pygopus*, alone representing the superfamily *Pygopodoidea*, having the frontal bone excluded from the orbit, the prefrontal and postfrontal bones being extended and contiguous. Also *Pygopidae*.

Pygopodoidea (pi'gō-pō-doi'dē-ā), *n. pl.* [NL., *< Pygopodes + -oidea.*] A superfamily of eriglossate lacertilians, represented by the family *Pygopodidae* alone, having concavo-convex ver-

tebrae, the clavicle not dilated and loop-shaped proximally, and no postorbital or postfrontal squamosal arches. T. Gill, Smithsonian Report, 1885.

pygopodous (pi-gop'ō-dus), *a.* [*< pygopod + -ous.*] In *ornith.*, rump-footed; specifically, of or pertaining to the *Pygopodes*, or having the characters of that group of birds: also applied to some birds, as cormorants and penguins, which do not belong to the *Pygopodes*.

Pygopus (pi'gō-pus), *n.* [NL. (Merrem, 1820), *< Gr. πυγή, rump, + ποῖς = E. foot.*] A genus of lizards, typical of the family *Pygopodidae*, having a pair of rudimentary hind limbs. *P. lepidopodus*, the only species, inhabits Australia; it is about 2 feet long. See cut in preceding column.

Pygoscelis (pi-gos'e-lis), *n.* [NL. (Wagler, 1832), *< Gr. πυγή, rump, + σκέλος, leg.*] A genus of penguins, of which the gentoo or so-called Papuan penguin, *P. papua* or *P. tentata*, is the type. It is one of those commonly called *johnny* by sailors. See *gentoo*.

Gentoo (*Pygoscelis tentata*).

pygostyle (pi'gō-stil), *n.* [*< Gr. πυγή, rump, + στυλ, column.*] In *ornith.*, the vomer or plowshare bone of a bird's tail, consisting of a number of caudal vertebrae ankylosed together for the support of the tail-feathers, and possessed by nearly all birds. Since the oldest known birds (of Jurassic age) had no pygostyle, but a long tapering tail like a lizard's with a pair of large feathers to each vertebra (see cut under *Archaeopteryx*), and since all modern birds have a pygostyle, upon which feathers are bunched in several pairs, it follows that, theoretically, a pygostyle includes or represents as many coalesced caudal vertebrae as there are pairs of feathers in the tail—namely, five or six in most birds, up to twelve or more in some. But this view does not rest upon observation. Whatever its morphological character, the pygostyle is always the last bone of the tail, and always conspicuous in size; in shape it is very variable in different birds.

Pygostyle.—Eight caudal vertebrae of an eagle (*Haliaeetus leucocephalus*), of which the last, *p*, is the pygostyle. (Two thirds natural size.)

It follows that, theoretically, a pygostyle includes or represents as many coalesced caudal vertebrae as there are pairs of feathers in the tail—namely, five or six in most birds, up to twelve or more in some. But this view does not rest upon observation. Whatever its morphological character, the pygostyle is always the last bone of the tail, and always conspicuous in size; in shape it is very variable in different birds.

pygostyled (pi'gō-stild), *a.* [*< pygostyle + -ed.*] Furnished with a pygostyle; forming or converted into a pygostyle.

Tail short as to its vertebrae, which are *pygostyled*.
Cous, Key to N. A. Birds, p. 203.

pyic (pi'ik), *a.* [*< Gr. πύον, pus, + -ic.*] Of or belonging to pus; purulent.

pyjamas, *n. pl.* Same as *pajamas*.

pykt, pyket, *n. and v.* Obsolete spellings of *piket*.

pyked, *a.* A Middle English form of *piked*.

pykeyst, *n.* A Middle English form of *pickax*.
Prompt. Parv.

pyknometer, *n.* Same as *pycnometer*.

pyknon, *n.* See *pynon*.

pyla (pi'lā), *n.*; pl. *pylae* (-lē). [NL., *< Gr. πύλη, a gate.*] The orifice by which each paracaudal or optic ventricle of the brain communicates with the aqueduct of Sylvius.

pylagoras (pi-lag'ō-ras), *n.*; pl. *pylagorai* (-ri). [*< Gr. Πυλάγωρας* (see def.), *< Πύλαι, the Pass of Thermopylae* (pl. of *πύλη, gate, pass*), + *ἀγορεύω, collect, gather: see agora.*] In ancient Greece, an elected delegate or representative of a constituent state in the Amphictyonic Council. The pylagorai were secondary to the delegates entitled *hieromnemes* (see *hieromnemon*), and had their name from the older place of assembly of the Pythian Amphictyony, at Pylai (Thermopylae).

pylagore (pi'la-gōr), *n.* [*< Gr. Πυλάγωρας: see pylagoras.*] Same as *pylagoras*.

pylangial (pi-lan'ji-al), *a.* [*< pylangi-um + -al.*] Pertaining to the pylangium.

pylangium (pi-lan'ji-um), *n.*; pl. *pylangia* (-ā). [NL., *< Gr. πύλη, a gate, + ἄγγειον, a vessel.*] The first section of the arterial trunk (truncus

arteriosus) of the lower vertebrates. See *truncus*.

pylar (pi'lār), *a.* [*< pyle^s + -ar^s.*] Of or pertaining to a pyle; specifically, pertaining to the pyle of the brain.

pylchet, *n.* A Middle English form of *pilch¹*.

pyle¹, *n.* A Middle English form of *pile¹*, etc.

pyle² (pil), *n.* [Perhaps a use of *pyle¹ = pile¹*.] A single grain of chaff. Burns, To the Unco Guid. [Scotch.]

pyle³ (pil), *n.* [*< Gr. πύλη, a gate.*] A pore or other orifice or opening of small size, as a micropyle. Coues.

pylemphraxis (pi-lem-frak'sis), *n.* [NL., *< Gr. πύλη, a gate, + ἐμφράξις, a stopping: see emphraxis.*] Obstruction of the portal vein.

pylephlebitis (pi-lef-lē-bi'tis), *n.* [NL., *< Gr. πύλη, a gate, + φλέβη (phlēβ-), a vein, + -itis.* Cf. *phlebitis*.] Inflammation of the portal vein and its branches.

pylethrombosis (pi-leth-rom-bō'sis), *n.* [NL., *< Gr. πύλη, a gate, + NL. thrombosis, q. v.*] Thrombosis of the portal vein.

pylgrim, *n.* A Middle English form of *pilgrim*.

pylon (pi'lon), *n.* [*< Gr. πύλων, a gateway, < πύλη, a gate, a gateway.*] In *arch.*, a monumental gateway to an Egyptian temple, or other important building. The pylon was sometimes a single structure, in outline resembling a truncated pyra-

Pylon.—Temple of Edfu, Egypt.

mid, through which the passage for the gate was pierced, but was more typically a combination of two such truncated pyramidal structures, connected by a lower architectural member, in which was the gate proper. They were usually covered with elaborate decoration in sculpture, together with hieroglyphic inscriptions. Often used synonymously with *propylon*. (Compare *propylon*.) Various forms of the pylon are used as hieroglyphic symbols. That shown in the cut stands for *On*, the Greek Heliopolis.

pylorectomy (pi-lō-rek'tō-mi), *n.* [*< NL. pylorus + Gr. εκτομή, a cutting out.*] Excision of the pylorus, as for cancer.

pyloric (pi-lor'ik), *a. and n.* [*< NL. pylorus + -ic.*] I. *a.* In *anat.*, of or pertaining to the pylorus: opposed to *cardiac*: as, *pyloric valve*; *pyloric orifice*; *pyloric* compartment of the stomach. See cuts under *Dibranchiata*, *ink-bag*, and *intestine*.

In the darter, which has a *pyloric* division or compartment of the gizzard, this is nearly filled with a mass of matted hairs, a peculiar modification of the epithelial lining, serving to guard the *pyloric* orifice.

Coues, Key to N. A. Birds, p. 213.

Pyloric artery, a branch of the hepatic artery, distributed to the pyloric extremity and lesser curvature of the stomach. The name is sometimes restricted to the small branch given off to the pylorus only.—**Pyloric caeca.** (a) In *ichth.*, more or less numerous caecal diverticula which are generally found about the beginning of the small intestine of fishes. (b) In *entom.*, the caecal diverticula with which the chylic ventricle of an insect may be provided. See cut under *Blattidae*.—**Pyloric glands.** See *gland*.—**Pyloric orifice.** Same as *pylorus*, 1 (a).—**Pyloric ossicle**, a transverse, partly calcified plate situated in the roof of the pyloric part of the stomach of some crustaceans, as crawfish, and connected with the pterocardiac by the zygocardiac ossicle.—**Pyloric plexus.** See *plexus*.—**Pyloric sacs**, in echinoderms, dilations of the alimentary canal, as of a starfish, on the aboral side of the cardiac sacs, separated by a constriction from the latter, and provided with tubular processes along the aboral aspect of a ray or arm.—**Pyloric tube**, a narrowed or tubular part of the stomach of a fish.—**Pyloric vein**, a small vein accompanying the pyloric artery and emptying into the portal vein.

II. *n. pl.* The pyloric caeca of a fish.

When ascending into fresh water with their ova nearly ready for extrusion, their *pylorics* are loaded with fat.

The Field (London), Dec. 28, 1885.

Pyloridea (pi-lō-rid'ē-ā), *n. pl.* [NL., *< Gr. πύλωρος, also πύλωρος, a gate-keeper* (see *pylorus*), + *-idea*.] In De Blainville's classification, the tenth family of bivalve mollusks, characterized by gaping shells with deep pallial emargination. It contains a number of genera now dissociated in several different families, especially *Mydas*, *Solenidae*, *Saxicavidae*, and *Gastrochaenidae*.

Pygopus lepidopodus. *a.*, rudiment of hind leg.

pyloridean (pi-lō-rīd'ē-an), *a.* and *n.* [*<* NL. *Pyloridea* + *-an*.] *I. a.* Gaping, as a bivalve mollusk; of or pertaining to the *Pyloridea*.

II. n. A member of the *Pyloridea*.

pyloristhenosis (pi-lō-ris-tē-nō'sis), *n.* [NL., *<* Gr. *πυλῶρ*, pylorus, + *στένωσις*, a narrowing, straitening, *<* στενύνω, narrow, straiten, στενός, narrow, strait.] Morbid contraction of the pylorus.

pylorochesis (pi-lō-rō-kē'sis), *n.* [NL., *<* Gr. *πυλῶρ*, pylorus, + *ἔχειν*, a carrying, driving (taken in sense of 'holding'), *<* ἔχειν, bear, carry, drive, *<* ἔχειν, hold, have.] Obstruction of the pylorus.

pylorus (pi-lō-rus), *n.*; pl. *pylori* (-ri). [NL., *<* LL. *pylorus*, *<* Gr. *πυλῶρ*, also *πυλωρός*, a gatekeeper, also the lower orifice of the stomach, *<* πύλη, a gate, a pass, + *ῥα*, Ionic *ῥα*, care, heed, or *ῥος*, a watcher or warder, *<* ῥάων, see.] *1.* In the early church, a doorkeeper; an ostiary (which see).—*2.* In *anat.*: (a) The orifice of communication between the stomach and the intestine, by which the contents of the stomach pass into the intestine. It is usually situated on the right-hand side, opposite the cardiac or esophageal orifice, but may closely approximate or be adjoined to the latter. See cut under *stomach*. (b) The fold of mucous membrane, containing muscular fibers, which guards the pyloric orifice, or other contrivance for retarding or opposing the passage of food from the stomach into the intestine. (c) The pyloric end or division of the stomach.—*3.* In *Hydrozoa*, a valvular structure which separates the gastric from the somatic cavity in the siphonophorous hydrozoans.—*Antrum pylori*. See *antrum*.—*Sphincter pylori*, a bundle of unstriped muscular fibers encircling the pyloric end of the stomach.

pymma (pim'ā), *n.* Same as *bloodwood*, 4.

pymper, *v. t.* An obsolete variant (or misprint) of *pamper*.

Good mistress Statham, . . . seeing what case I was in, hath fetched me home to her own house, and doth *pymper* me up with all diligence, for I fear a consumption. *Latimer, Sermons and Remains* (Parker Soc.), p. 386. [(Davies.)]

pynaclet, *n.* A Middle English form of *pinnacle*.

pyncht, *v.* An obsolete spelling of *pinch*.

pyndt, *pyndert*. Middle English forms of *pind*, *pinder*.

pynet, *n.* and *v.* A Middle English spelling of *pine*.

pyynet, *n.* and *v.* A Middle English form of *pin*.

pyoblennorrhœa (pi-ō-blen-ō-rē'sis), *n.* [NL., *<* Gr. *πύον*, pus, + *βλένω*, mucus, + *ῥοία*, a flow, *<* ῥέω, flow. Cf. *blennorrhœa*.] Mucopurulent discharge.

pyochezia (pi-ō-kē-zī'sis), *n.* [NL., *<* Gr. *πύον*, pus, + *ῥέζω*, ease oneself.] The condition in which pus is discharged by the intestine.

pyocœlia (pi-ō-sē-li'sis), *n.* [NL., *<* Gr. *πύον*, pus, + *κοιλία*, a cavity: see *cœlia*.] The presence of pus in the abdominal cavity.

pyocolpos (pi-ō-kol'pos), *n.* [NL., *<* Gr. *πύον*, pus, + *κόλπος*, womb.] The presence of pus in the vagina.

pyocystis (pi-ō-sis'tis), *n.* [NL., *<* Gr. *πύον*, pus, + *κύστις*, bladder: see *cystis*.] An encysted collection of pus.

pyogenesis (pi-ō-jen'e-sis), *n.* [NL., *<* Gr. *πύον*, pus, + *γένεσις*, origin, source: see *genesis*.] The generation of pus; the theory or process of the formation of pus. Also *pyogenia*.

pyogenetic (pi-ō-jē-net'ik), *a.* [*<* *pyogenesis*, after *genetic*.] Pertaining to pyogenesis; pyogenic.

pyogenia (pi-ō-jē-nī'sis), *n.* [NL., *<* Gr. *πύον*, pus, + *γένεσις*, producing.] Same as *pyogenesis*.

pyogenic (pi-ō-jen'ik), *a.* [*<* Gr. *πύον*, pus, + *γενής*, producing, + *-ic*.] Having relation to the formation of pus; producing or generating pus.—*Pyogenic fever*, *pyemia*.

pyohemothorax (pi-ō-hē-mō-thō'raks), *n.* [NL., irreg. *<* Gr. *πύον*, pus, + *αἷμα*, blood, + *θώραξ*, thorax.] The presence of pus and blood in the pleural cavity.

pyoid (pi'oid), *a.* [*<* Gr. *πυοειδής*, like pus, *<* πύον, pus, + *εἶδος*, form.] Having the nature of or resembling pus; purulent.

pyolymph (pi-ō-limf), *n.* [*<* Gr. *πύον*, pus, + NL. *lymph*, lymph: see *lymph*.] Lymph somewhat turbid with pus-corpules.

pyometra (pi-ō-mō-trā), *n.* [NL., *<* Gr. *πύον*, pus, + *μήτρα*, uterus.] The presence of pus in the uterus.

pyonephritis (pi-ō-nēf-rī'tis), *n.* [NL., *<* Gr. *πύον*, pus, + NL. *nephritis*, *q. v.*] Suppurative inflammation of the kidney.

pyonephrosis (pi-ō-nēf-rō'sis), *n.* [NL., *<* Gr. *πύον*, pus, + *νεφρός*, kidney, + *-osis*.] The presence of pus in the kidney and its pelvis.

pyonephrotic (pi-ō-nēf-rō'tik), *a.* [*<* *pyonephrosis* + *-ot-* + *-ic*.] Pertaining to pyonephrosis.

pyoningt, *n.* See *pyoning*.

pyonyt, *n.* An obsolete form of *piony*, *peony*.

pyopericardium (pi-ō-per-i-kār'di-um), *n.* [NL., *<* Gr. *πύον*, pus, + NL. *pericardium*: see *pericardium*.] The presence of pus in the pericardial sac.

pyoperitonitis (pi-ō-per-i-tō-nī'tis), *n.* [NL., *<* Gr. *πύον*, pus, + NL. *peritonitis*, *q. v.*] Suppurative peritonitis.

pyophthalmia (pi-ō-thal'mi-ā), *n.* [NL., *<* Gr. *πύον*, pus, + *ὀφθαλμία*, a disease of the eyes: see *ophthalmia*.] Production of pus in the eye.

pyopneumothorax (pi-ō-nū-mō-thō'raks), *n.* [NL., *<* Gr. *πύον*, pus, + *πνεῦμα*, lung, + *θώραξ*, thorax.] Same as *pneumopyothorax*.

pyopoësis (pi-ō-pō-ē'sis), *n.* Same as *pyopoesis*.

pyopoesis (pi-ō-poi-ē'sis), *n.* [NL., *<* Gr. *πύον*, pus, + *ποίησις*, production, *<* ποιεῖν, make.] Suppuration; production of pus; pyosis. Also *pyopoesis*.

pyoptysis (pi-ō-pti-sis), *n.* [NL., *<* Gr. *πύον*, pus, + *πτύσις*, a spitting, *<* πτύειν, spit.] Expectoration of pus.

pyorrhœa, **pyorrhœa** (pi-ō-rē'sis), *n.* [NL. *pyorrhœa*, *<* Gr. *πύον*, pus, + *ῥοία*, a flow, *<* ῥέω, flow.] Purulent discharge.—*Pyorrhœa alveolaris*, an alveolar abscess.

pyosalpingitis (pi-ō-sal-pin-jī'tis), *n.* [NL., *<* Gr. *πύον*, pus, + *σάλπιγξ* (*σάλπιγγ-*), a tube, + *-itis*.] Purulent inflammation of a Fallopian tube.

pyosalpinx (pi-ō-sal'pinks), *n.* [NL., *<* Gr. *πύον*, pus, + *σάλπιγξ*, a tube.] The presence of pus in a Fallopian tube.

The difficulty of accurate diagnosis between a *pyosalpinx* and a *hydrosalpinx* . . . must here be taken into account. *Lancet*, No. 3477, p. 837.

pyosapremia (pi-ō-sap-rē-mī'sis), *n.* [NL., *<* Gr. *πύον*, pus, + *σαπρός*, rotten, + *αἷμα*, blood.] The infection of the blood with a purulent exudate, as pus.

pyoscope (pi-ō-skōp), *n.* [*<* Gr. *πύον*, pus, + *σκοπεῖν*, view.] An instrument for the determination of the amount of fat in milk.

pyosis (pi-ō'sis), *n.* [*<* Gr. *πύωσις*, suppuration, *<* πύω, cause to suppurate, *<* πύον, pus: see *pus*.] The progress or formation of pus.

pyoti, *n.* See *pyet*.

pyothorax (pi-ō-thō'raks), *n.* [NL., *<* Gr. *πύον*, pus, + *θώραξ*, thorax.] The presence of pus in a pleural cavity; empyema.

He had seen the rapid formation of an abscess follow an exploratory puncture in a case of tuberculous *pyothorax*. *Lancet*, No. 3479, p. 989.

pyracanth (pir'a-kanth), *n.* [*<* Gr. *πυράκανθα*, a variety of thorn, *<* πύρ, fire, + *ἀκανθος*, a prickly tree, a thorn.] A thorn, *Crataegus Pyracantha*, found in the south of Europe.

pyracid (pi-ras'id), *n.* Same as *pyro-acid*.

pyral (pi'ral), *a.* [*<* *pyre* + *-al*.] Of or pertaining to a pyre.

Whether unto eight or ten bodies of men to adde one of a woman, as being more inflammable, and unctuously constituted for the better *pyral* combustion, were any rational practise. *Sir T. Browne, Urn-burial*, iv.

pyralid (pir'a-lid), *a.* and *n.* *I. a.* Resembling a moth of the family *Pyralidæ*; belonging to this family; pyralideous.

II. n. A pyralid moth; any member of the *Pyralidæ* or *Pyralidina*.

Also *pyralidine*.

Pyralidæ (pi-ral'i-dē), *n. pl.* [NL. (Leach, 1819), *<* *Pyralis* + *-idæ*.] A heterogeneous family of moths, of uncertain limits and characters. They are generally of medium size or small, with slender bodies and long legs, and with both maxillary and labial palpi. The family has in fact for many years been a resting-place for genera which do not find place in the other, better defined, families. Also *Pyralidina*, and preferably *Pyralididæ*. See cut under *bee-moth*.

pyralideous (pi-ral'id-ē-us), *a.* [*<* *pyralid* + *-ous*.] Pyralid; of or pertaining to the *Pyralidina*: as, "the pyralideous group," *Stainton*.

pyralidiform (pi-ral'id'i-fōrm), *a.* [*<* NL. *Pyralis* + *-id-* + L. *forma*, form.] Having the form or structure of a pyralid moth; pyralidine or pyralideous; belonging to the *Pyralidiformia*.

Pyralidiformia (pi-ral'id-i-fōr'mi-ā), *n. pl.* [NL.: see *pyralidiform*.] A group of pyralidiform or pyralideous moths. *Schrank*, 1802.

Pyralidina (pi-ral'i-dī-nā), *n. pl.* [NL., *<* *Pyralis* + *-id-* + *-ina*.] Same as *Pyralidæ*.

pyralidine (pi-ral'i-din), *a.* and *n.* Same as *pyralid*.

Pyralis (pir'a-lis), *n.* [NL. (Schrank, 1801), *<* L. *pyralis*, *<* Gr. *πυράλις*, *πυραλίς*, a winged insect supposed to live on fire, *<* πύρ, fire: see *pyre*.] A genus of moths, typical of the family *Pyralidæ*, having a conspicuous proboscis and ascending palpi. About a dozen species are known, mainly European. *P. farinalis* is a cosmopolitan flour-pest.

pyralolite (pi-ral'ō-lit), *n.* [So called as taking another color; *<* Gr. *πύρ*, fire, + *λίθος*, other, + *λίθος*, stone.] A white or greenish altered variety of pyroxene, found in Finland.

Pyrameis (pir-a-mē'sis), *n.* [NL. (Huebner, 1816).] A large and wide-spread genus of butterflies of the family *Nymphalidæ*. It occurs in most parts of the world, and is represented in the United States by four species, of which *P. cardui* is a cosmopolitan form and is well known in England as the *painted-lady* (which see with cut), and in the United States as the *thistle-butterfly*, from the fact that its larva feeds on thistles.

pyramid (pir'a-mid), *n.* [Formerly also, as L., *pyramis*, pl. *pyramides*; = F. *pyramide*, formerly *pyramide* = Sp. *pirámide* = Pg. *piramide*, *pyramide* = It. *piramide* = D. *piramide* = G. *pyramide* = Sw. *pyramid* = Dan. *pyramide*, *<* L. *pyramis* + *-mid-*, *<* Gr. *πυραμῖς* + *-mid-*, a pyramid, perhaps *<* Egypt. *pir-em-us*, the slanting edge of a pyramid. Some have imagined a connection with Gr. *πύρ*, fire, as if named from the resemblance to a tapering flame.] *1.* A massive structure of polygonal, usually square plan, the sides of which slope, each usually in one plane, to a common apex. Pyramids have been erected in different parts of the world, especially in Egypt, where there are numerous groups in different styles of execution and states of preservation. By far the most interesting of these groups is that of Ghizeh, near Cairo, where there are three pyramids of large size, and several smaller ones. All the Egyptian pyramids were built for tombs, and certainly in most cases, if not in all, for royal personages. They are remarkable not only for the great size of many of them, but for the manner in which they were hermetically sealed, there being no external opening of any kind, nor any indication of the place in which the mummy had been deposited; on the contrary, some of them exhibit very ingenious arrangements intended to lead astray those search-

ing for the sepulchral chamber. Everything was planned in their construction to insure permanence, concealment, and security from violation. Of the three great pyramids at Ghizeh, the largest and by far the most important and interesting is the so-called Great Pyramid, in regard to which a very extensive literature exists, and which has frequently been measured and elaborately described. It is the largest work of man's hands in the world, having been originally 481 feet in height, and each of the sides of its very nearly square base measuring on the average nearly 756 feet (9063.3 in., Petrie). It is the only one remaining of the "seven wonders of the world." Its interior structure is more elaborate than that of any of the other pyramids, and some of the features which it displays are peculiar, and remarkable as showing the desire of the builders that at least one geometrical fact of fundamental importance should be incorporated into the structure. Thus the height of the Great Pyramid bears, with remarkable precision, the same relation to the total length of the four sides of its base that the radius of a circle has to its circumference, and other indications of the π ratio exist in its interior. This and other interesting peculiarities of this pyramid have led various persons, some of whom have been eminent in science, to adopt the view that it was a divinely inspired building, and that the so-called "coffer" contained within the principal sepulchral chamber was intended to serve as a standard of weights and measures and a record of various fundamental facts in geophysics, and not for a sarcophagus. Of the manner in which the huge stones of which this pyramid is built were raised to their present position but little is definitely known, but it is inferred that the work was done without the aid of complicated machinery; that they were shaped—to a very considerable extent at least—by the use of saws of bronze, the teeth of which were gems or hard stones, has been clearly shown by the most recent investigations. The date of the Great Pyramid, which is believed to have been built by or for King Shufu (Cheops) of the fourth dynasty, is variously fixed by Egyptologists at from 2450 to 4250 B.C. The latter is the date assigned by Mariette.

2. In *geom.*, a solid contained by a plane polygon as base and other planes meeting in a point. This point is called the *vertex* of the pyramid; and the planes which meet in the vertex are called the

sides, which are necessarily all triangles, having for their bases the sides of the base of the pyramid. Any pyramid is in volume one third of a prism that has the same base and altitude. Pyramids are denominated from the figures of their bases, being triangular, square, pentagonal, etc., according as the base is a triangle, a square, a pentagon, etc.
